INTRODUCTION

This user guide is created to provide a valuable service to our valued clients. Being a customized and easy-to-navigate user guide, we are giving our clients the chance to exercise their independence in improving their information management and implementing the preferences that are appropriate to their business requirements.

This document contains all the essential information for the user to fully utilize the features and functions of the OSTR Modules, including descriptions, capabilities, and a set of instructions associated with each module.

Users/Roles

REQUESTOR:

A requestor is a user who initiates a transaction to request items they no longer possess. This action is taken to obtain the specific items required by the department. Upon submission of the request, it enters the workflow system for approval by the approver.

Note: To access and perform this specific role, please ensure you log in using the Requestor's credentials.

APPROVER:

An approver is a user responsible for managing the workflow system. Their role involves approving requests submitted by the requestor. Once approved, the requests are then forwarded to the receiver for further processing.

Note: To access and perform this specific role, please ensure you log in using the Approver's credentials.

RECEIVER:

The receiver is tasked with changing the status of approved requests to "received" by utilizing the download arrow icon. Subsequently, the receiver can issue items by clicking the issue-pencil icon. Upon tagging a request as an item issued, the status transitions to either "partially served" or "completed." The status is marked as completed when the request is recorded with a batch number.

Note: To access and perform this specific role, please ensure you log in using the MCD Receiver's credentials.

MCD RECORDS

A user responsible for managing records is tasked with creating batch numbers for all completed or partially served transactions. It's noteworthy that the batch number is utilized by another system within the company, although this falls outside the scope of OSTRD.

Note: To access and perform this specific role, please ensure you log in using the MCD Record's credentials.

Sign-in Page

- It is the point of entry to the OSTR Admin Portal. A user must provide the correct credentials to access the Admin Portal.

SIGN-IN

1. Go to the web address of the OSTR Admin Portal.
2. Enter the following information:
   - **Email**
   - **Password**
3. Click on the **Login** button to complete the process.

Admin Sign-in Page

VIEW MODE

Switching View Modes

- It is the function that allows you to switch the current view mode of the admin panel.

1. Click on the **Theme Mode** button to switch between light mode and dark mode.

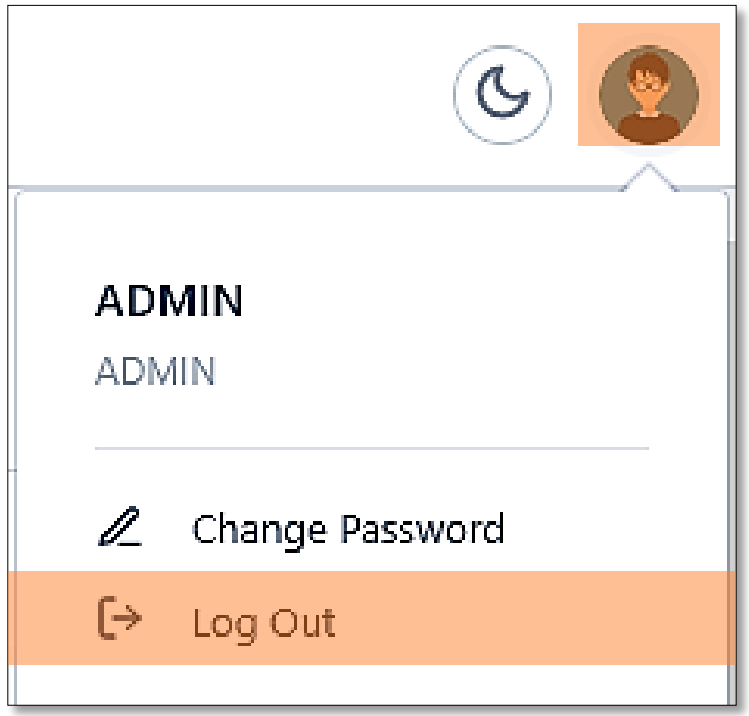

LOG-OUT

Log Out

- It is the function that allows you to log out of the admin panel.

1. Select your profile image on the top right of the screen.
2. Click on the **Log Out** button to log out.

Chapter 2

DASHBOARD

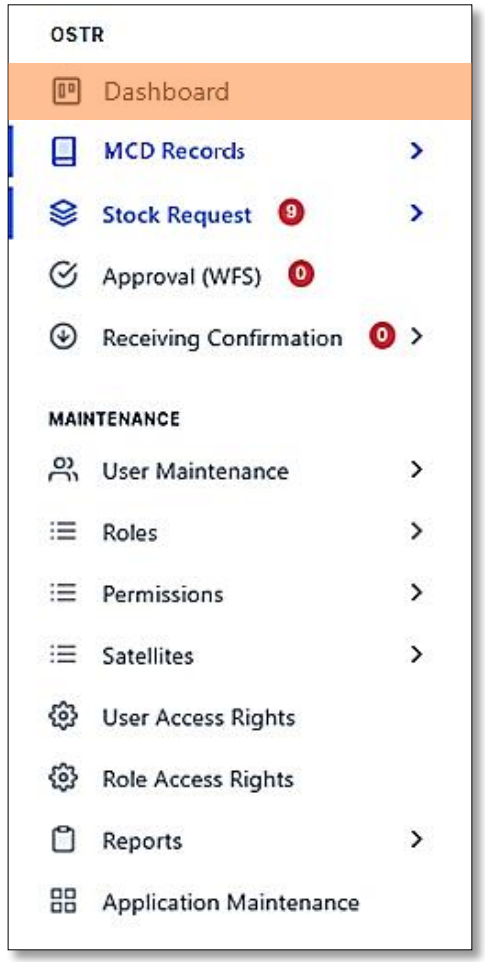

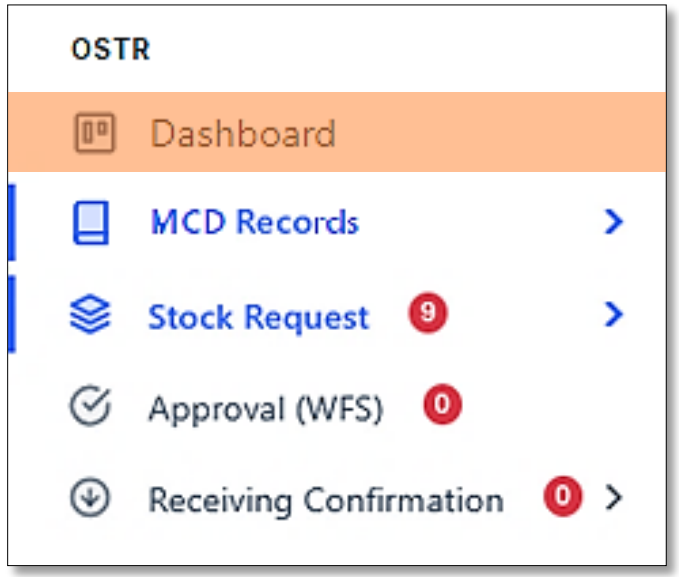

Table of Contents

DASHBOARD

Dashboard

- An OSTR Standard Module that displays information about the current status of the website and its activities.
- The information displayed in the dashboard depends on the role of the user.
  NOTE: Only Admin Role can view all data in the admin portal.
- The Dashboard consists of three (3) sections namely: Pending Request, In-Progress Request, and Completed Request.

Sections	Functions
Pending Request	It displays a summary of all requests that are currently pending reviewal and approval.
In-Progress Request	It displays a summary of all requests that were approved and is currently being released.
Completed Request	It displays a summary of all completed stock request.

STOCK REQUEST

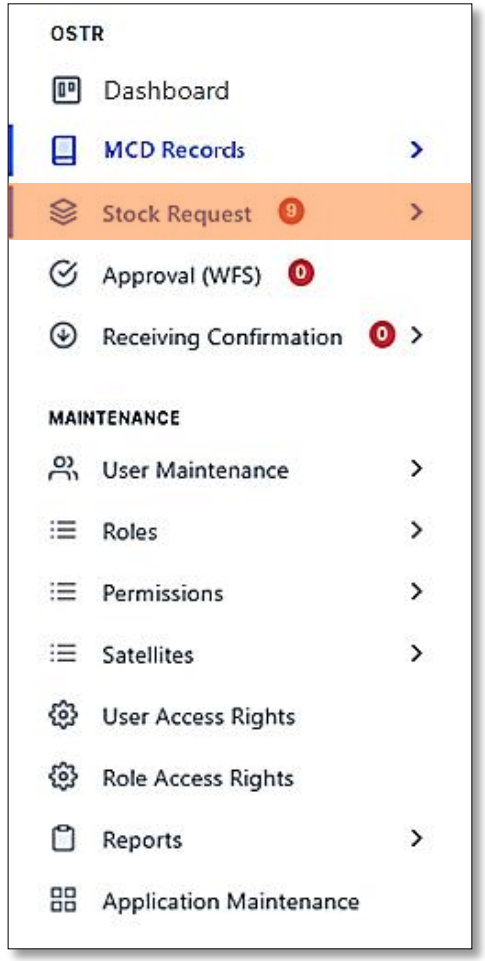

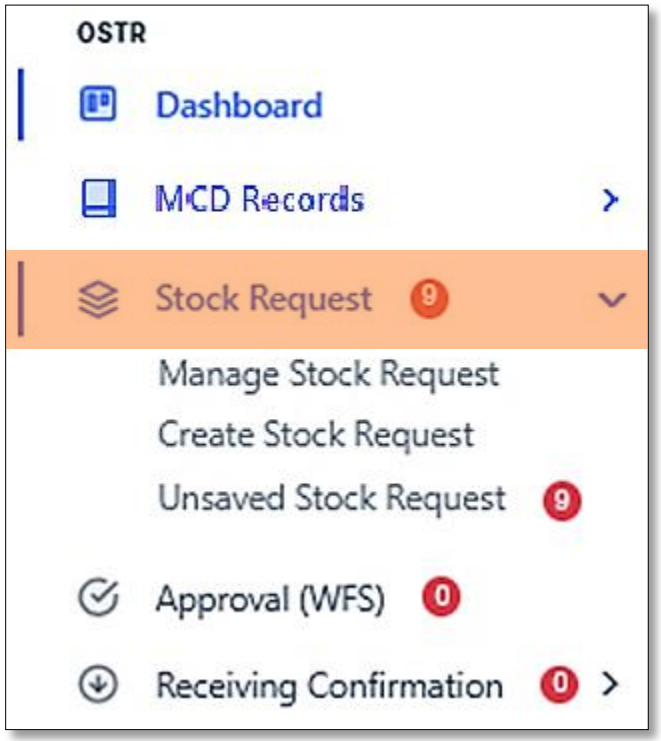

Table of Contents

STOCK REQUEST

Stock Request

An OSTR module that displays information about the stock requests of all department, their status, and activities.

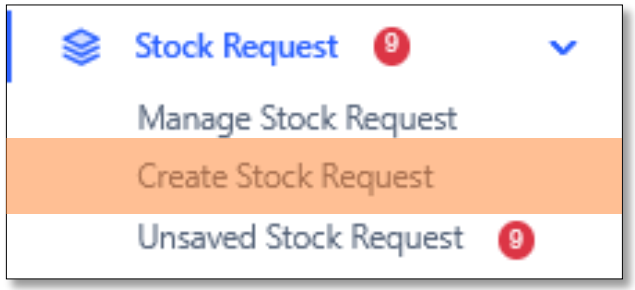

You may also do the following:

- Create, view, export, and print stock requests.
- Create, view, export, and print unsaved stock requests.
- Add, edit, and delete items in stock requests.

Note: Once the request is approved, the department requester will not be able to update the request details.

STOCK REQUEST

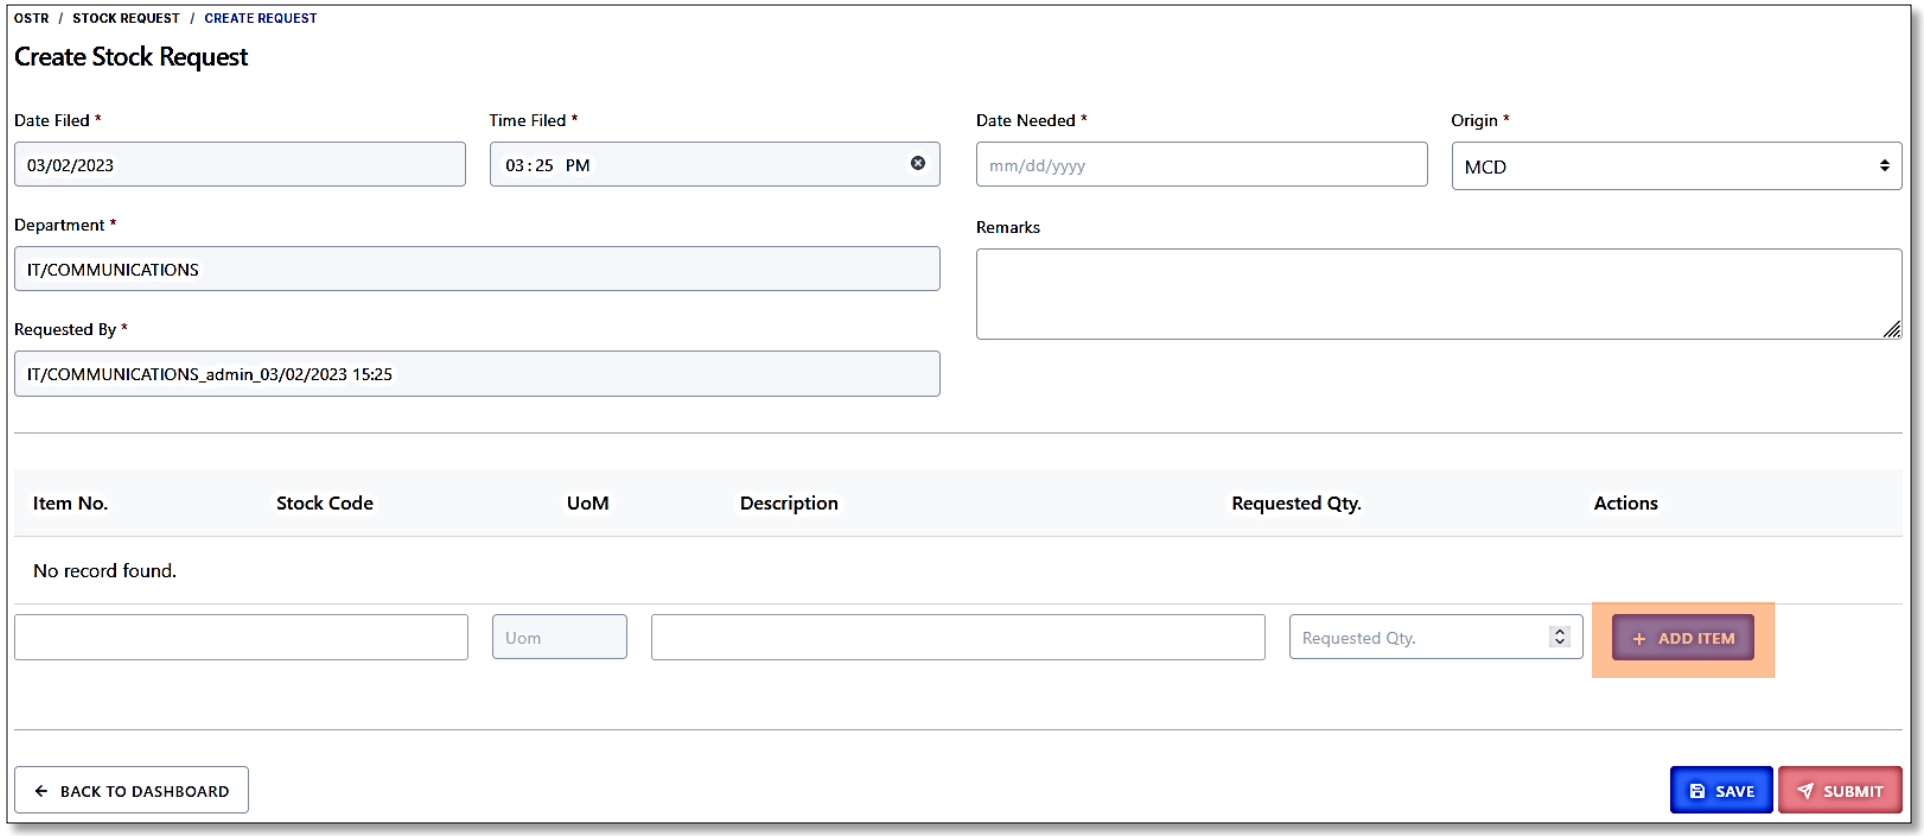

Create a Request

1. Go to **Stock Request** and select the **Create Stock Request** option.
2. Enter all the necessary information.
3. Add item(s) and enter all the necessary information.
4. Choose the **+ Add Item** button to add the item.

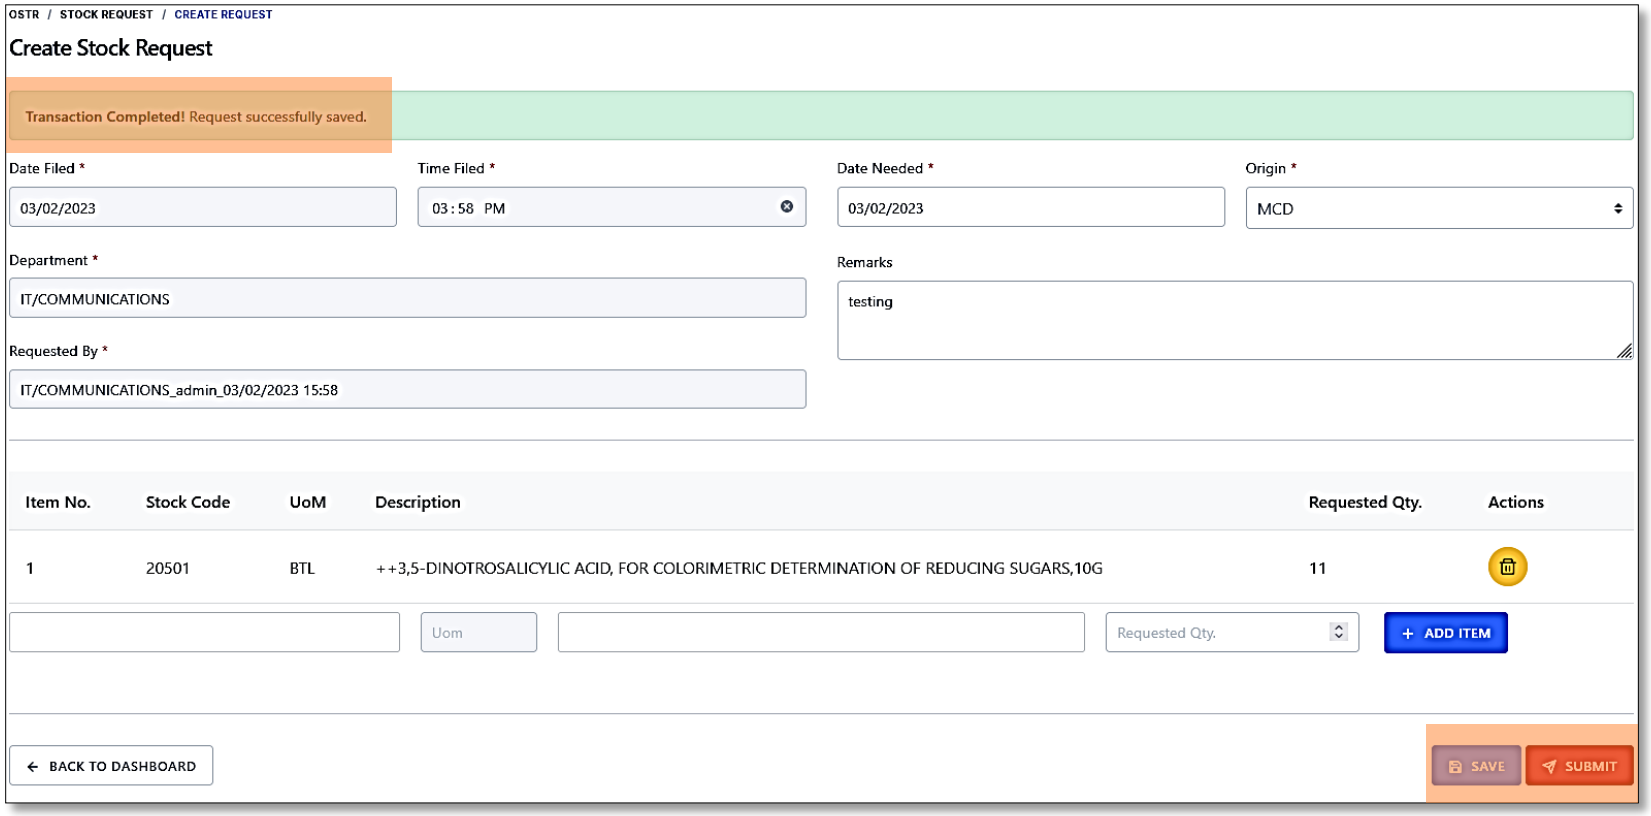

Date Filed	It is the date upon which the request is filed.
Time Filed	It is the time upon which the request is filed.
Department	It is the department to which the request is addressed.
Requested by	It is the department that created the request.
Date Needed	It is the date that the request is needed.
Origin	It is where the materials come from.
Remarks	It is the remarks stated by the creator of the request.
Item No.	It is the quantity of the item.
Stock Code	It is the stock code ID of the item.
UoM	It is the unit of measurement of the item.
Description	It is the description of the item.
Requested Qty.	It is the requested quantity of the item.

STOCK REQUEST

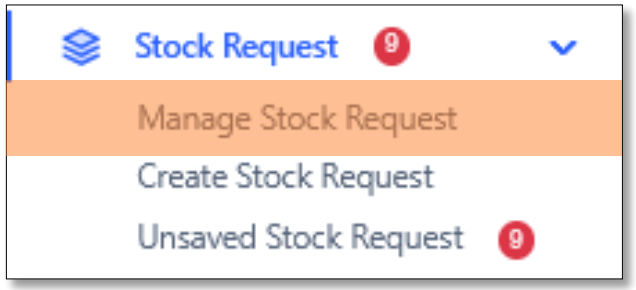

STOCK REQUEST

5. Select the **Save** button to save the newly created stock request. A notification will appear on the screen if the creation of the request is successful.
6. Click on the **Submit** button to finally submit the created request.

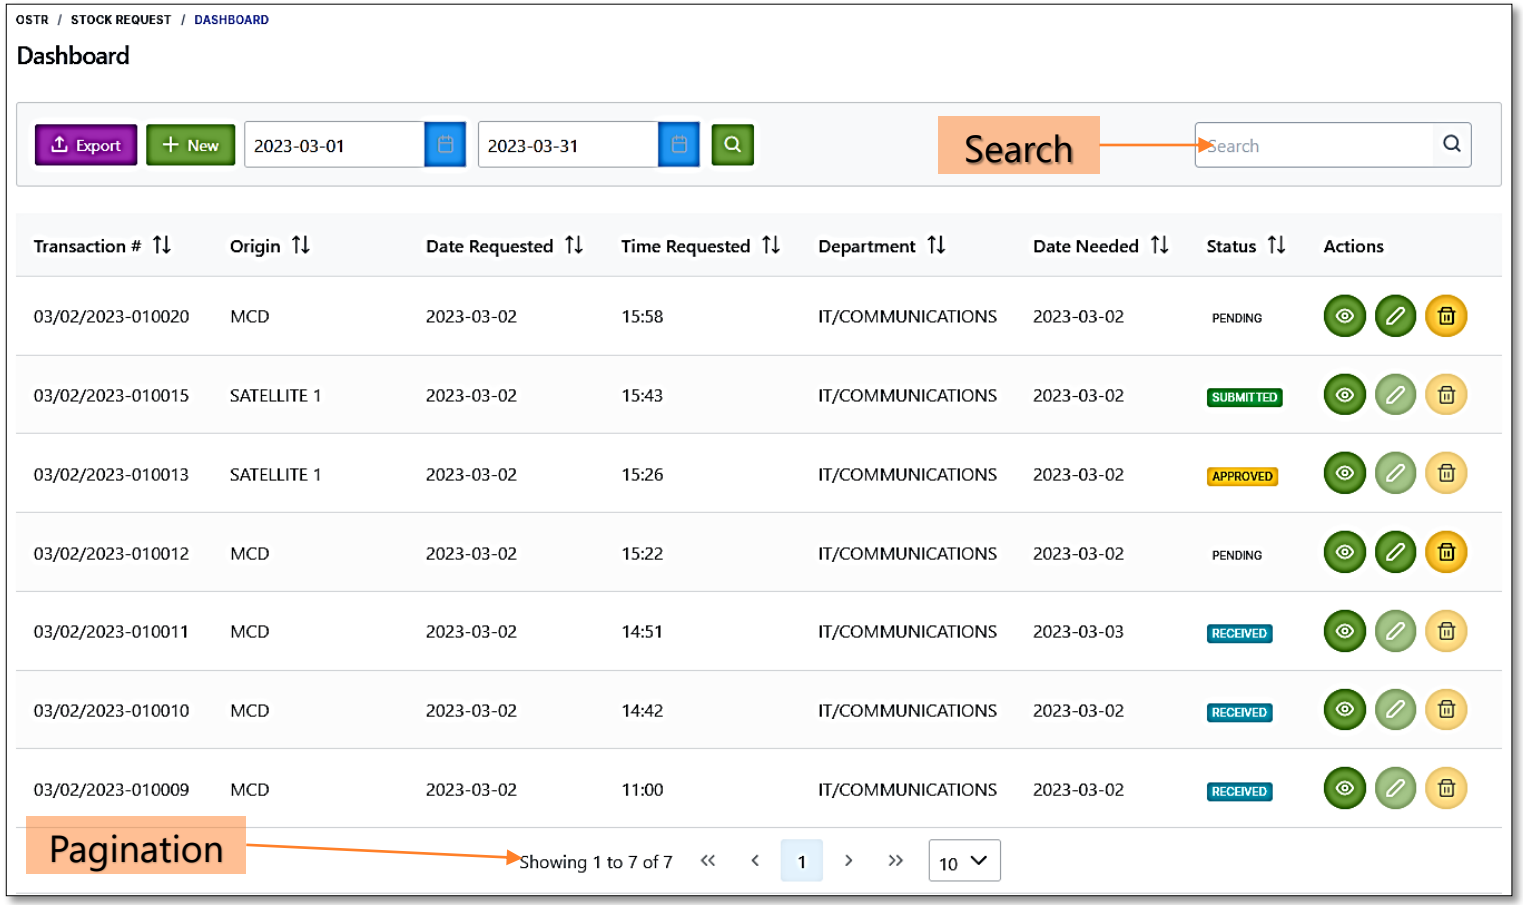

STOCK REQUEST

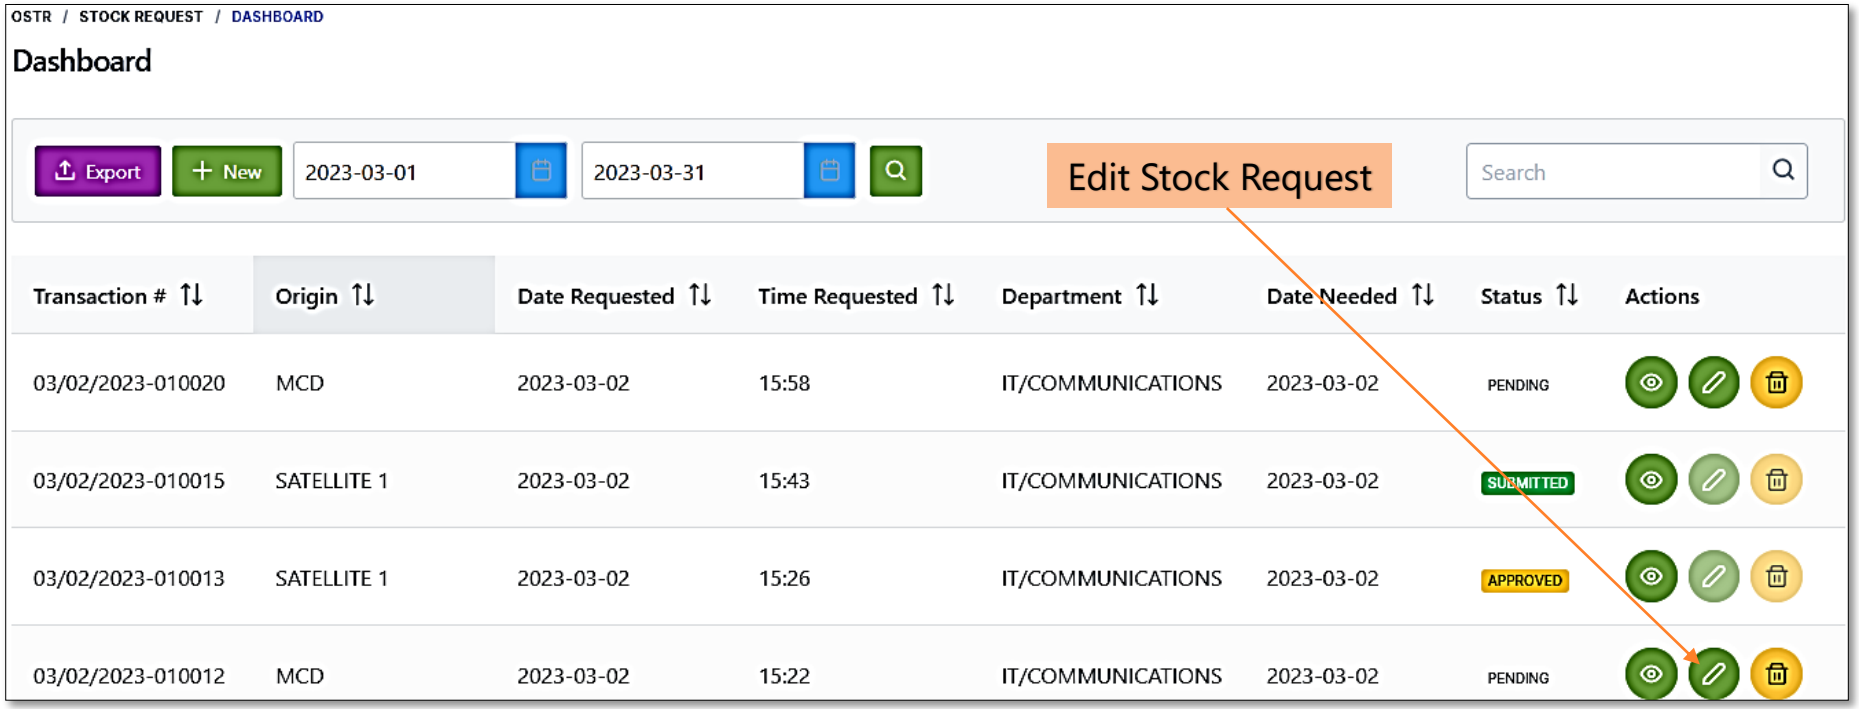

Edit a Stock Request

1. Go to **Stock Request** and select the **Manage Stock Request** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock request you want to edit.

STOCK REQUEST

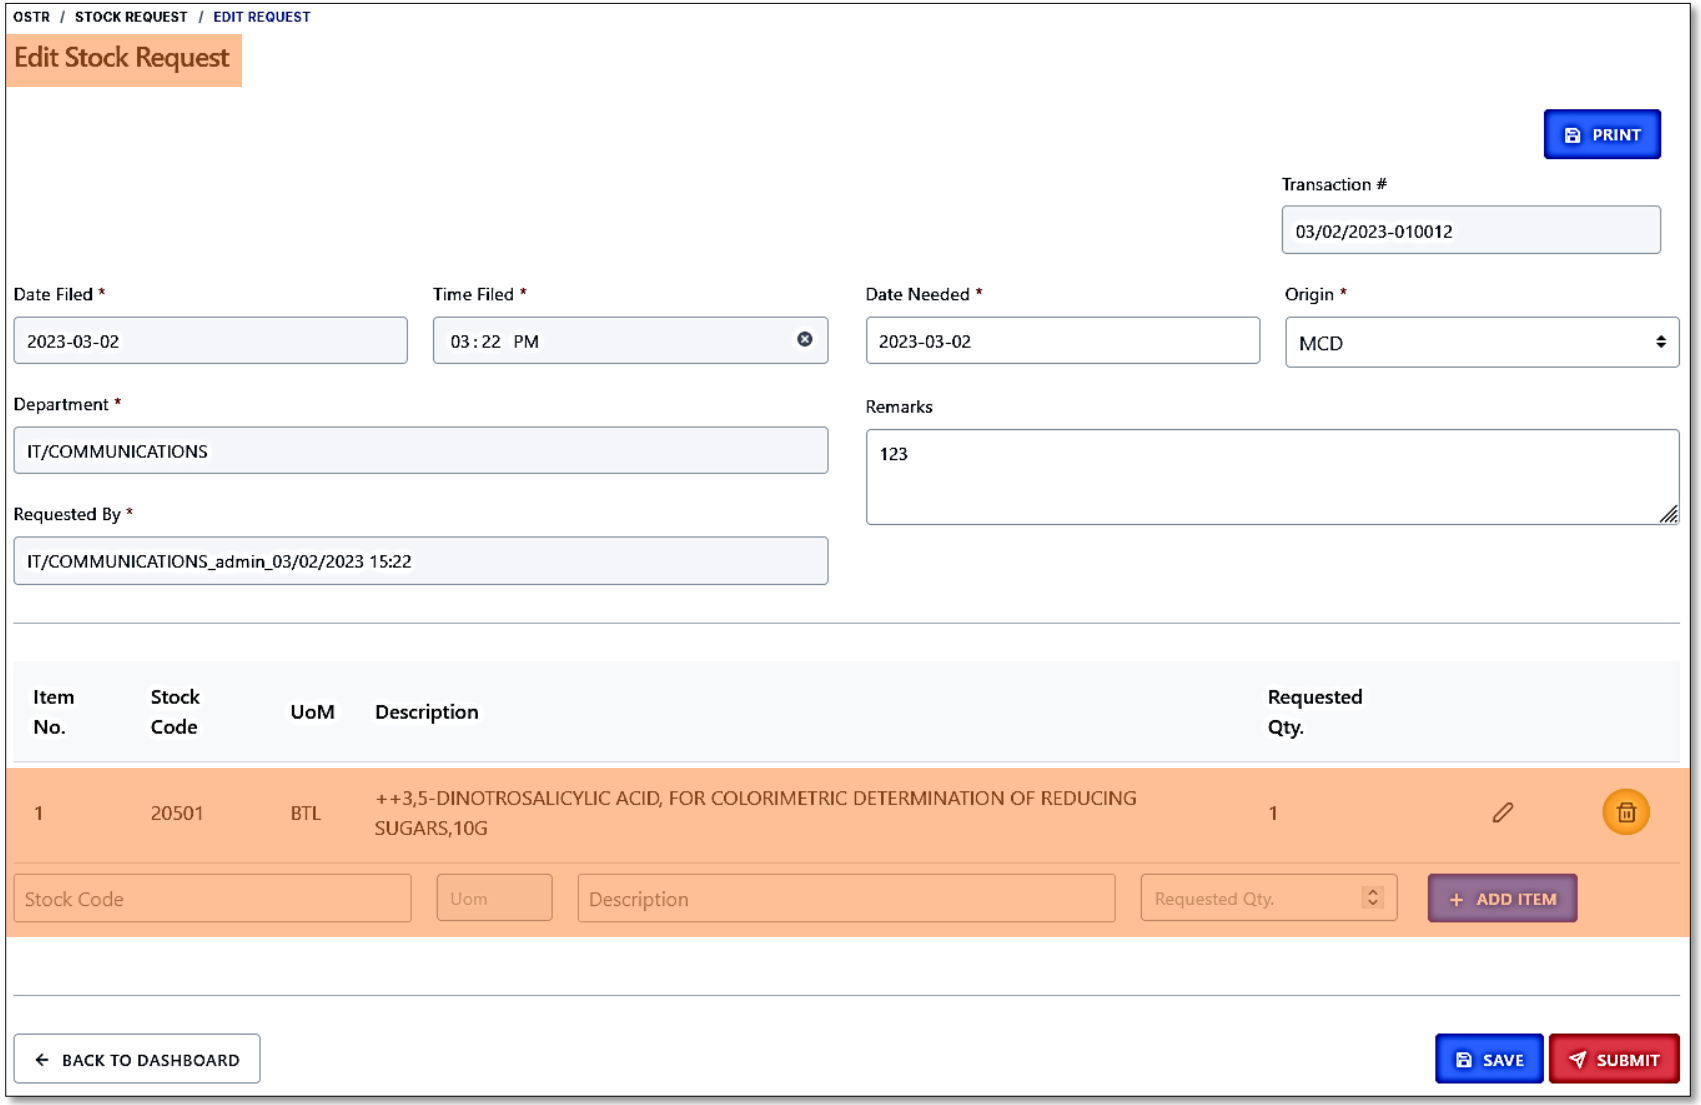

3. Select the **Edit Stock Request** icon and change the information accordingly once the **Edit Stock Request** screen appears.

Note: You can only edit requests with the *Pending* status.

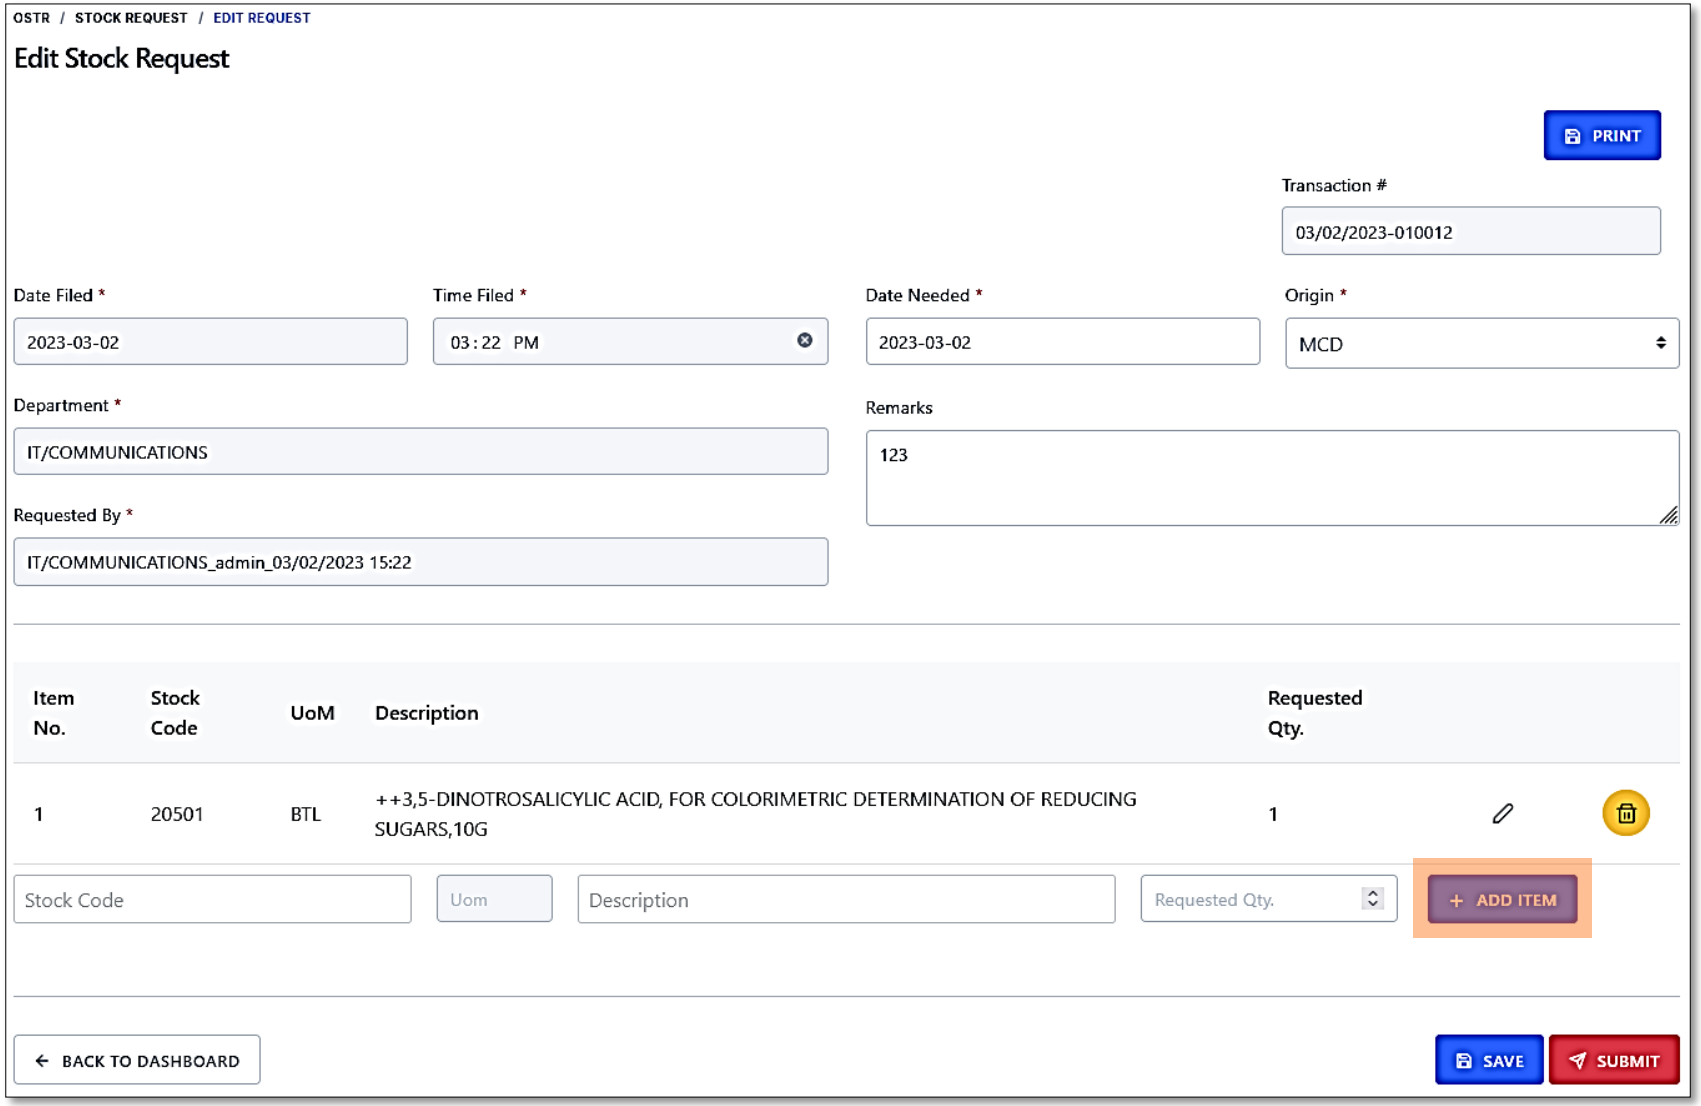

STOCK REQUEST

4. You may also add, edit, or delete items.

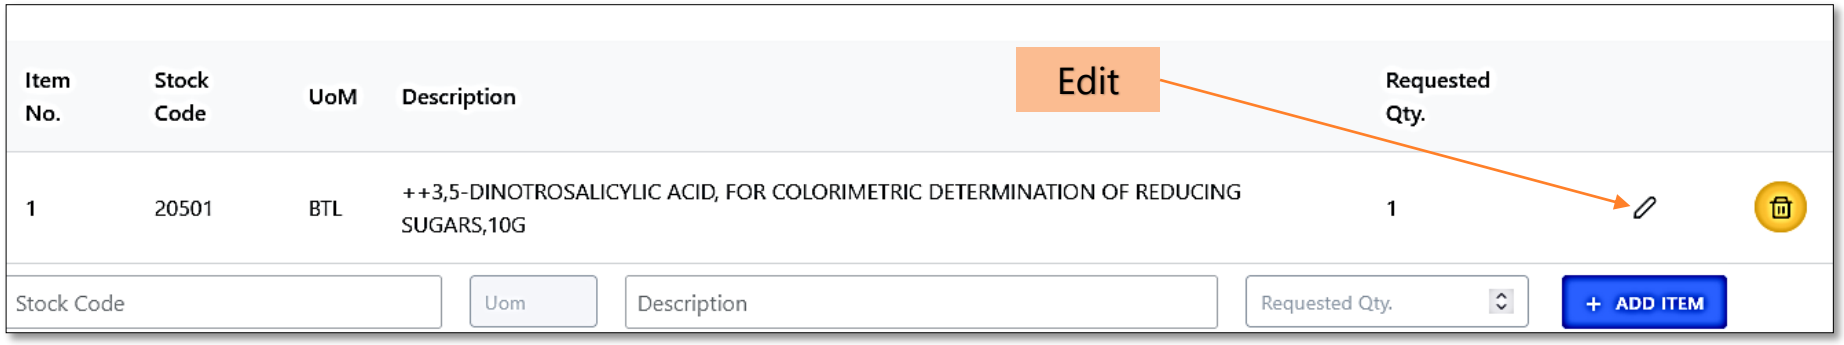

STOCK REQUEST

5. Add item(s) and enter all the necessary information.
6. Choose the **+ Add Item** button to add the item.

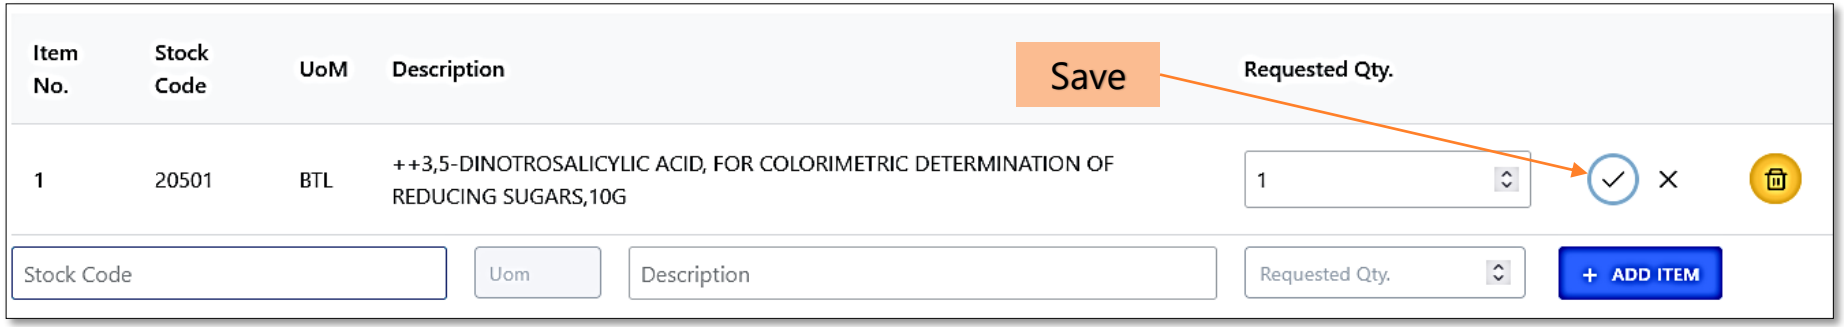

STOCK REQUEST

7. You may also edit an item by selecting the **Edit** icon and changing the information accordingly.

8. Click on the **Save** icon to save the changes made.

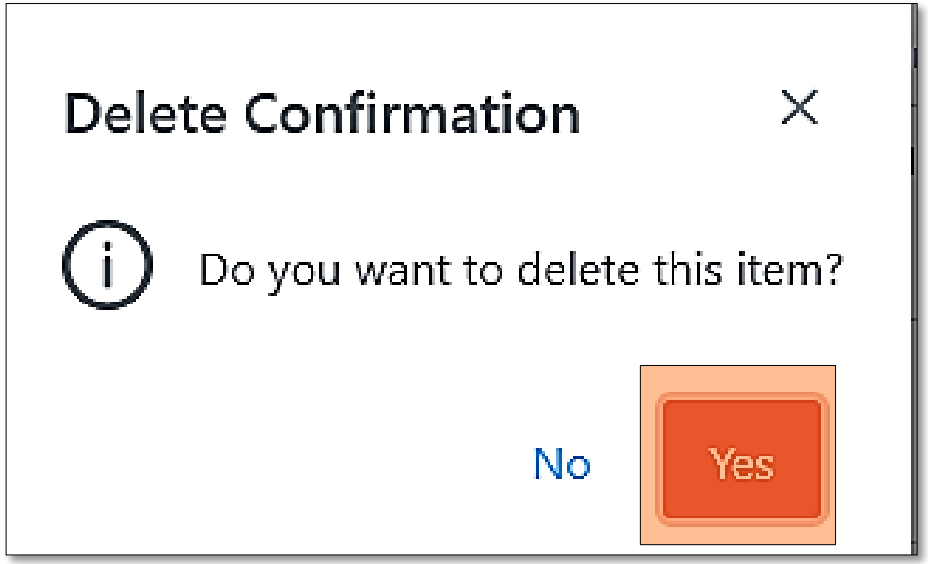

STOCK REQUEST

9. You may also delete an item by selecting the **Delete** icon. A pop-up box will appear asking if you want to continue the deletion process.

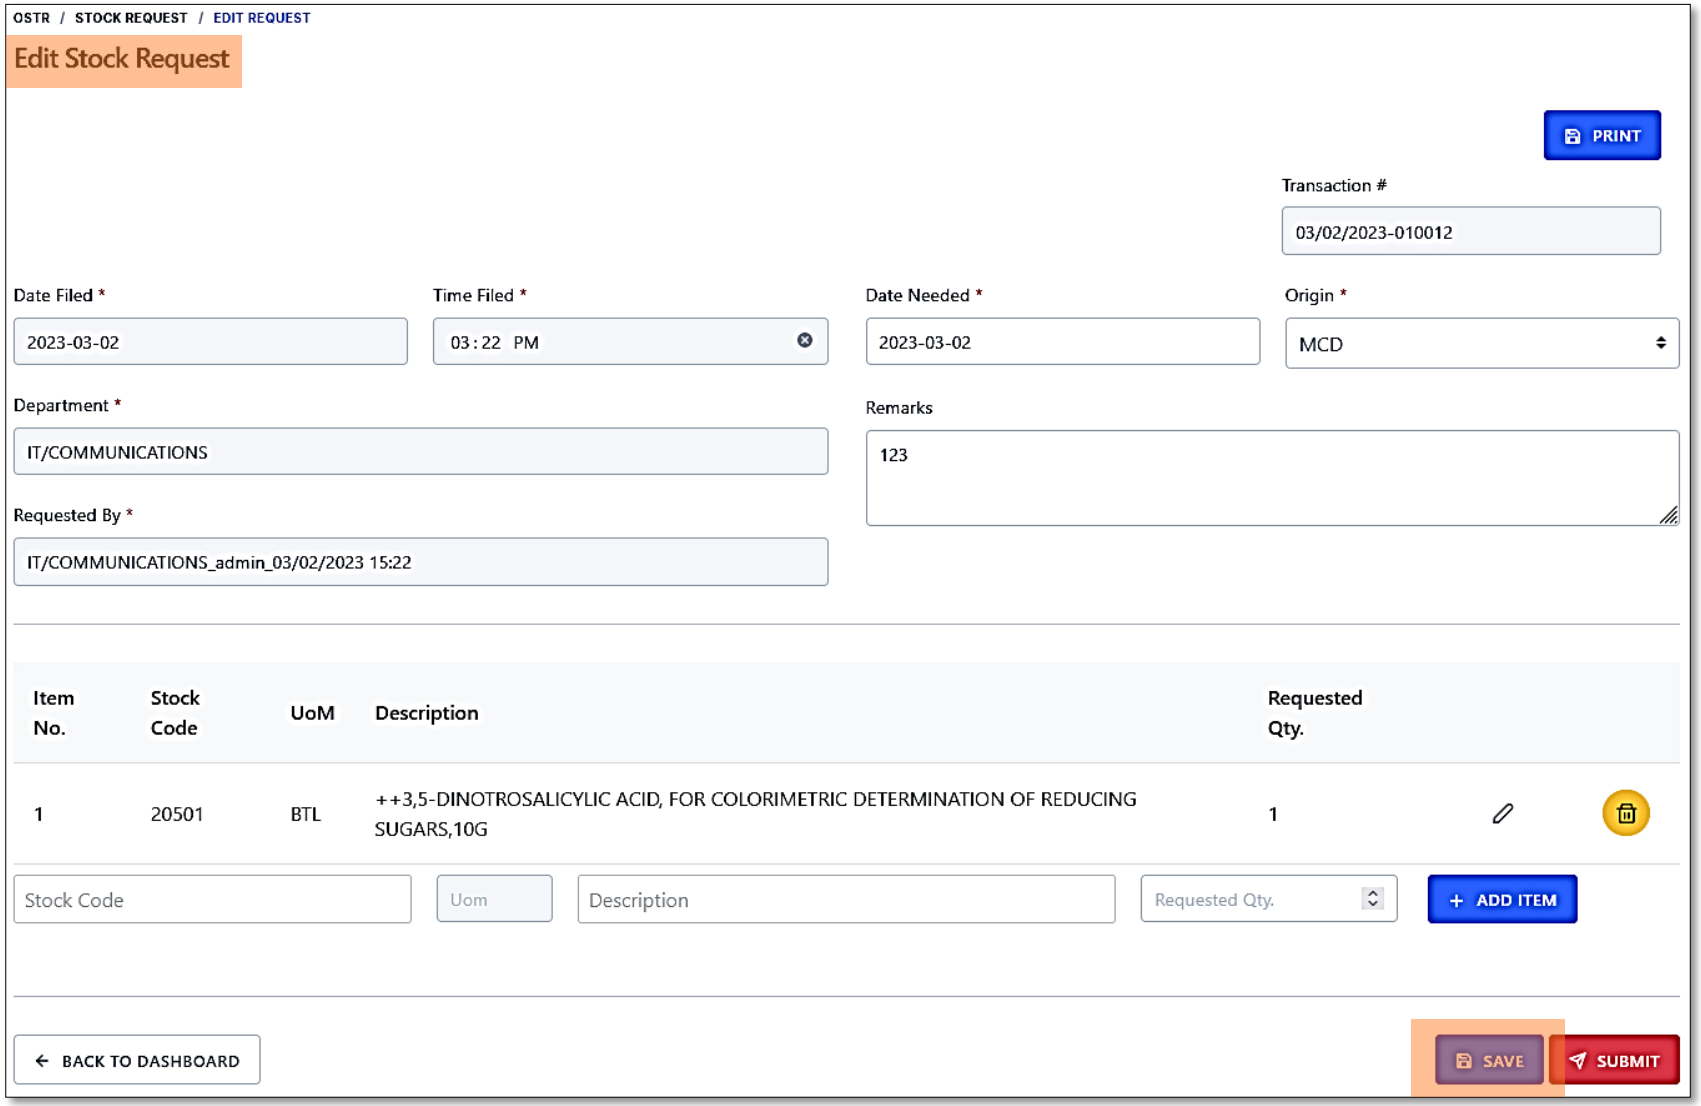

10. Click on the **Yes** button to continue.

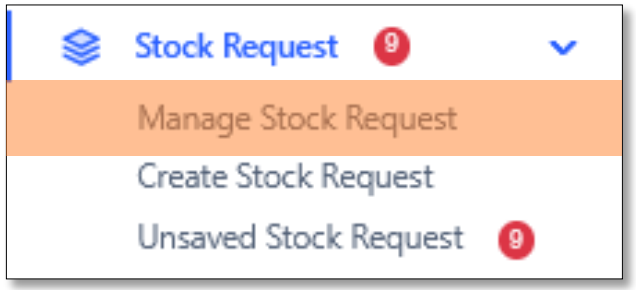

STOCK REQUEST

11. Click the **Save** button to save the changes made.

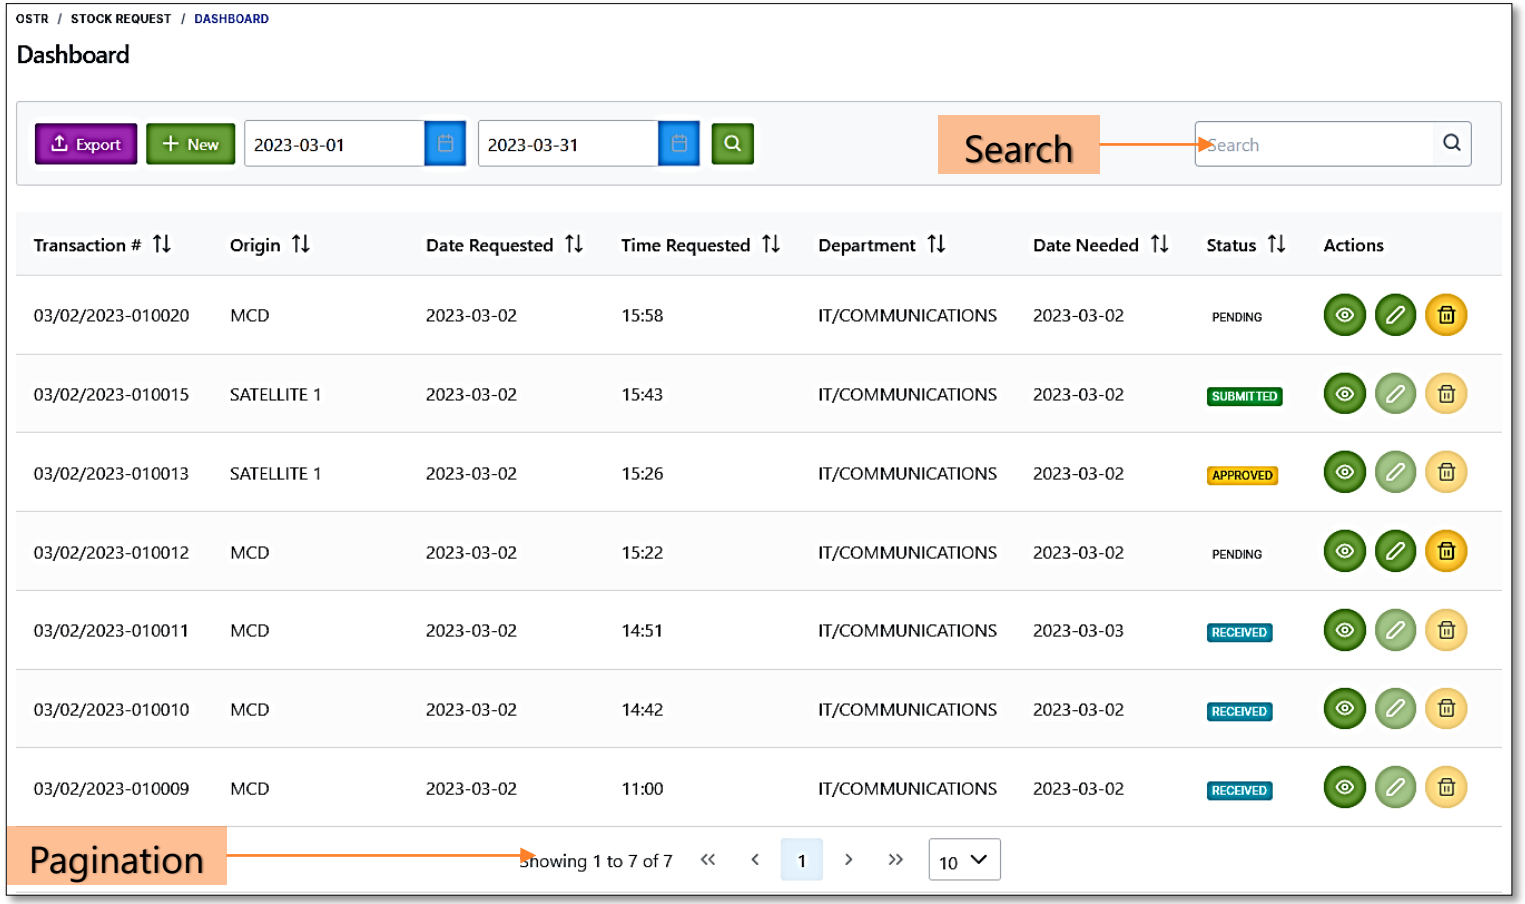

STOCK REQUEST

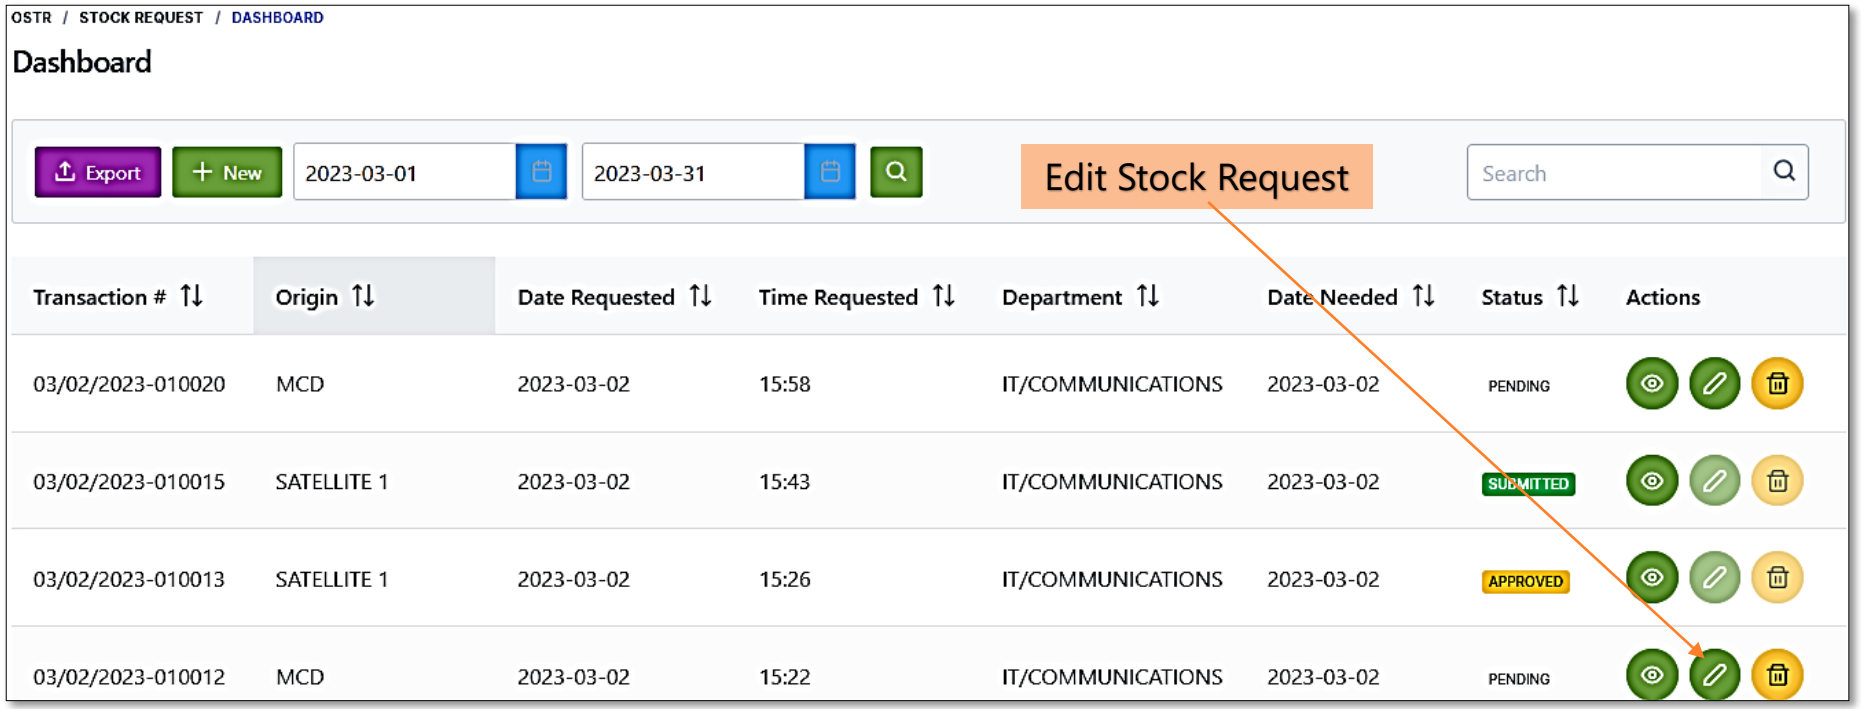

Submit a Stock Request

1. Go to **Stock Request** and select the **Manage Stock Request** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock request you want to submit.

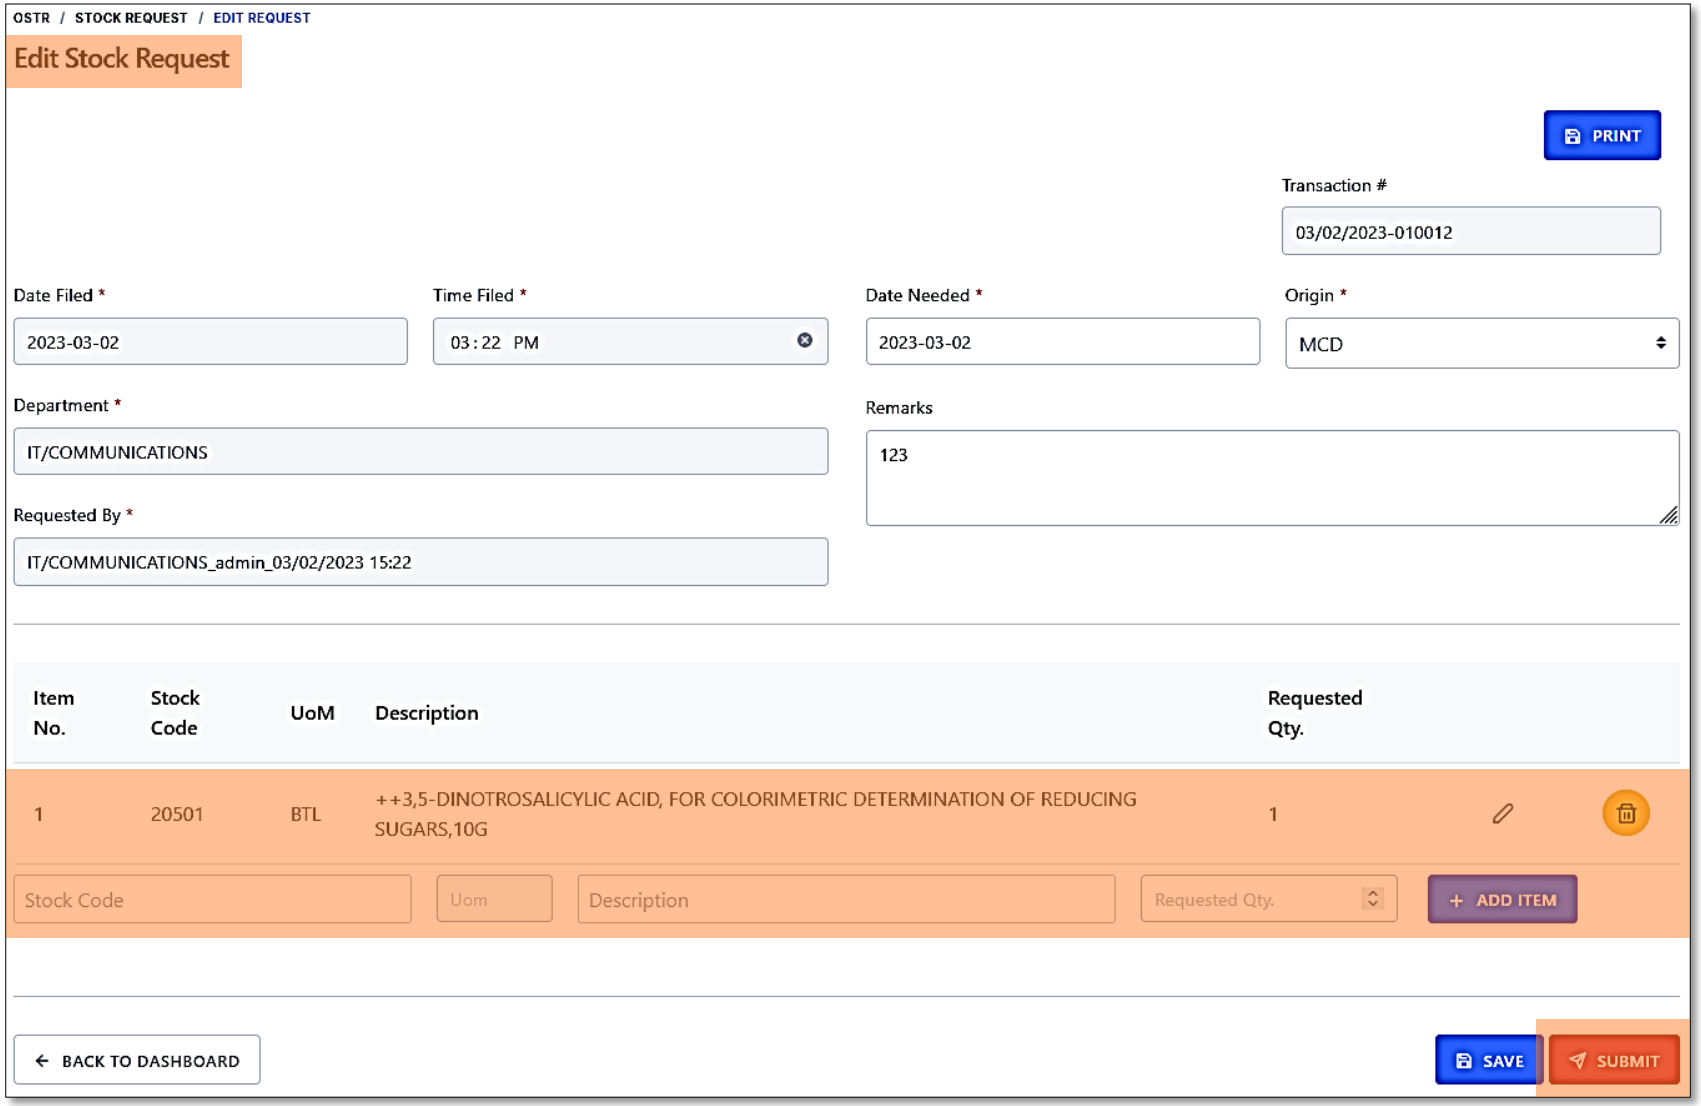

STOCK REQUEST

3. Select the **Edit Stock Request** icon.

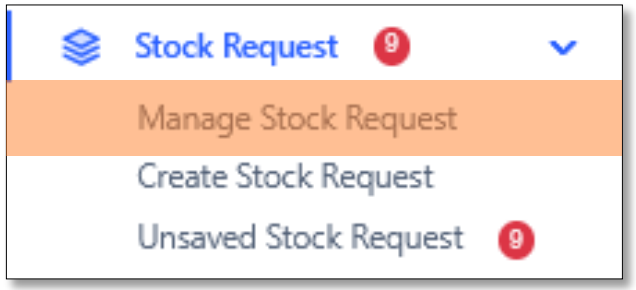

STOCK REQUEST

4. You may also add, edit, or delete items.
5. Click the **Submit** button to submit the request.

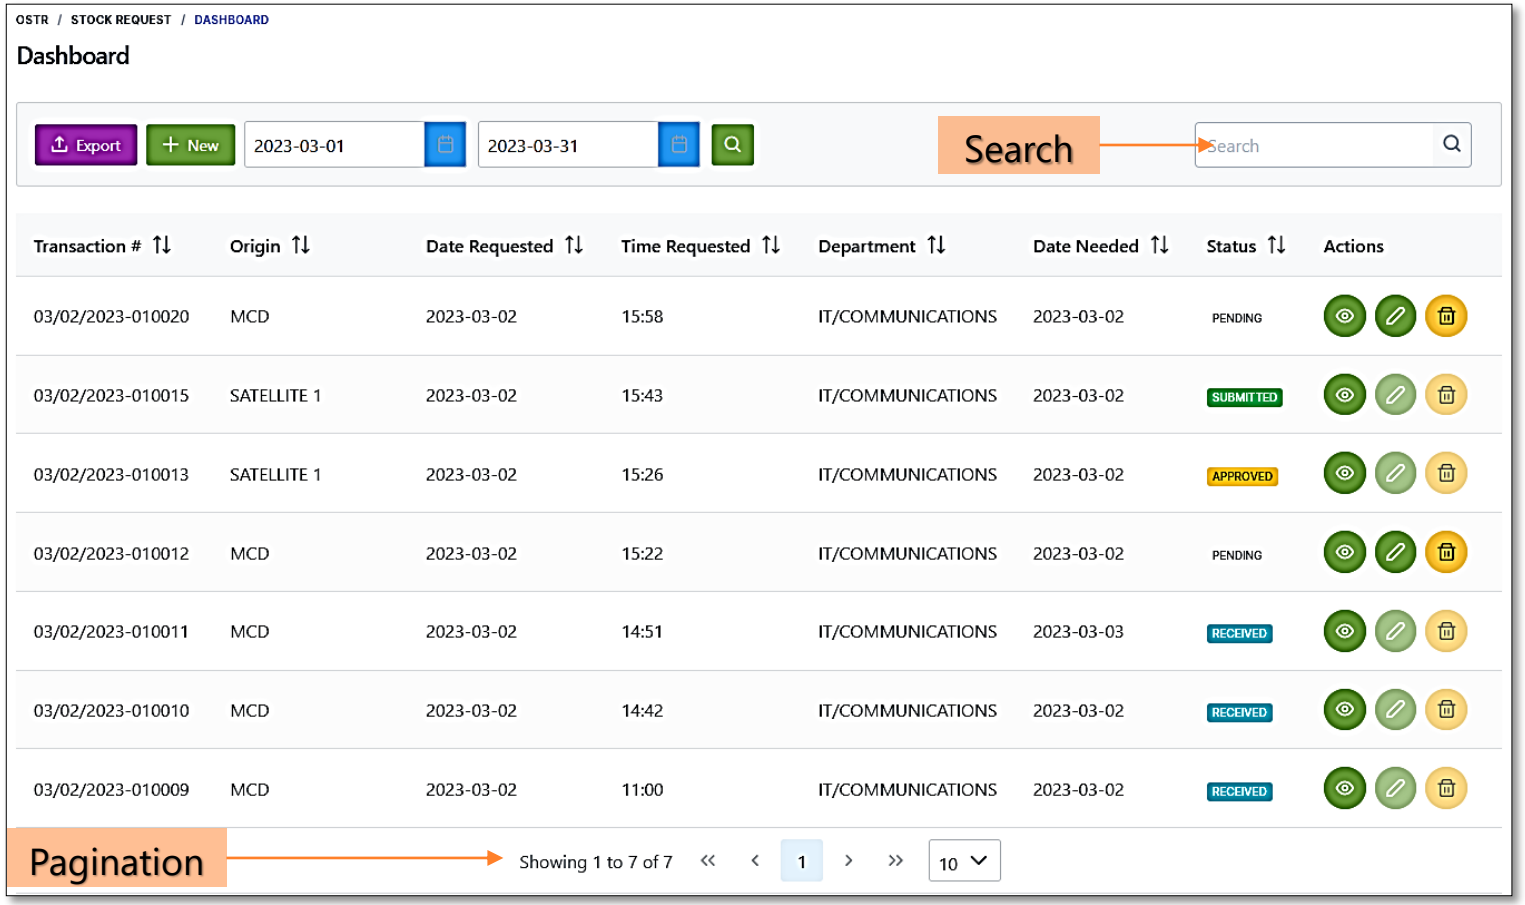

STOCK REQUEST

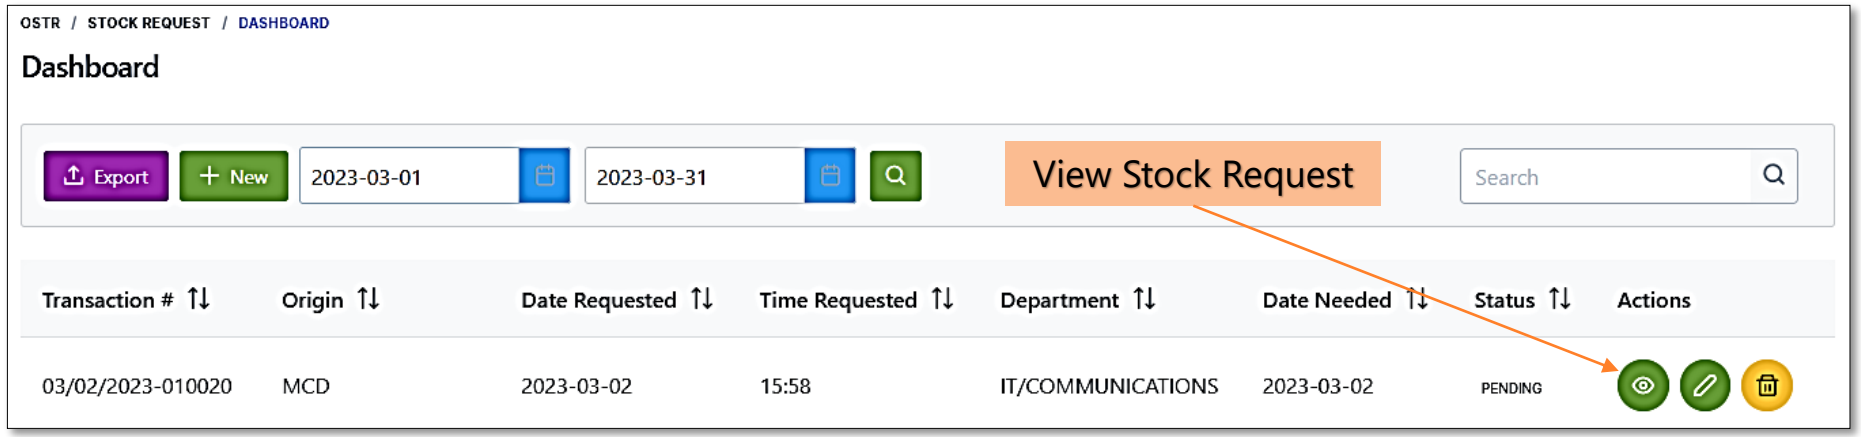

View a Stock Request

1. Go to **Stock Request** and select the **Manage Stock Request** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock request you want to view.

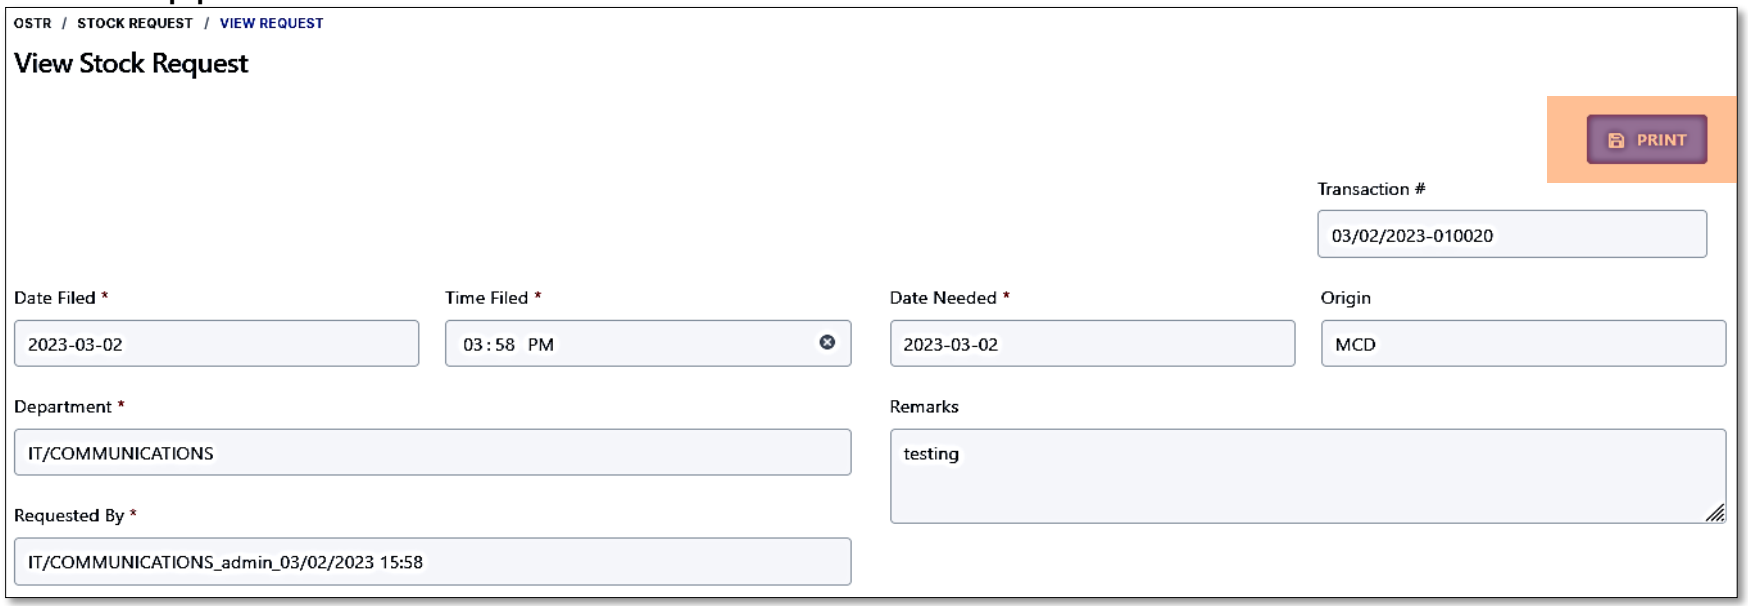

STOCK REQUEST

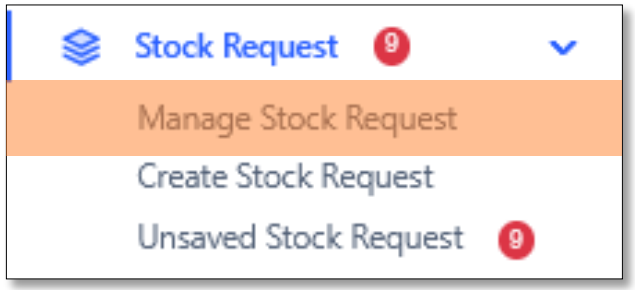

3. Select the **View Stock Request** icon.

4. You may also print a request by selecting the **Print** button once the **View Stock Request** screen appears.

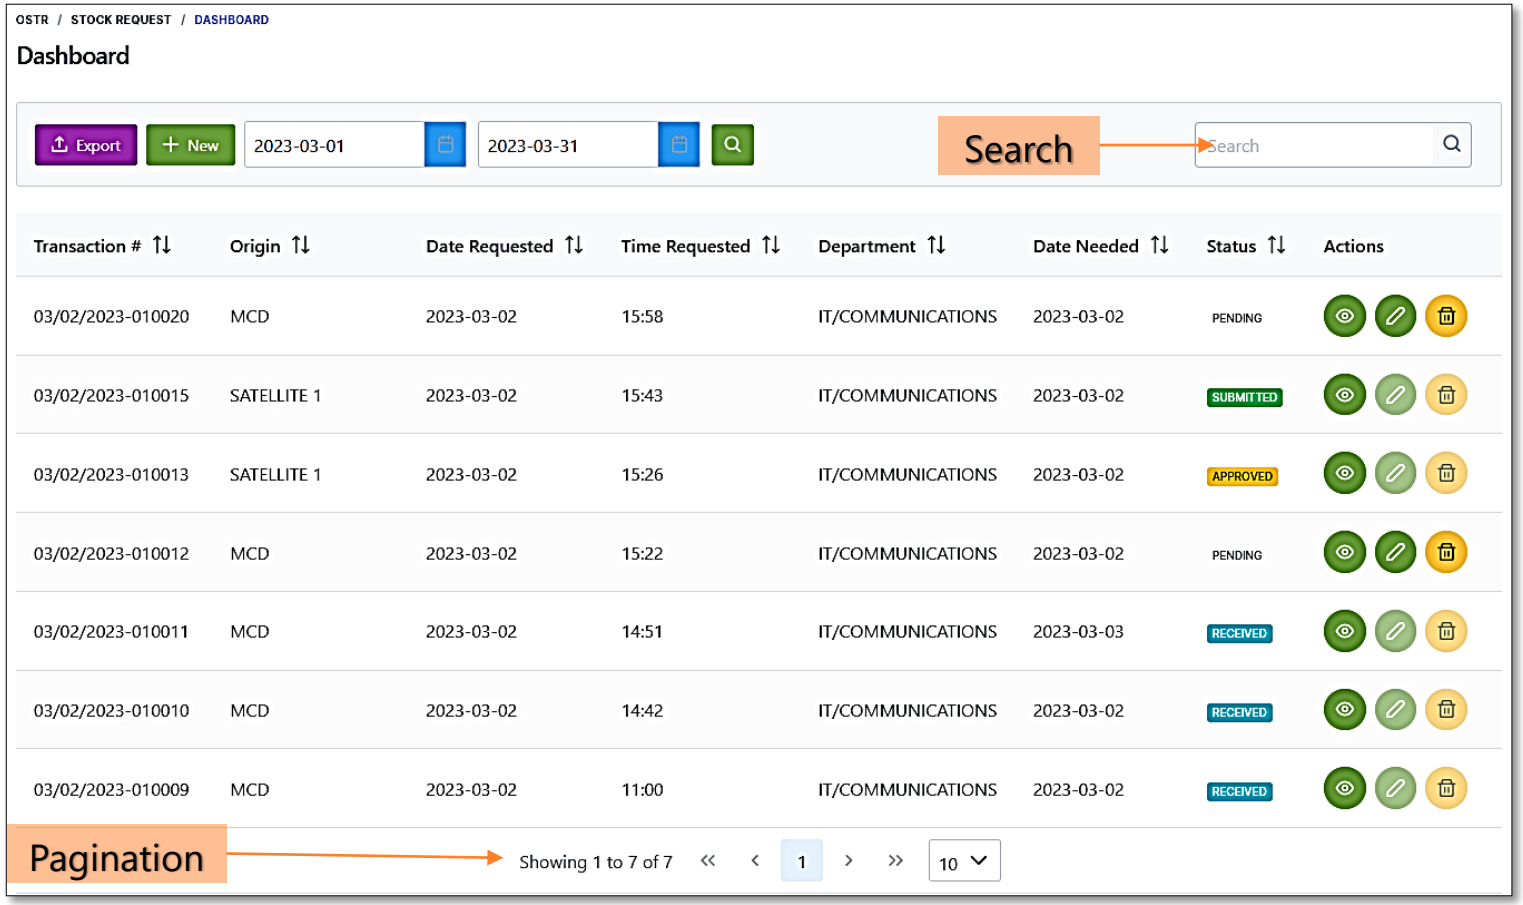

STOCK REQUEST

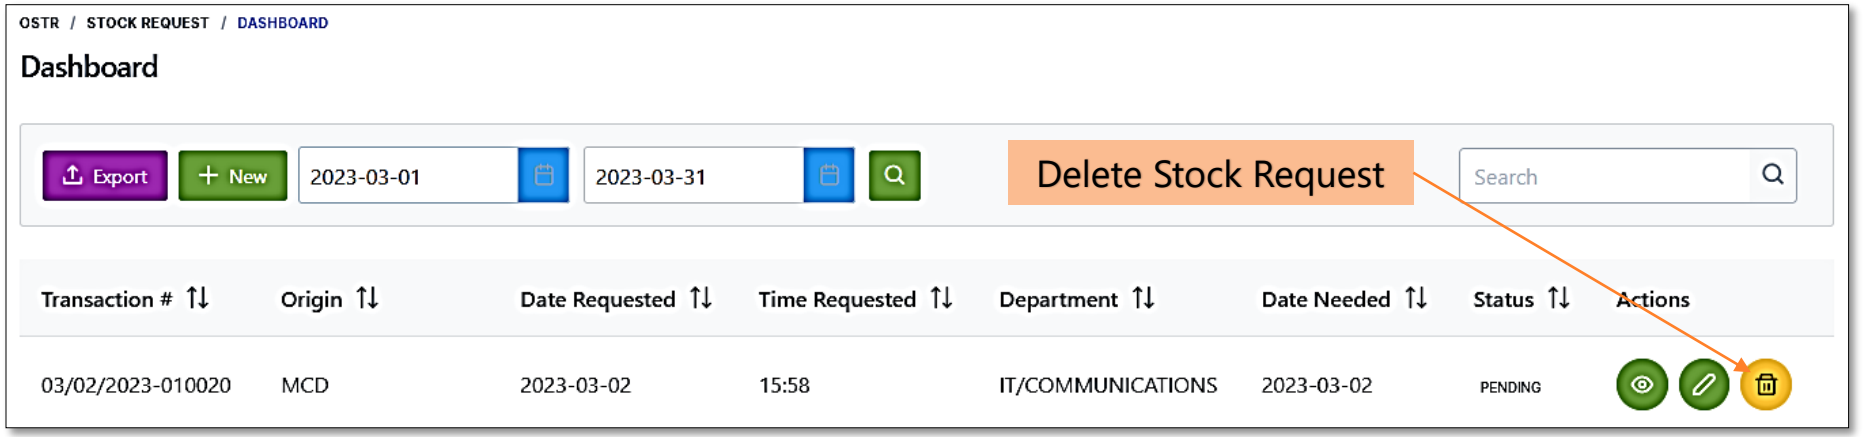

Delete a Stock Request

1. Go to **Stock Request** and select the **Manage Stock Request** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock request you want to delete.

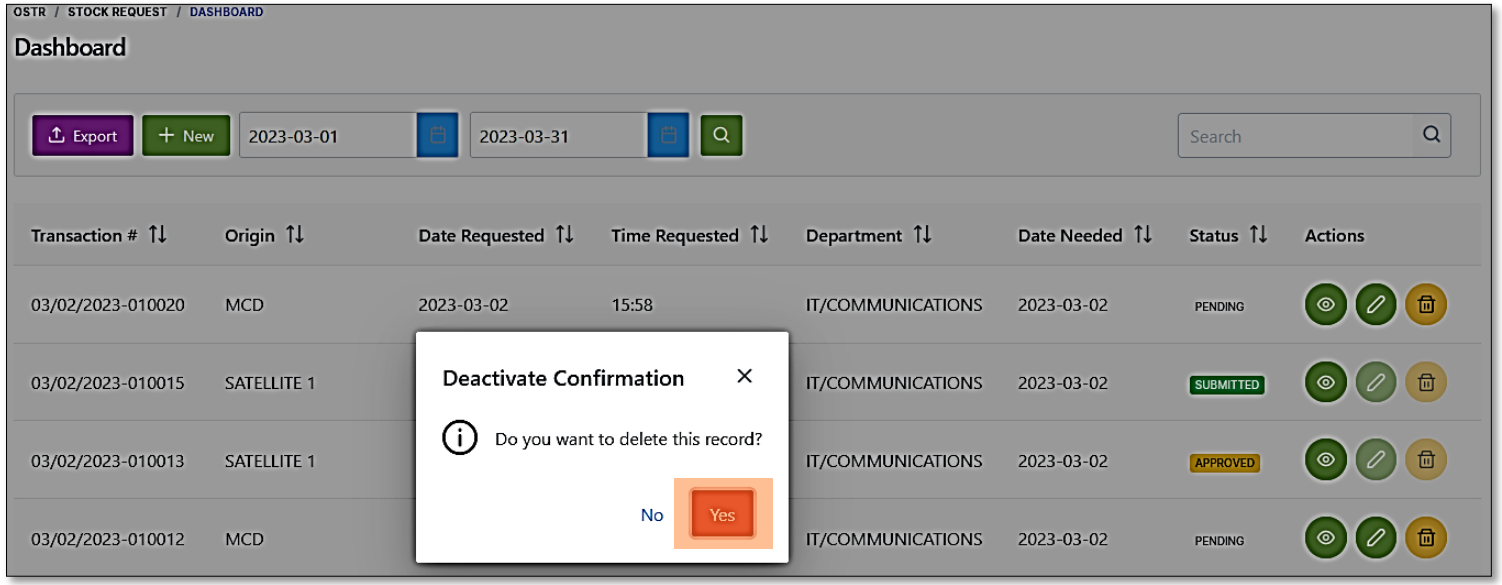

STOCK REQUEST

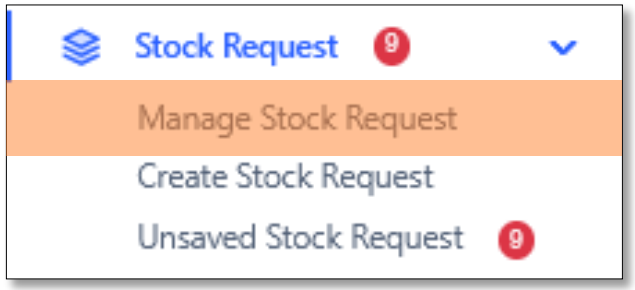

3. Select the **Delete Stock Request** icon. A pop-up box will appear asking if you want to continue the deletion process.

4. Click on the **Yes** button to complete the process.

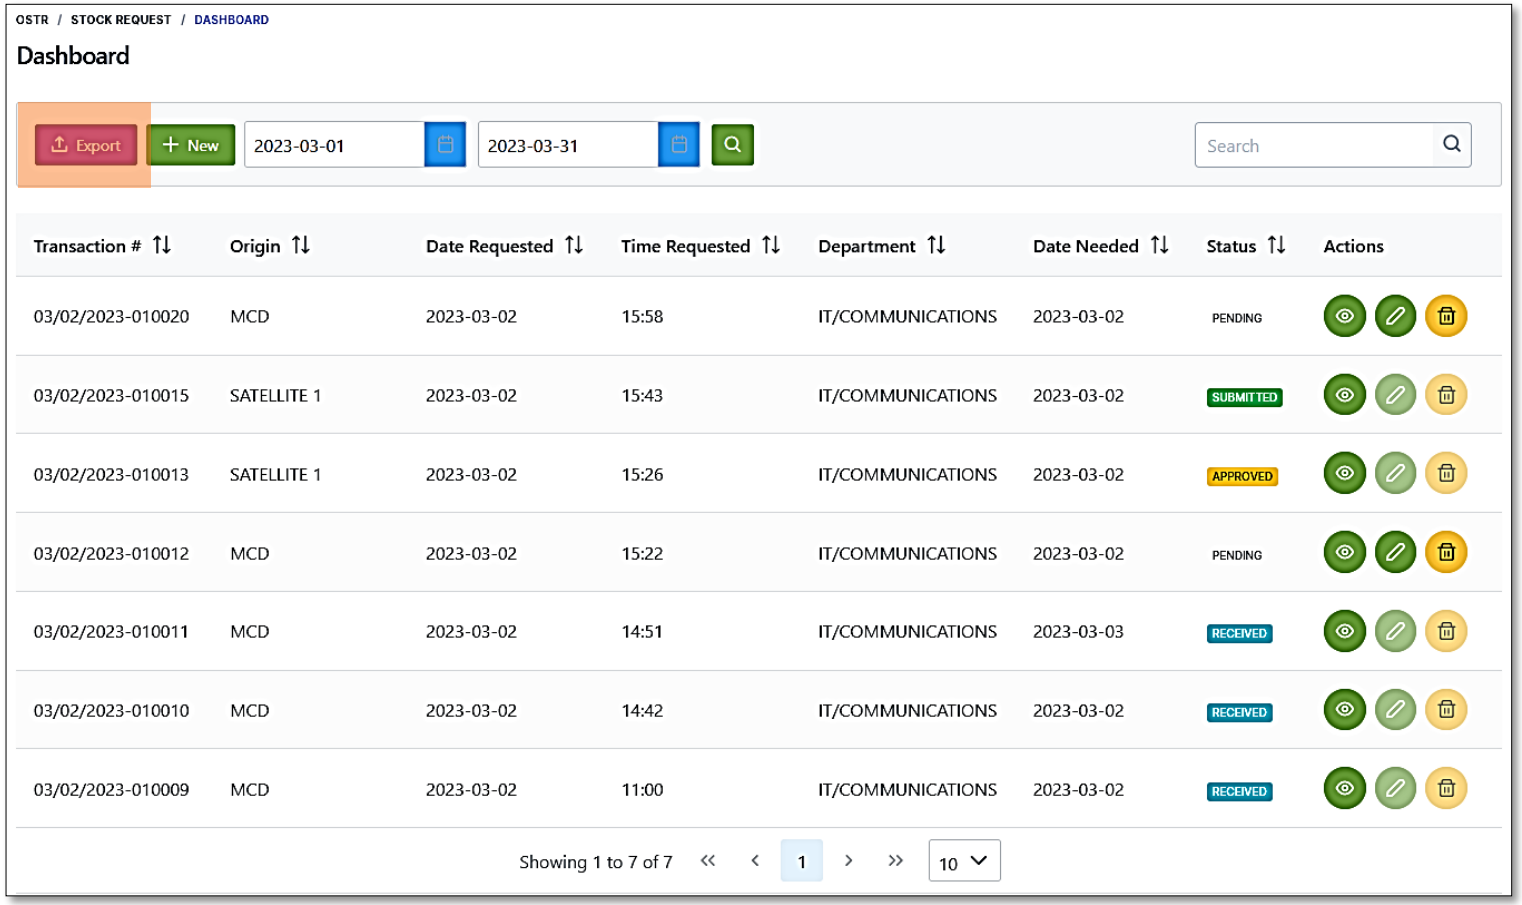

STOCK REQUEST

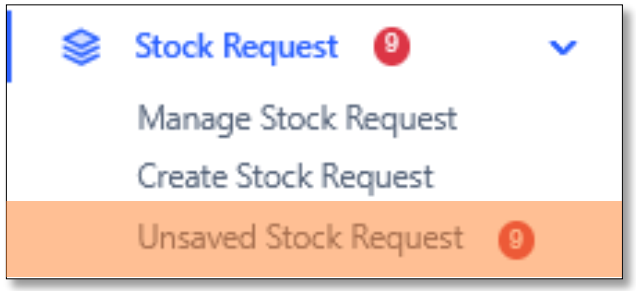

Export Stock Requests

1. Go to **Stock Request** and select the **Manage Stock Request** option.
2. View the **Dashboard** screen.
3. Click on the **Export** button to export the stock requests.

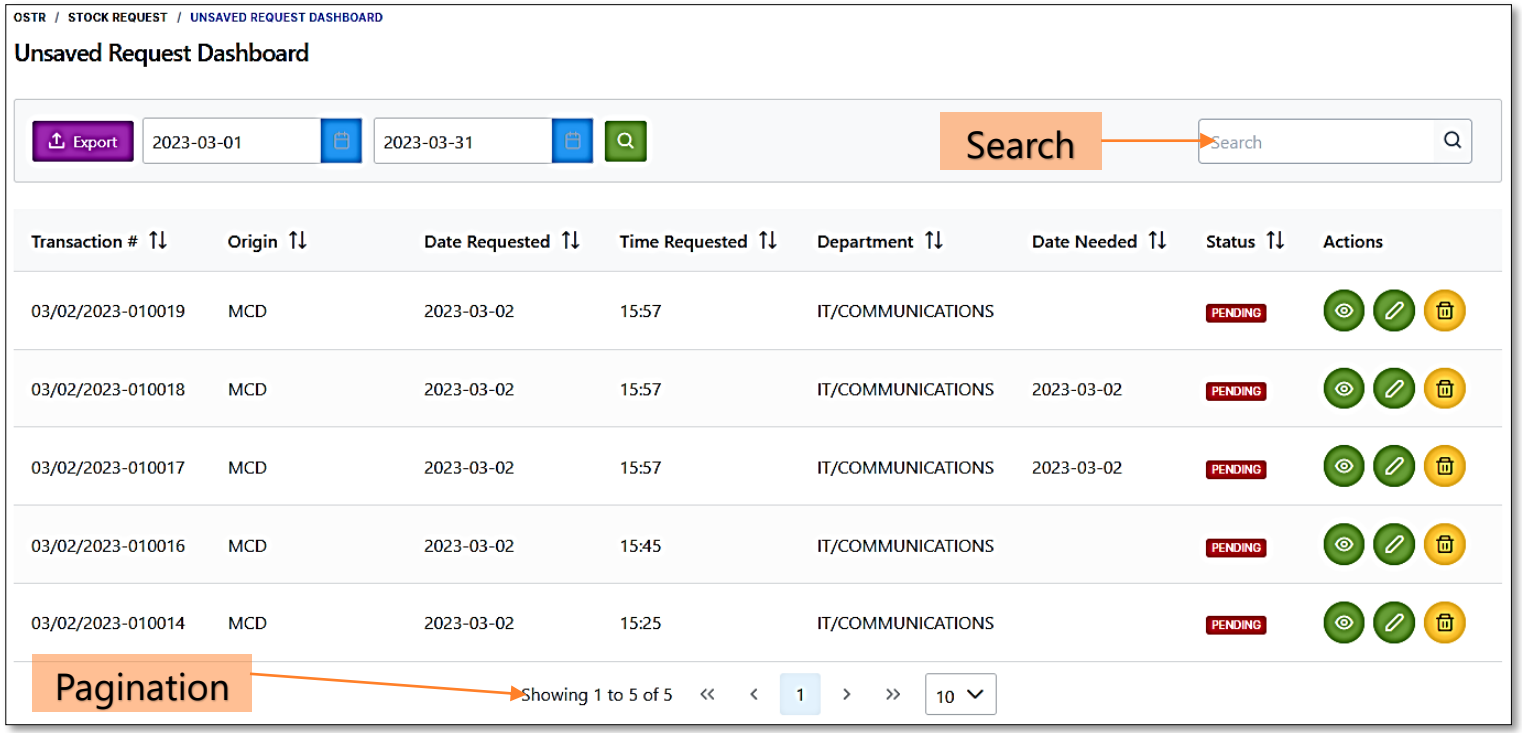

STOCK REQUEST

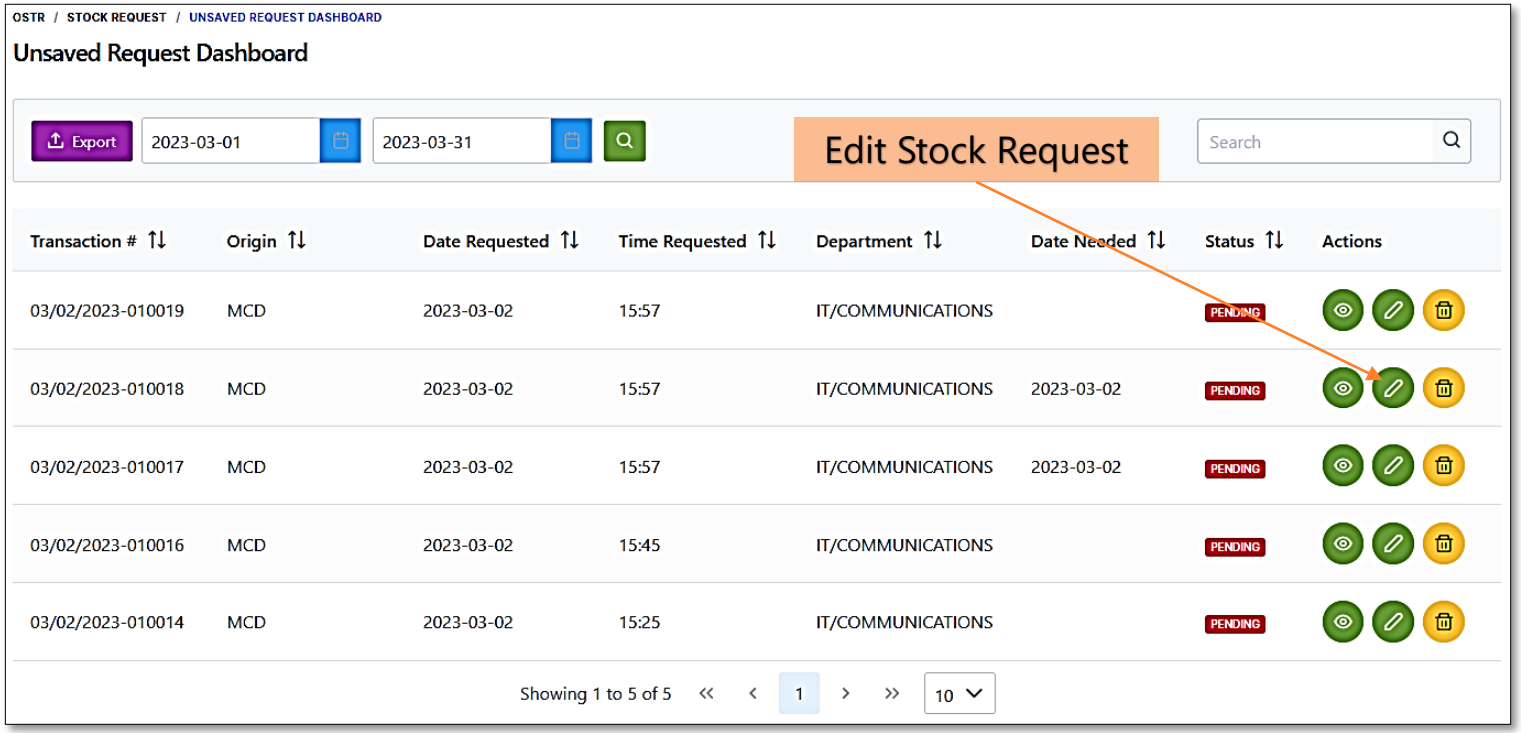

Edit an Unsaved Stock Request

1. Go to **Stock Request** and select the **Unsaved Stock Request** option.
2. View the **Unsaved Request Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the unsaved stock request you want to edit.

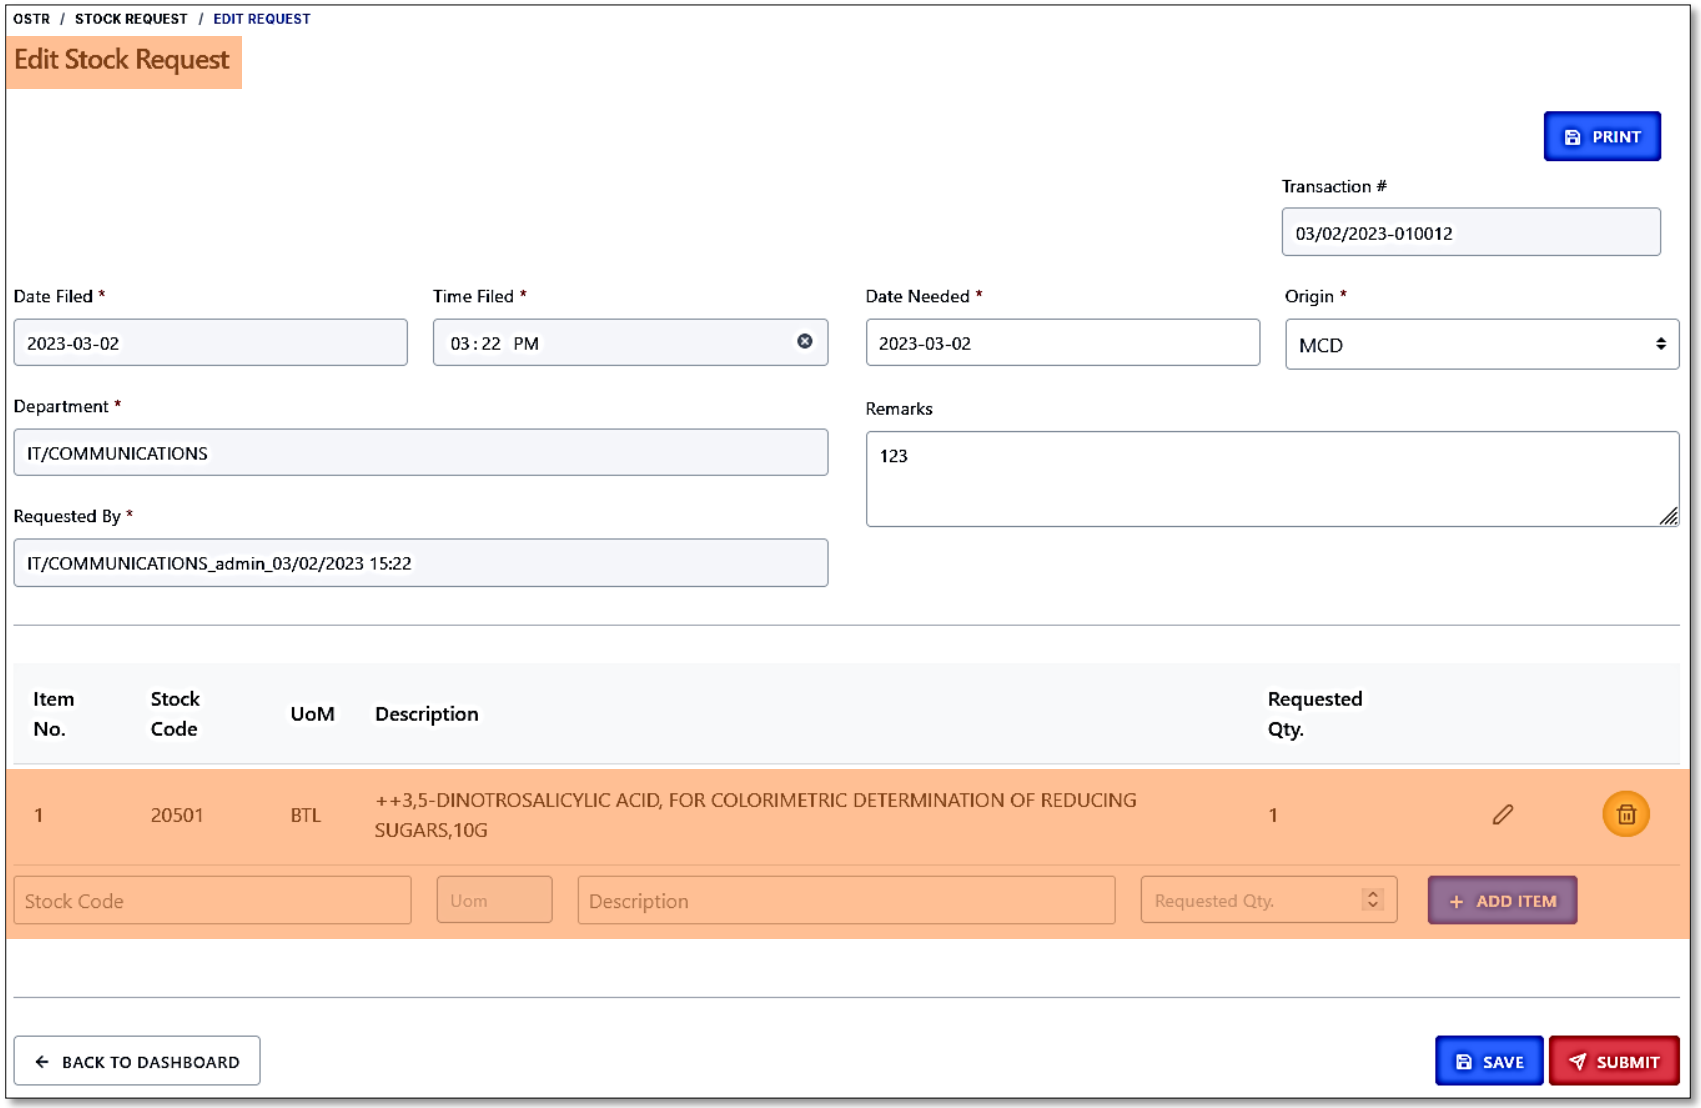

STOCK REQUEST

3. Select the **Edit Stock Request** icon and change the information accordingly once the **Edit Stock Request** screen appears.

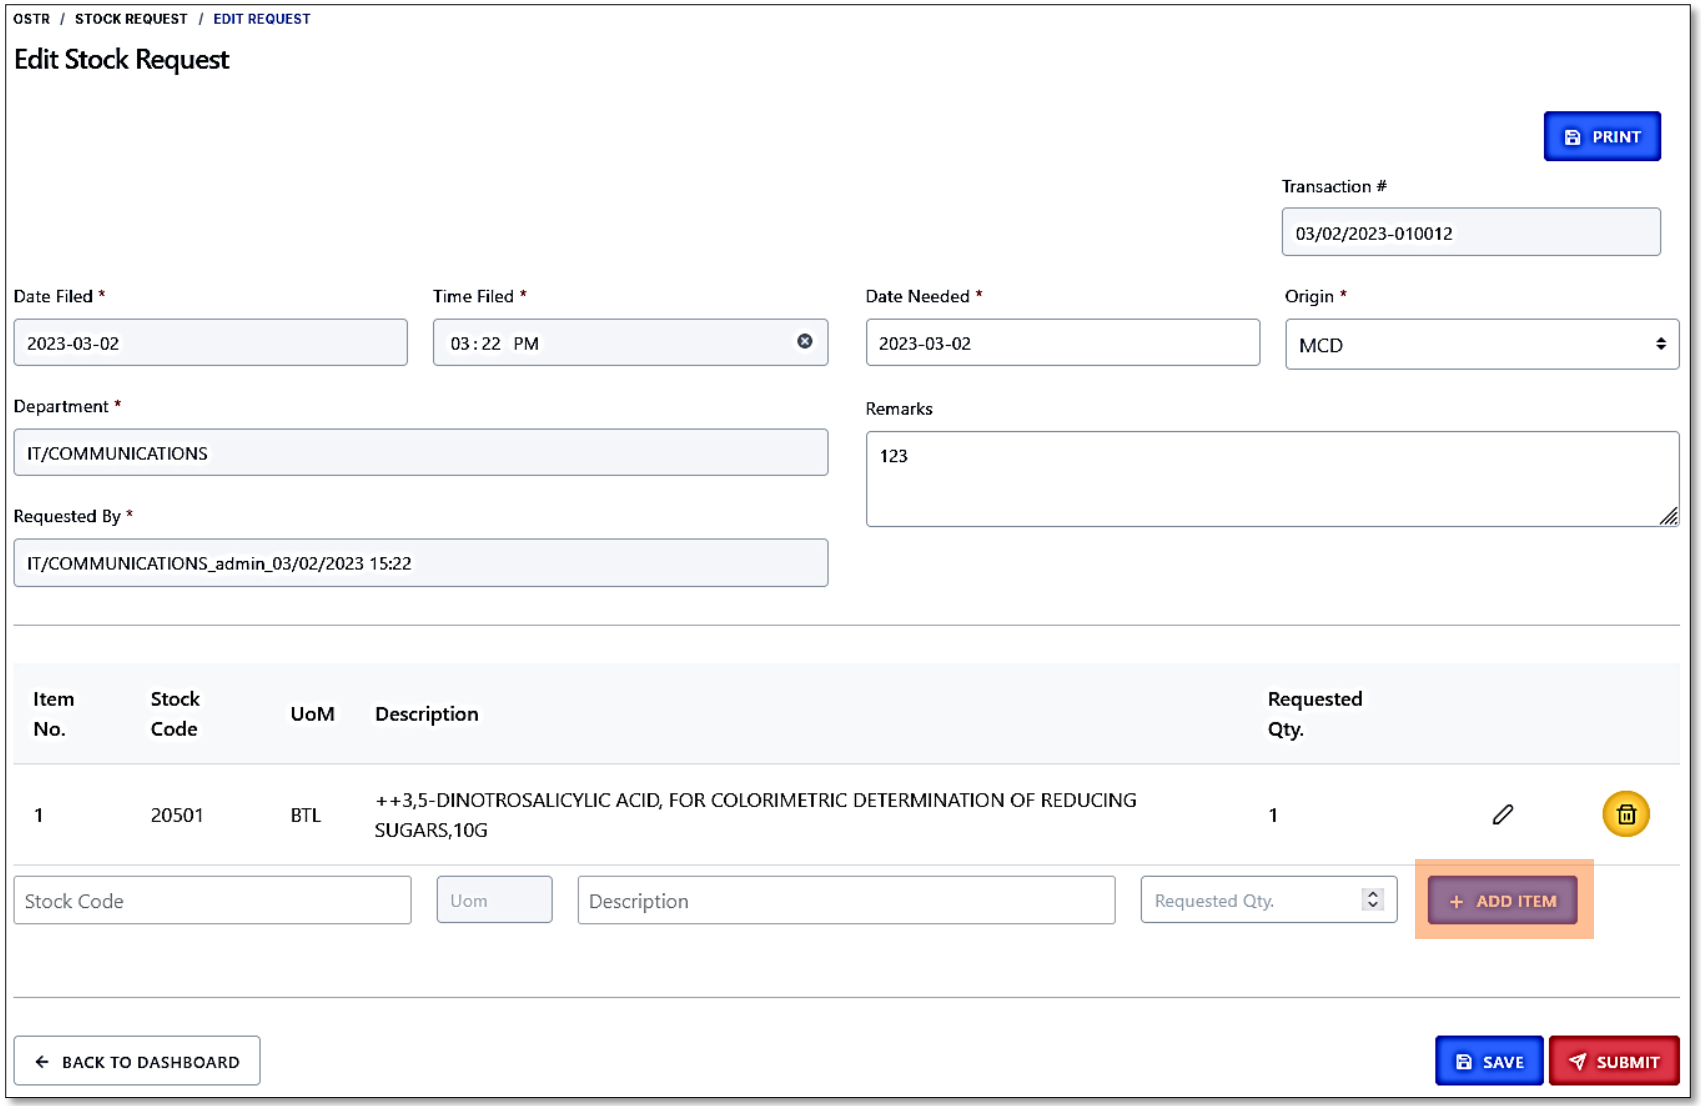

STOCK REQUEST

4. You may also add, edit, or delete items.

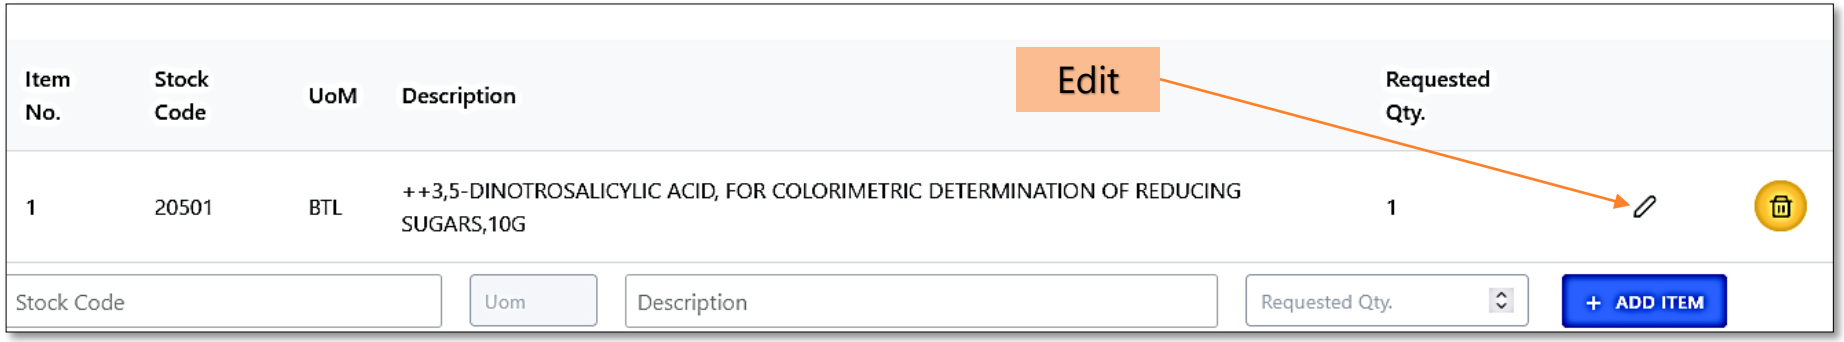

STOCK REQUEST

5. Add item(s) and enter all the necessary information.
6. Choose the **+ Add Item** button to add the item.

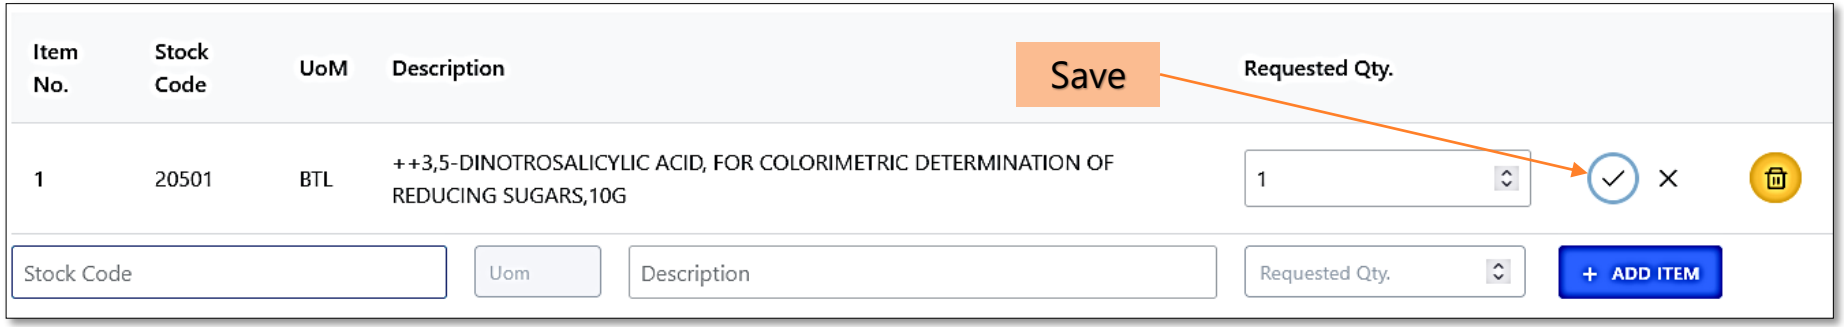

STOCK REQUEST

7. You may also edit an item by selecting the **Edit** icon and change the information accordingly.

8. Click on the **Save** icon to save the changes made.

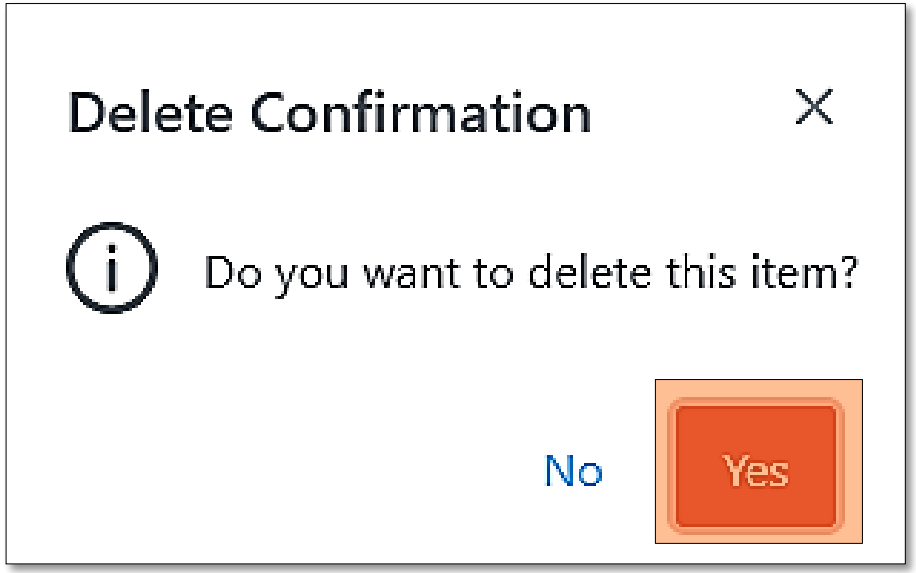

STOCK REQUEST

9. You may also delete an item by selecting the **Delete** icon. A pop-up box will appear asking if you want to continue the deletion process.

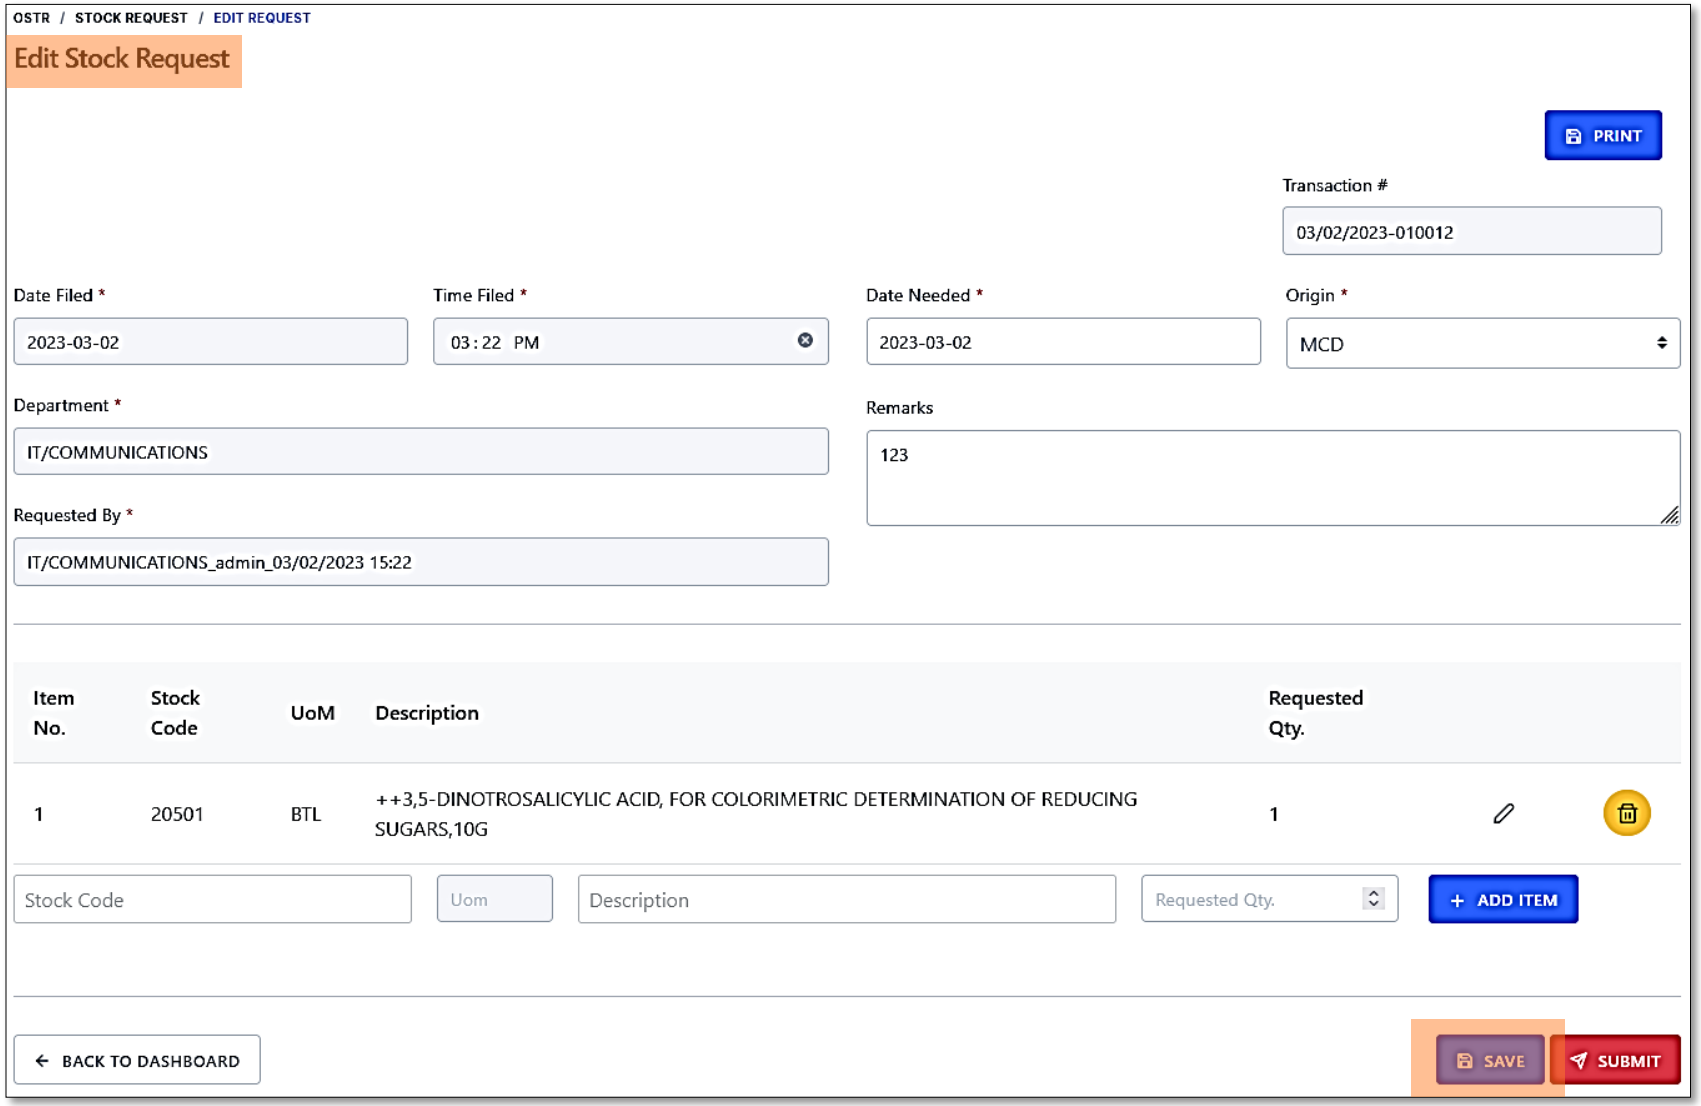

10. Click on the **Yes** button to continue.

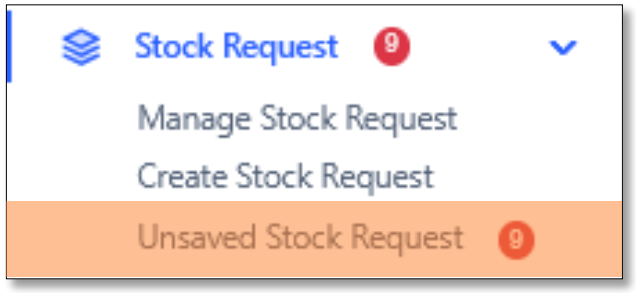

STOCK REQUEST

11. Click the **Save** button to save the changes made.

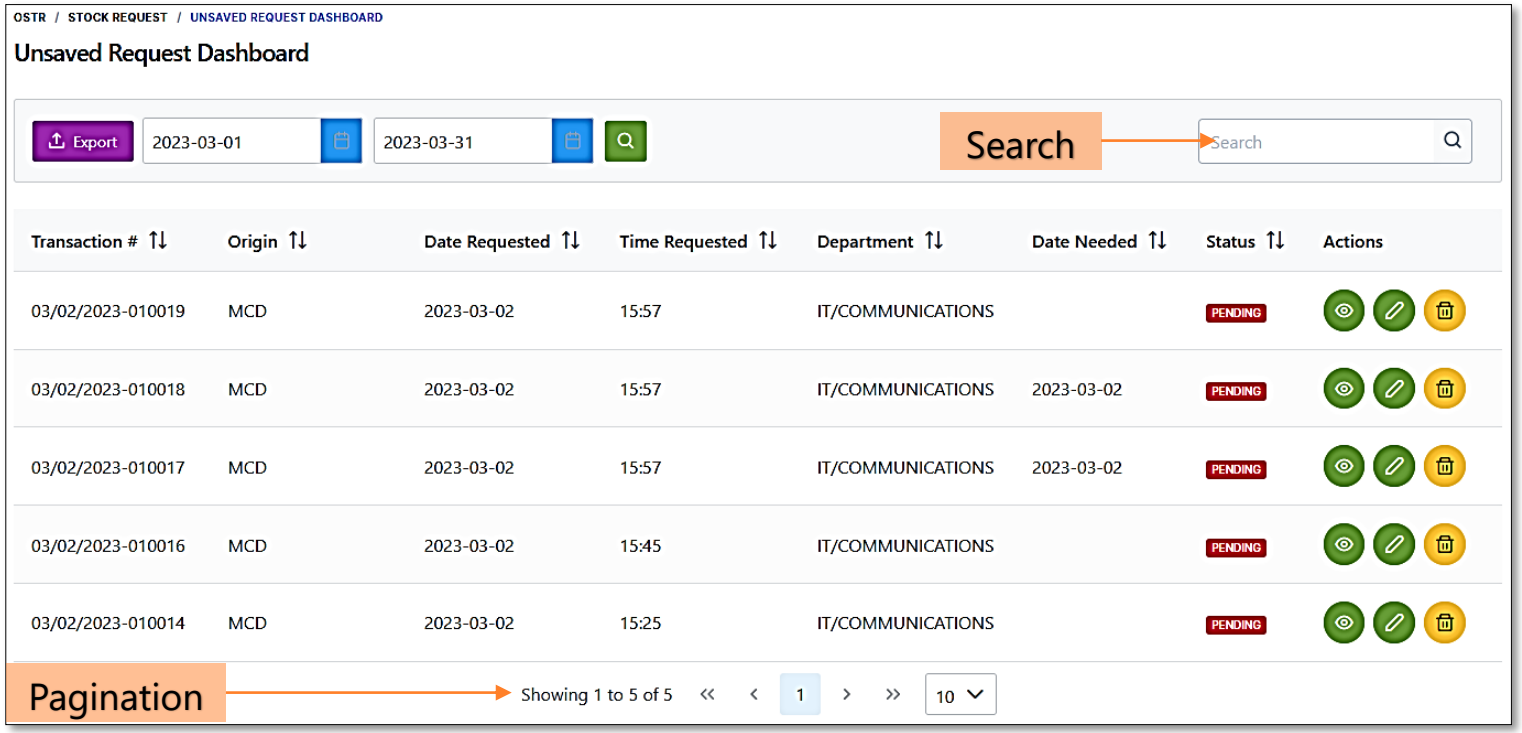

STOCK REQUEST

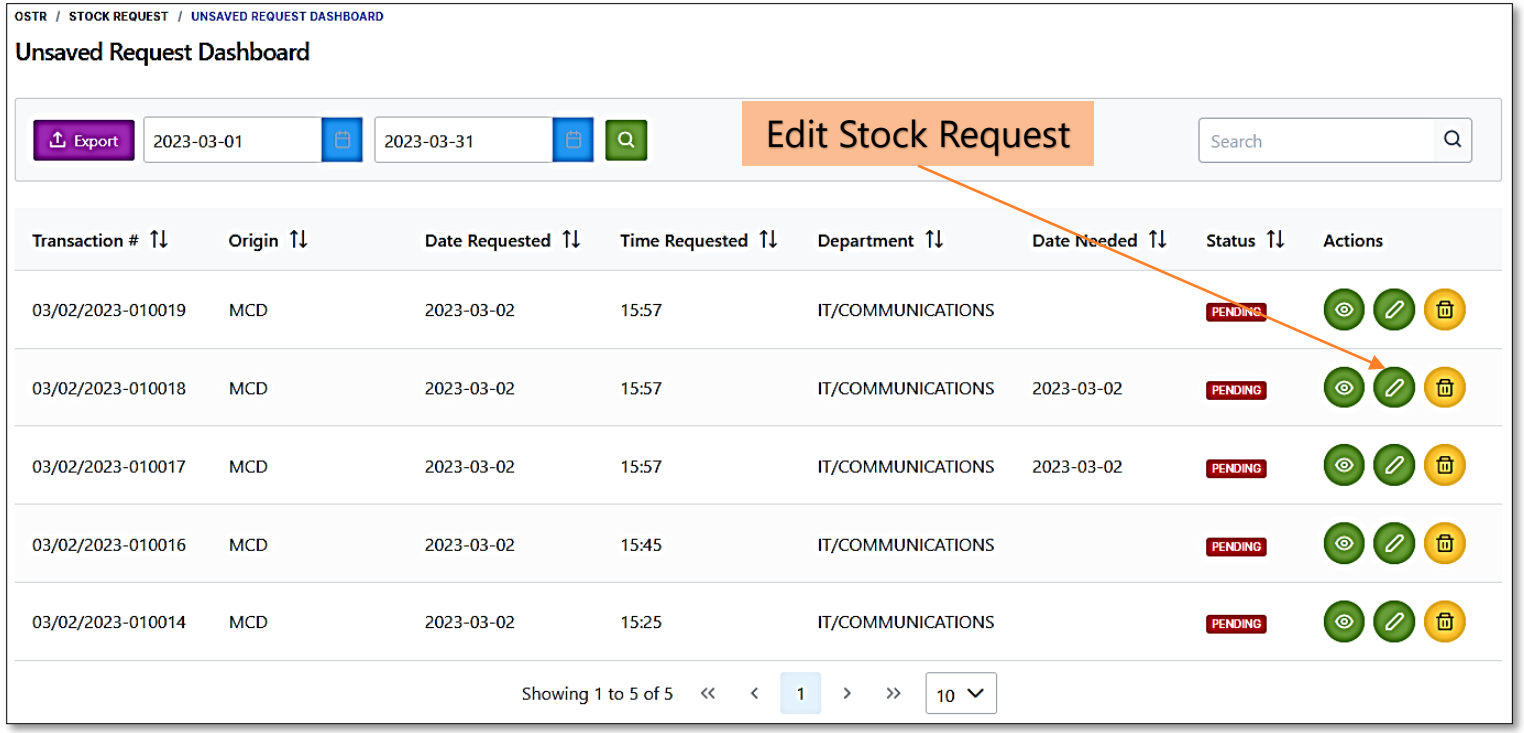

Submit an Unsaved Stock Request

1. Go to **Stock Request** and select the **Unsaved Stock Request** option.
2. View the **Unsaved Request Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the unsaved stock request you want to submit.

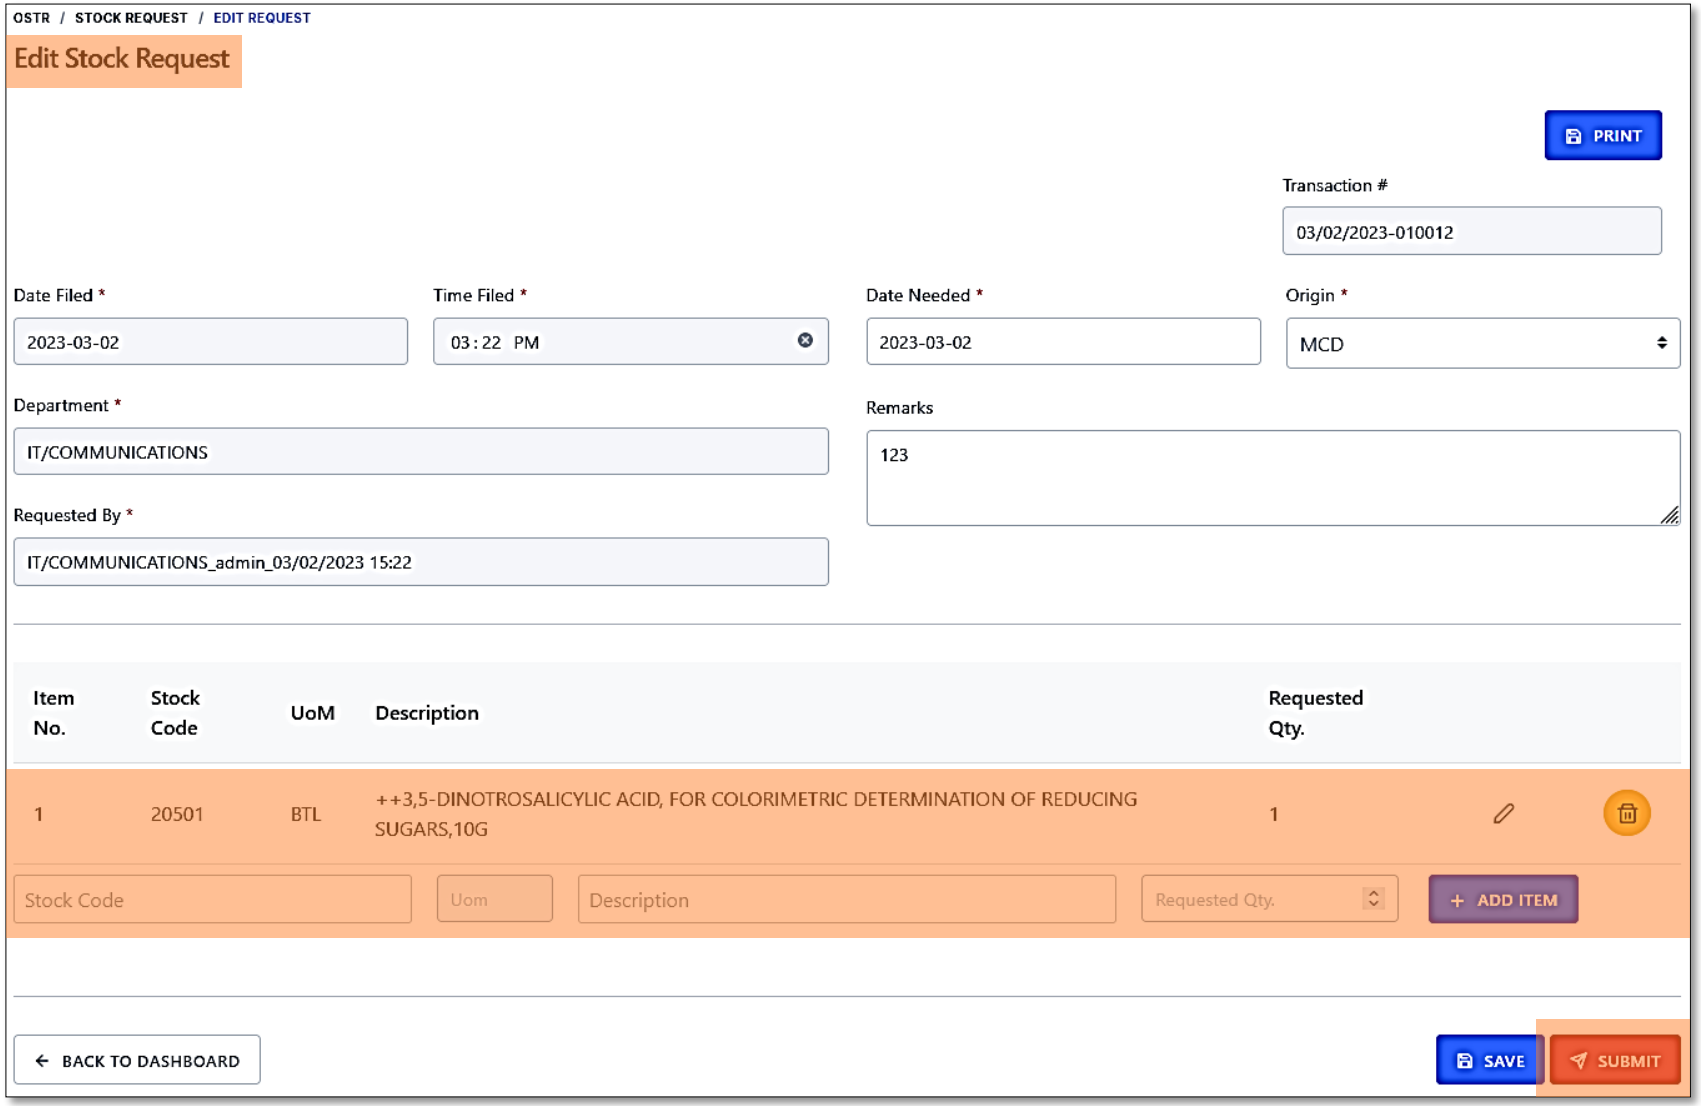

STOCK REQUEST

3. Select the **Edit Stock Request** icon.

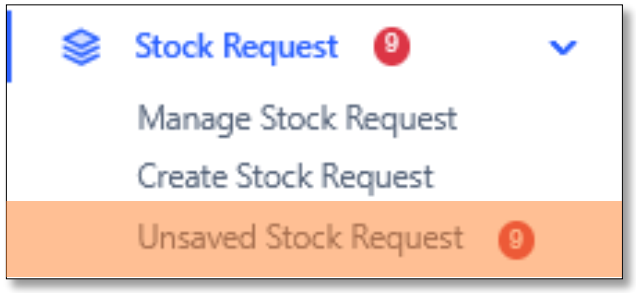

STOCK REQUEST

4. You may also add, edit, or delete items.
5. Click the **Submit** button to submit the request.

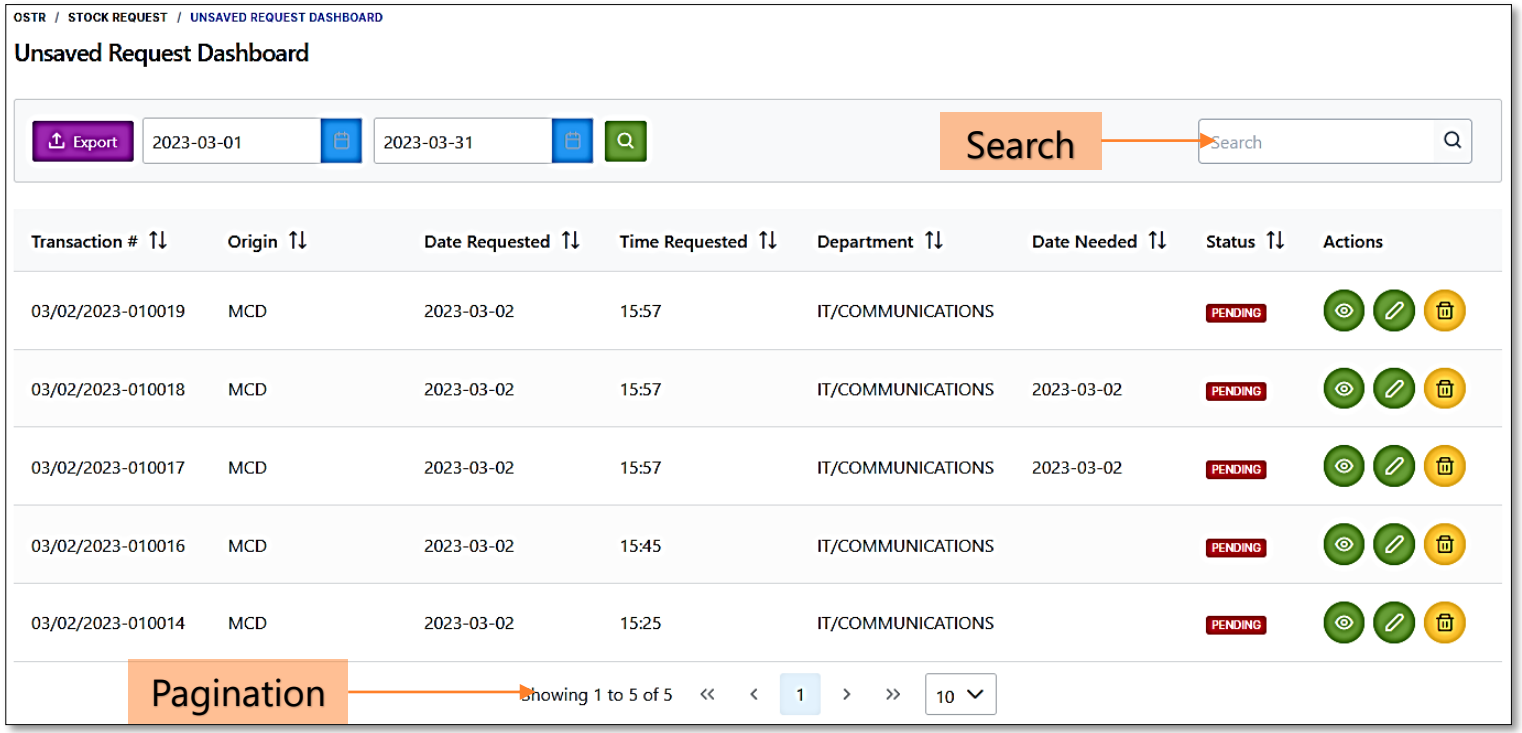

STOCK REQUEST

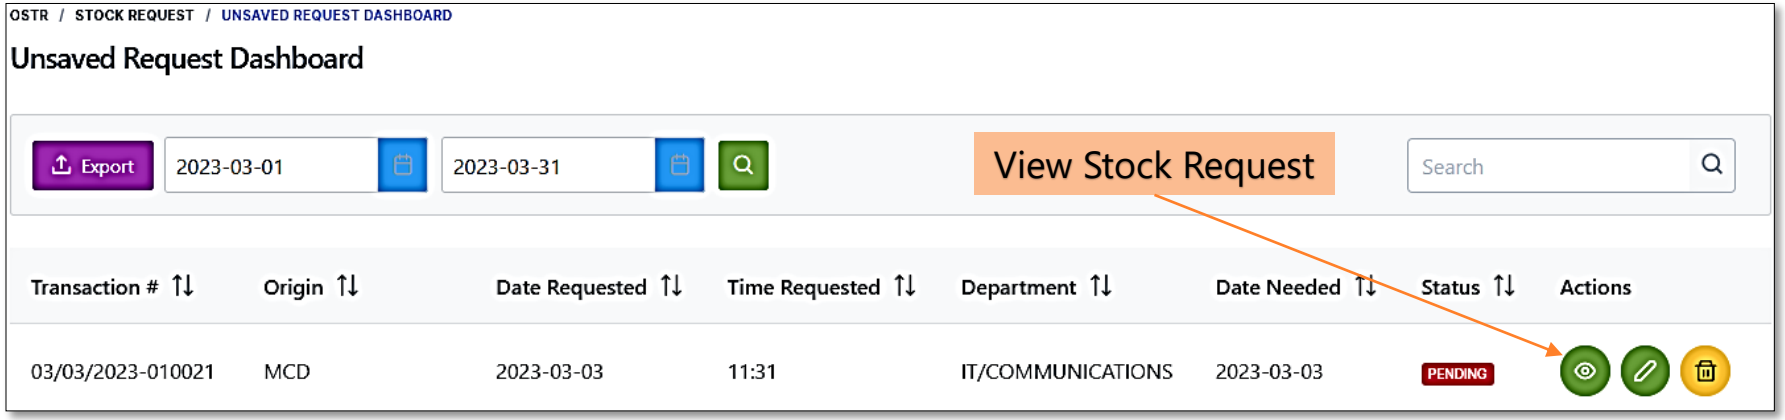

View an Unsaved Stock Request

1. Go to **Stock Request** and select the **Unsaved Stock Request** option.
2. View the **Unsaved Request Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the unsaved stock request you want to view.

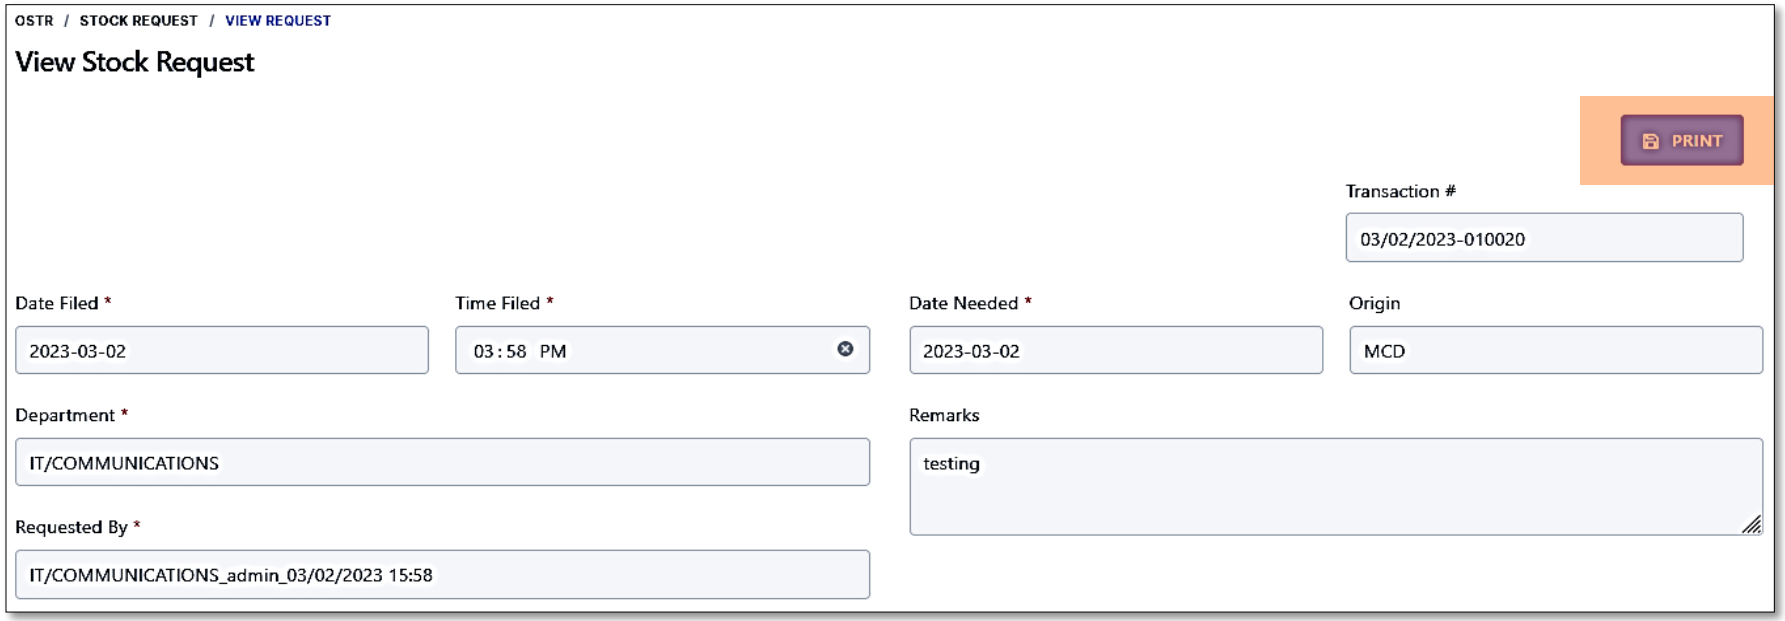

STOCK REQUEST

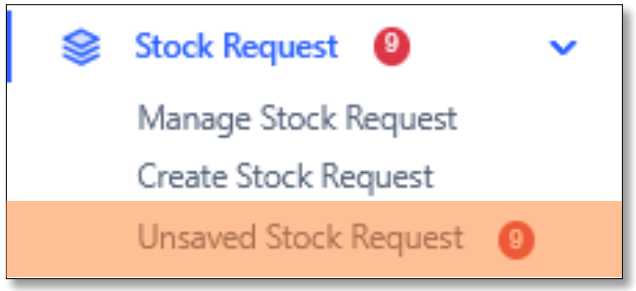

3. Select the **View Stock Request** icon.

4. You may also print a request by selecting the **Print** button once the **View Stock Request** screen appears.

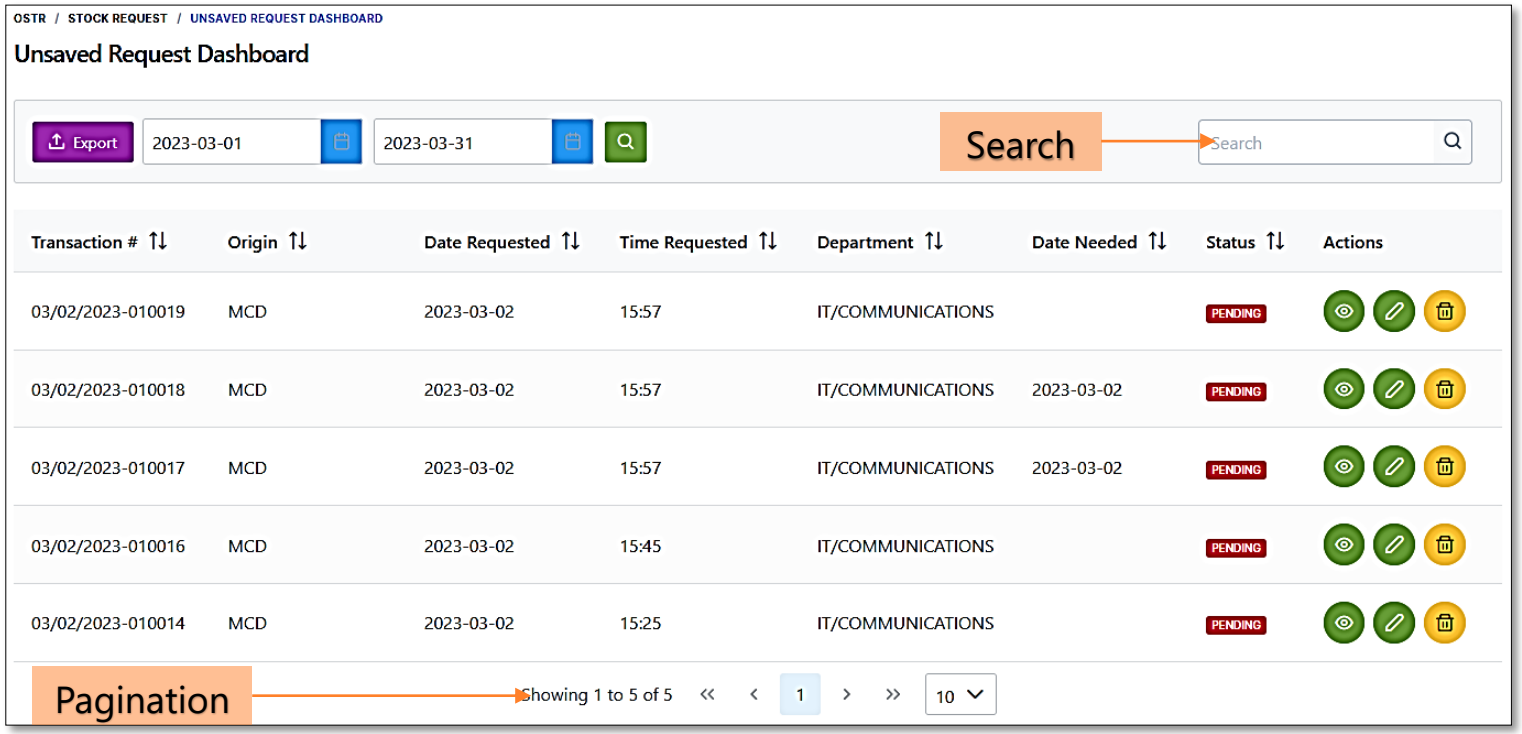

STOCK REQUEST

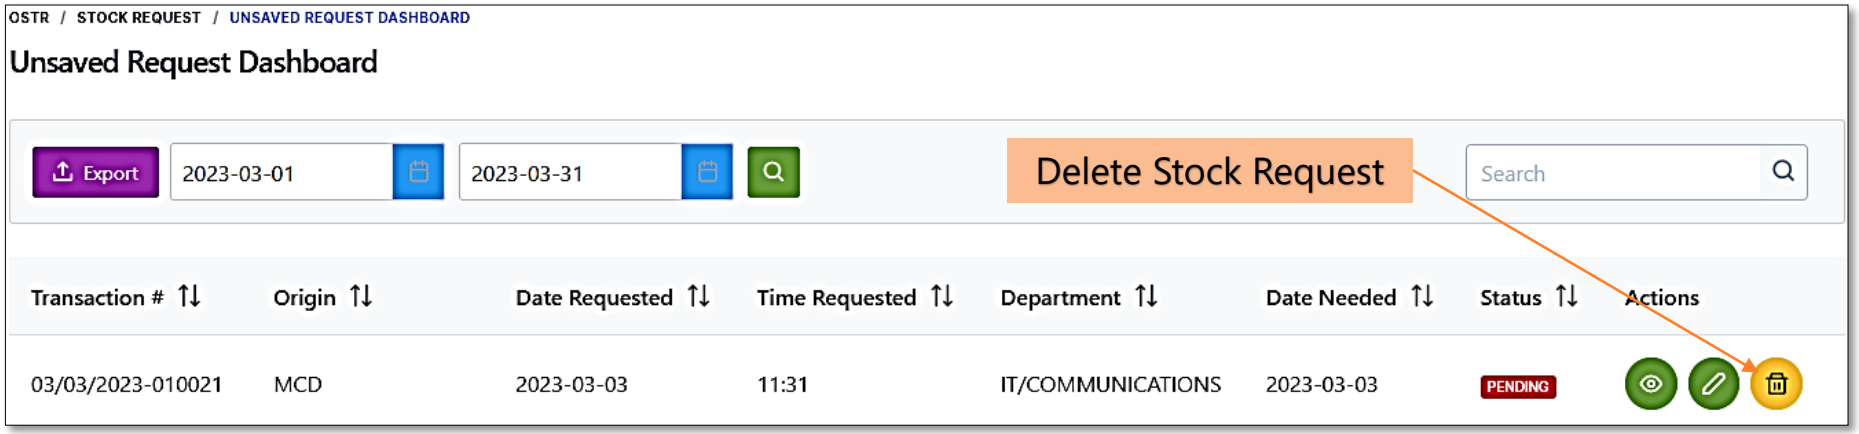

Delete an Unsaved Stock Request

1. Go to **Stock Request** and select the **Unsaved Stock Request** option.
2. View the **Unsaved Request Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the unsaved stock request you want to delete.

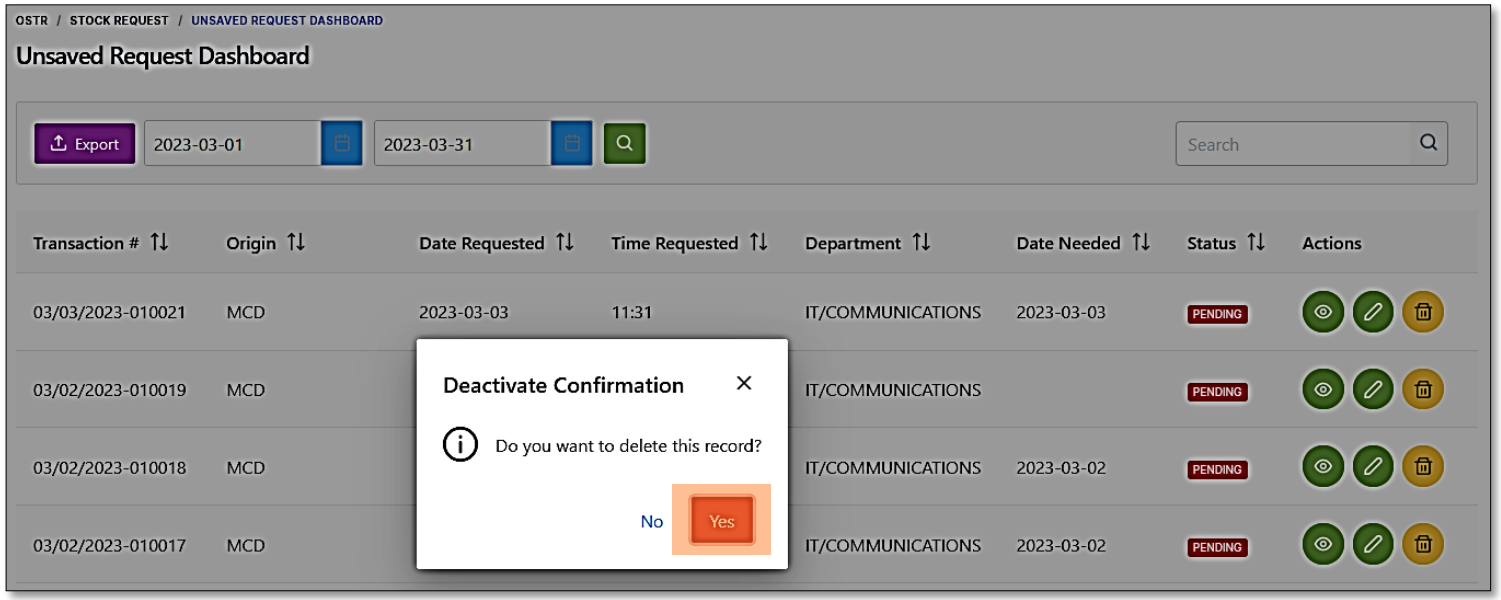

STOCK REQUEST

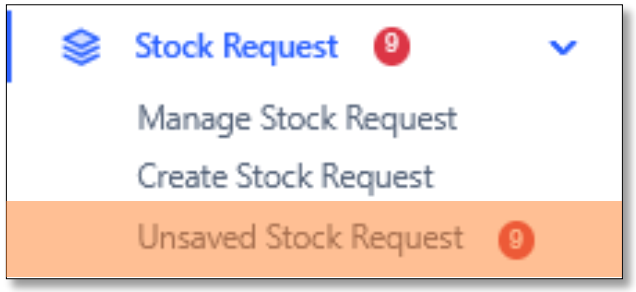

3. Select the **Delete Stock Request** icon. A pop-up box will appear asking if you want to continue the deletion process.

4. Click on the **Yes** button to complete the process.

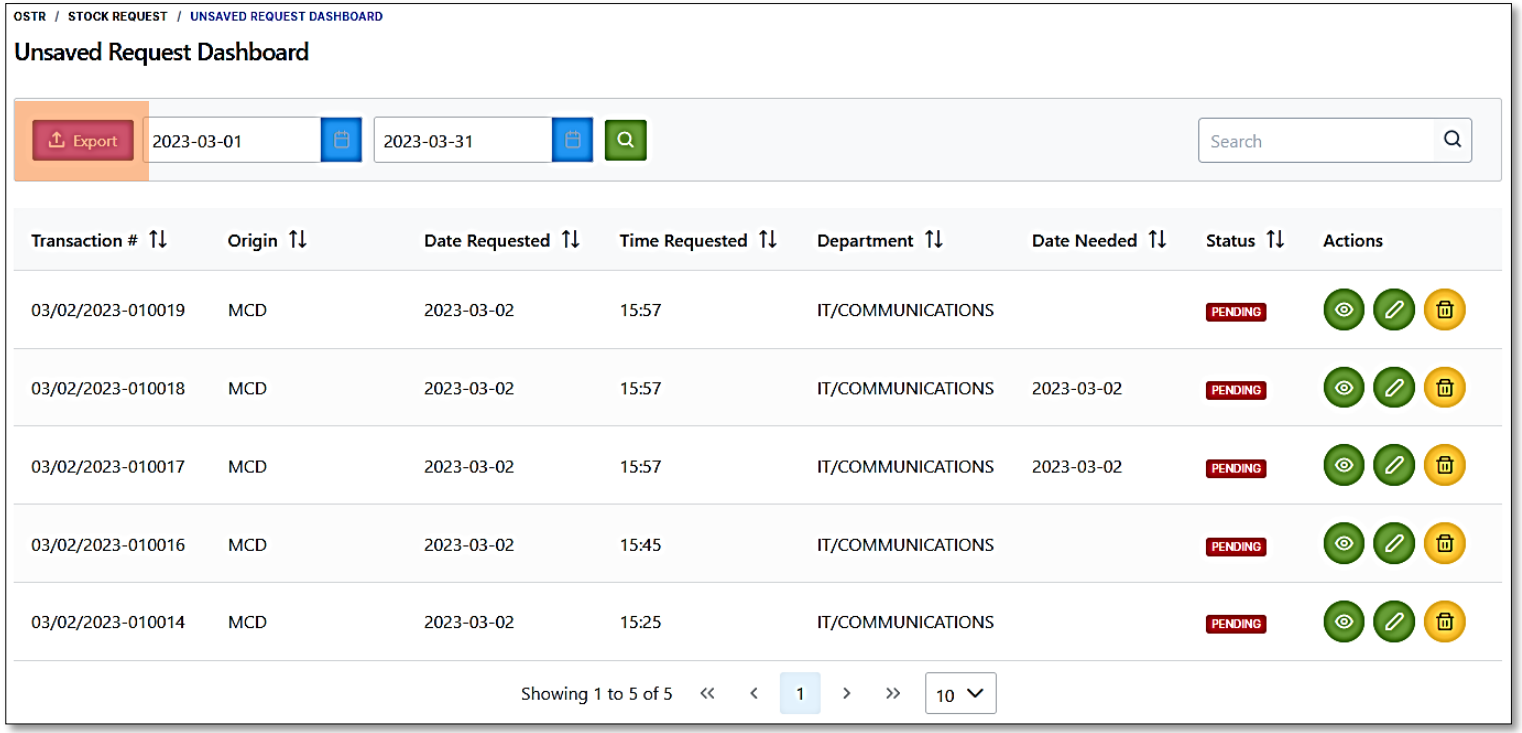

STOCK REQUEST

Export Unsaved Stock Requests

1. Go to **Stock Request** and select the **Unsaved Stock Request** option.
2. View the **Unsaved Request Dashboard** screen.
3. Click on the **Export** button to export the unsaved stock requests.

Chapter 4

TRANSACTIONS (WORKFLOW)

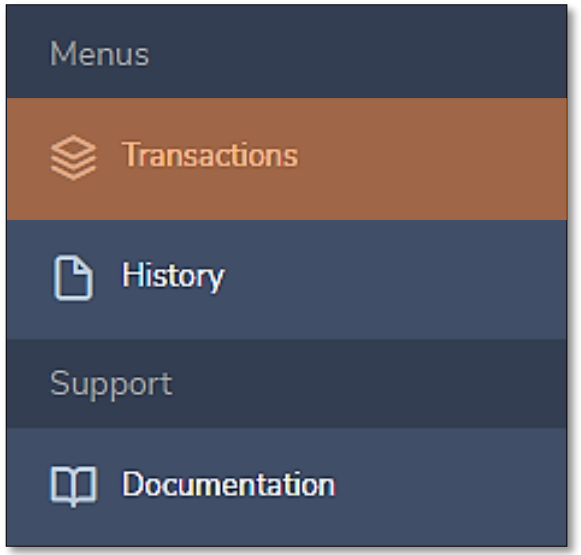

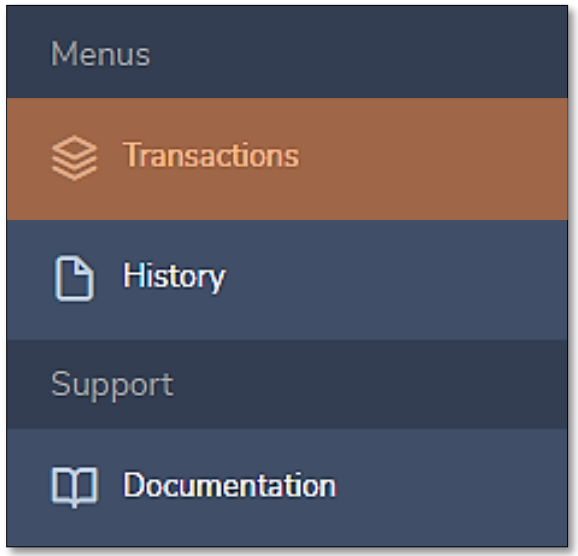

Table of Contents

TRANSACTIONS

Transactions

A Workflow module that displays information about pending and on-hold transaction requests.

You may also do the following:

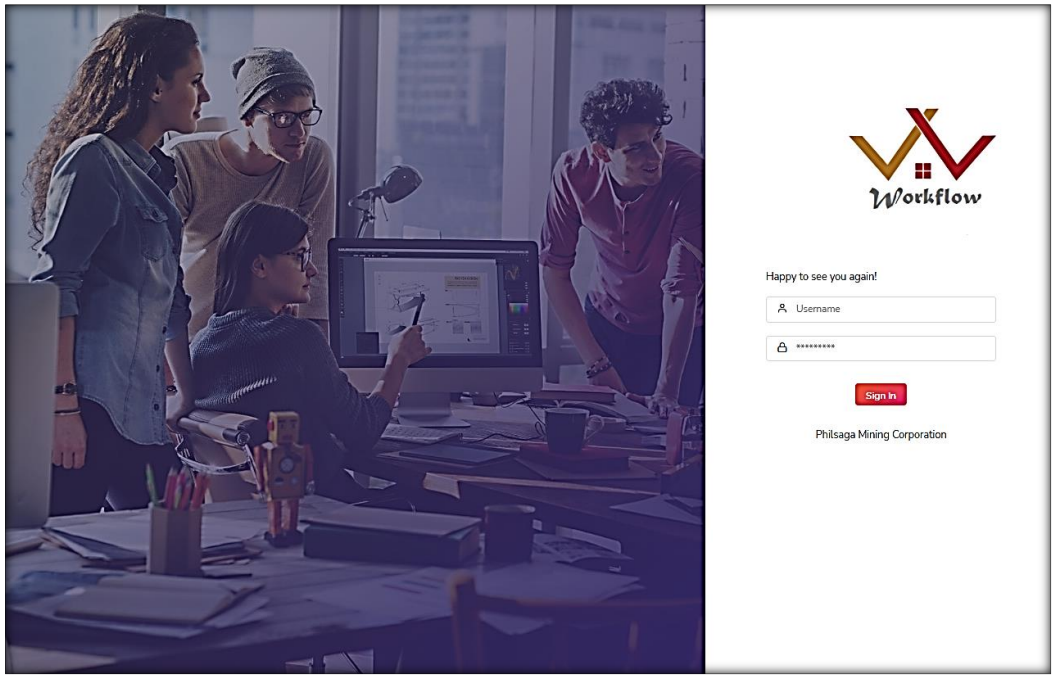

- View, approve, hold, and disapprove requests.

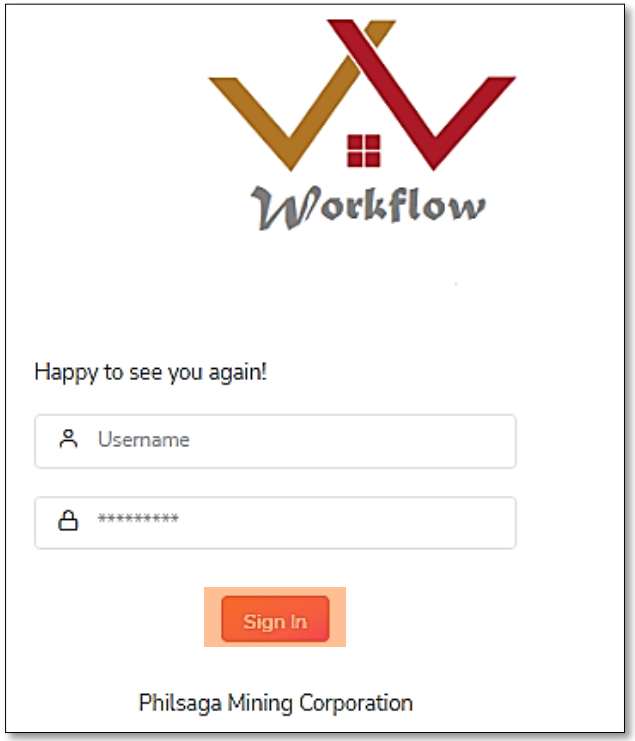

Note: Once a request is approved, you may view it in the Approval (WFS) on the OSTR module.

TRANSACTIONS

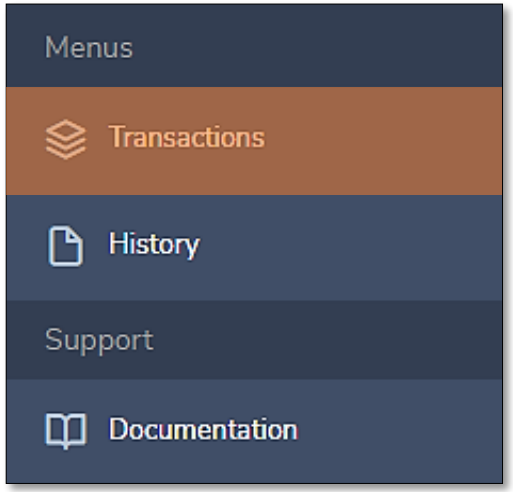

Login to Workflow

1. Open your browser and enter https://mlappsvrs.philsaga.com:8021/login in the web address.
2. Enter your credentials once the Workflow Login screen appears.
3. Click on the **Sign In** button.

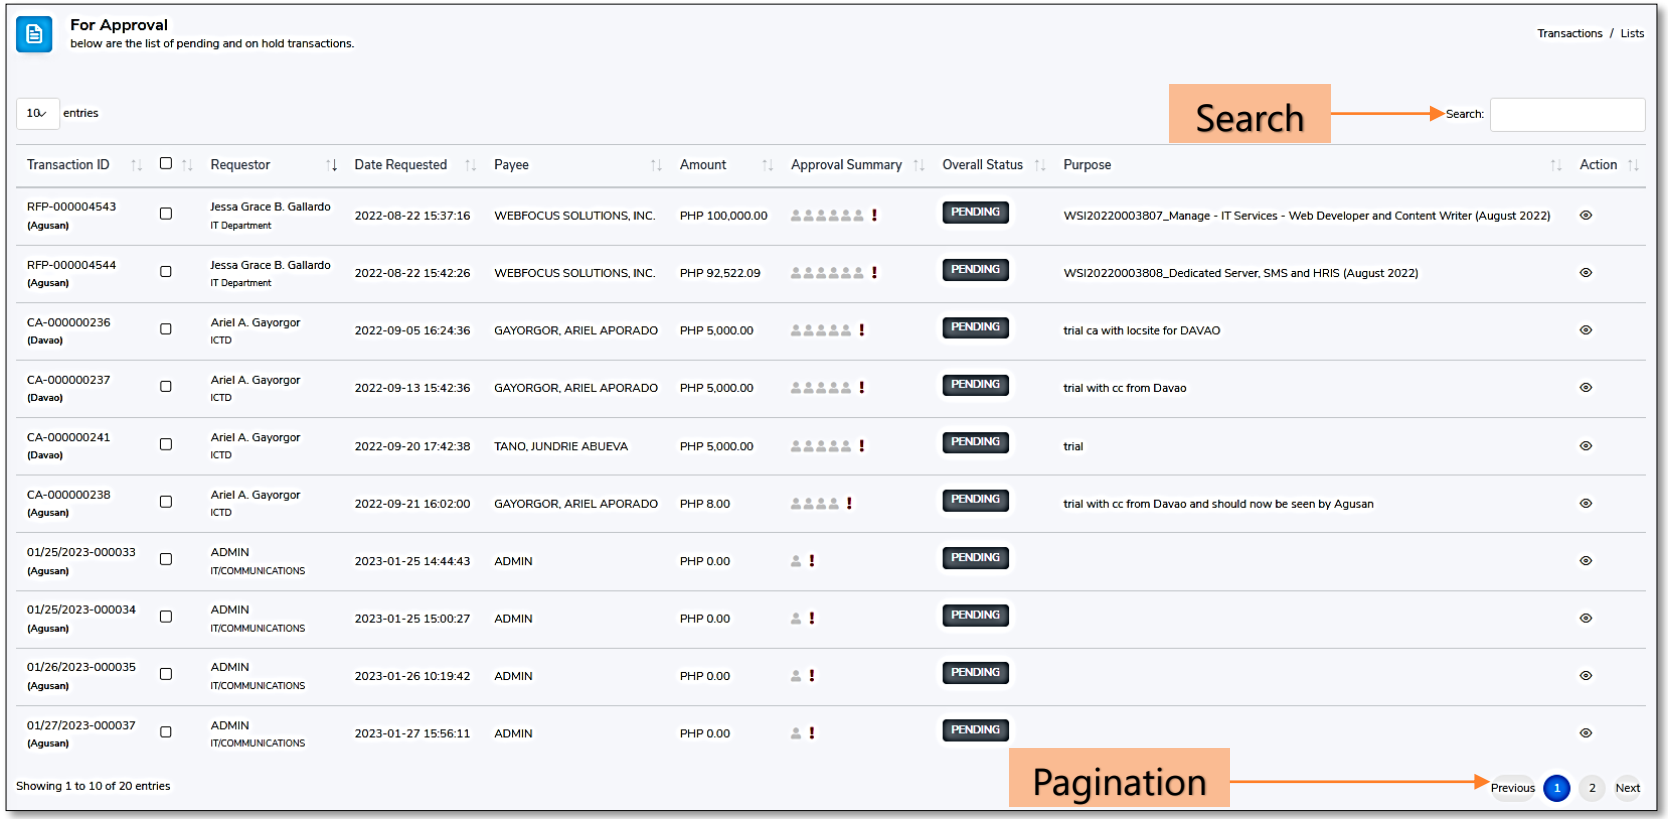

TRANSACTIONS

Approve a Transaction

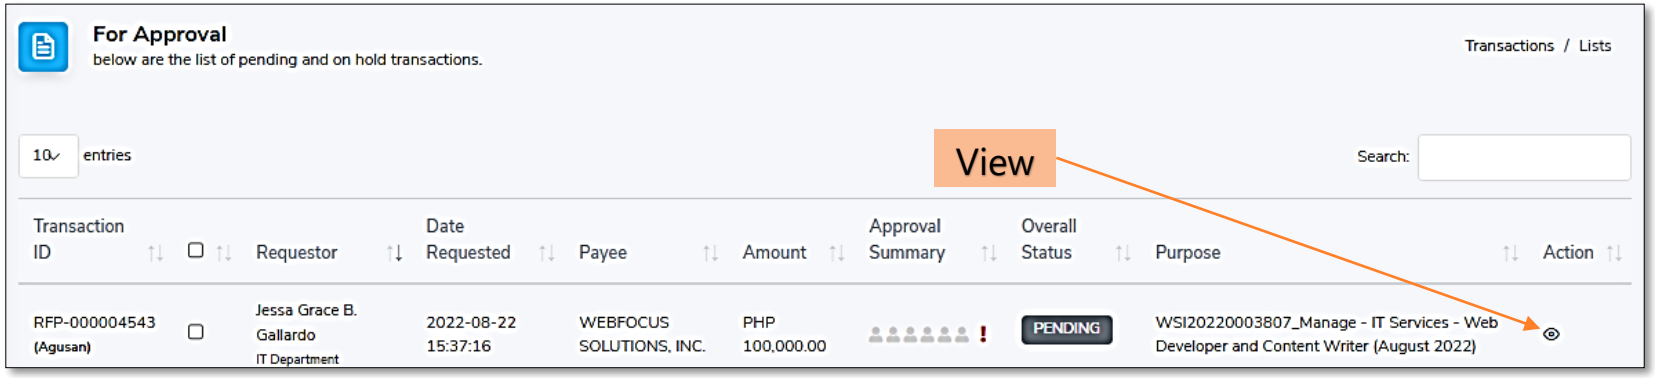

1. Go to **Menus** and select the **Transaction** option.
2. View the **For Approval** screen. You may use either the **search** or the **pagination** functions to look for the transaction you want to approve.

Note: Any approved requests cannot be canceled.

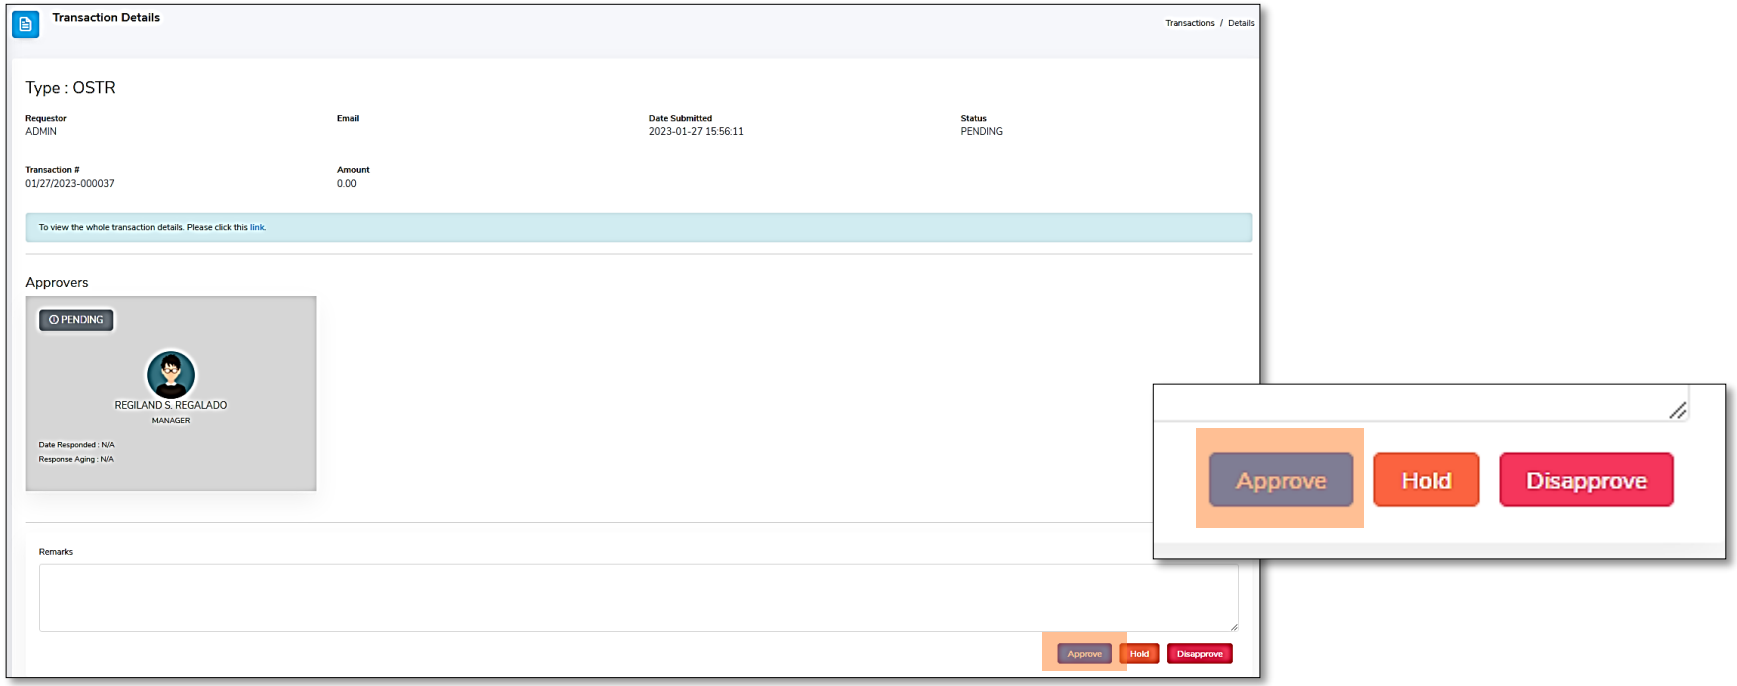

TRANSACTIONS

3. Choose the **View** icon and view the **Transaction Details** screen.

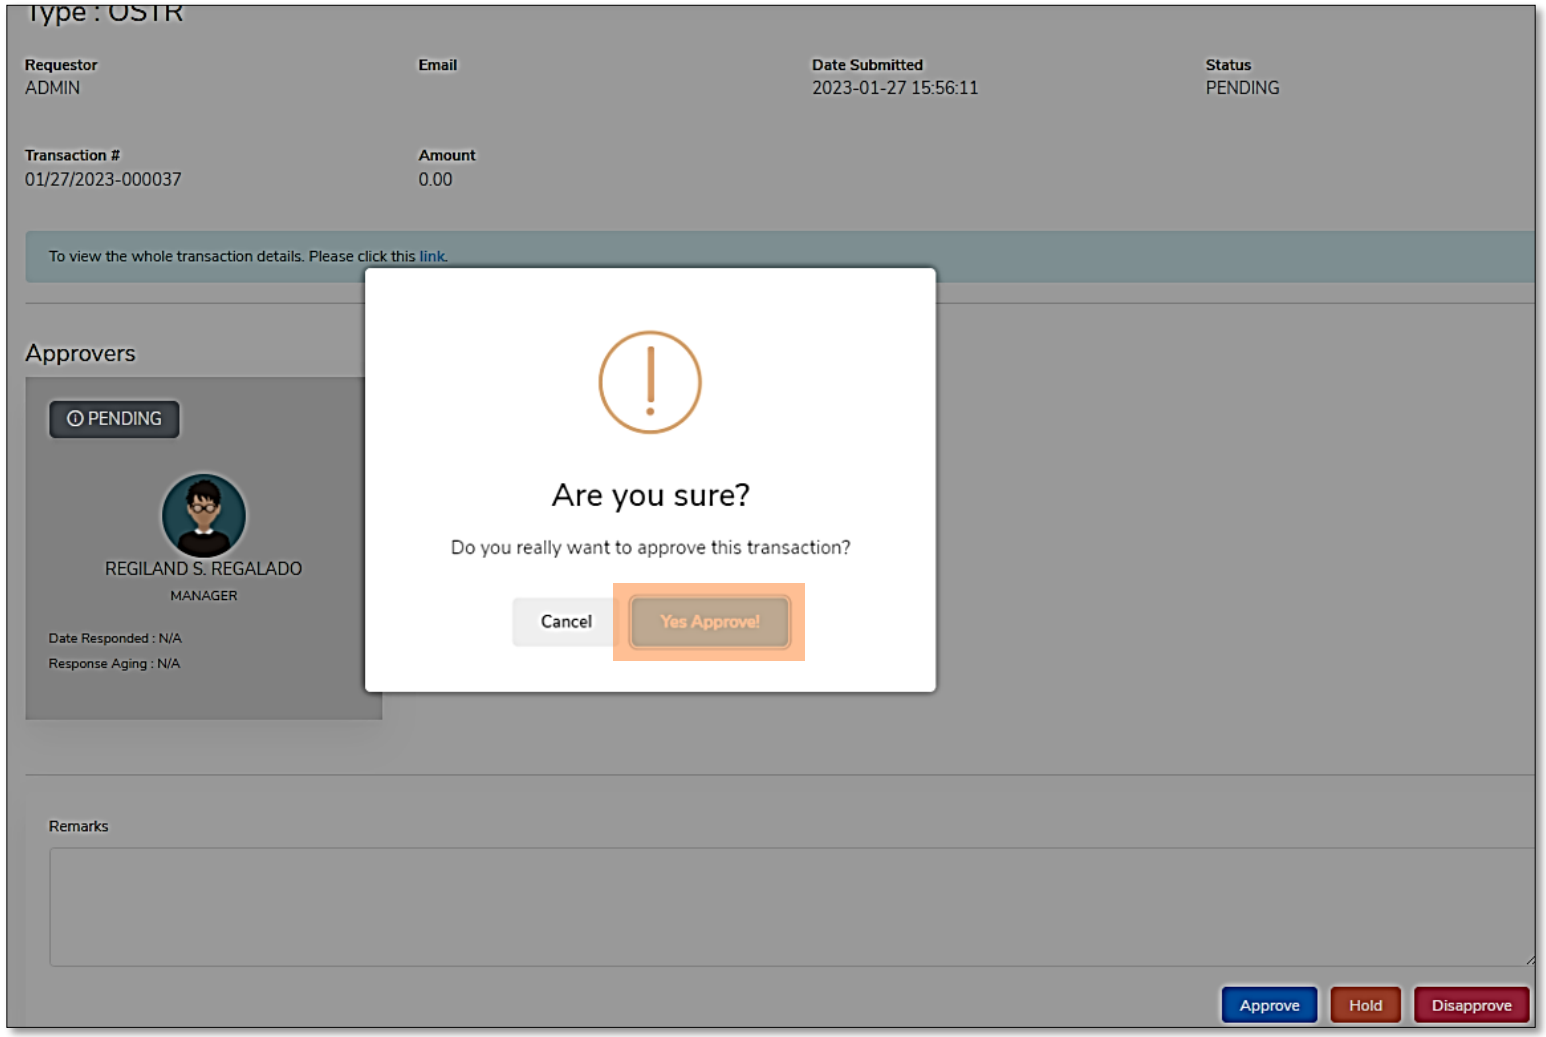

4. Select the **Approve** button to approve the transaction. A pop-up box will appear asking if you want to continue the approval process.

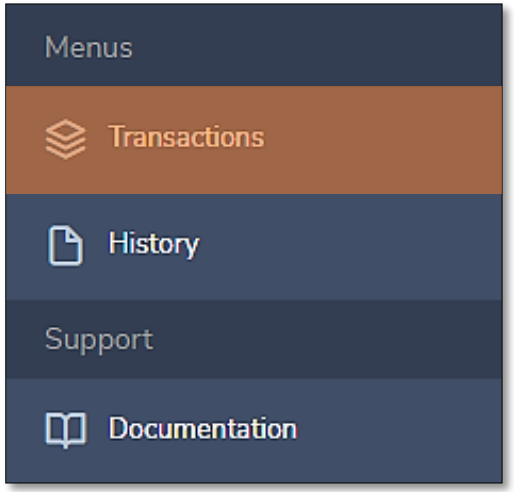

TRANSACTIONS

5. Click the **Yes Approve!** button to complete the process.

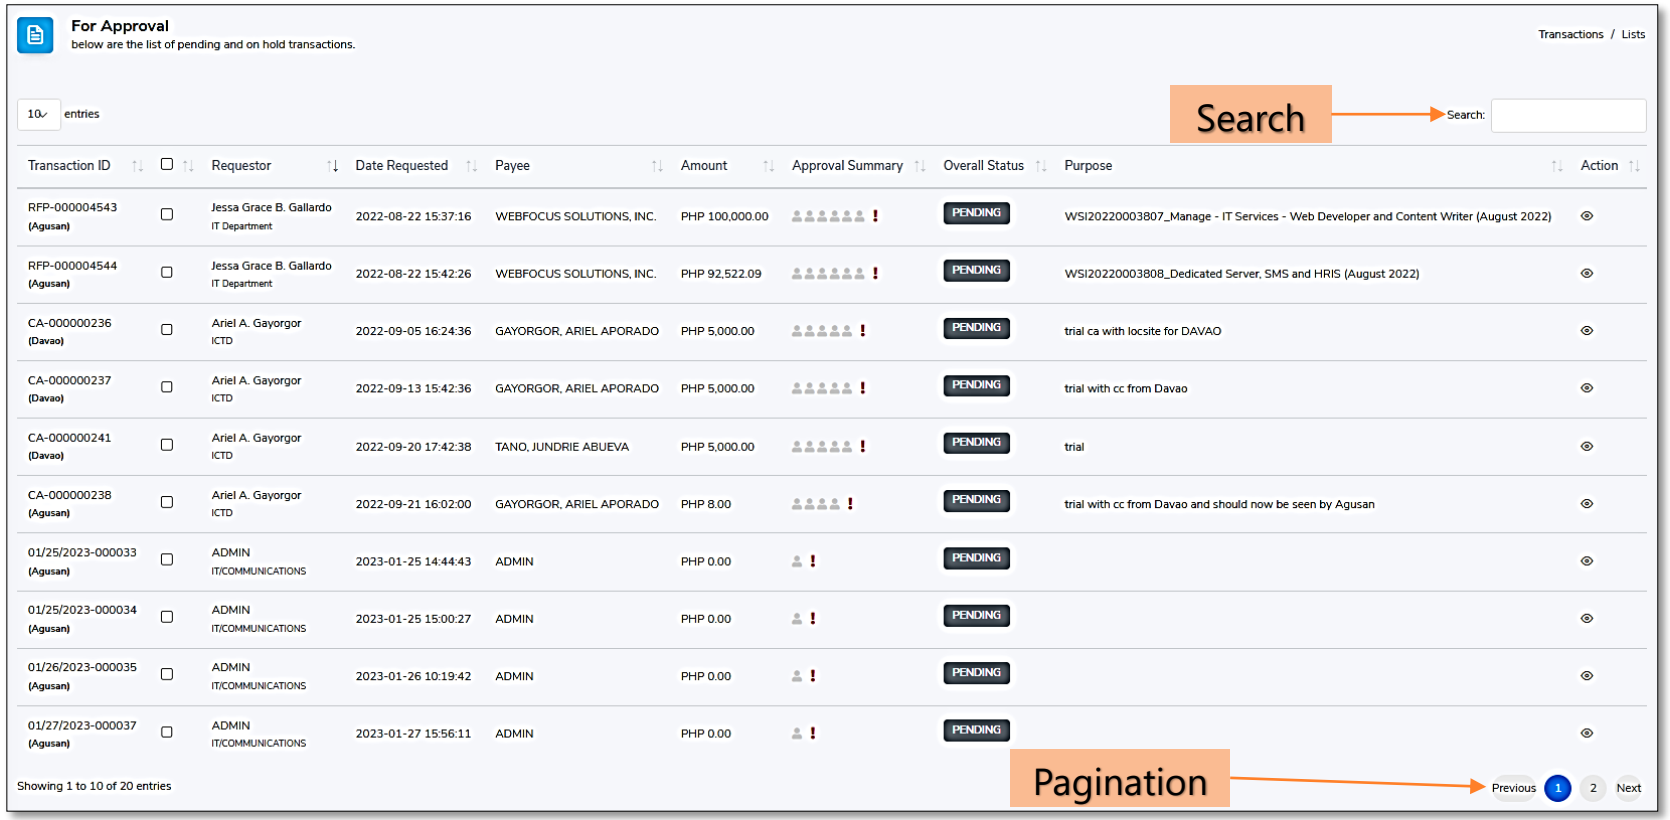

TRANSACTIONS

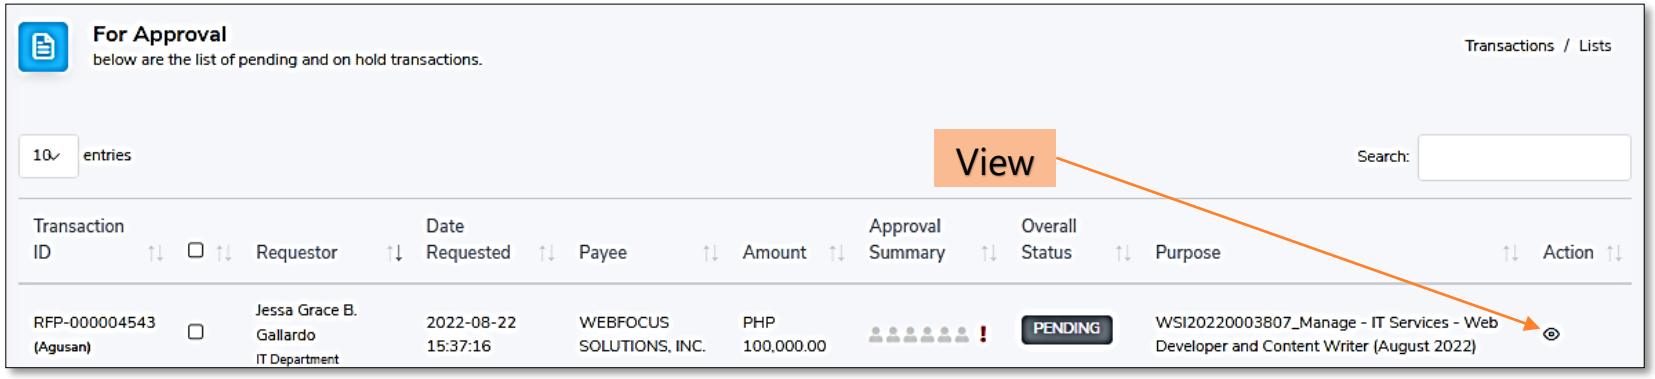

Hold a Transaction

1. Go to **Menus** and select the **Transaction** option.
2. View the **For Approval** screen. You may use either the **search** or the **pagination** functions to look for the transaction you want to hold.

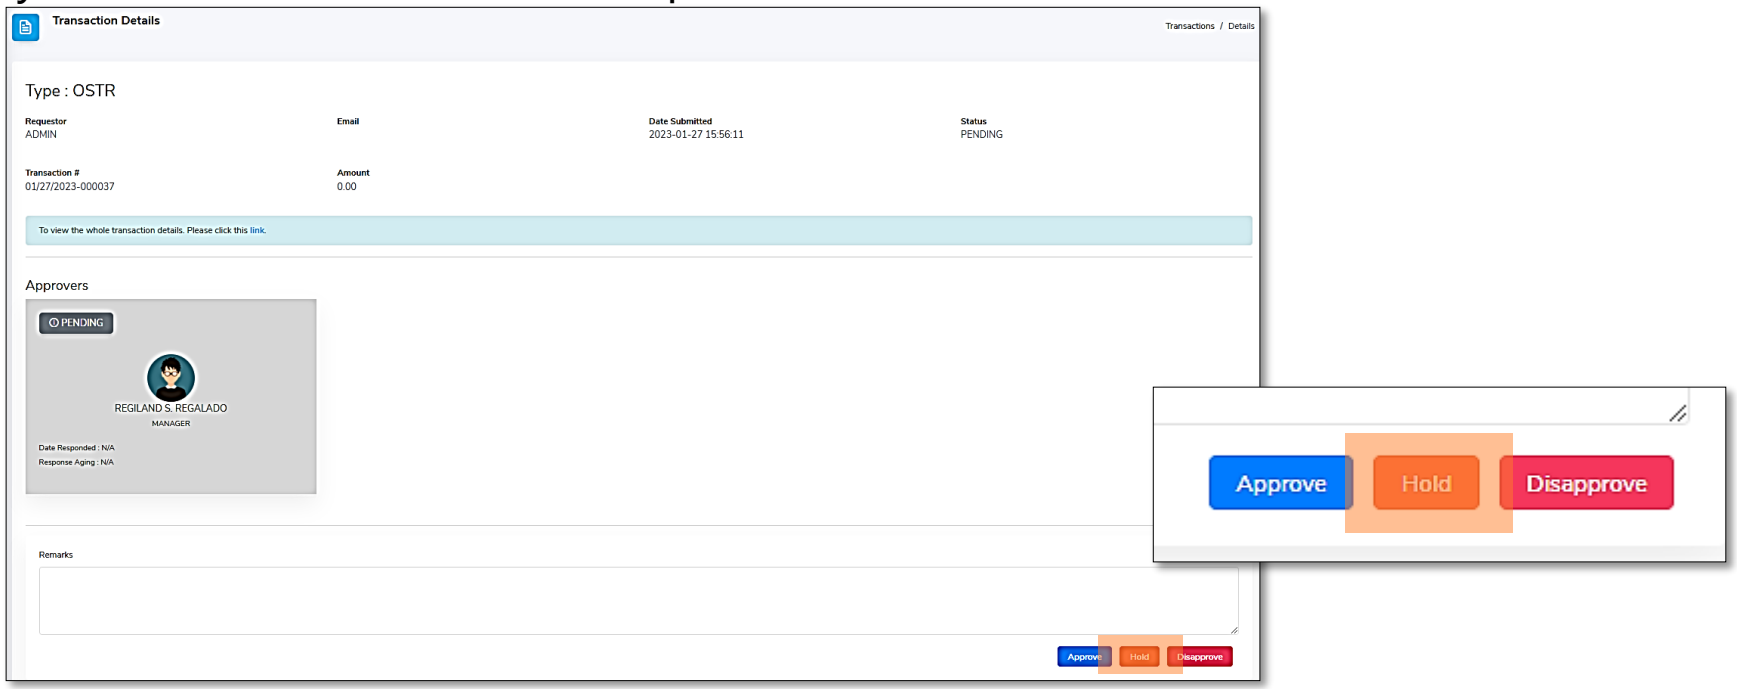

TRANSACTIONS

3. Choose the **View** icon and view the **Transaction Details** screen.

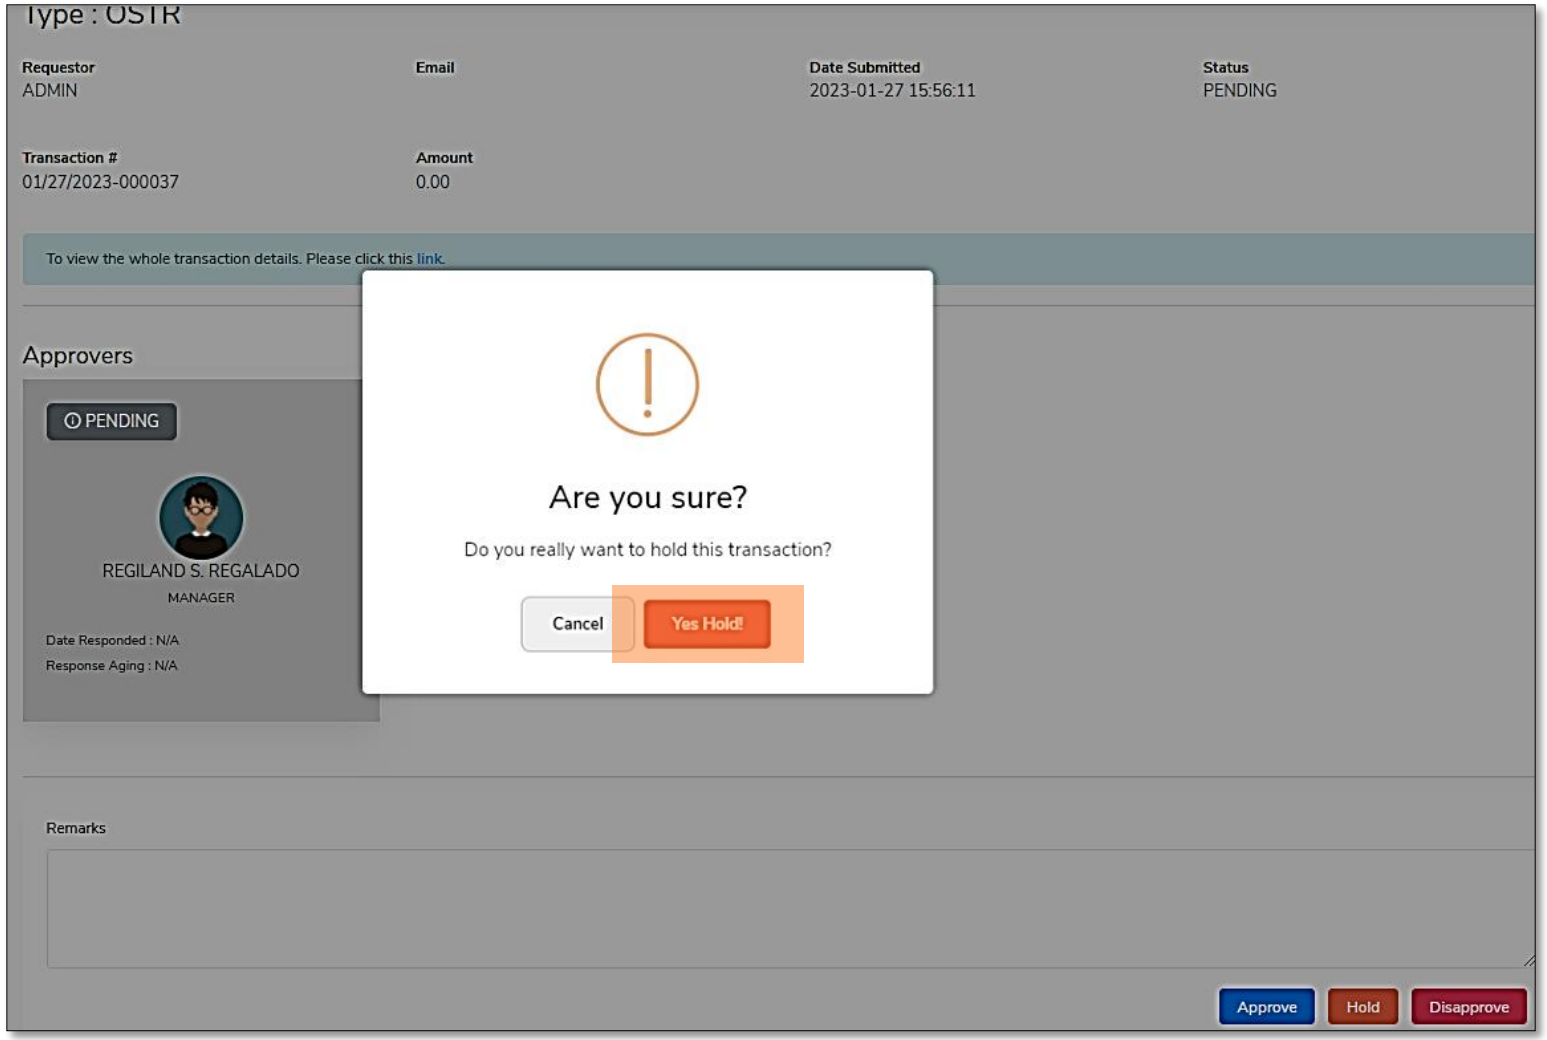

4. Select the **Hold** button to approve the transaction. A pop-up box will appear asking if you want to continue the hold process.

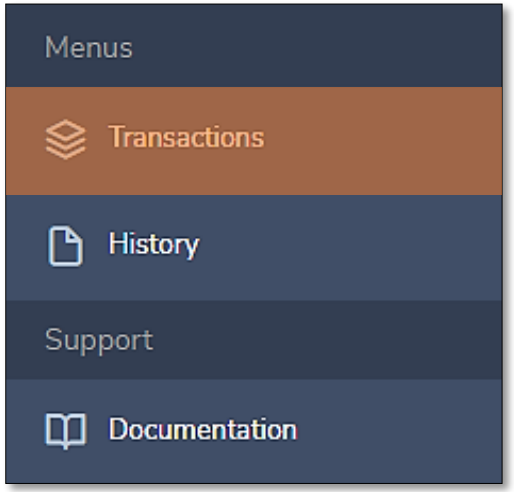

TRANSACTIONS

5. Click the **Yes Hold!** button to complete the process.

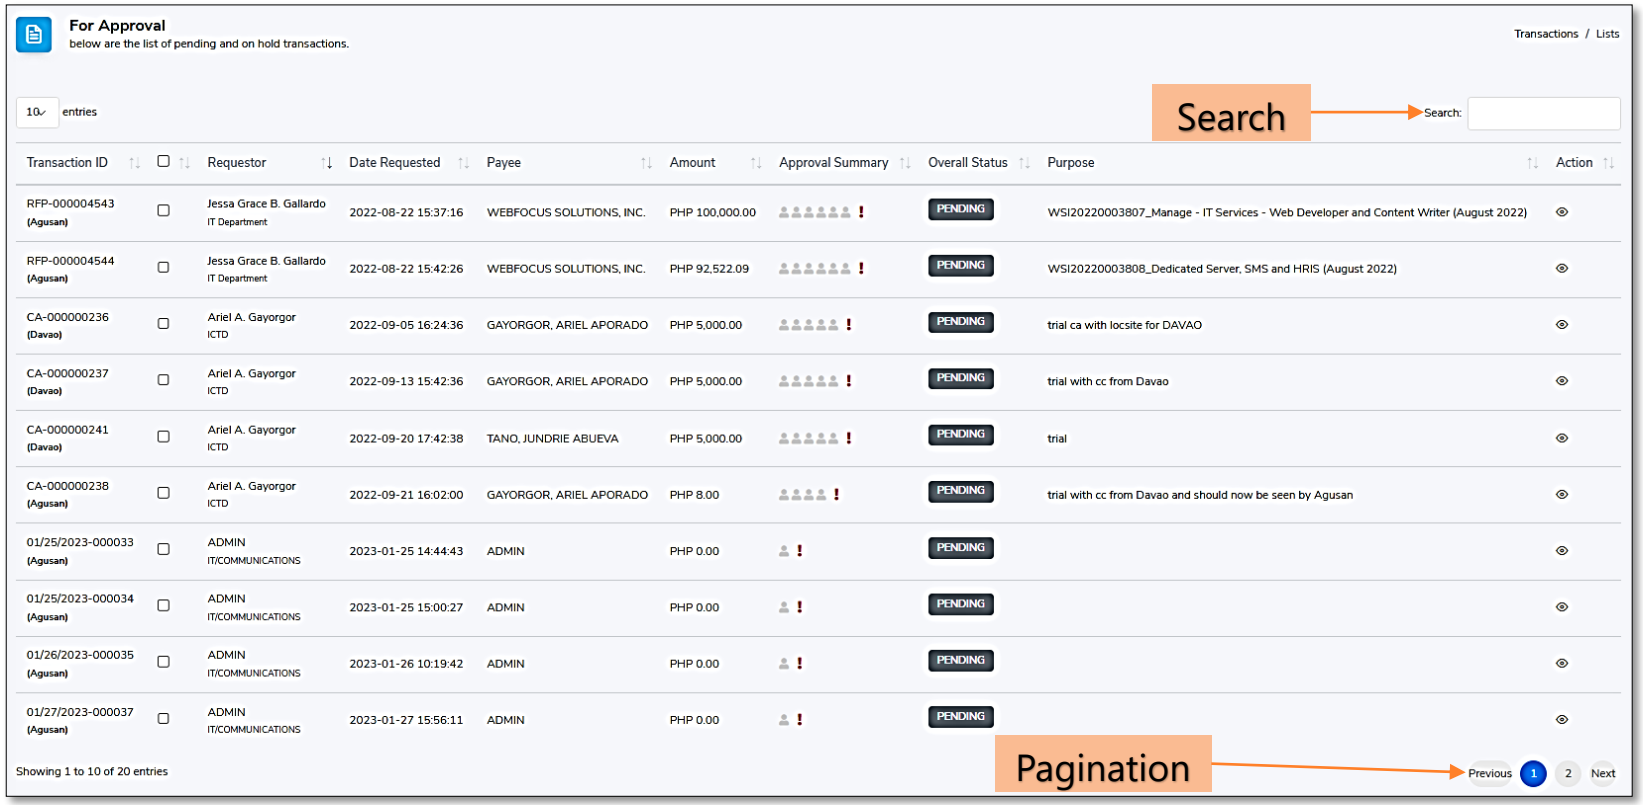

TRANSACTIONS

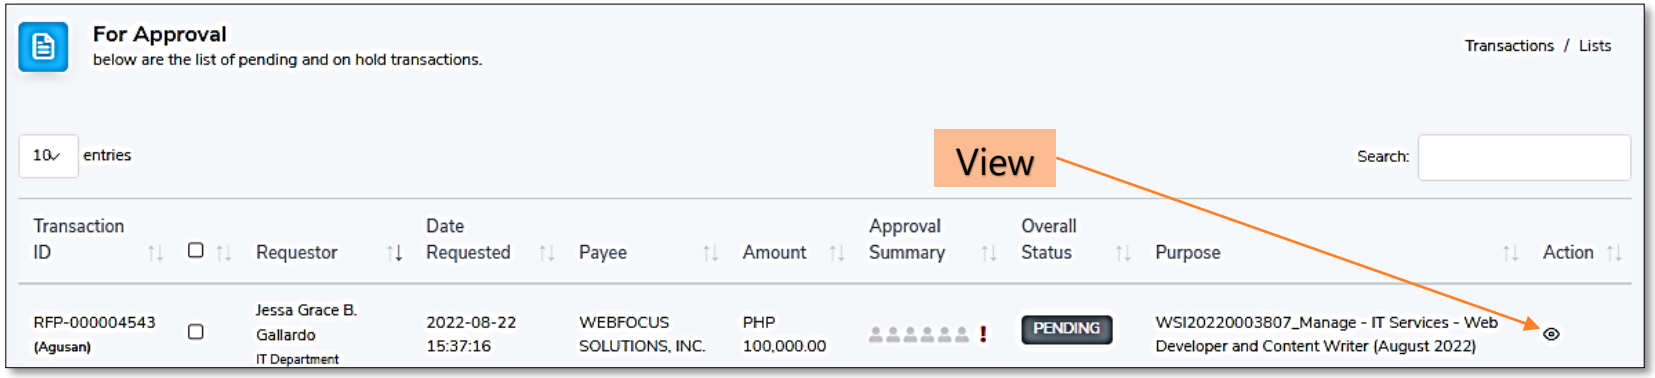

Disapprove a Transaction

1. Go to **Menus** and select the **Transaction** option.
2. View the **For Approval** screen. You may use either the **search** or the **pagination** functions to look for the transaction you want to disapprove.

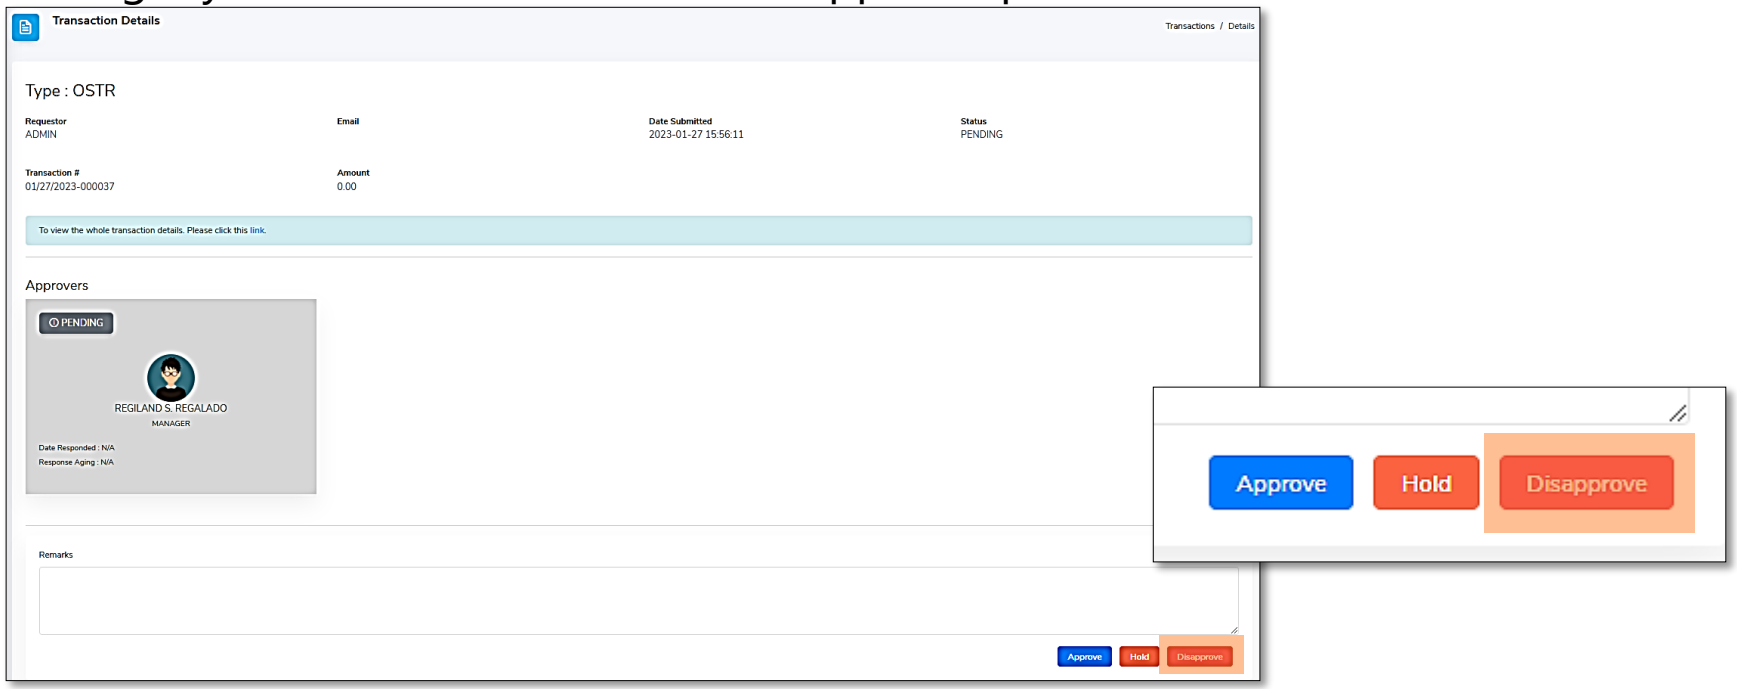

TRANSACTIONS

3. Choose the **View** icon and view the **Transaction Details** screen.

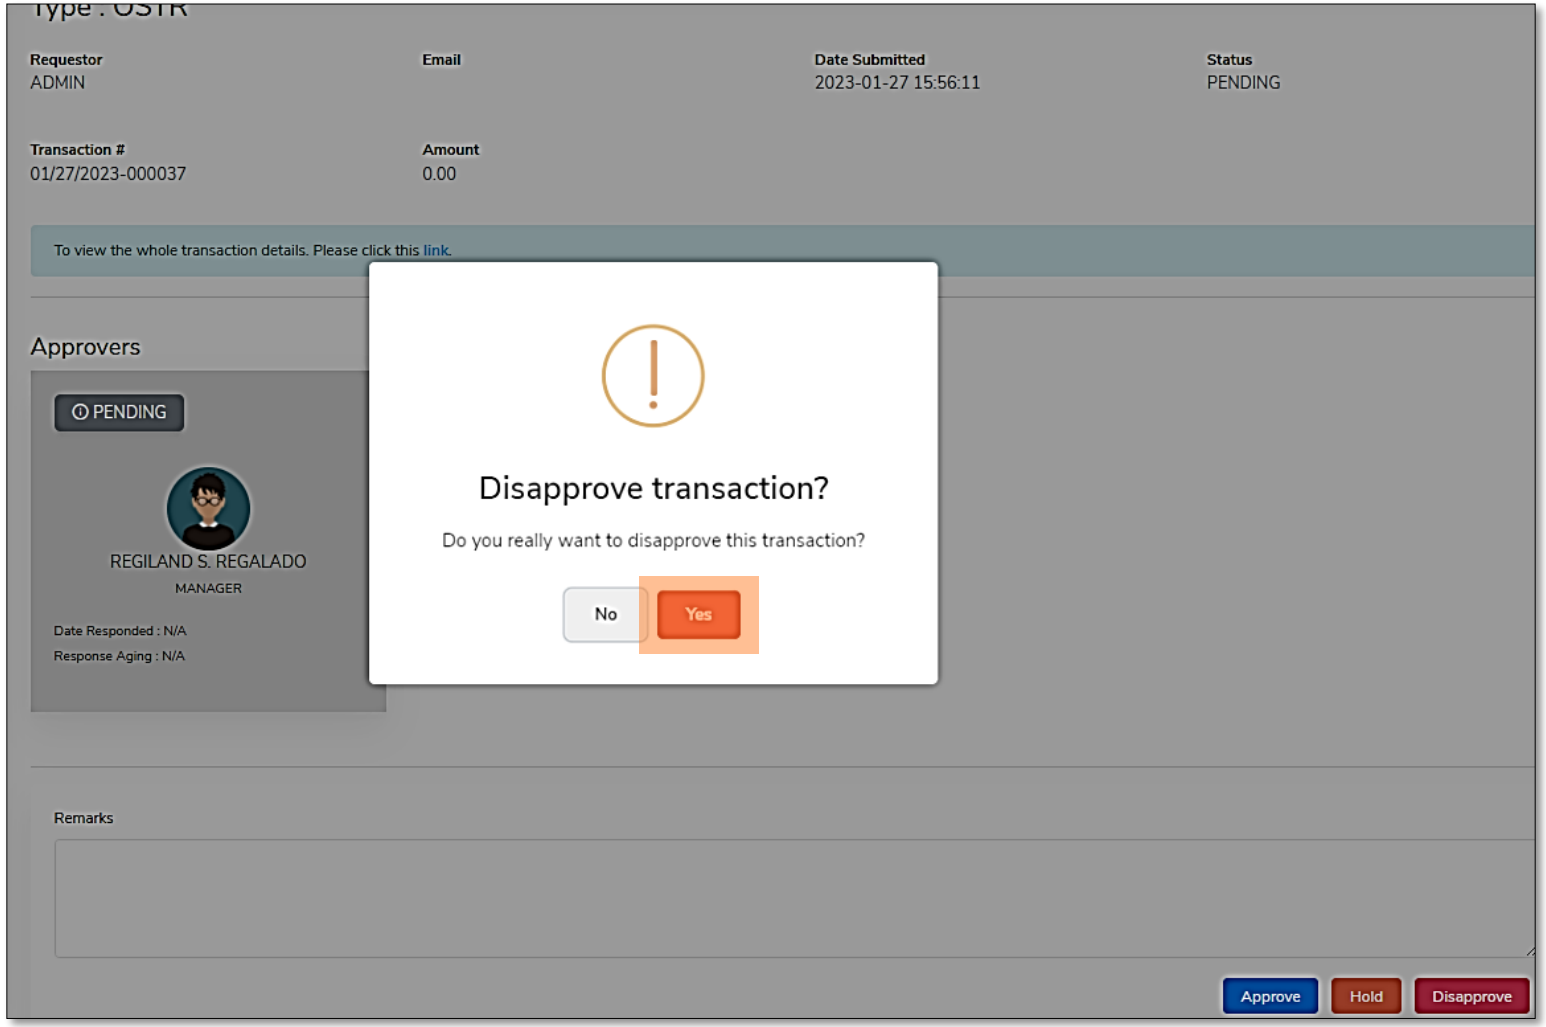

4. Select the **Disapprove** button to approve the transaction. A pop-up box will appear asking if you want to continue the disapproval process.

TRANSACTIONS

5. Click the **Yes** button to complete the process.

Chapter 5

APPROVAL (WFS)

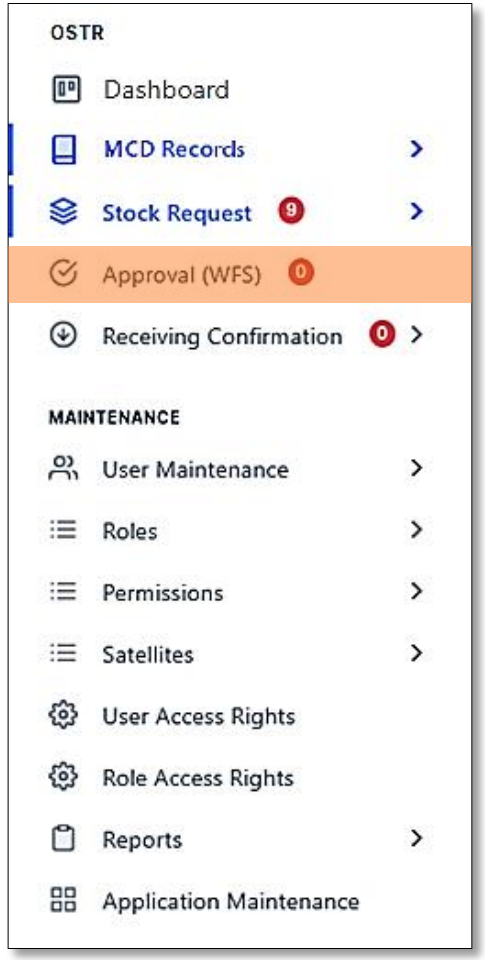

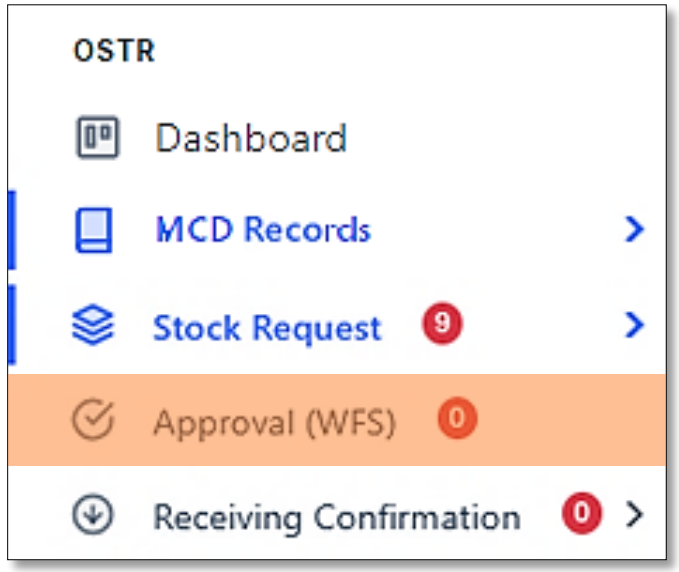

Table of Contents

APPROVAL (WFS)

Approval (WFS)

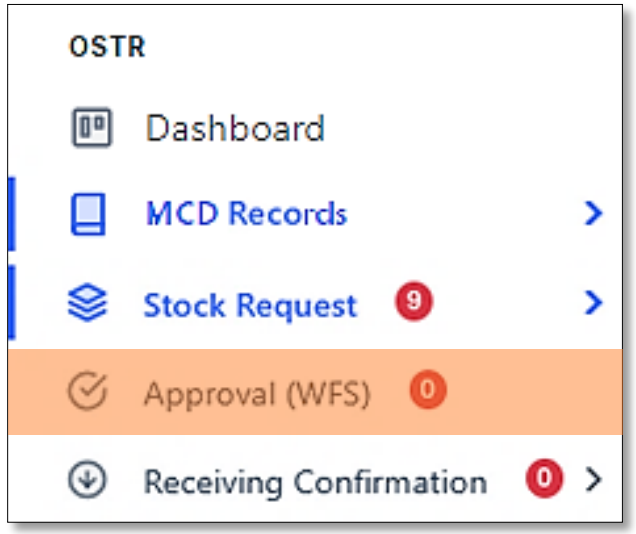

An OSTR module that displays information about approved requests.

You may also do the following:

- View, cancel, print, and export approved requests.

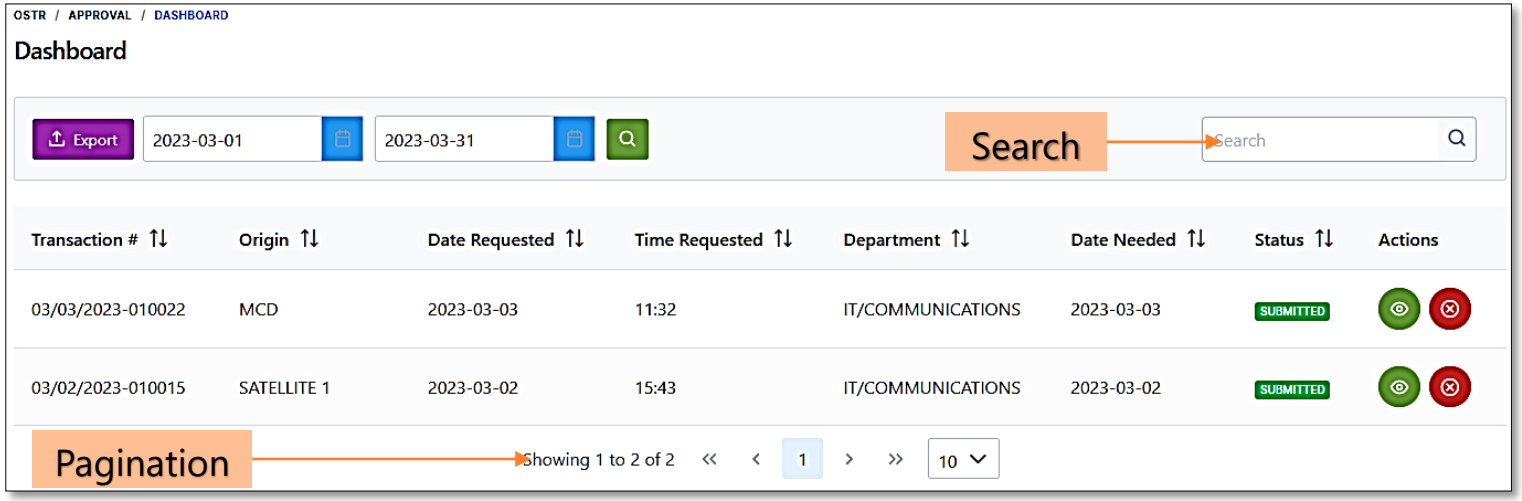

Note: You may only view approved requests after they were approved in Workflow's Transaction module.

APPROVAL (WFS)

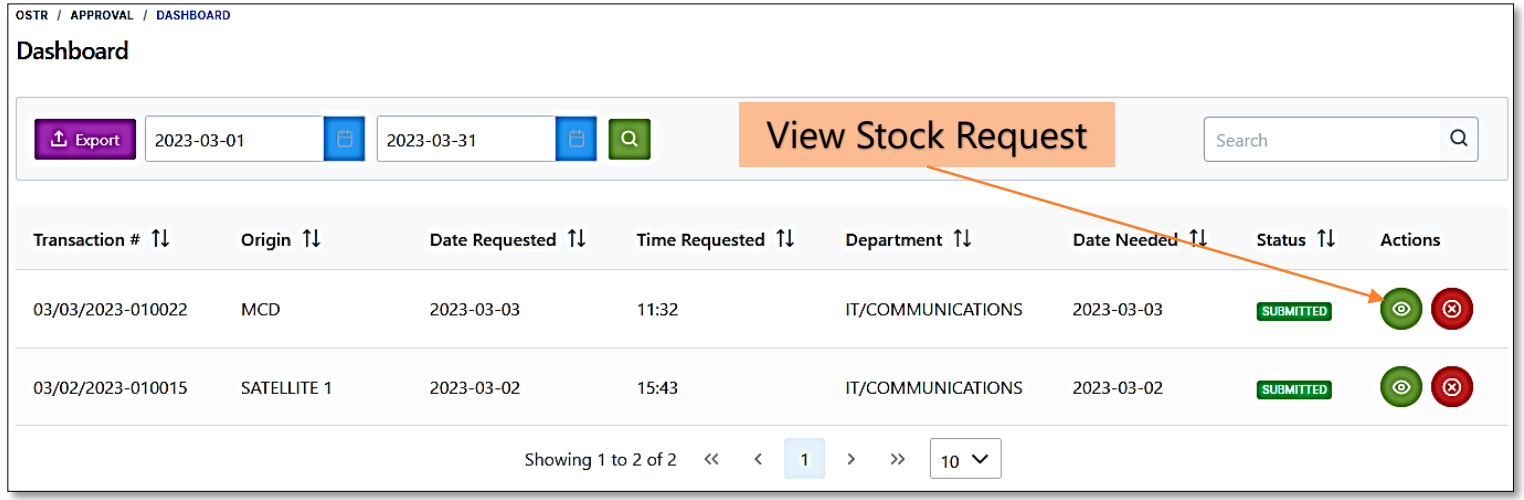

View an Approved Request

1. Go to **Approval (WFS)**.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the approved request you want to view.

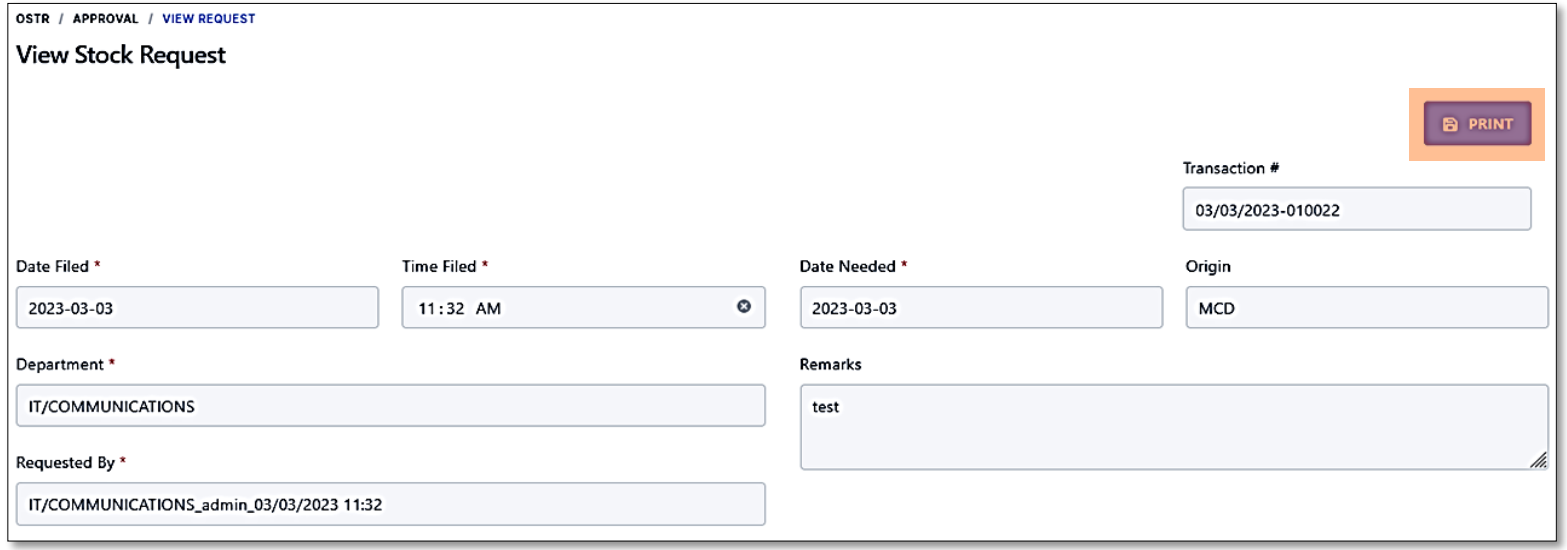

APPROVAL (WFS)

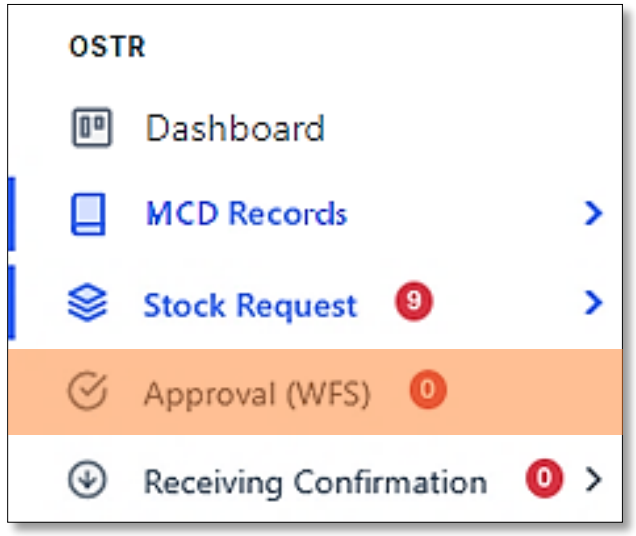

3. Select the **View Stock Request** icon.

4. You may also print a request by selecting the **Print** button once the **View Stock Request** screen appears.

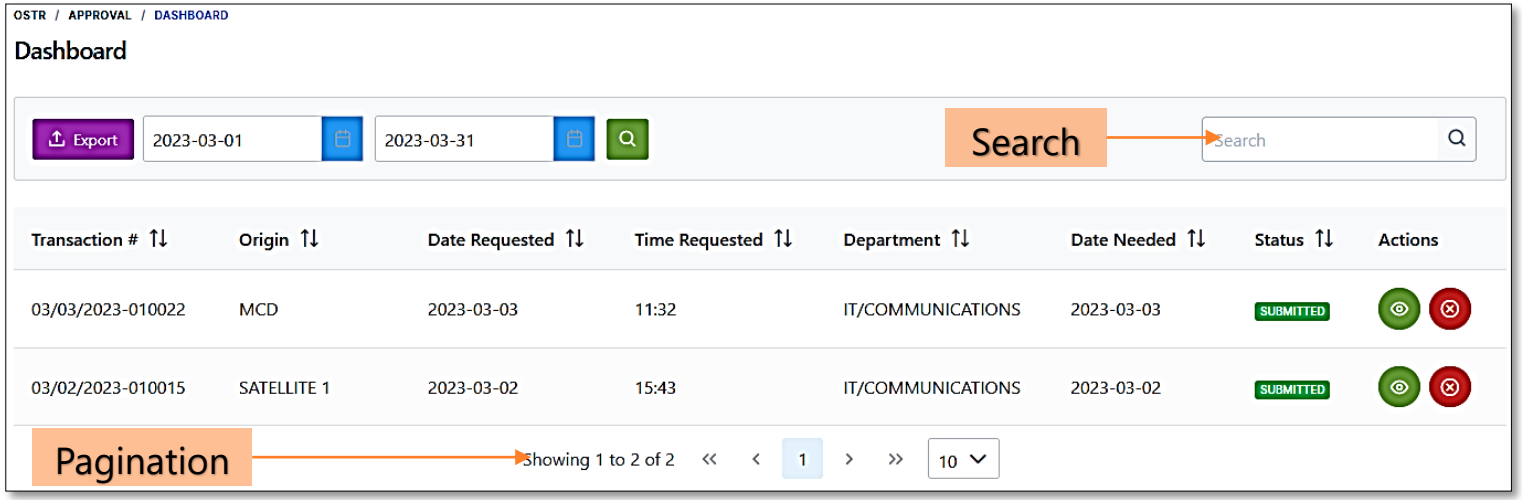

APPROVAL (WFS)

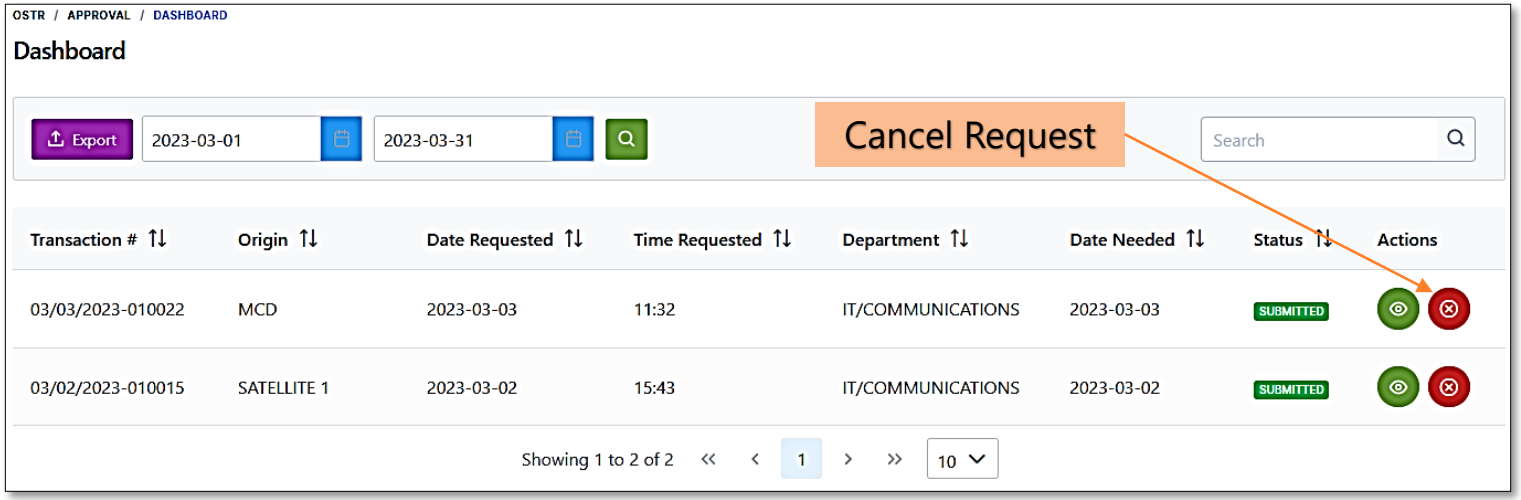

Cancel an Approved Request

1. Go to **Approval (WFS)**.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the approved request you want to cancel.

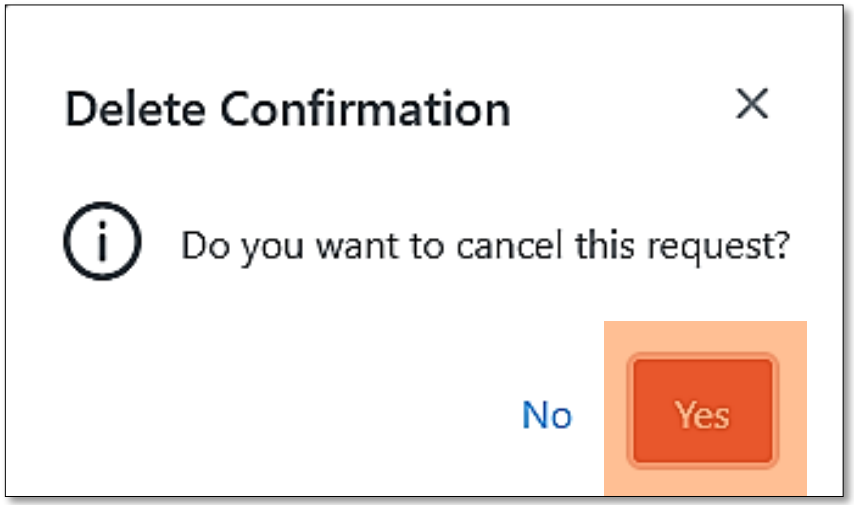

APPROVAL (WFS)

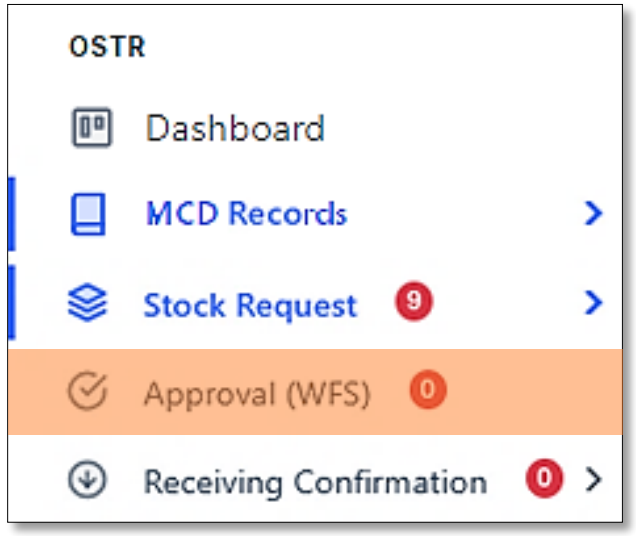

3. Select the **Cancel Request** icon. A pop-up box will appear asking if you want to continue the cancelation process.

4. Click the **Yes** button to complete the process.

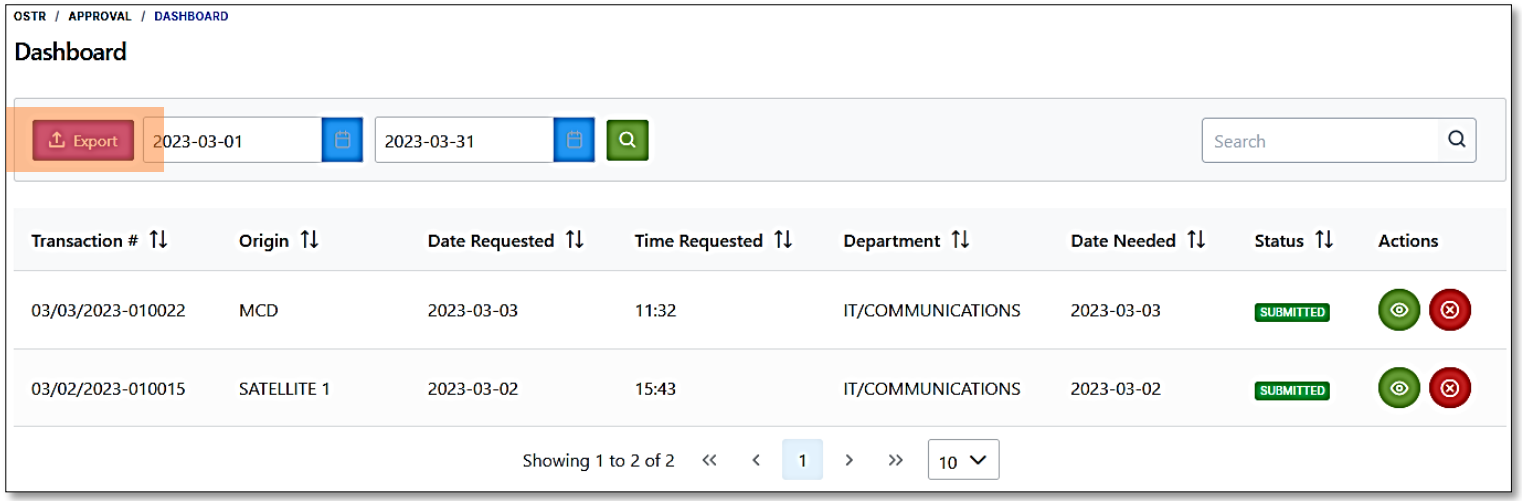

APPROVAL (WFS)

Export Approved Requests

1. Go to **Approval (WFS)**.
2. View the **Dashboard** screen.
3. Click on the **Export** button to export the approved requests.

Chapter 6

RECEIVING CONFIRMATION

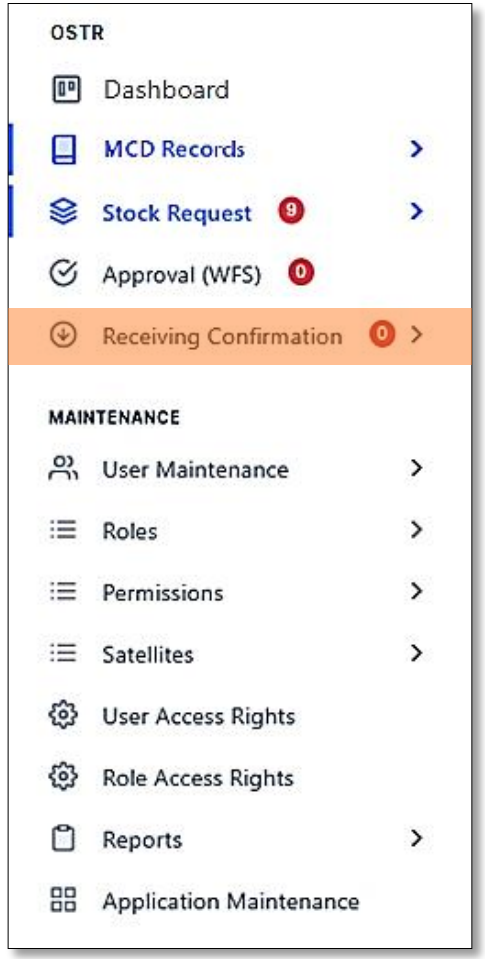

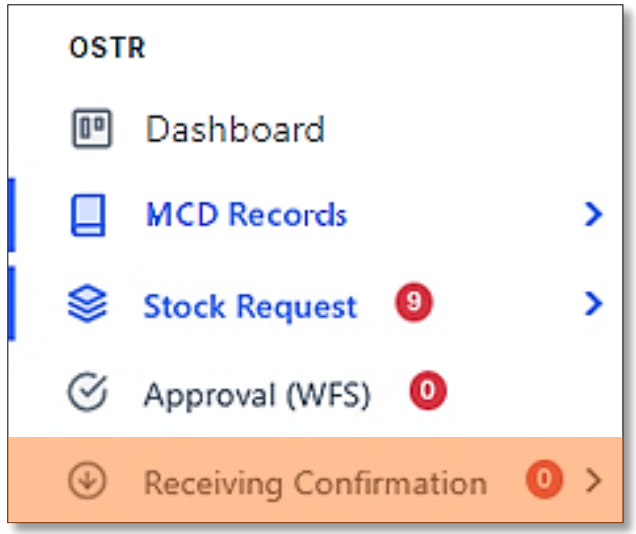

Table of Contents

RECEIVING CONFIRMATION

Receiving Confirmation

An OSTR module that displays information about stock transfer requests that are approved and received.

You may also do the following:

- View, cancel, print, and export stock transfer requests.
- Add, edit, and delete a stock transfer request's items.

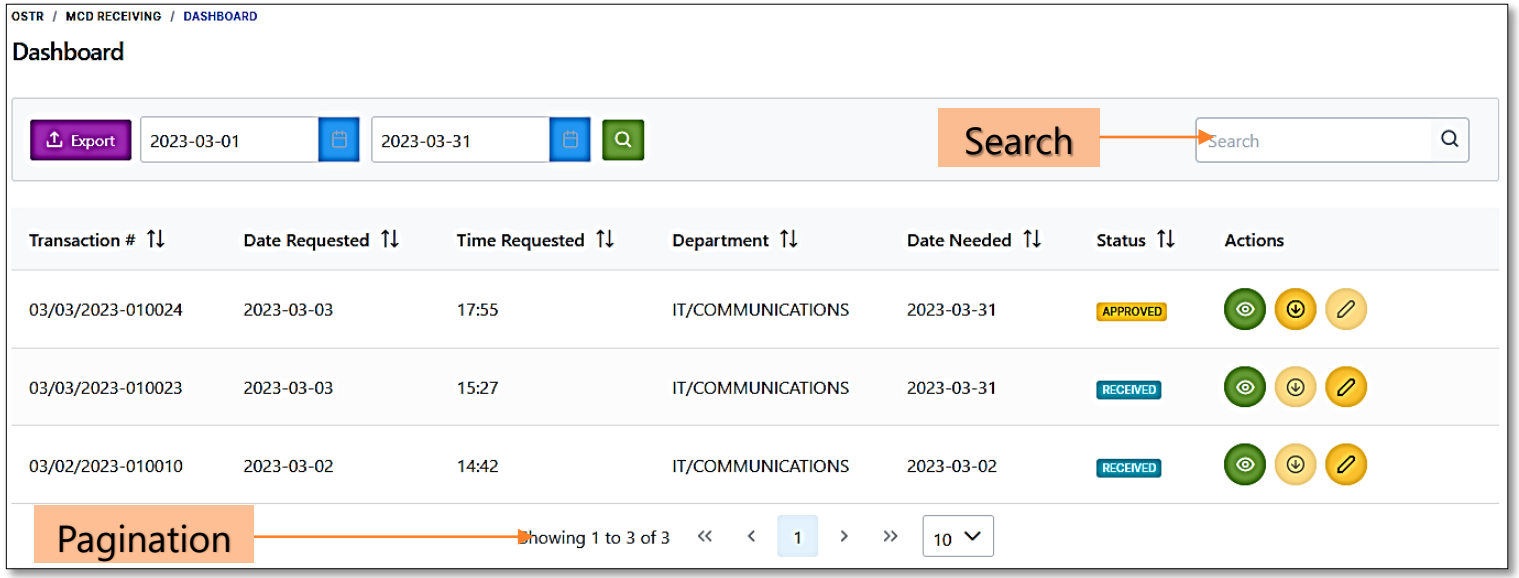

RECEIVING CONFIRMATION

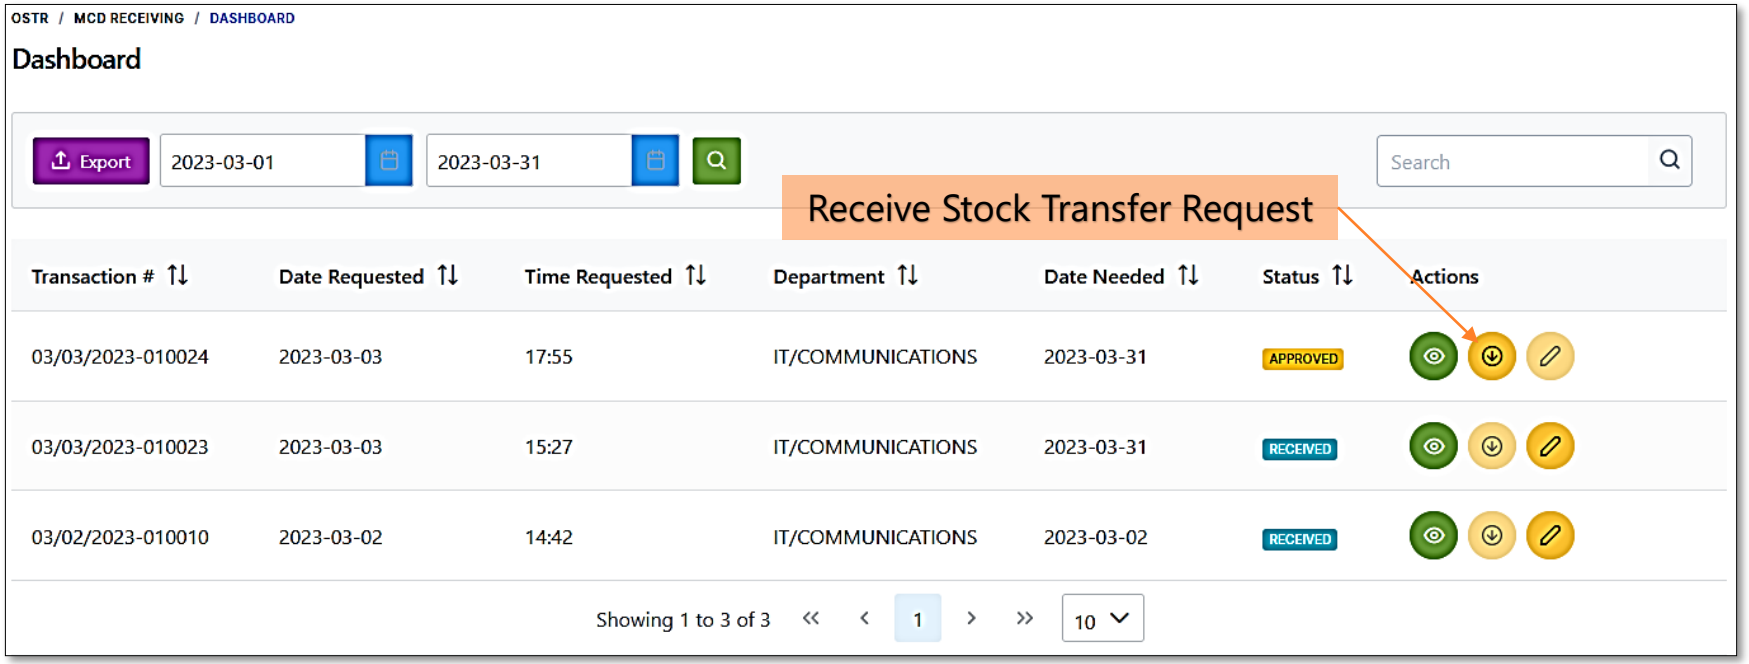

Receive a Stock Transfer Request

1. Go to **Receiving Confirmation** and select the **Manage Receiving** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock transfer request you want to receive.

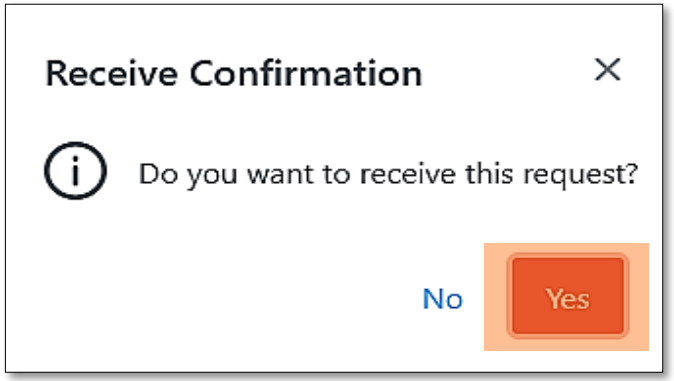

RECEIVING CONFIRMATION

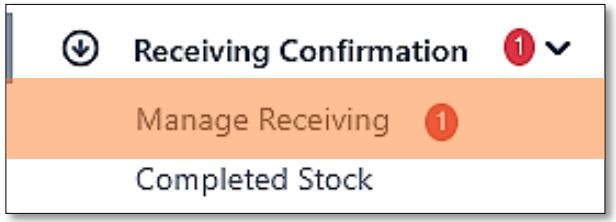

3. Select the **Receive Stock Request** icon. A pop-up box will appear asking if you want to continue the receiving process.

4. Click the **Yes** button to complete the process.

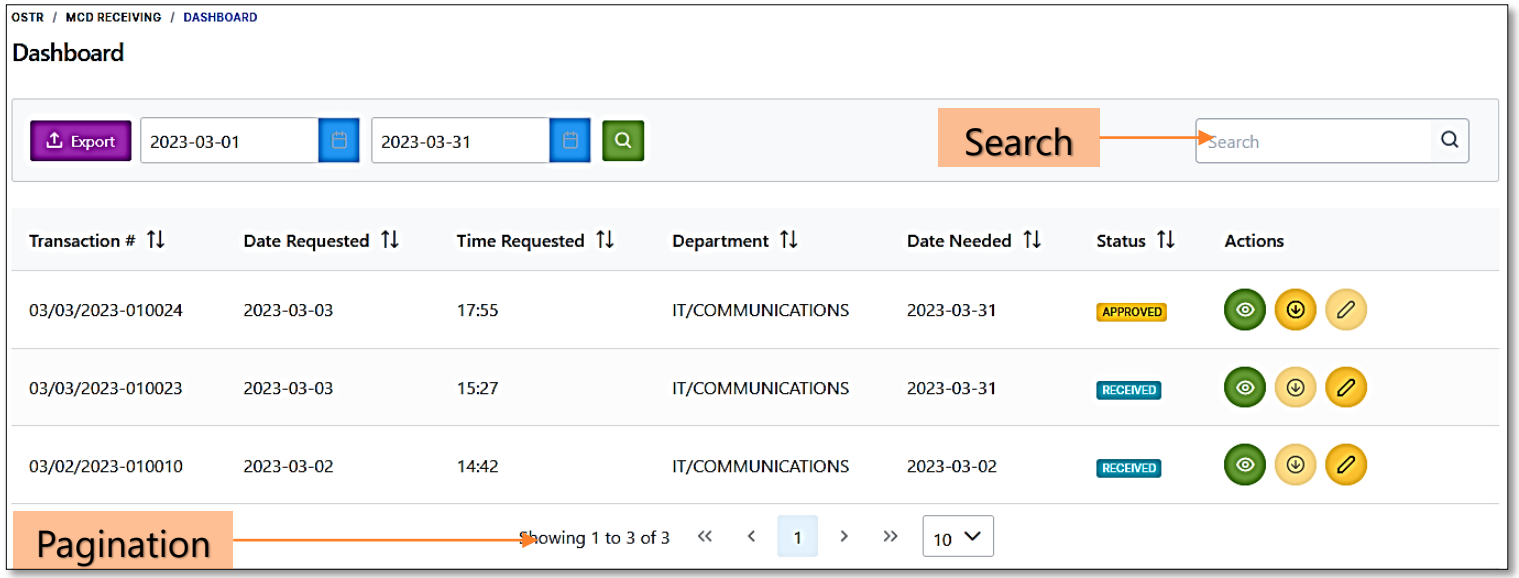

RECEIVING CONFIRMATION

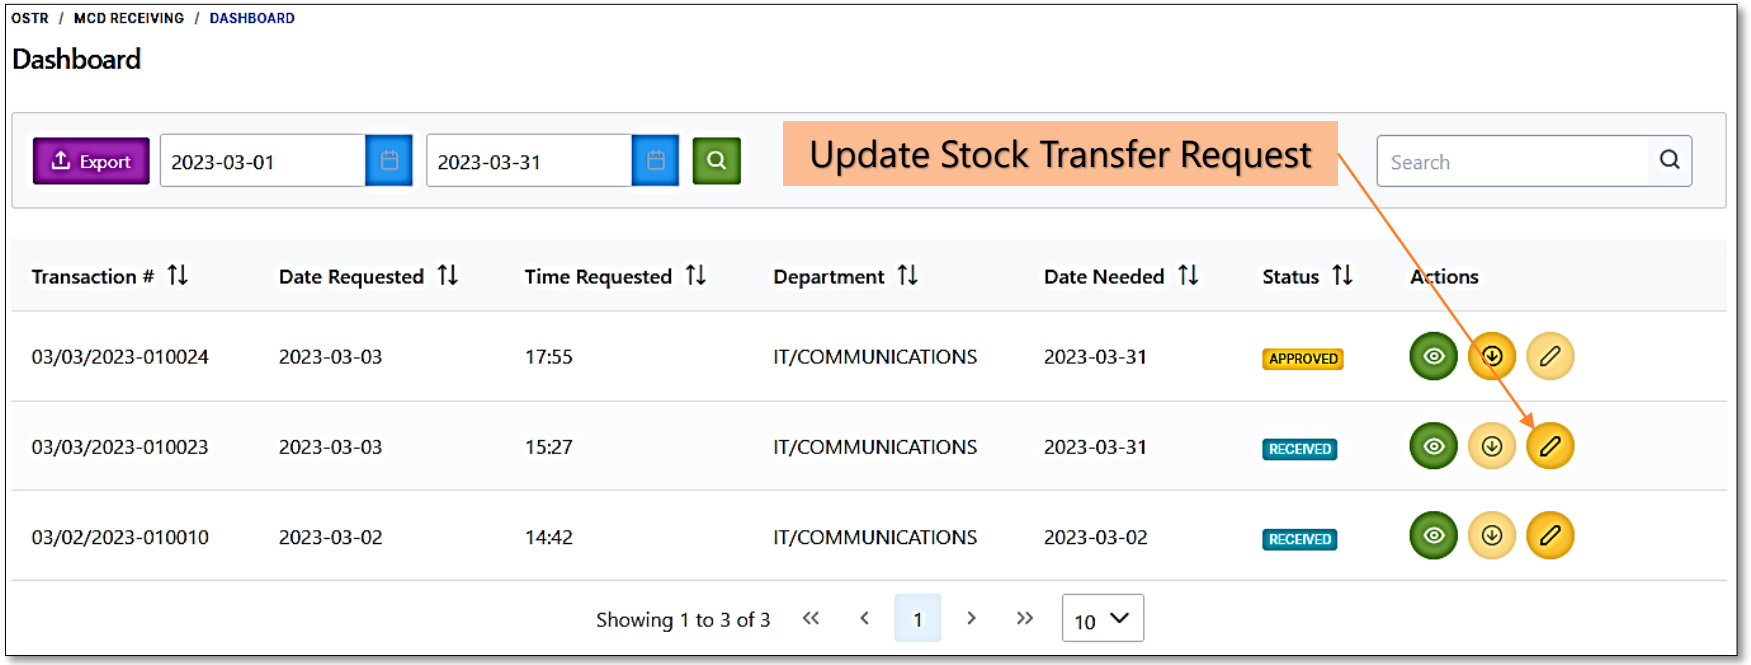

Edit the Items of a Stock Transfer Request

1. Go to **Receiving Confirmation** and select the **Manage Receiving** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock transfer request you want to edit.

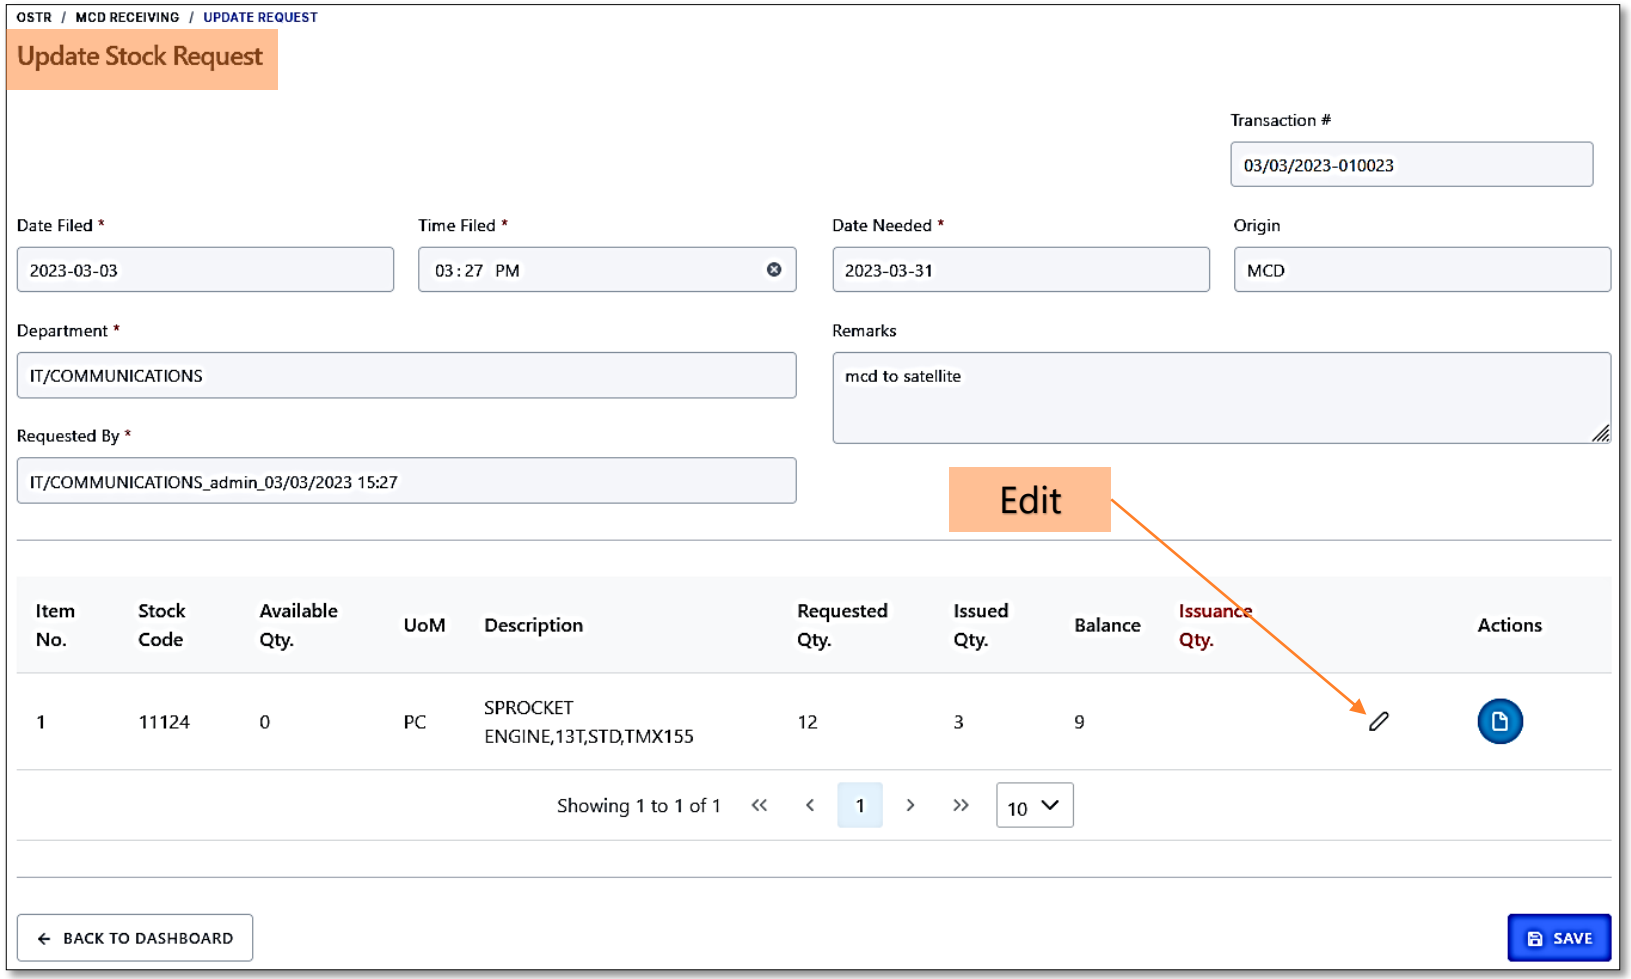

RECEIVING CONFIRMATION

3. Select the **Update Stock Request** icon and view the **Update Stock Request** screen.

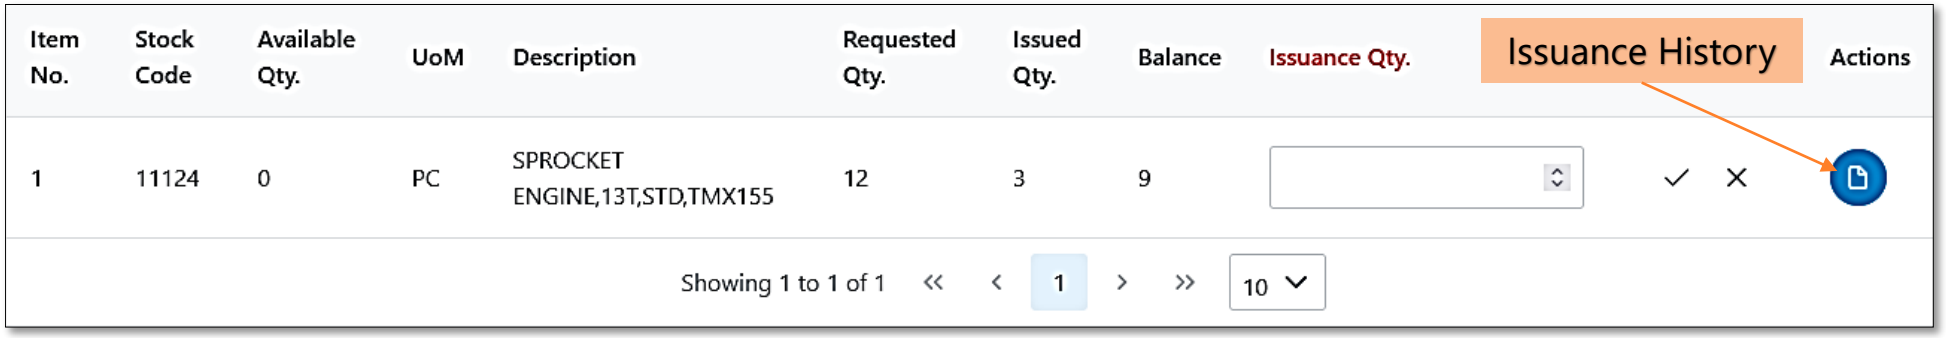

RECEIVING CONFIRMATION

4. Select the **Edit** icon and change the information accordingly once the **Update Stock Request** screen appears.

RECEIVING CONFIRMATION

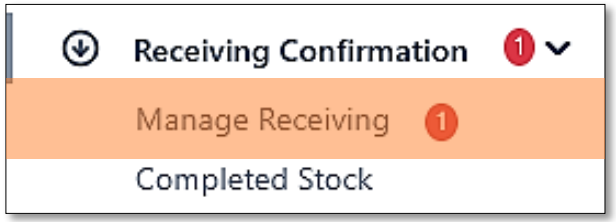

5. You may also click the **Issuance History** icon to view the Stock Transfer's **Issuance History** on a pop-up box.

6. Click the **Save** icon to save the changes made.

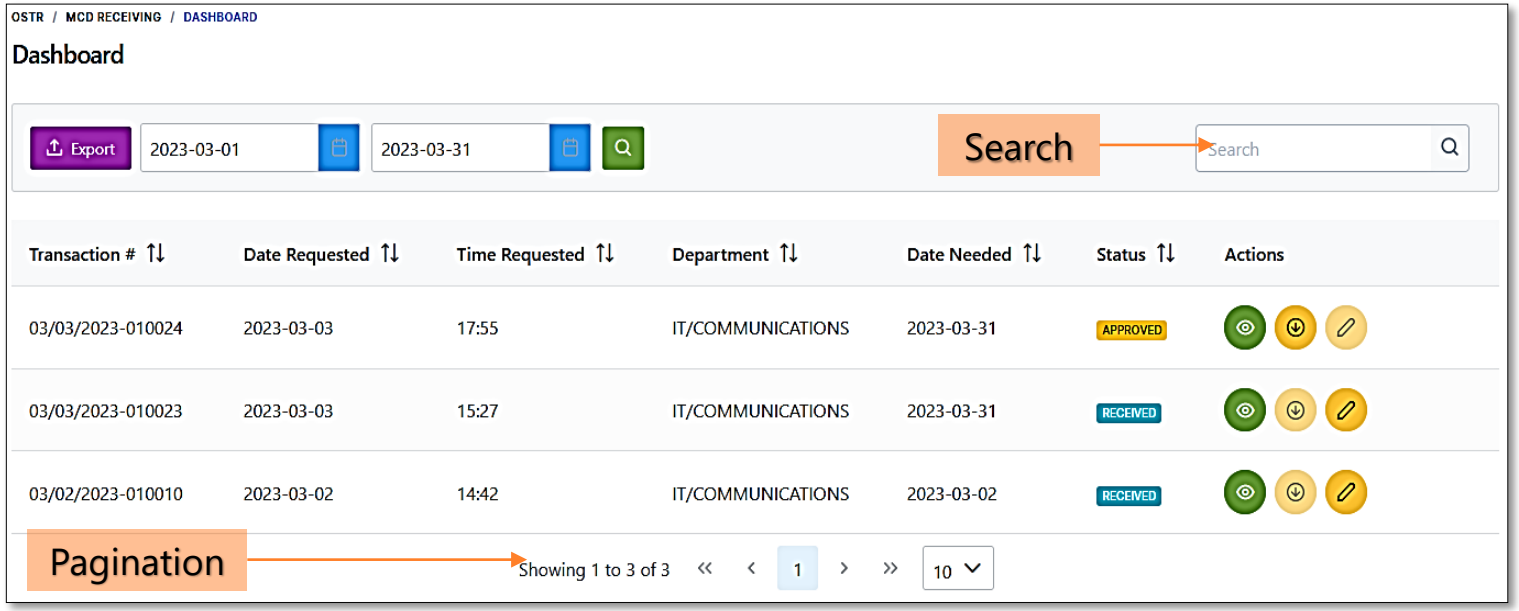

RECEIVING CONFIRMATION

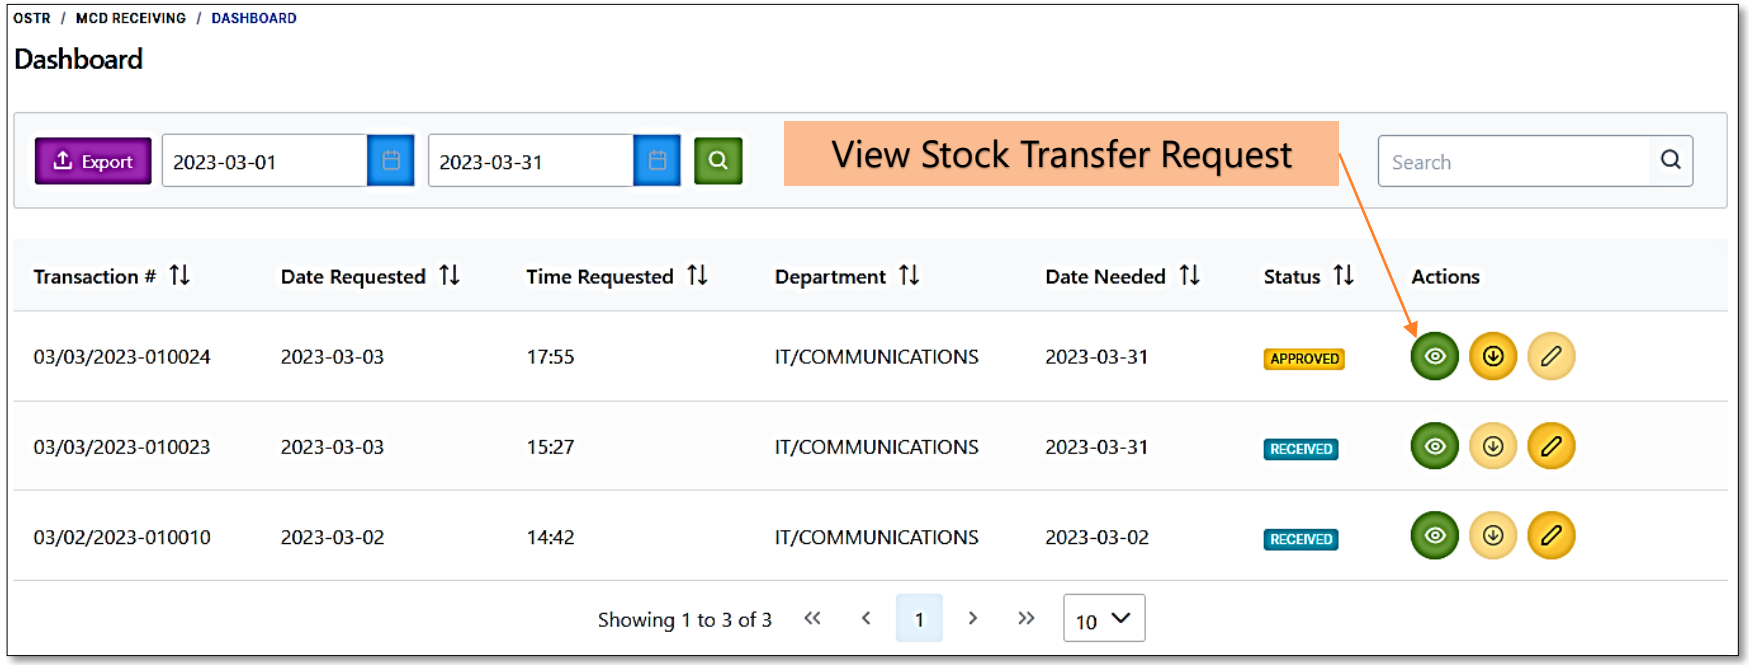

View a Stock Transfer Request

1. Go to **Receiving Confirmation** and select the **Manage Receiving** option.
2. View the **Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the stock transfer request you want to view.

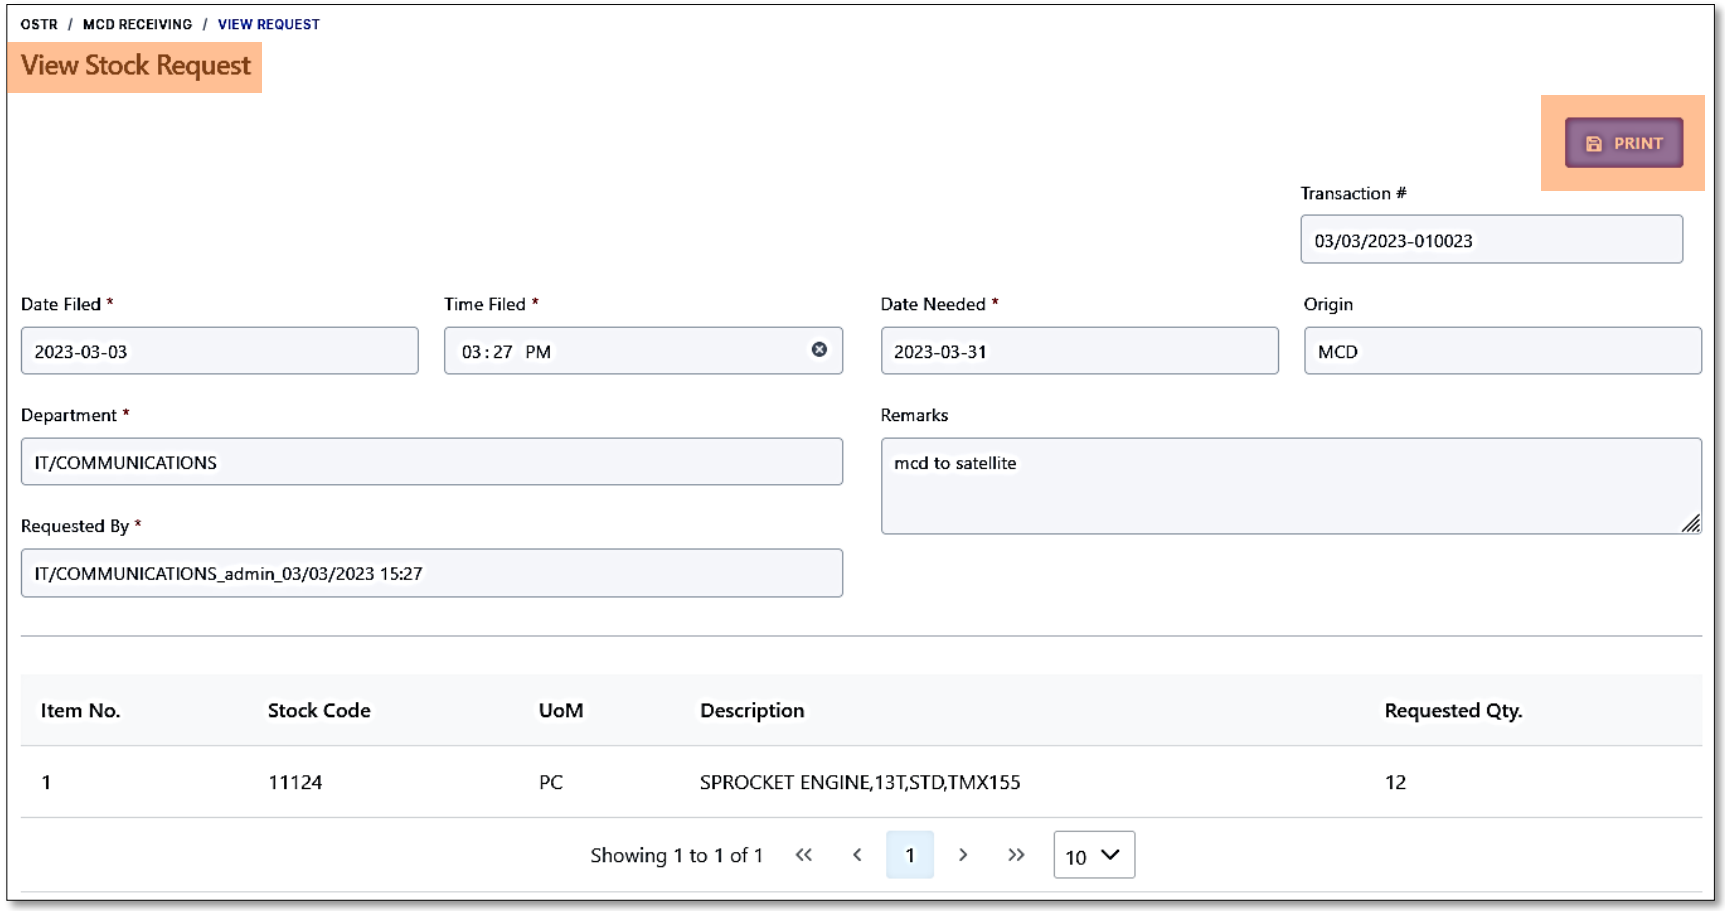

RECEIVING CONFIRMATION

3. Select the **View Stock Request** icon to view the **View Stock Request** screen.

RECEIVING CONFIRMATION

4. You may also select the **Print** button to print the stock transfer request.

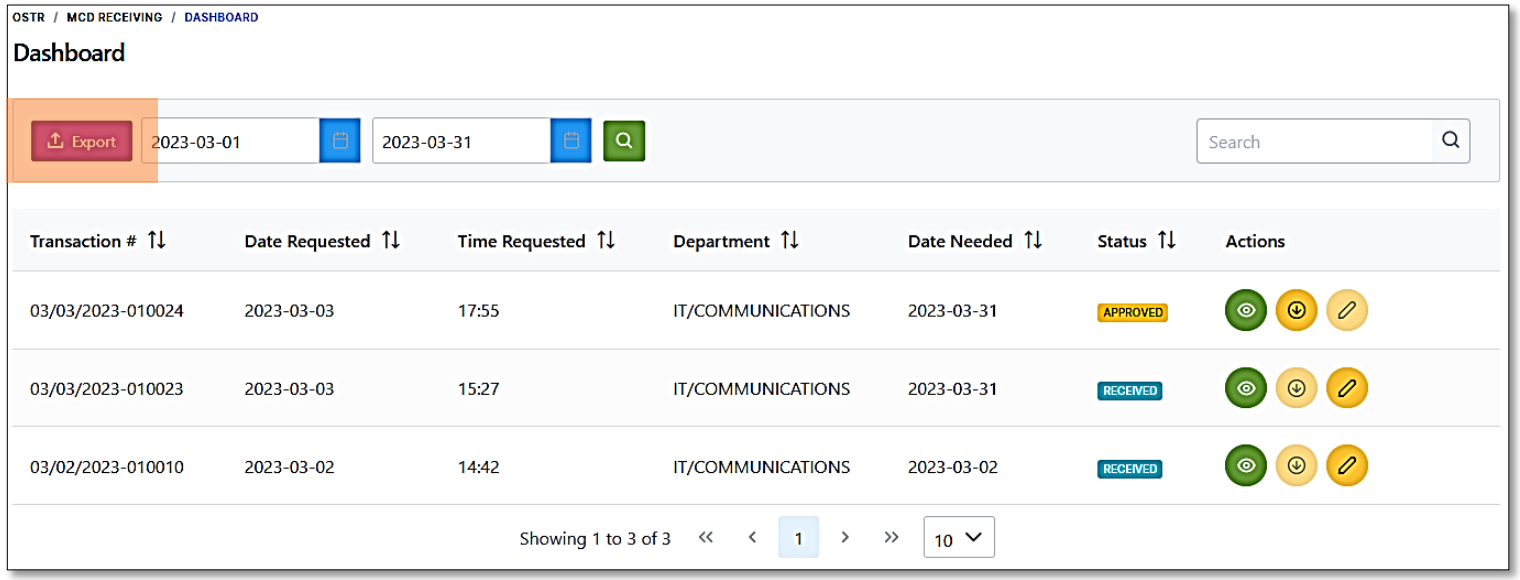

RECEIVING CONFIRMATION

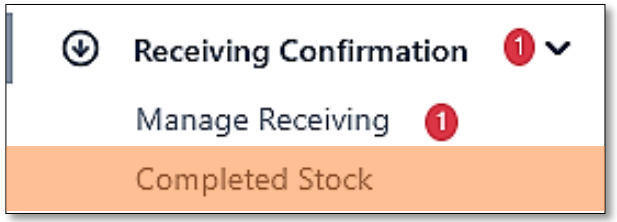

Export Stock Transfer Requests

1. Go to **Receiving Confirmation** and select the **Manage Receiving** option.
2. View the **Dashboard** screen.
3. Click on the **Export** button to export the stock transfer requests.

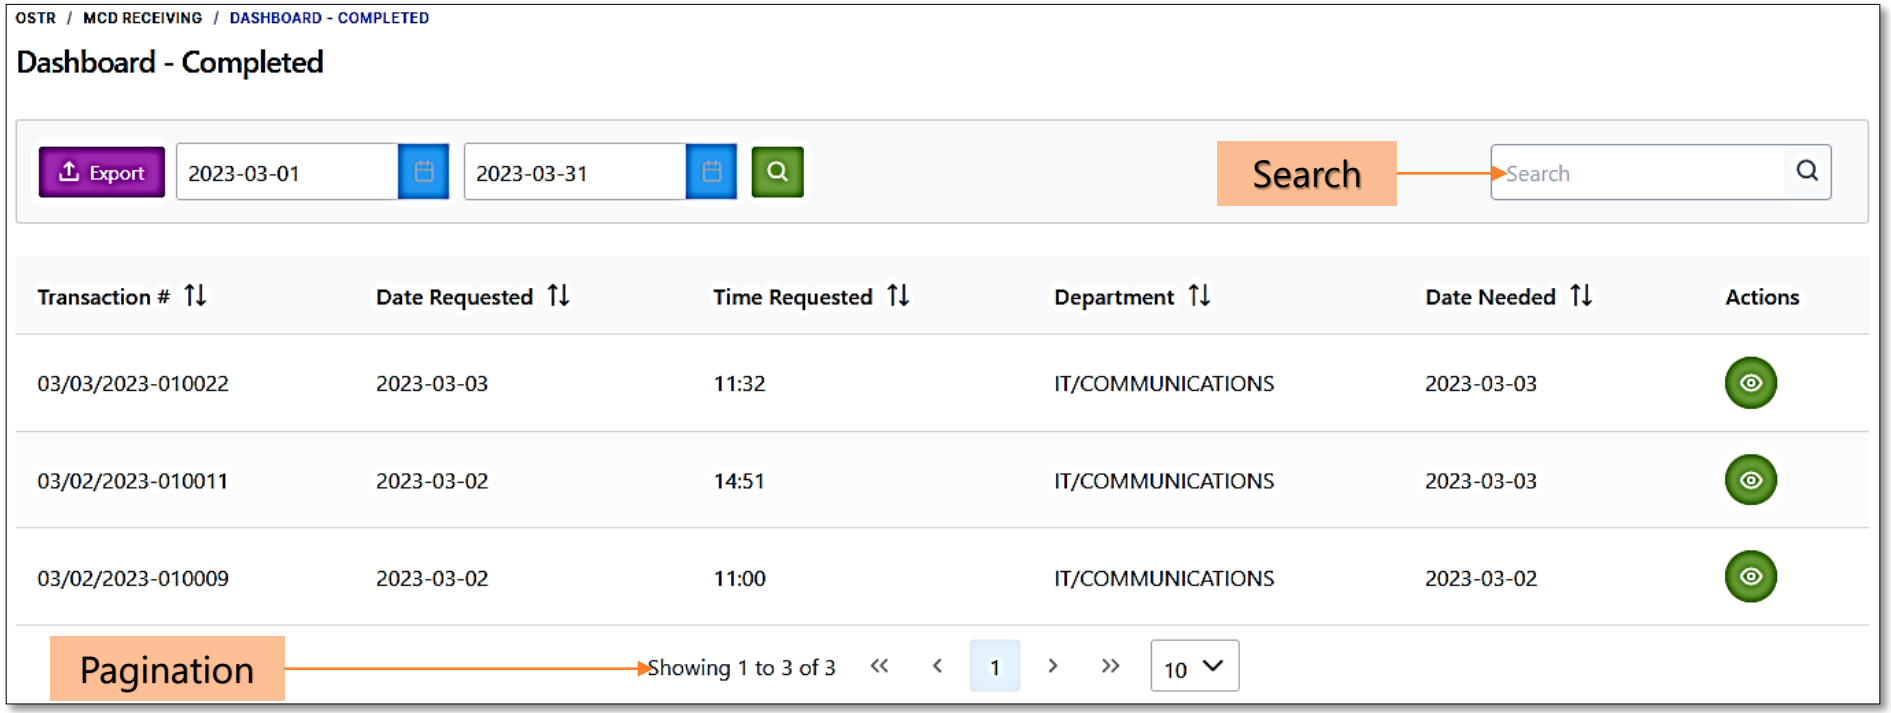

RECEIVING CONFIRMATION

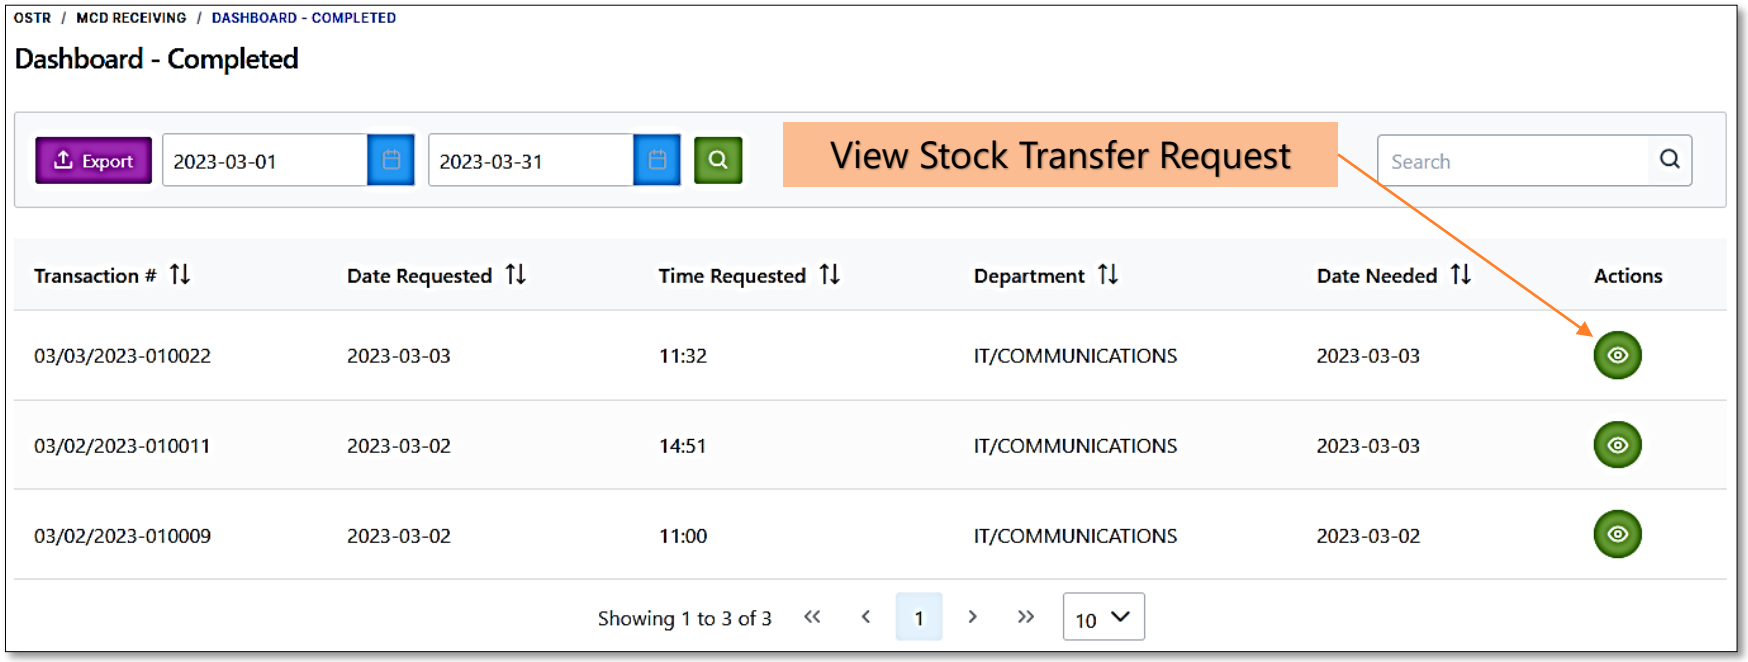

View a Completed Stock Transfer Request

1. Go to **Receiving Confirmation** and select the **Completed Stock** option.
2. View the **Dashboard - Completed** screen. You may use either the **search** or the **pagination** functions to look for the completed stock transfer request you want to view.

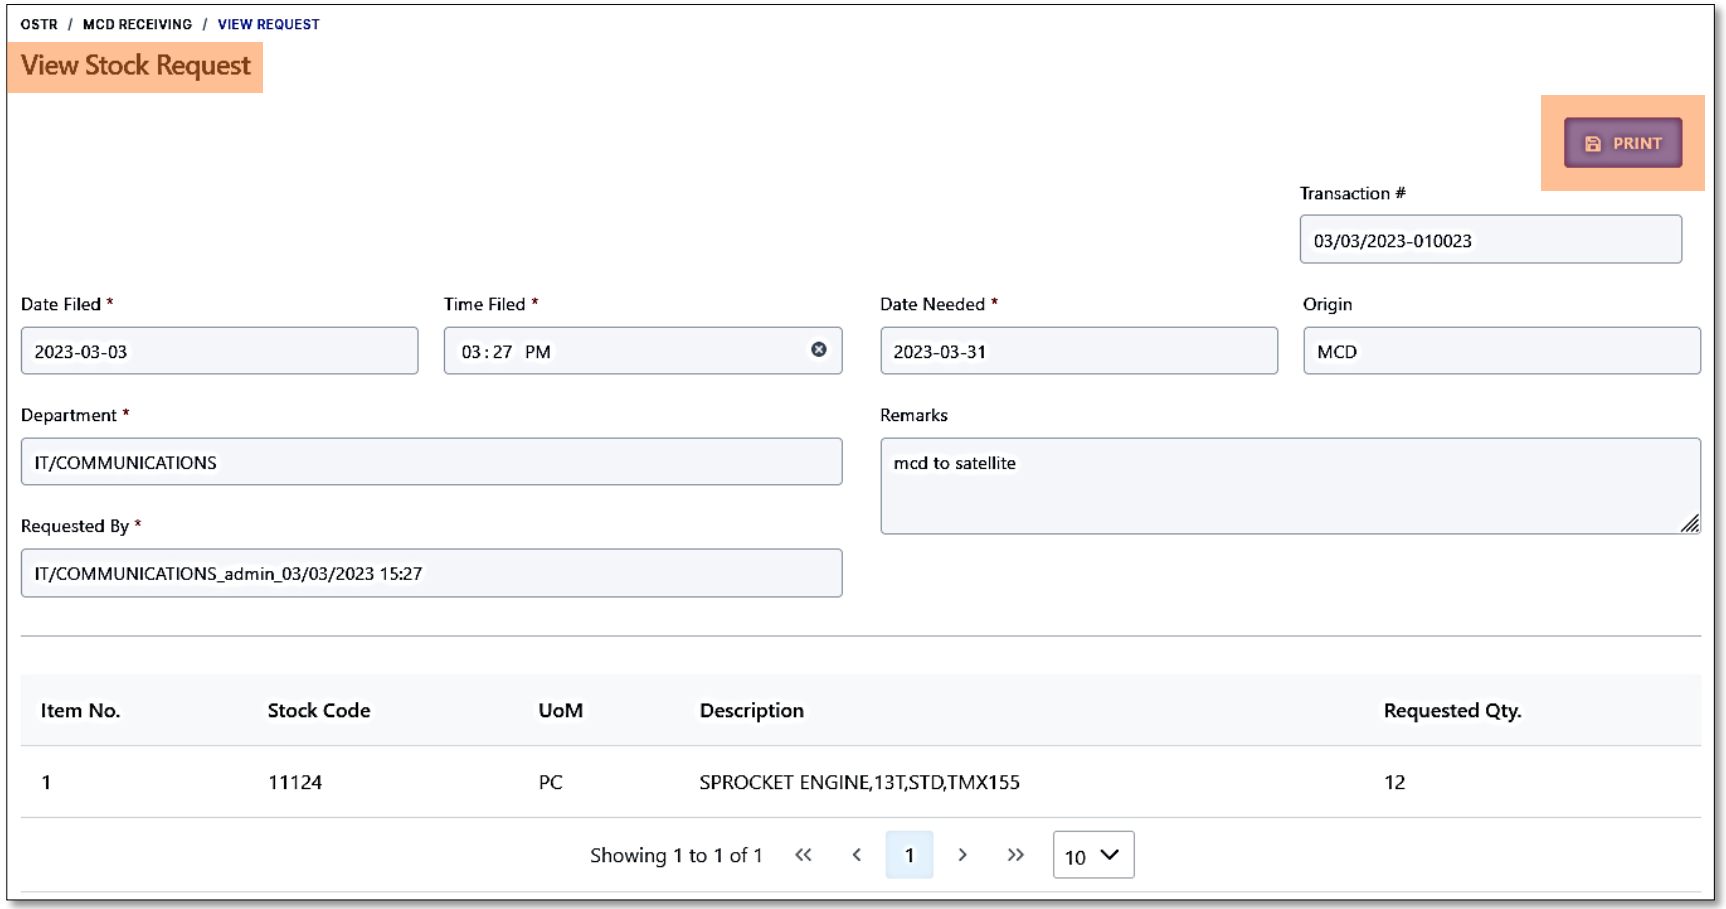

RECEIVING CONFIRMATION

3. Select the **View Stock Request** icon to view the **View Stock Request** screen.

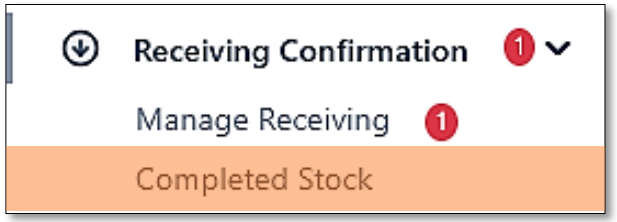

RECEIVING CONFIRMATION

4. You may also select the **Print** button to print the completed stock transfer request.

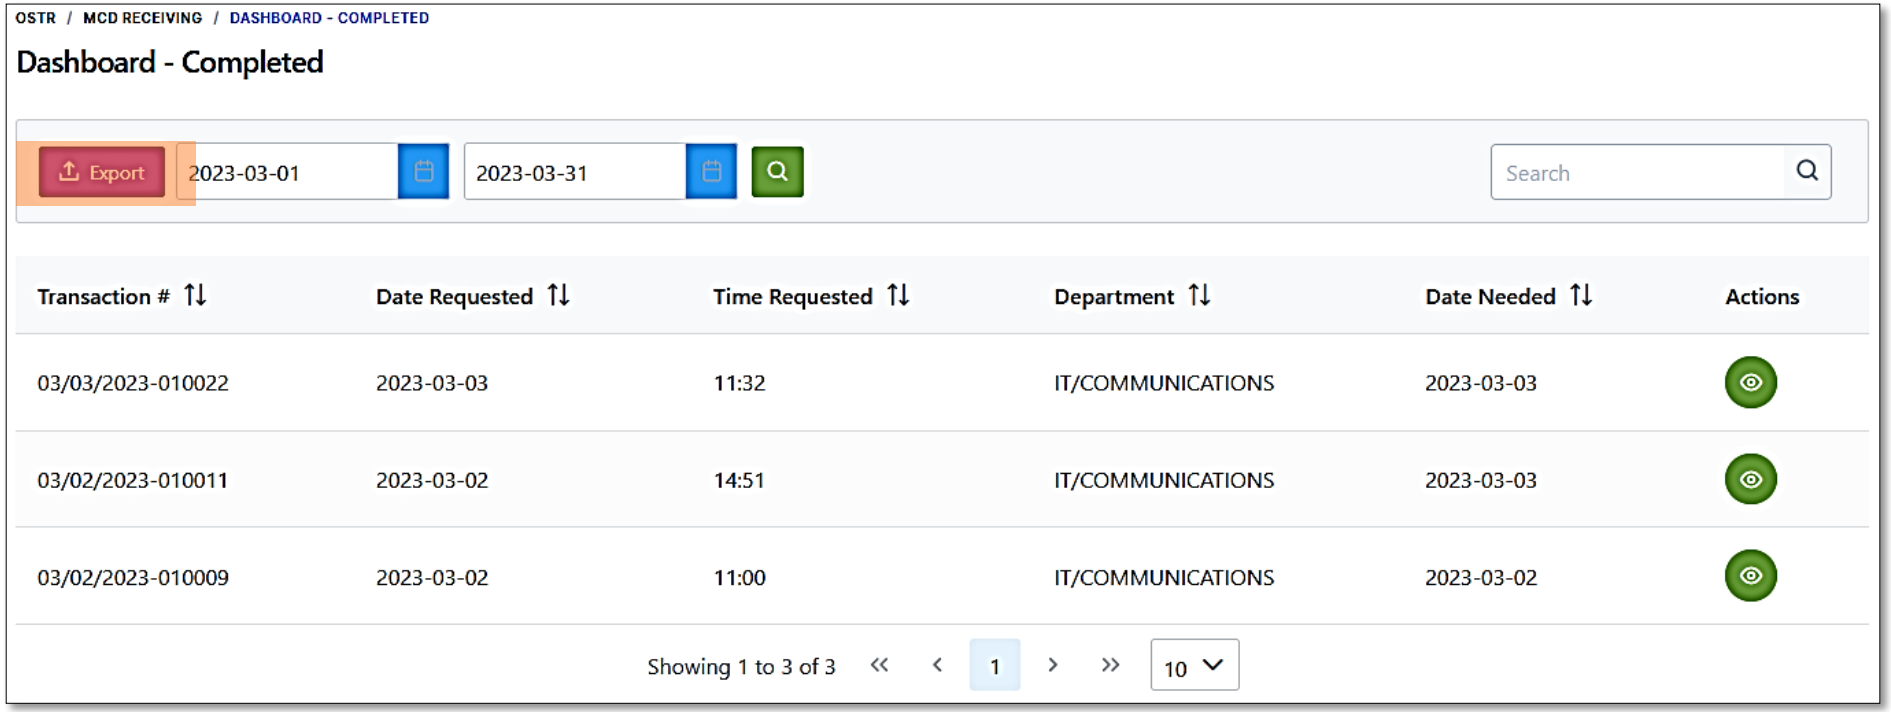

RECEIVING CONFIRMATION

Export Stock Transfer Requests

1. Go to **Receiving Confirmation** and select the **Completed Stock** option.
2. View the **Dashboard - Completed** screen.
3. Click on the **Export** button to export the completed stock transfer requests.

Chapter 7

MCD RECORDS

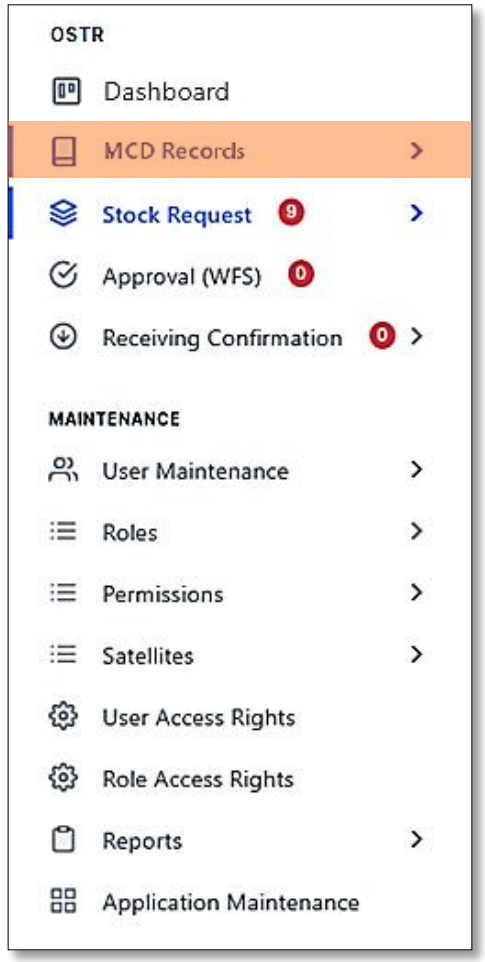

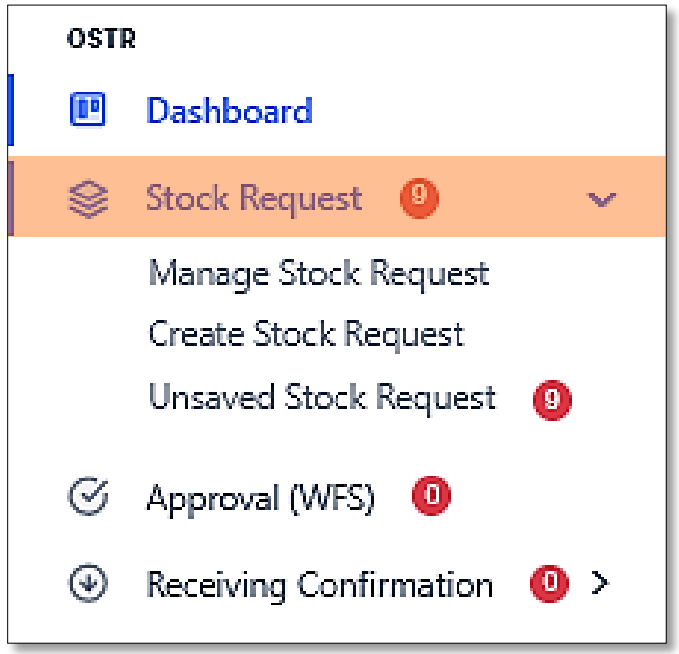

Table of Contents

MCD RECORDS

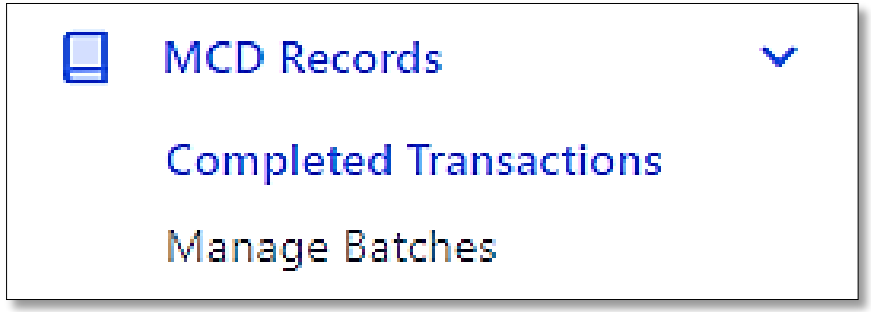

MCD Records

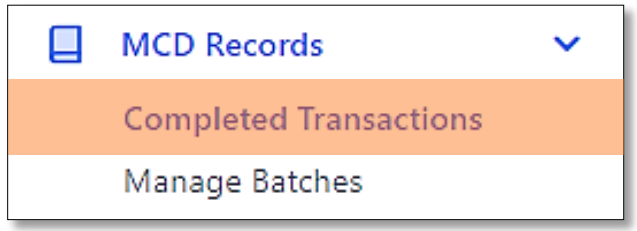

An OSTR module that displays information about the stock request transfers and batch managing of MCD records.

You may also do the following:

- Create, edit, view, print, and delete completed stock transfers.
- Create, edit, view, print, and delete stock transfer batches.

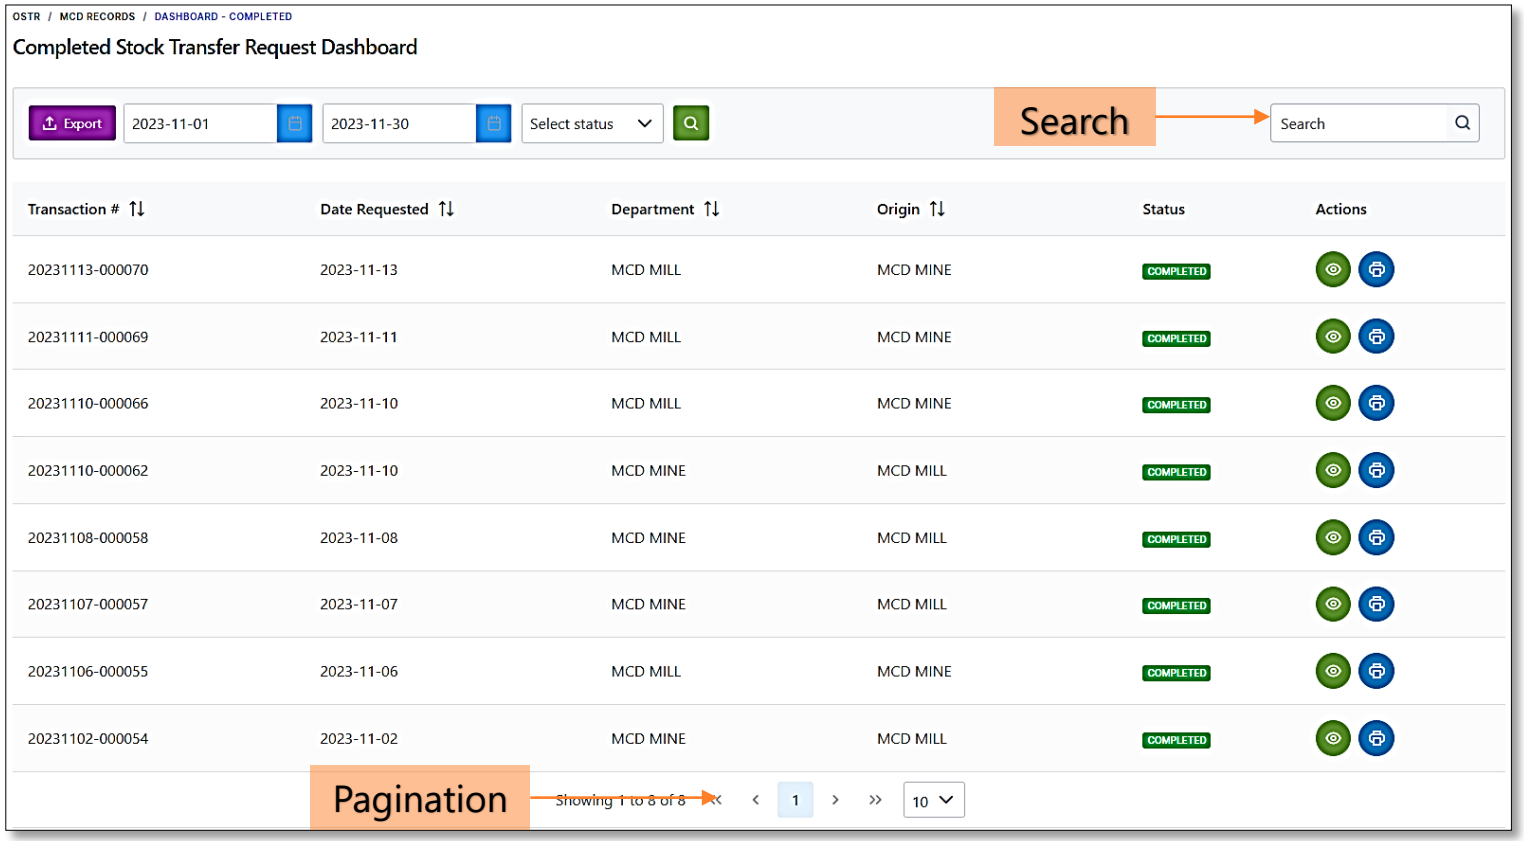

MCD RECORDS

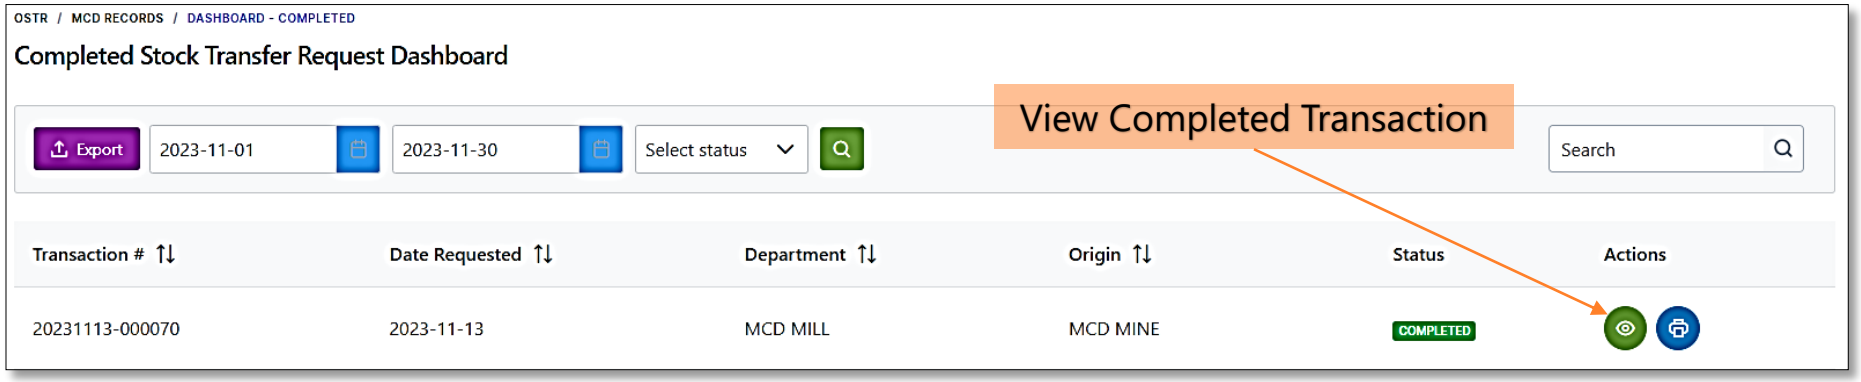

View a Completed Stock Transfer Request

1. Go to **MCD Records** and select the **Completed Transactions** option.
2. View the **Completed Stock Transfer Request Dashboard** screen. You may use either the **search** or the **pagination** functions to look for the completed transaction you want to view.

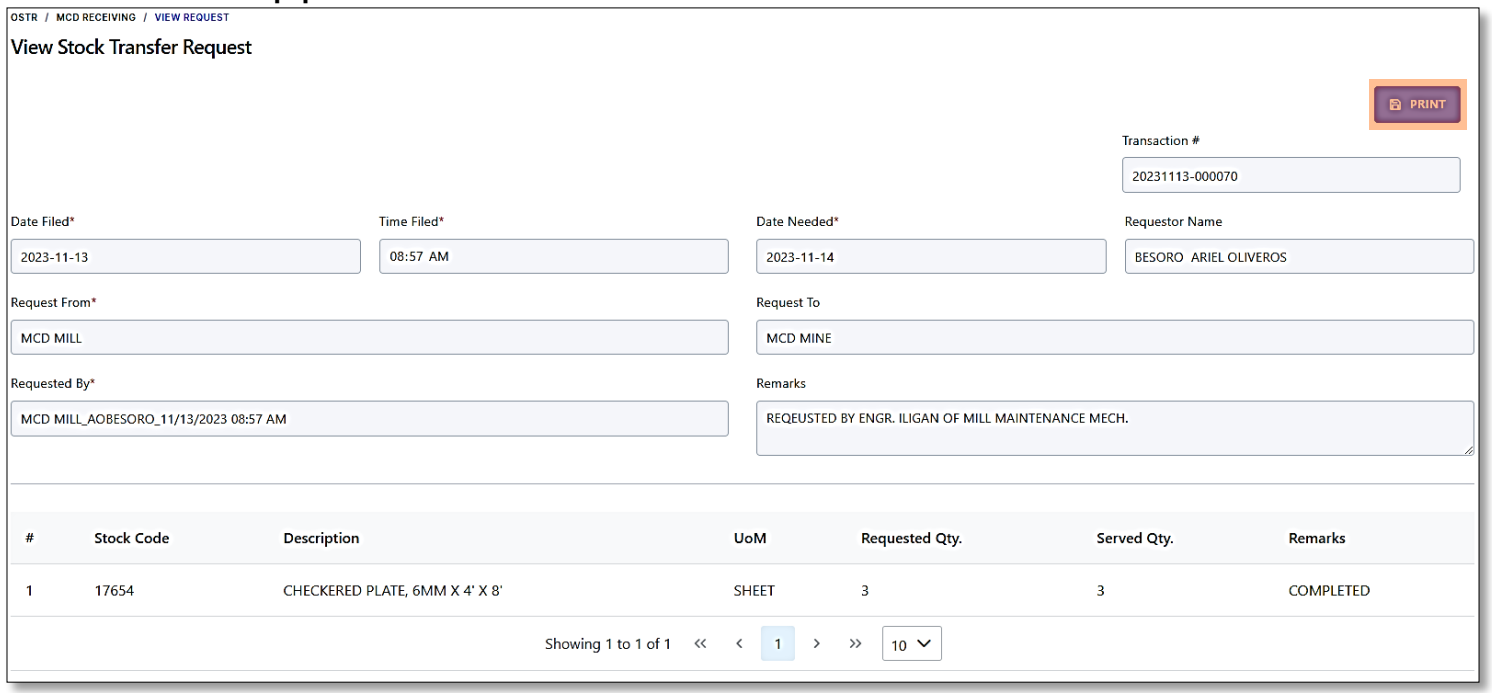

MCD RECORDS

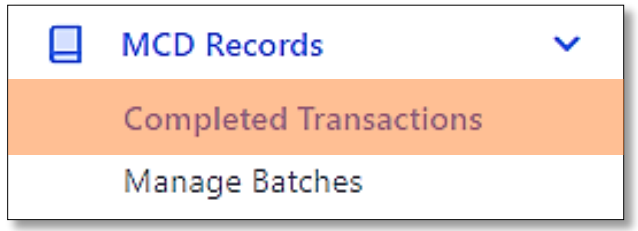

3. Select the **View Completed Transaction** icon.

4. You may also print a request by selecting the **Print** button once the **View Stock Request** screen appears.

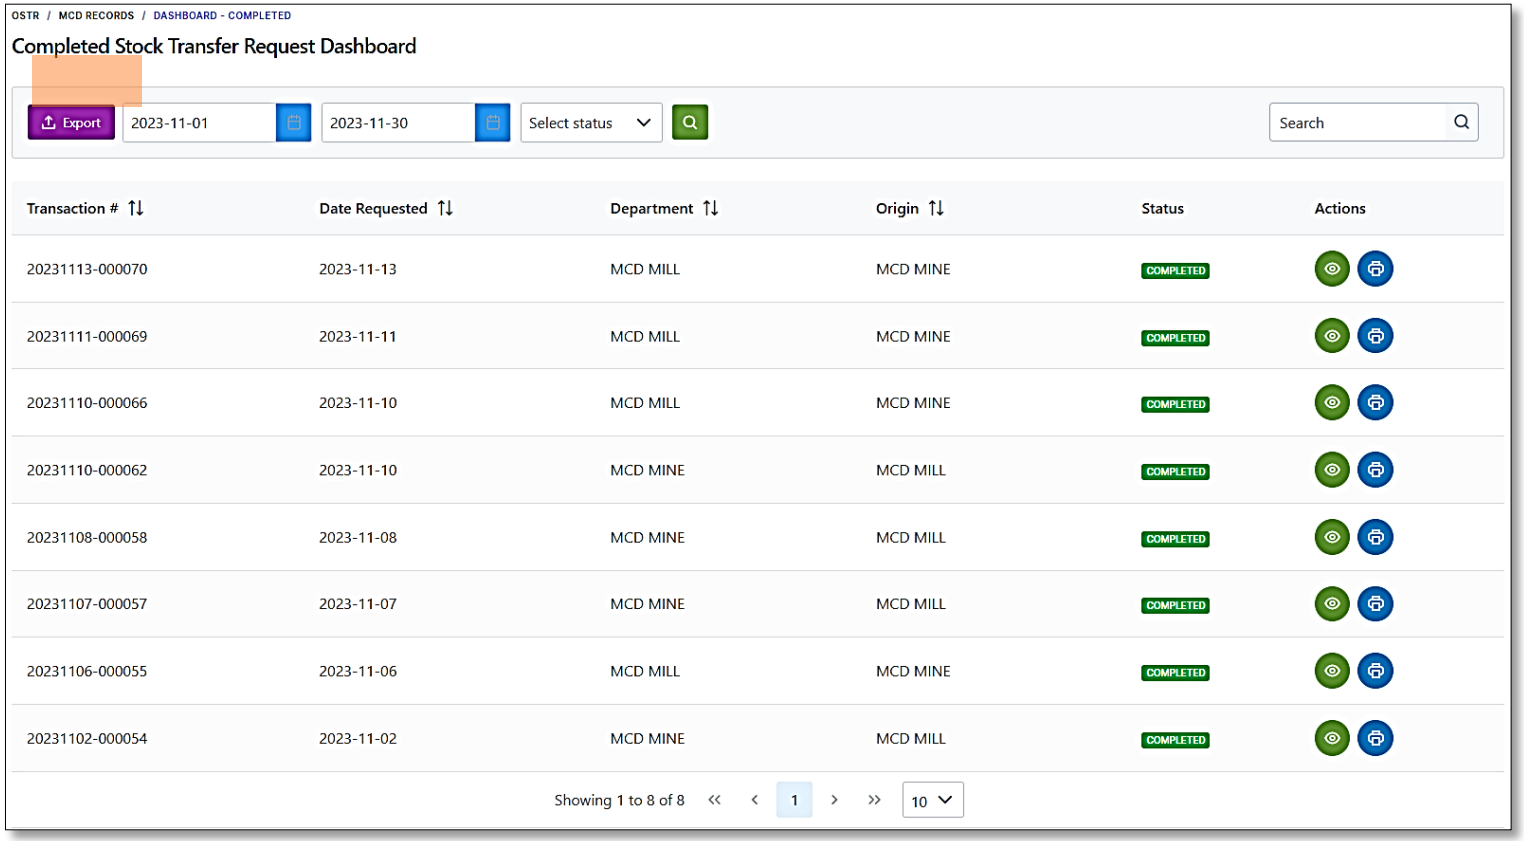

MCD RECORDS

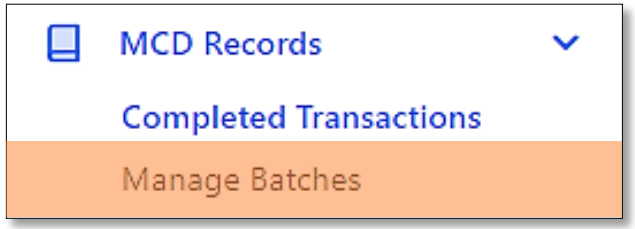

Export Completed Stock Transfer Requests

1. Go to **MCD Records** and select the **Completed Transactions** option.
2. View the **Dashboard** screen.
3. Click on the **Export** button to export the stock requests.

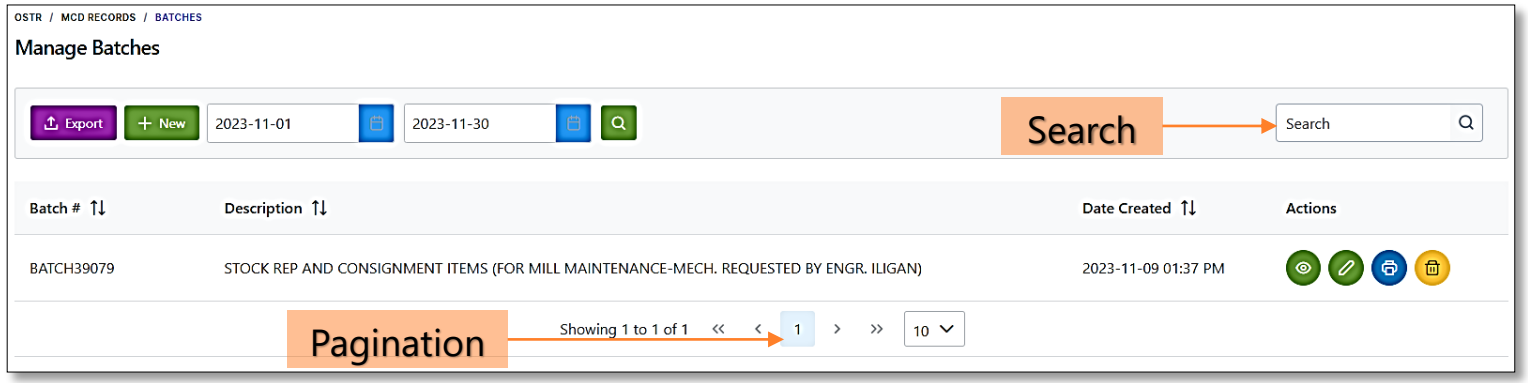

MCD RECORDS

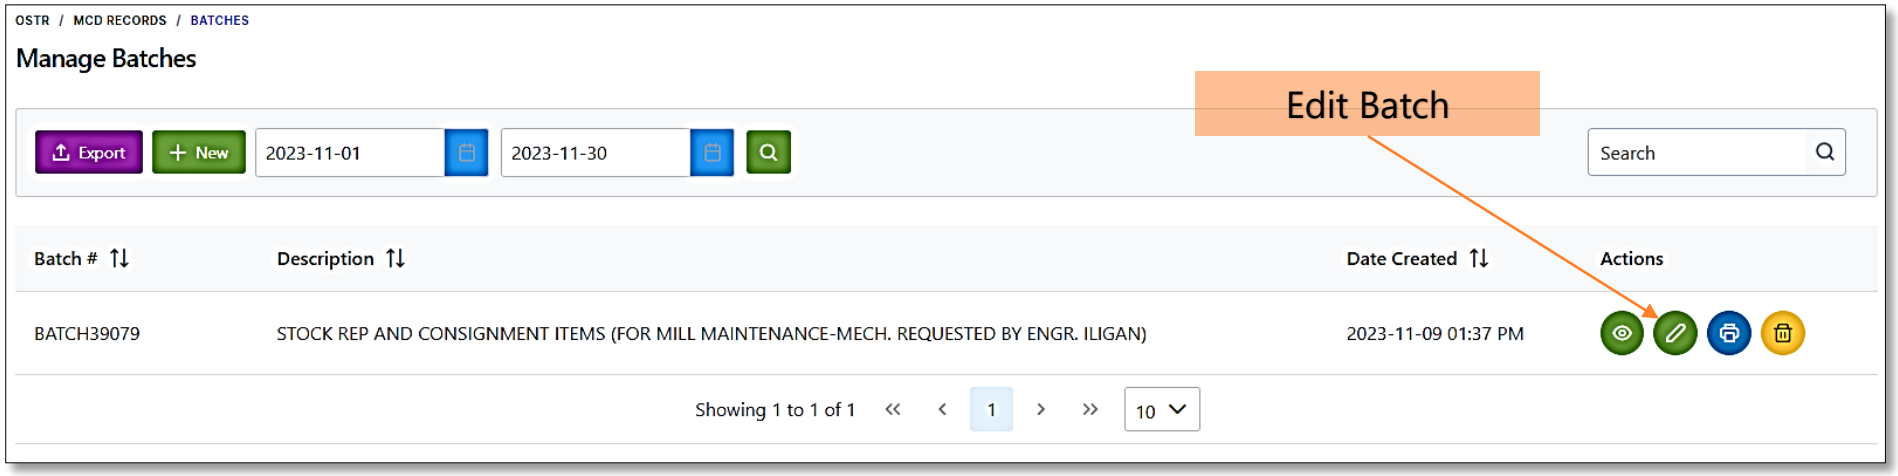

Edit a Stock Transfer Batch

1. Go to **MCD Records** and select the **Manage Batches** option.
2. View the **Manage Batches** screen. You may use either the **search** or the **pagination** functions to look for the batch you want to edit.

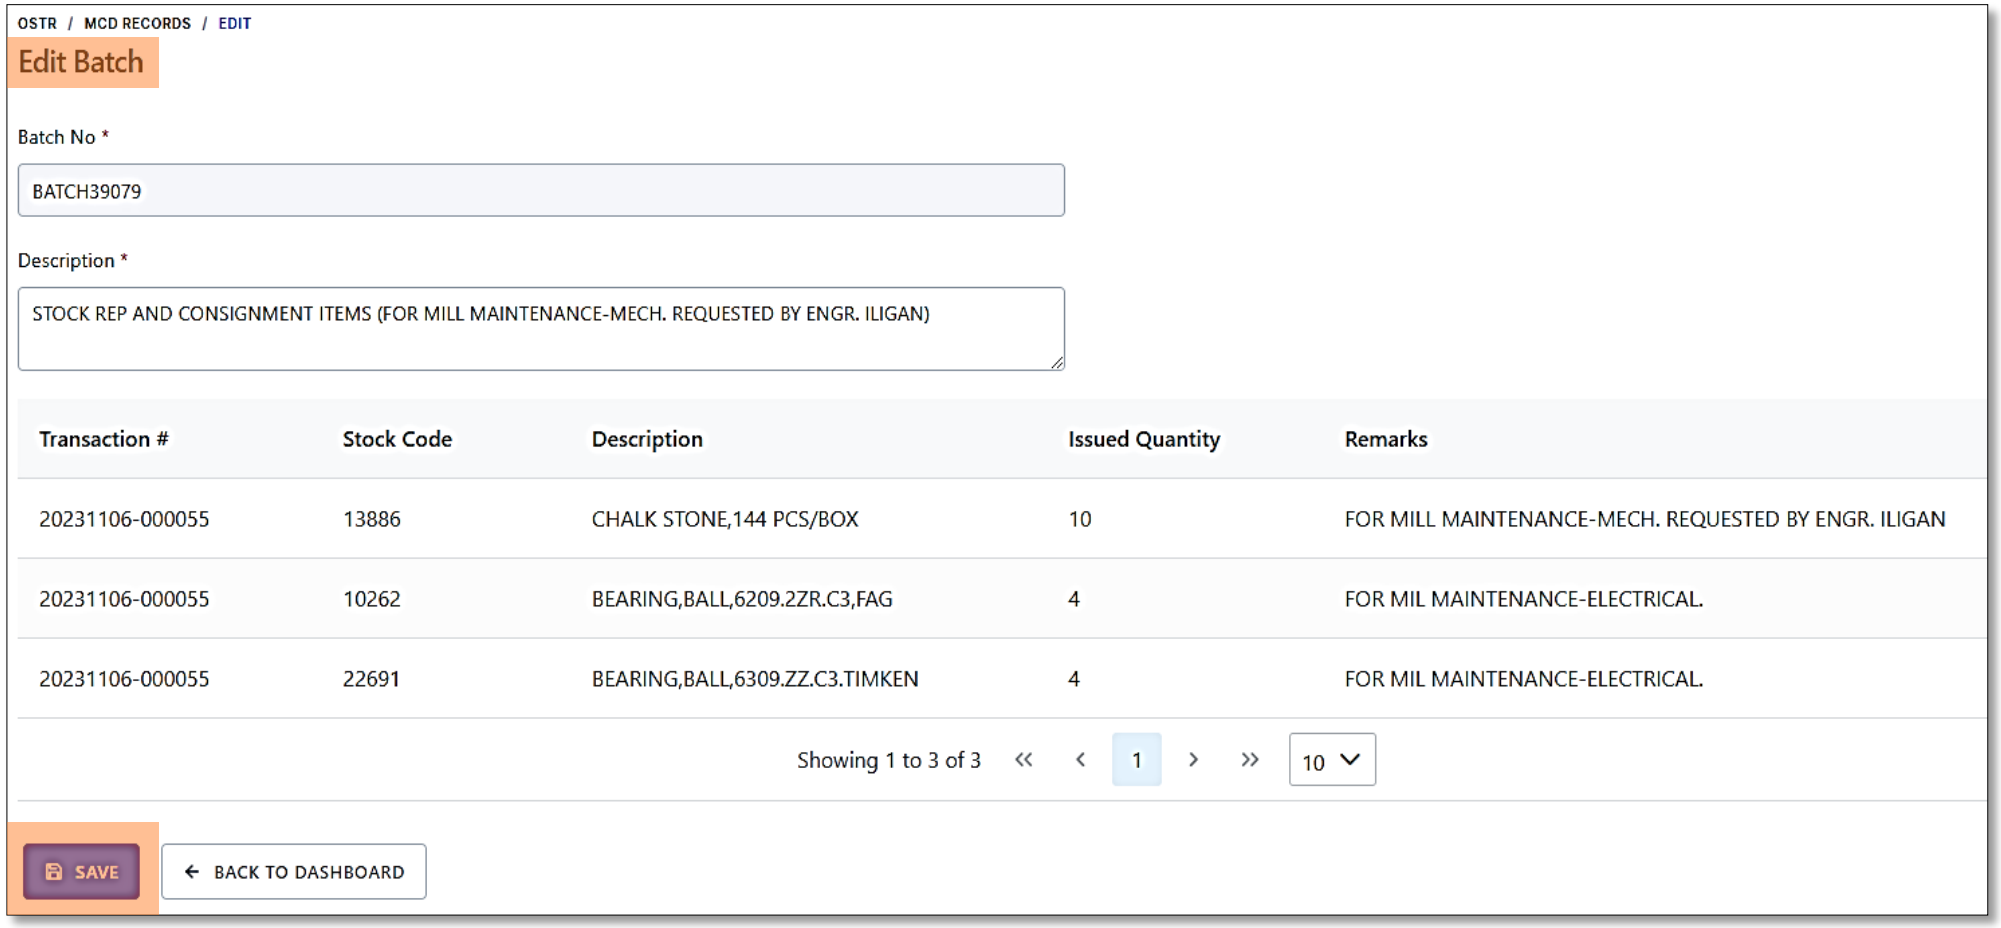

MCD RECORDS

3. Select the **Edit Stock Request** icon and change the information accordingly once the **Edit Stock Request** screen appears.

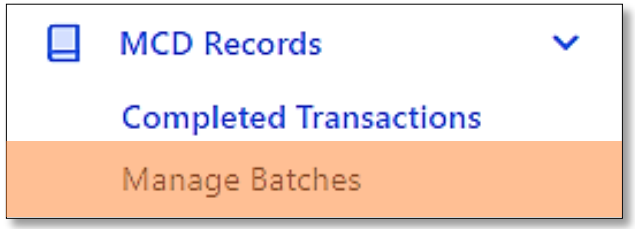

MCD RECORDS

4. Make all the necessary changes.

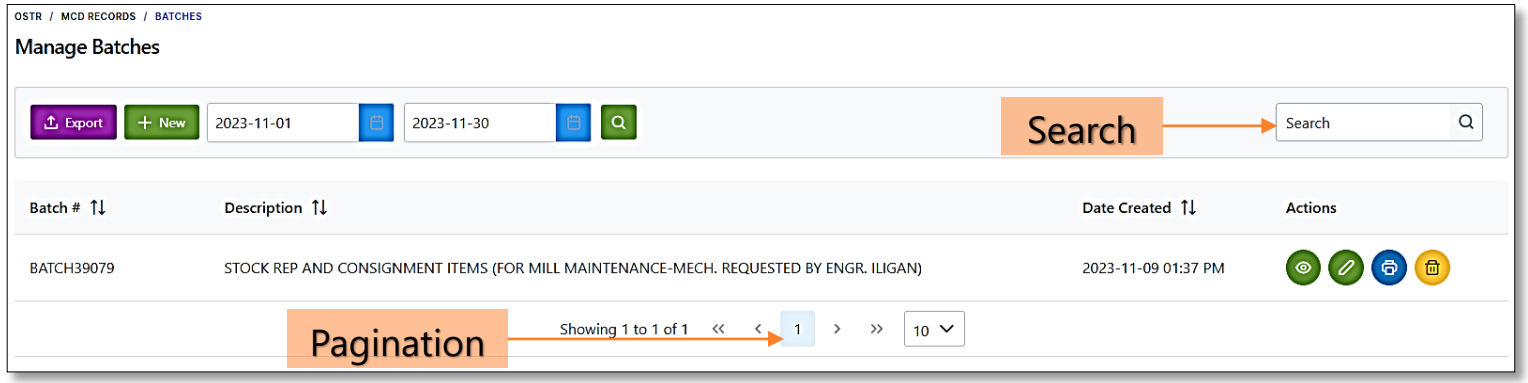

5. Click on the **Save** button to save changes made.

MCD RECORDS

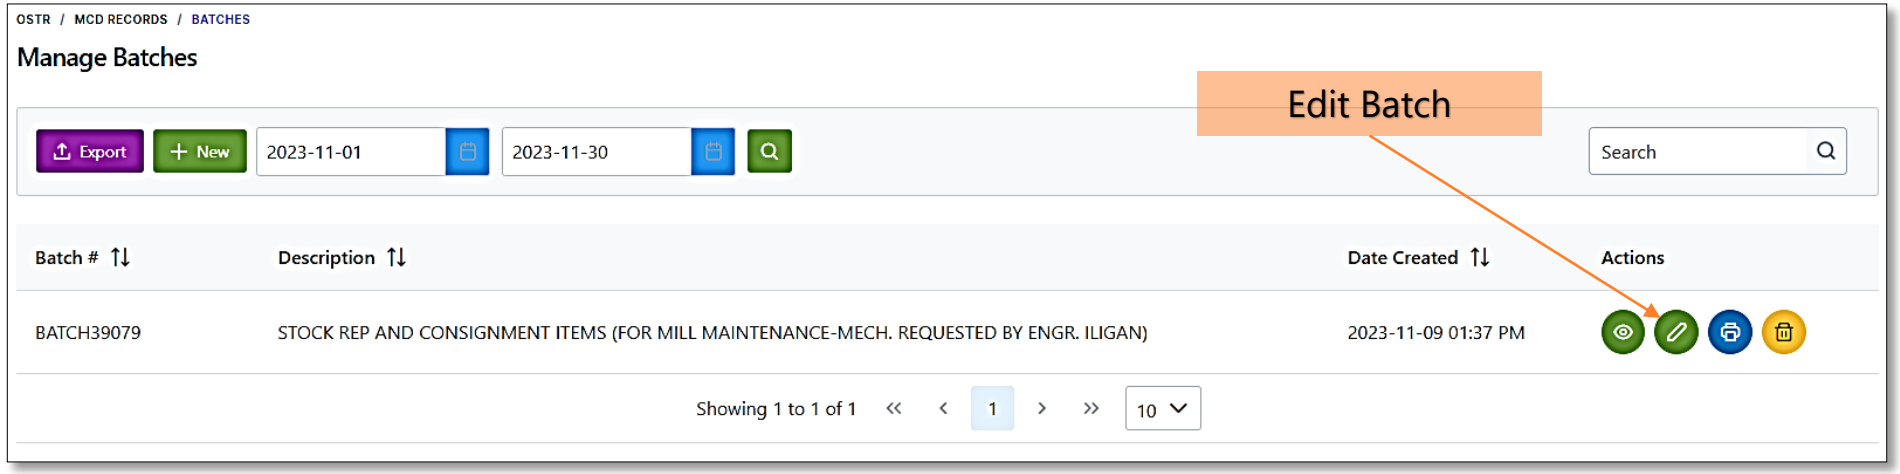

Delete a Stock Transfer Batch

1. Go to **MCD Records** and select the **Manage Batches** option.
2. View the **Manage Batches** screen. You may use either the **search** or the **pagination** functions to look for the batch you want to delete.

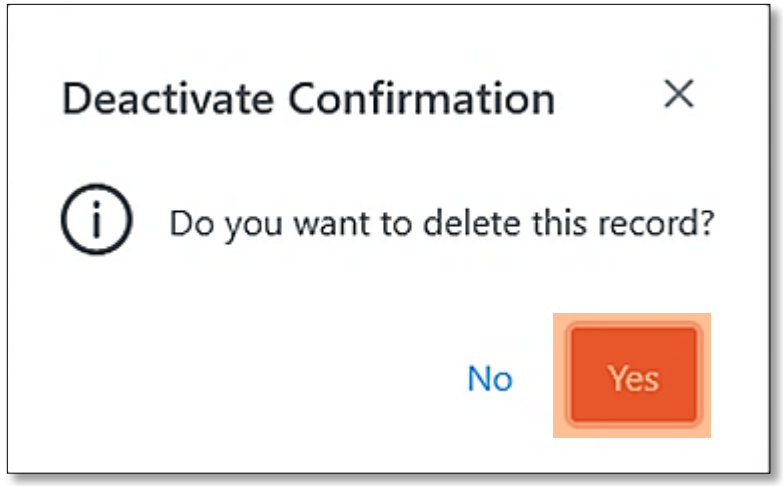

MCD RECORDS

3. Select the **Edit Stock Request** icon and change the information accordingly once the **Edit Stock Request** screen appears.

4. Click on the **Yes** button to complete the process.

MAINTENANCE

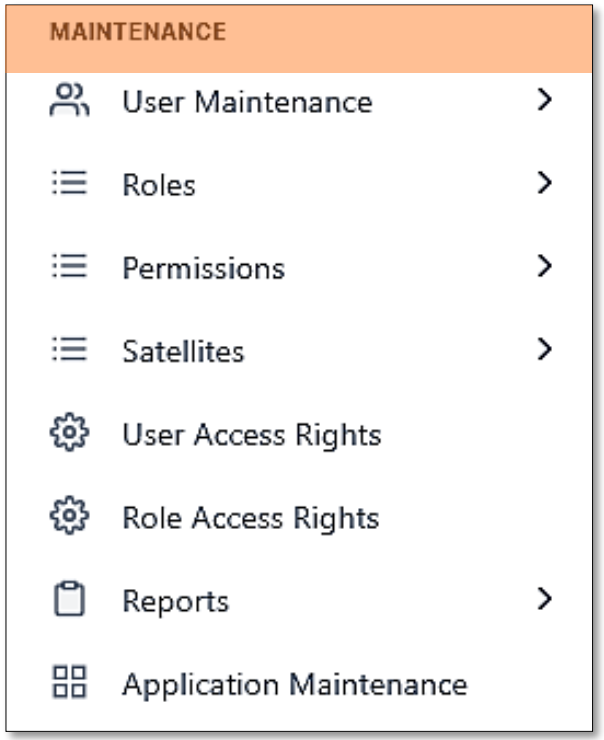

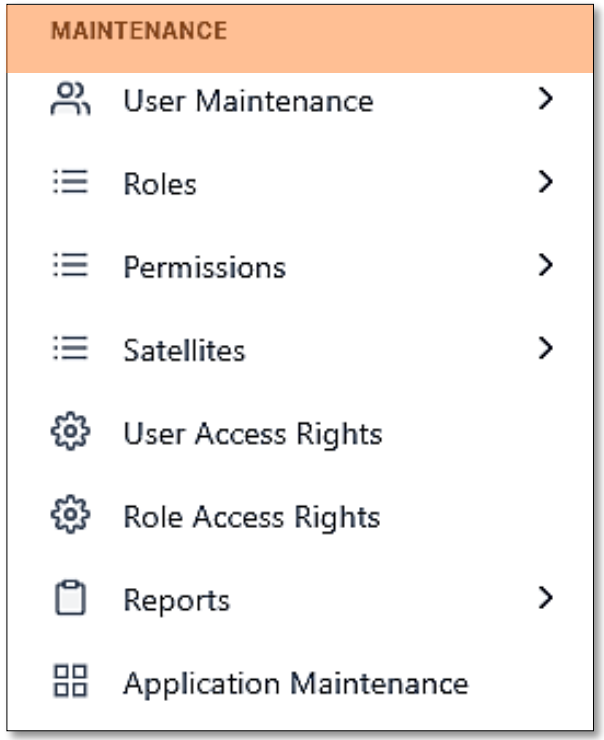

Table of Contents

MAINTENANCE

Maintenance

The OSTR maintenance module is a module displaying information that allows you to manage the maintenance of the users, roles, permissions, satellites, access rights, reports, and applications.

You may also do the following:

- View, create, edit, and export user maintenance.
- Create, edit, and export roles
- Create, edit, and export permissions.
- Create, edit, and export satellites.
- Create, edit, and export user maintenance.
- Manage the access rights of the users.
- Manage the access rights of the roles.
- View audit and error logs reports.
- View, create, edit, export, reindex, and manage scheduled shutdowns.

Chapter 8

USER MAINTENANCE

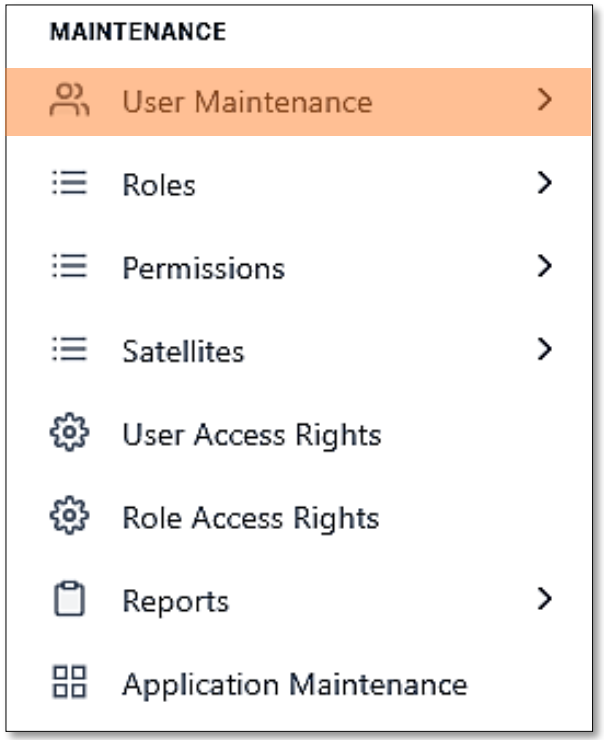

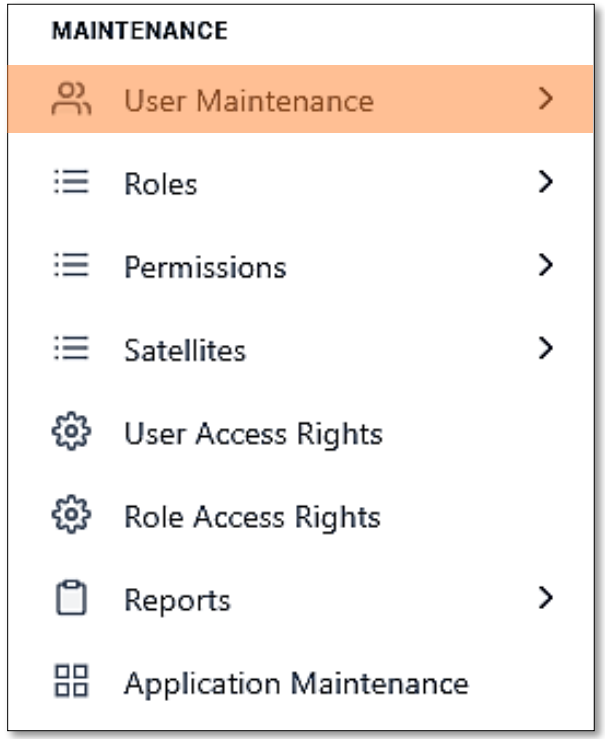

Table of Contents

USER MAINTENANCE

User Maintenance

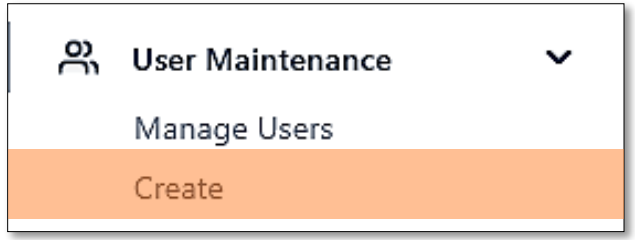

An OSTR maintenance module that displays information about the users so that you may manage and perform maintenance to the user accounts.

You may also do the following:

- Create, edit, delete, view, and export the list of users.

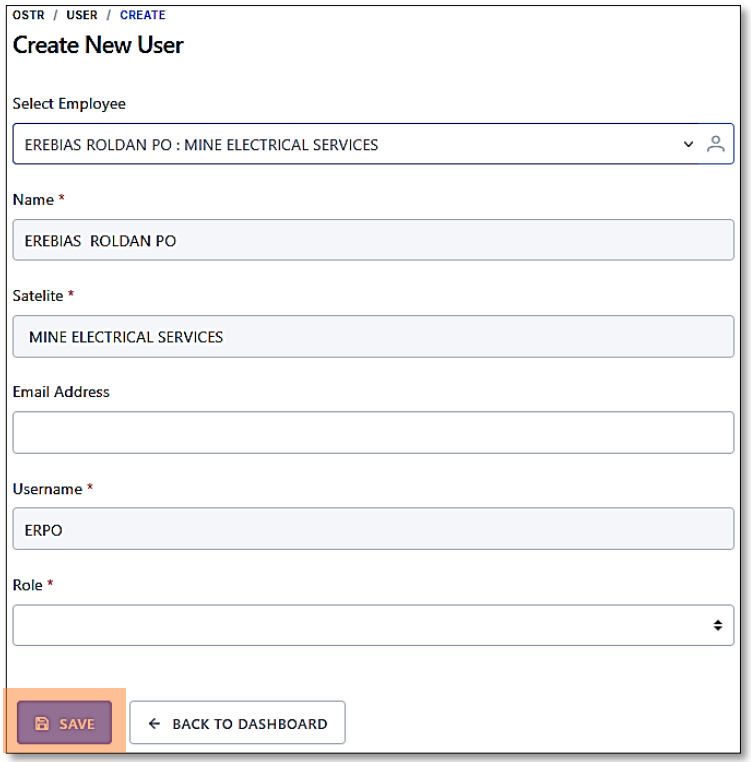

USER MAINTENANCE

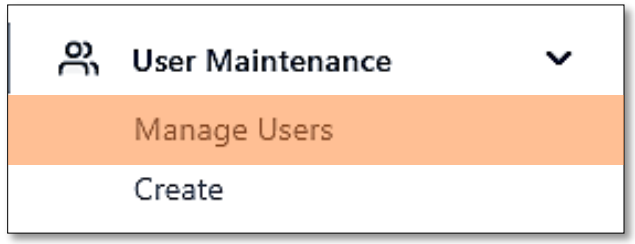

Create a User

1. Go to **User Maintenance** and select the **Create** option.
2. Enter all necessary information.
3. Click the **Save** button to complete the process.

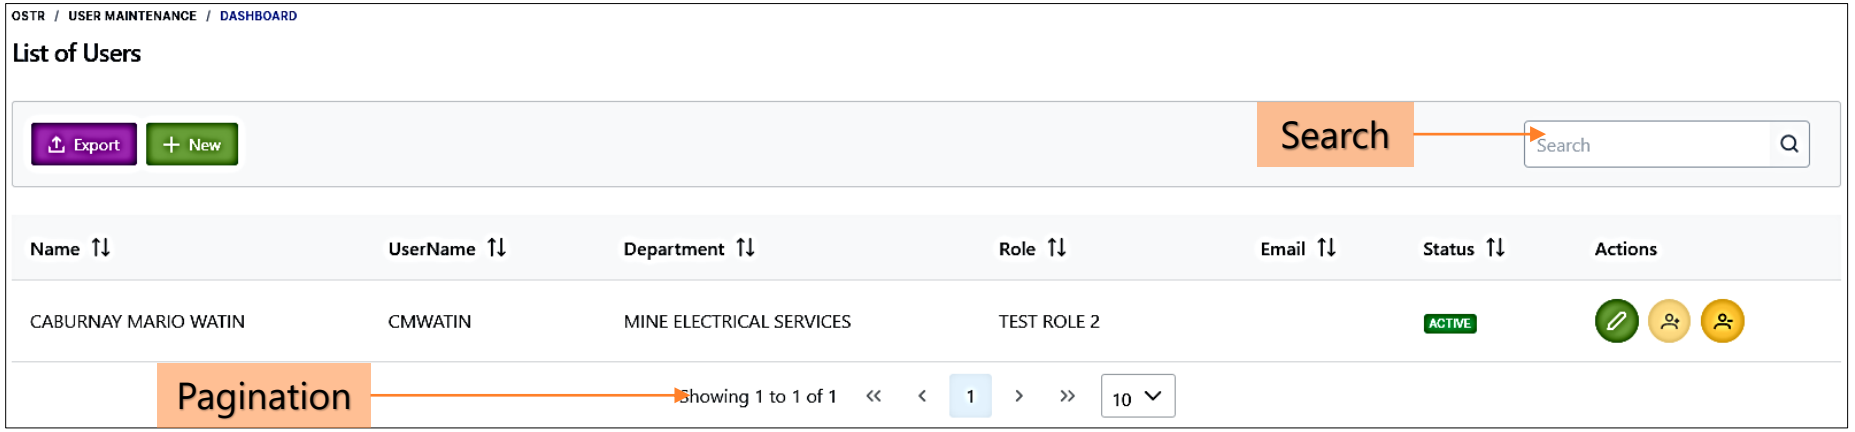

Select Employee	It is where you can select an employee.
Name	It is the name of the user you are currently creating.
Satellite	It is the satellite assigned to the user you are currently creating.
Email Address	It is the email address of the user.
Username	It is the username of the user.
Role	It is where you can select a role to assign the user to.

USER MAINTENANCE

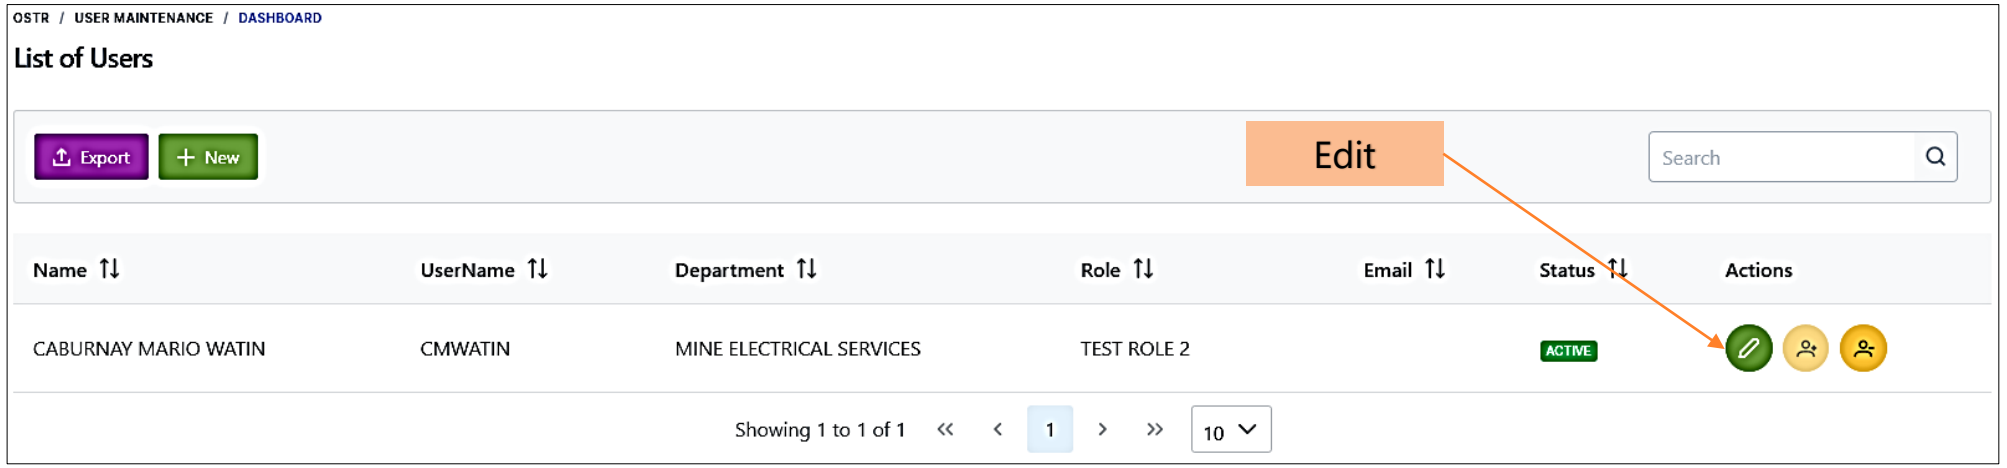

Edit a User

1. Go to **User Maintenance** and select the **Manage Users** option.
2. View the **List of the Users** screen. You may use either the **search** or **pagination** functions to look for the user you want to edit.

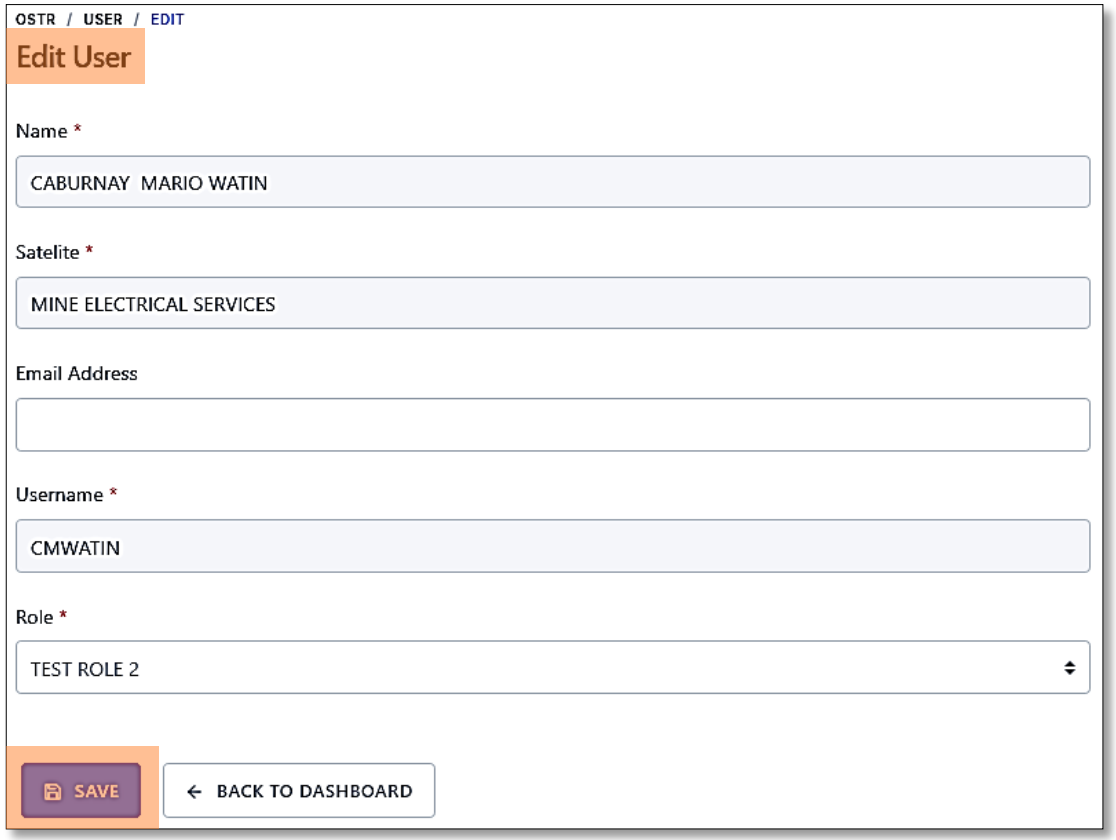

USER MAINTENANCE

3. Select the **Edit** icon and change the information accordingly once the **Edit User** screen appears.

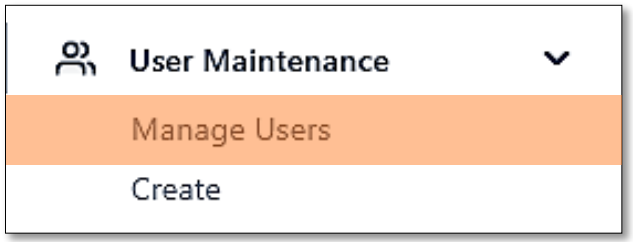

USER MAINTENANCE

4. Click the **Save** button to save the changes made.

USER MAINTENANCE

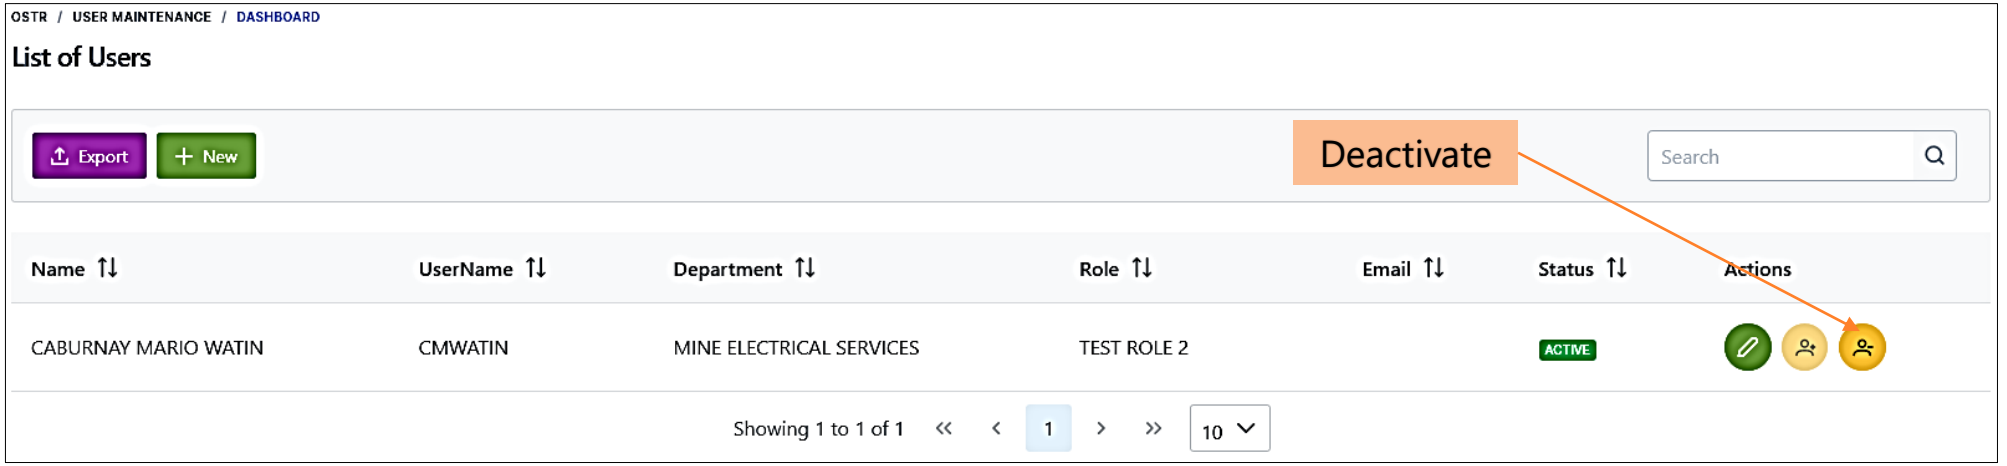

Deactivate a User

1. Go to **User Maintenance** and select the **Manage Users** option.
2. View the **List of the Users** screen. You may use either the **search** or **pagination** functions to look for the user you want to deactivate.

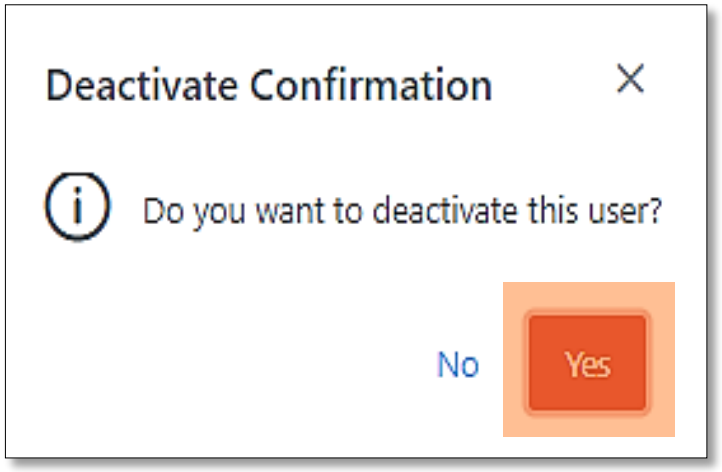

USER MAINTENANCE

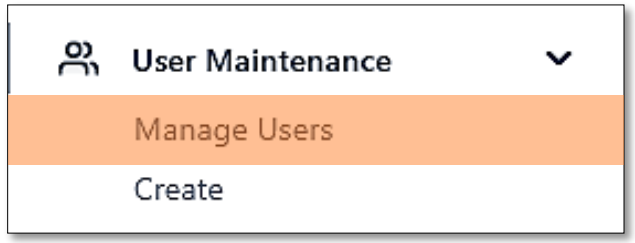

3. Select the **Deactivate** icon. A pop-up box will appear asking if you want to continue the deactivation process.

4. Click the **Yes** button to confirm.

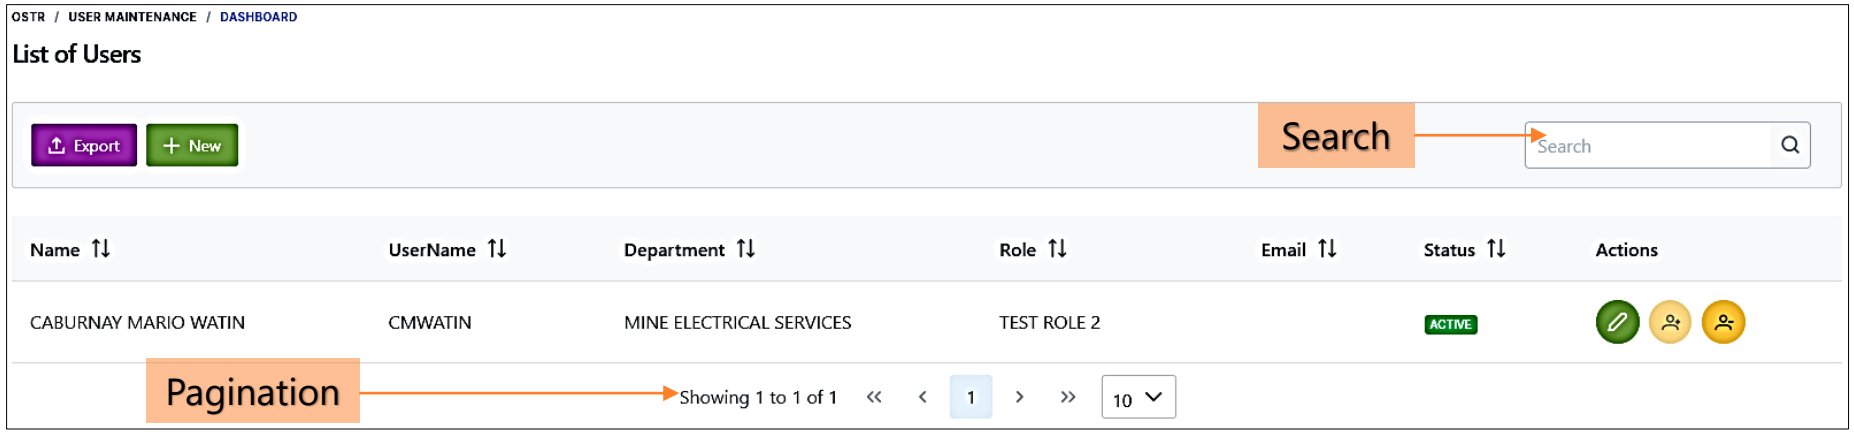

USER MAINTENANCE

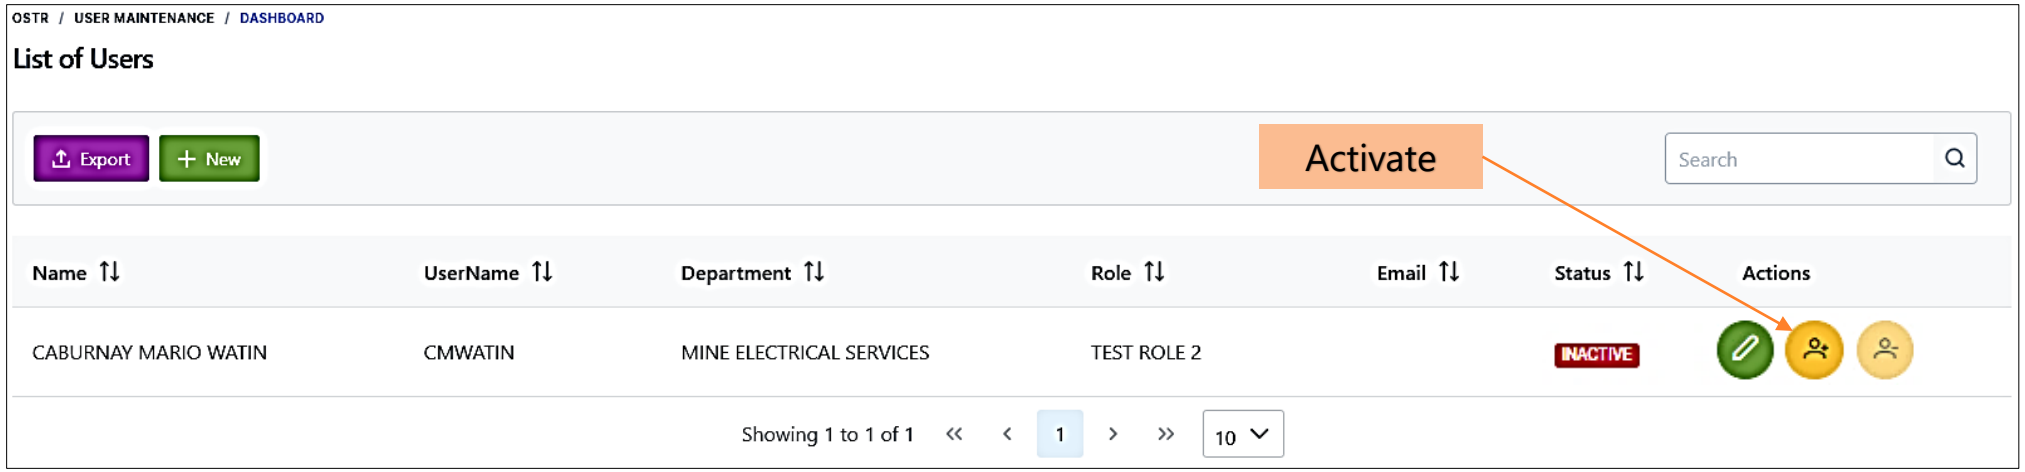

Activate a User

1. Go to **User Maintenance** and select the **Manage Users** option.
2. View the **List of the Users** screen. You may use either the **search** or **pagination** functions to look for the inactive user you want to activate.

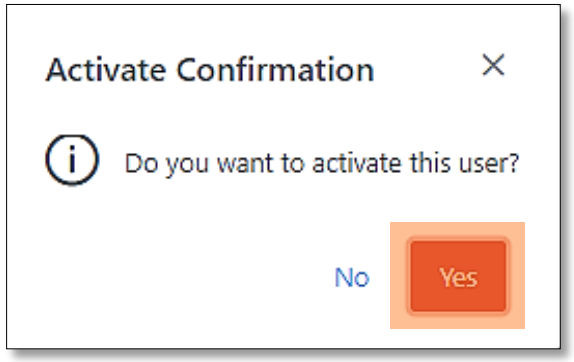

USER MAINTENANCE

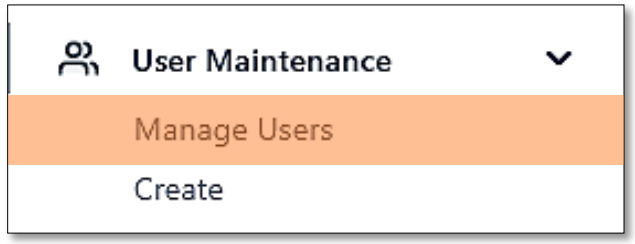

3. Select the **Activate** icon. A pop-up box will appear asking if you want to continue the activation process.

4. Click the **Yes** button to confirm.

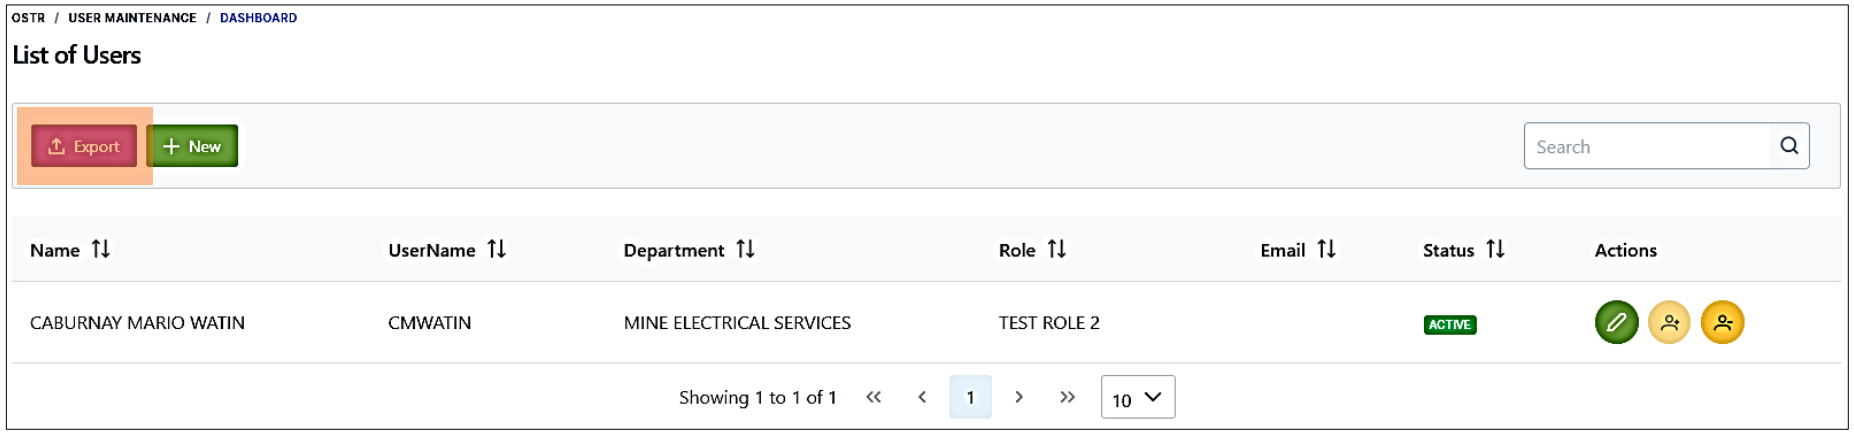

USER MAINTENANCE

Export List of Users

1. Go to **User Maintenance** and select the **Manage Users** option.
2. Click the **Export** button to export the list of users.

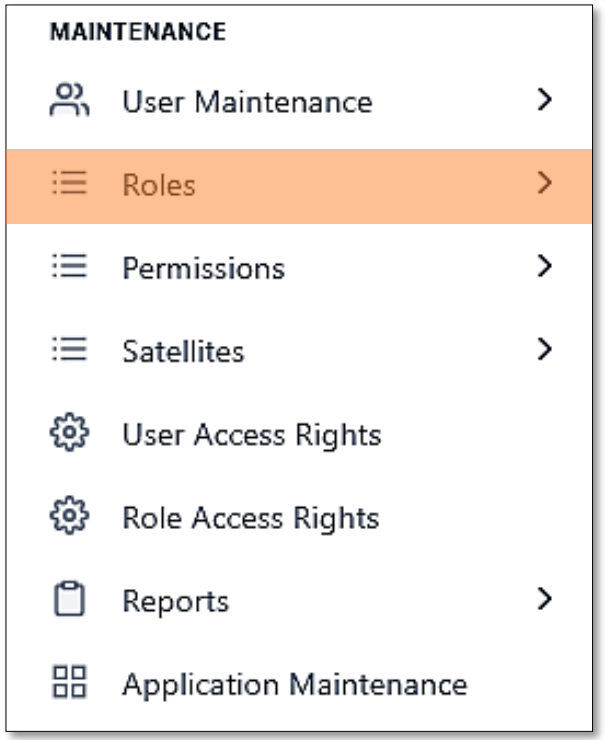

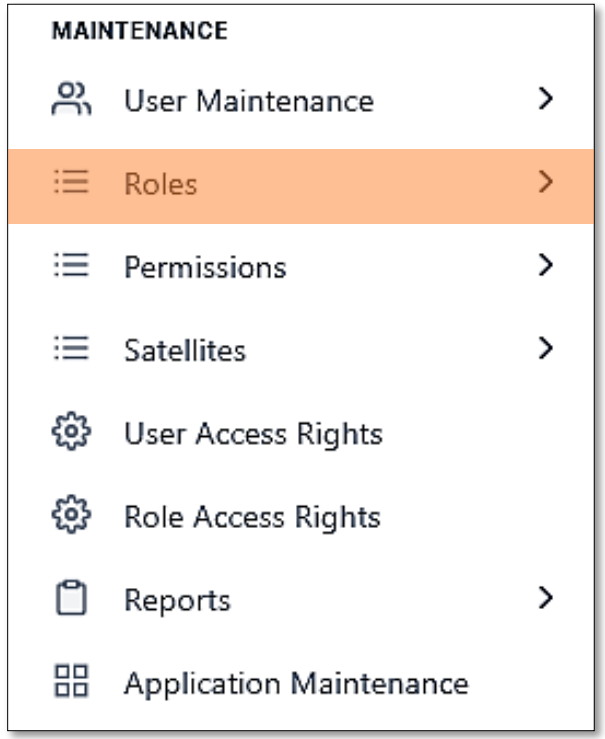

Chapter 9

ROLES

ROLES

Roles

An OSTR maintenance module that displays information about the roles so that you may manage user roles.

You may also do the following:

- Create, edit, delete, view, and export the roles.

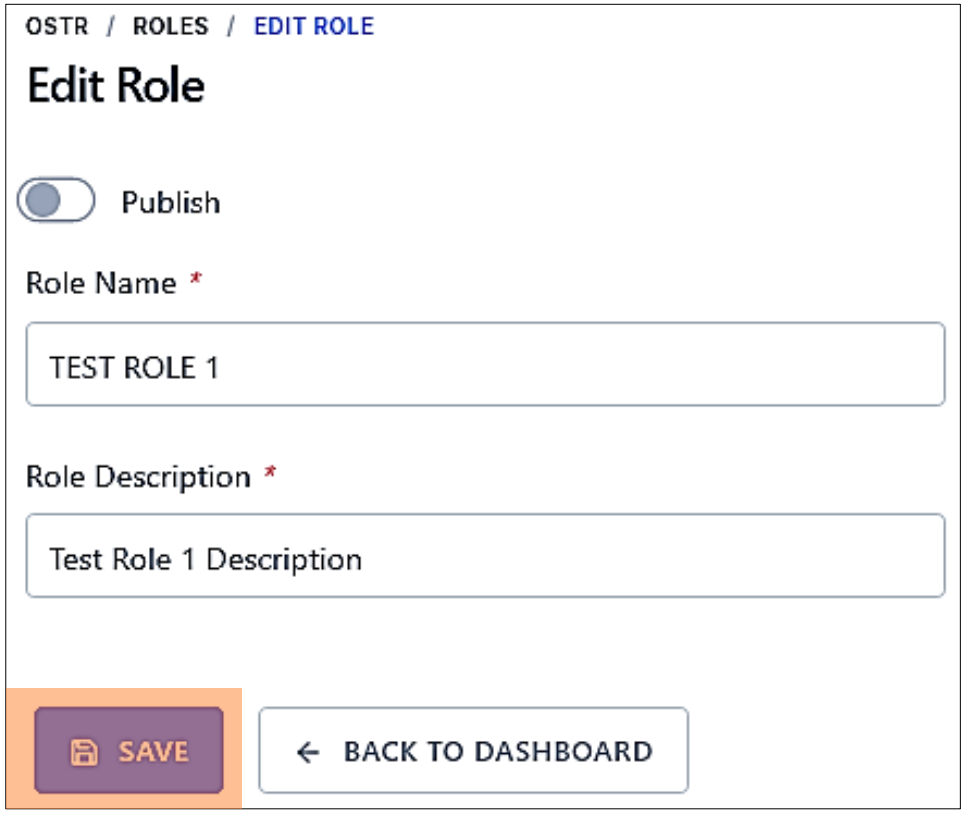

ROLES

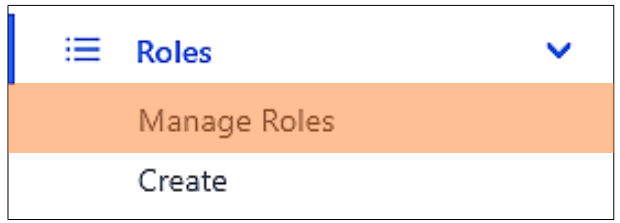

Create a Role

1. Go to **Roles** and select the **Create** option.
2. Enter all necessary information.
3. Click the **Save** button to complete the process.

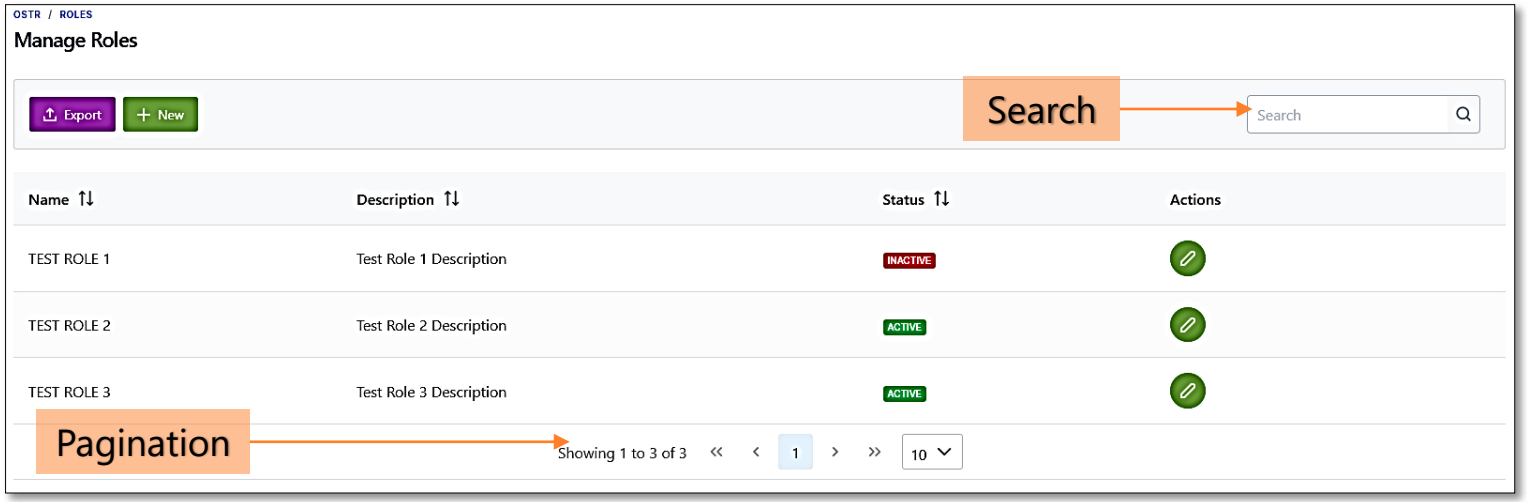

Status	It is the current status of the role.
Role Name	It is the name of the role you are currently creating.
Role Description	It is the description of the role you are currently creating.

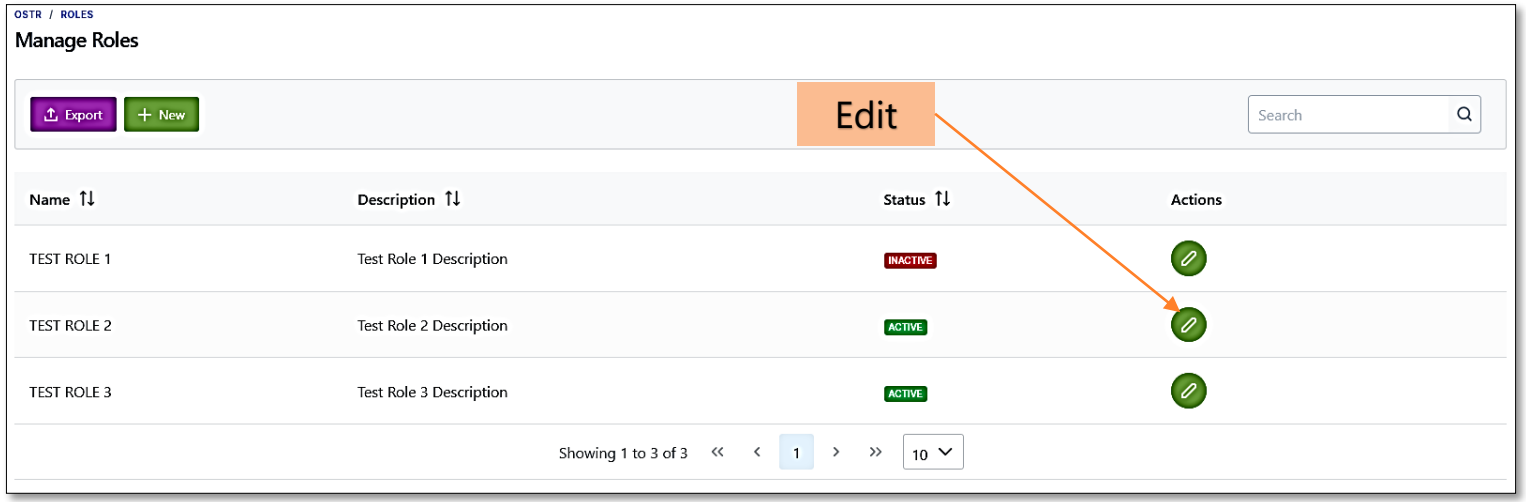

Edit a Role

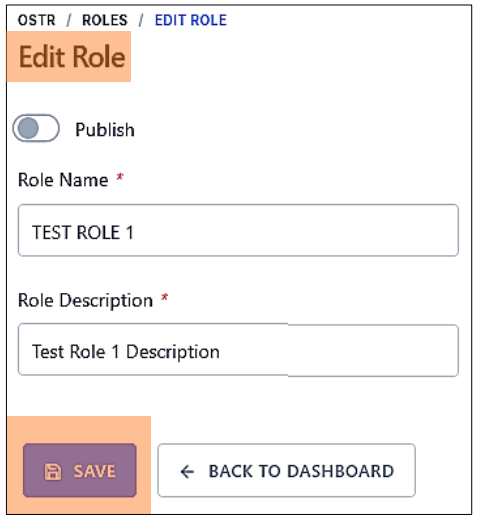

1. Go to **Roles** and select the **Manage Roles** option.
2. View the **Manage Roles** screen. You may use either the **search** or **pagination** functions to look for the role you want to edit.

3. Select the **Edit** icon and change the information accordingly once the **Edit Role** screen appears.

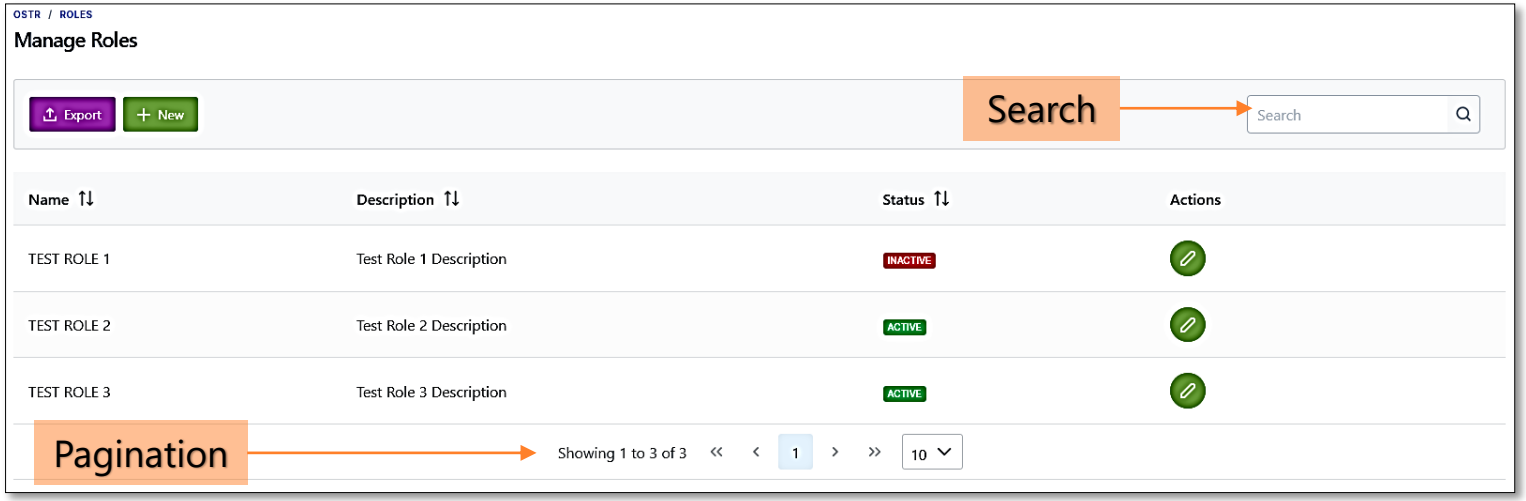

4. Click the **Save** button to save the changes made.

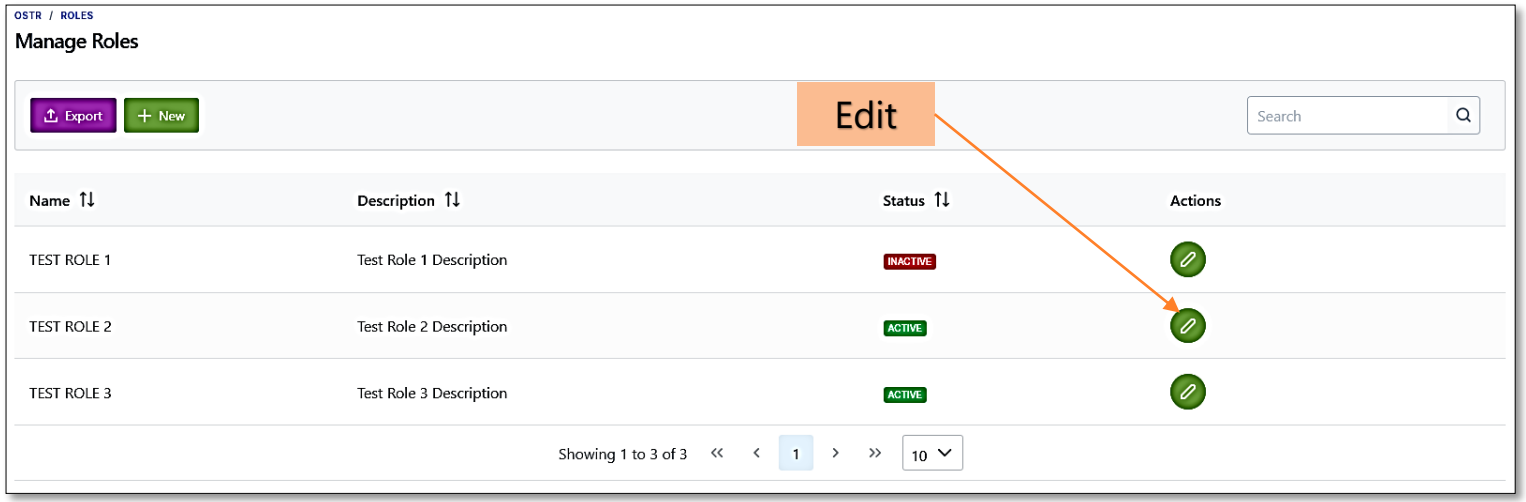

Change the status of a Role

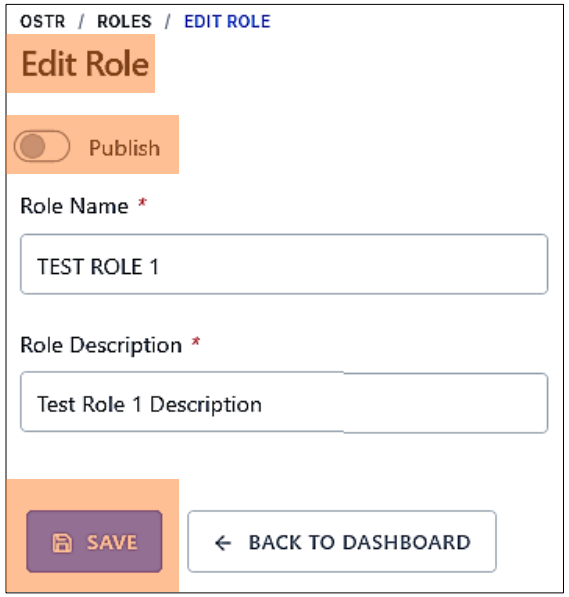

1. Go to **Roles** and select the **Manage Roles** option.
2. View the **Manage Roles** screen. You may use either the **search** or **pagination** functions to look for the role whose status you want to change.

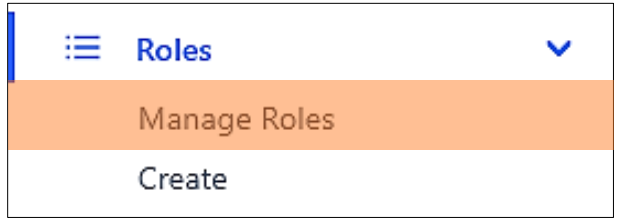

3. Select the **Edit** icon and toggle the status bar of the role once the **Edit Role** screen appears.

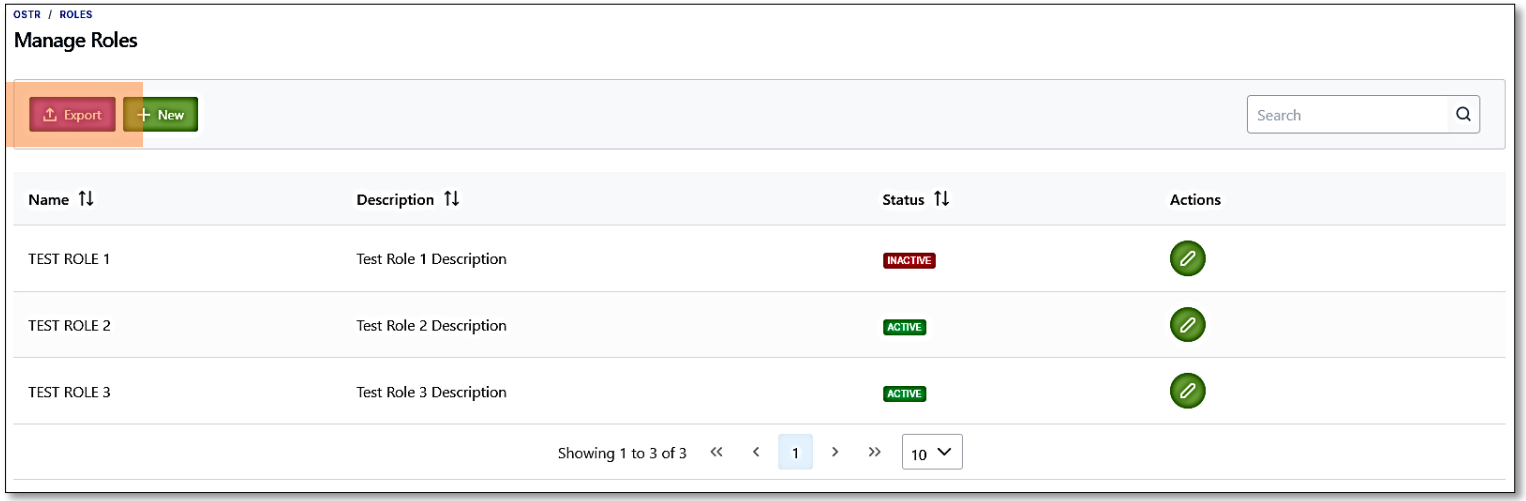

4. Click the **Save** button to save the changes made.

Export Roles

1. Go to **Roles** and select the **Manage Roles** option.
2. Click the **Export** button to export the roles.

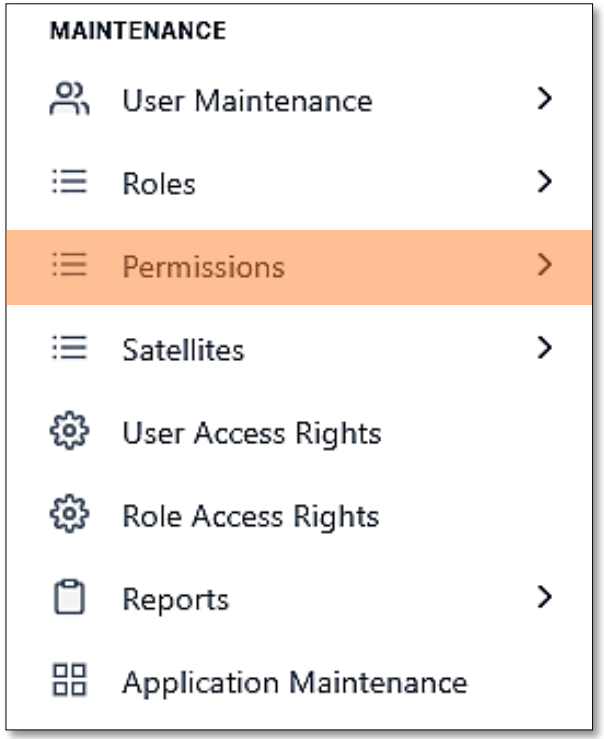

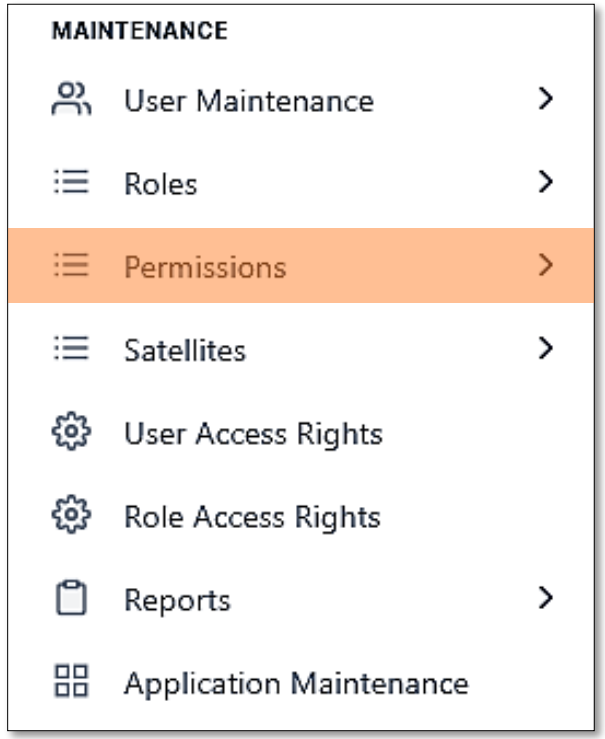

Chapter 10

PERMISSIONS

PERMISSIONS

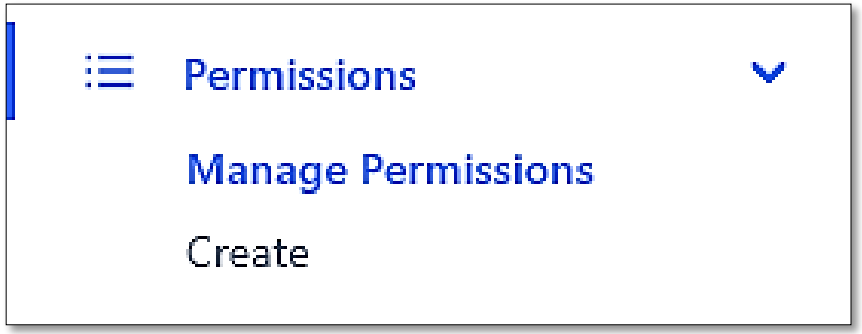

Permissions

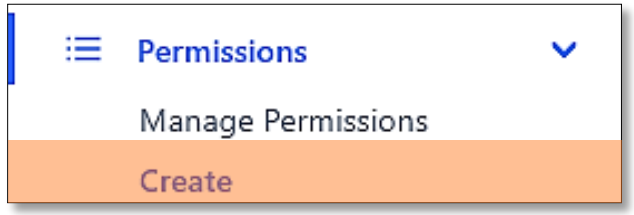

An OSTR maintenance module that displays information about permissions and allows you to manage the permissions of the modules.

You may also do the following:

- Create, edit, delete, view, and export the permissions.

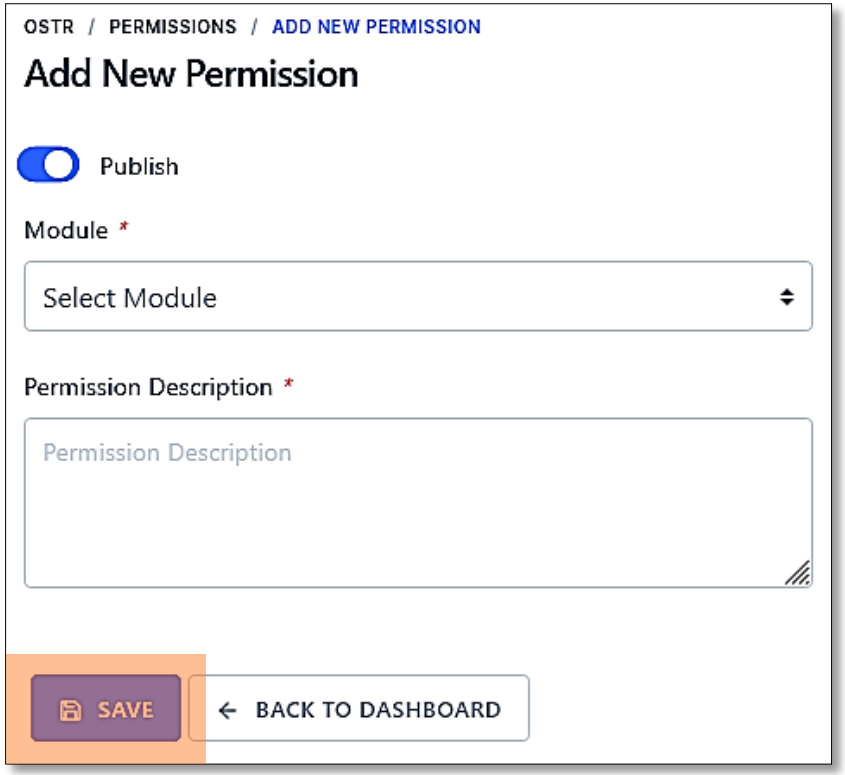

PERMISSIONS

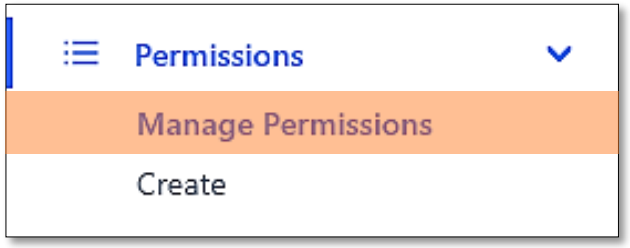

Create a Permission

1. Go to **Permissions** and select the **Create** option.
2. Enter all necessary information.
3. Click the **Save** button to complete the process.

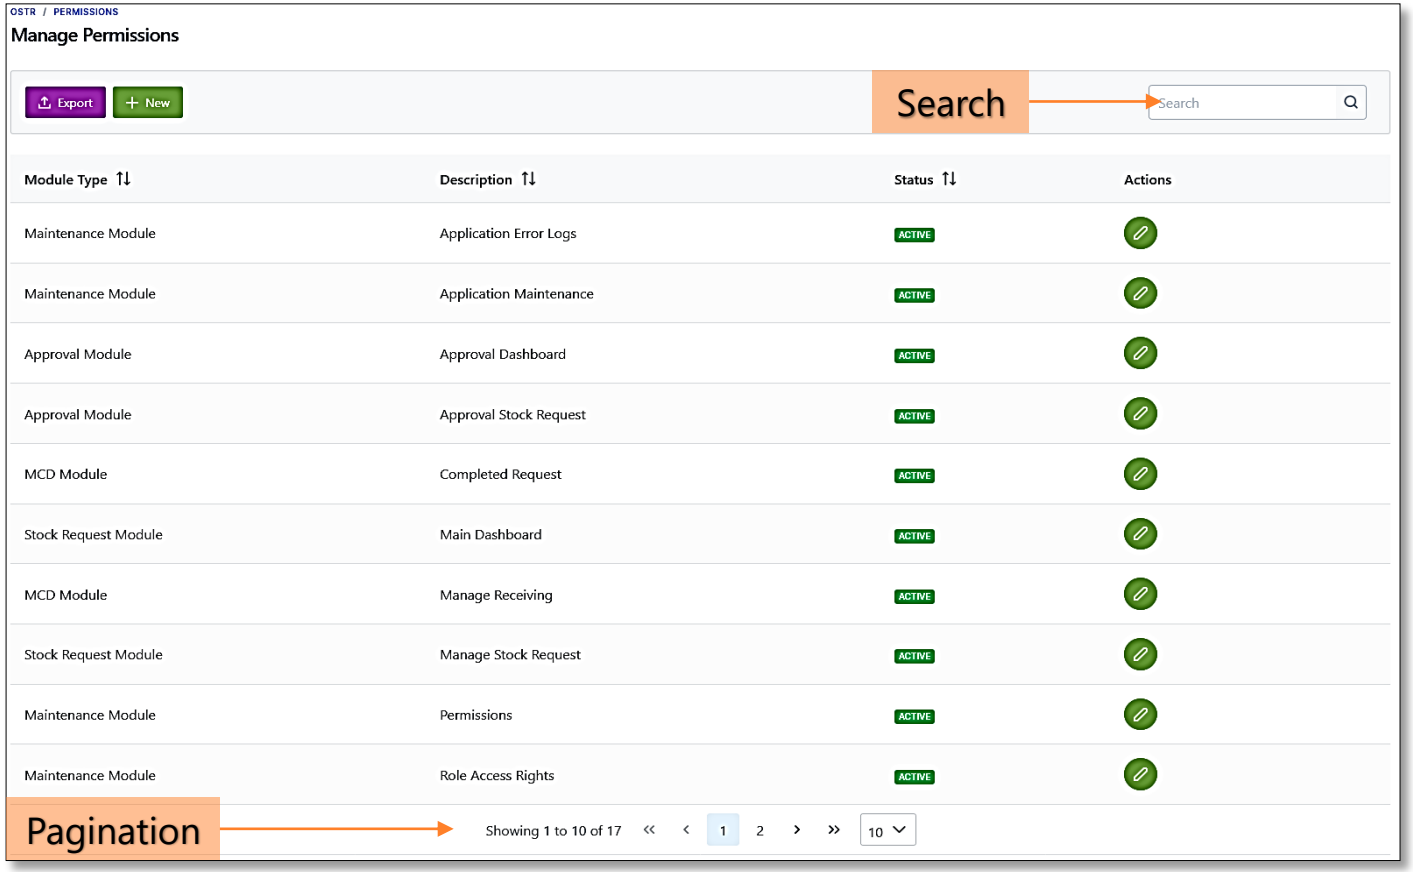

Status	It is the current status of the permission.
Module	It is the module to which the permission is attached.
Permission Description	It is the description of the permission you are currently creating.

PERMISSIONS

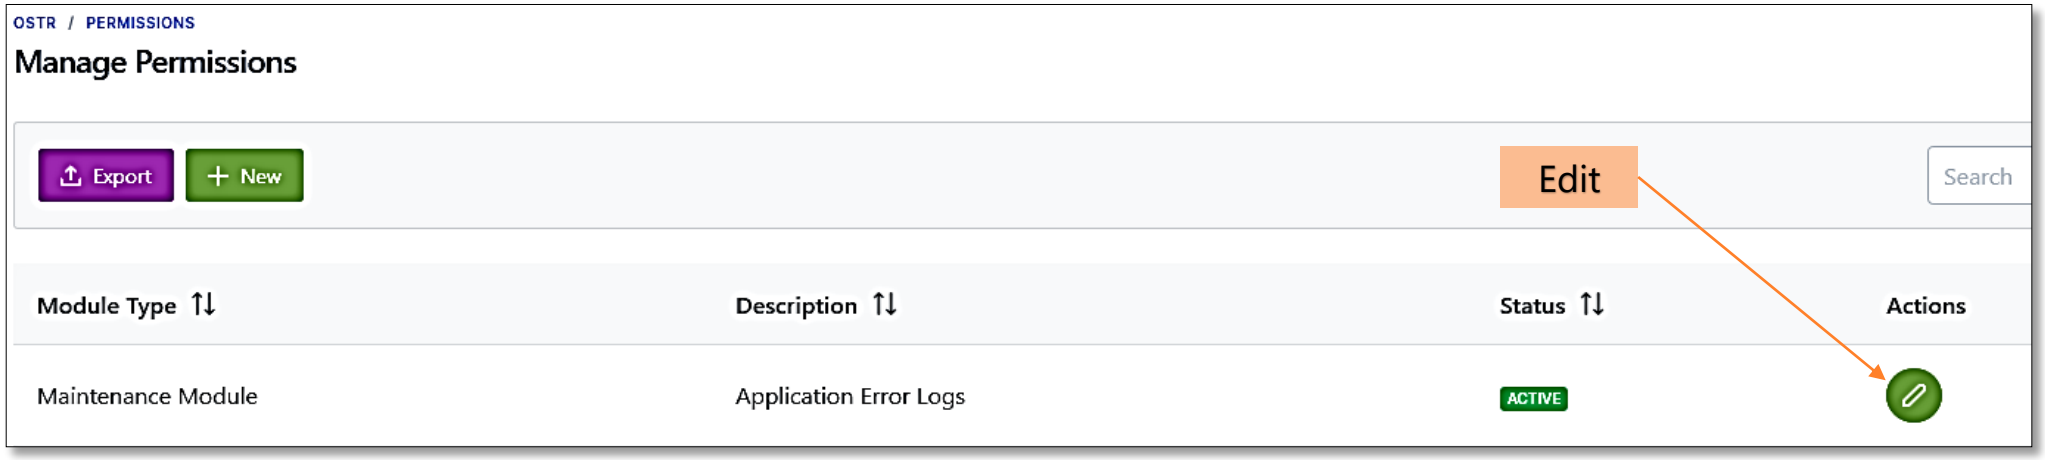

Edit a Permission

1. Go to **Permissions** and select the **Manage Permissions** option.
2. View the **Manage Permissions** screen. You may use either the **search** or **pagination** functions to look for the permission you want to edit.

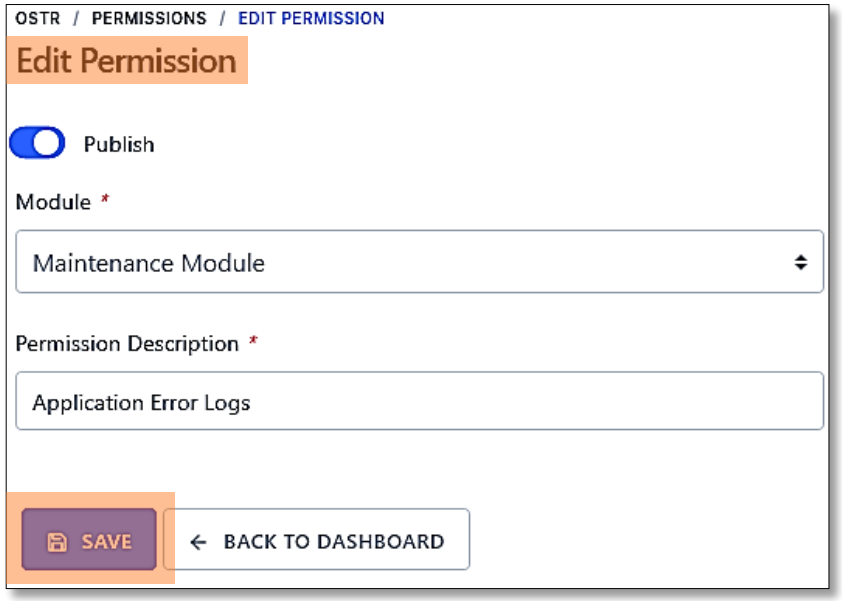

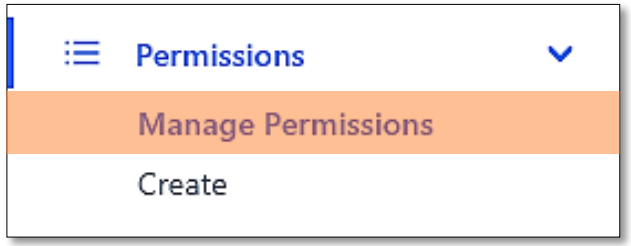

PERMISSIONS

3. Select the **Edit** icon and change the information accordingly once the **Edit Permission** screen appears.

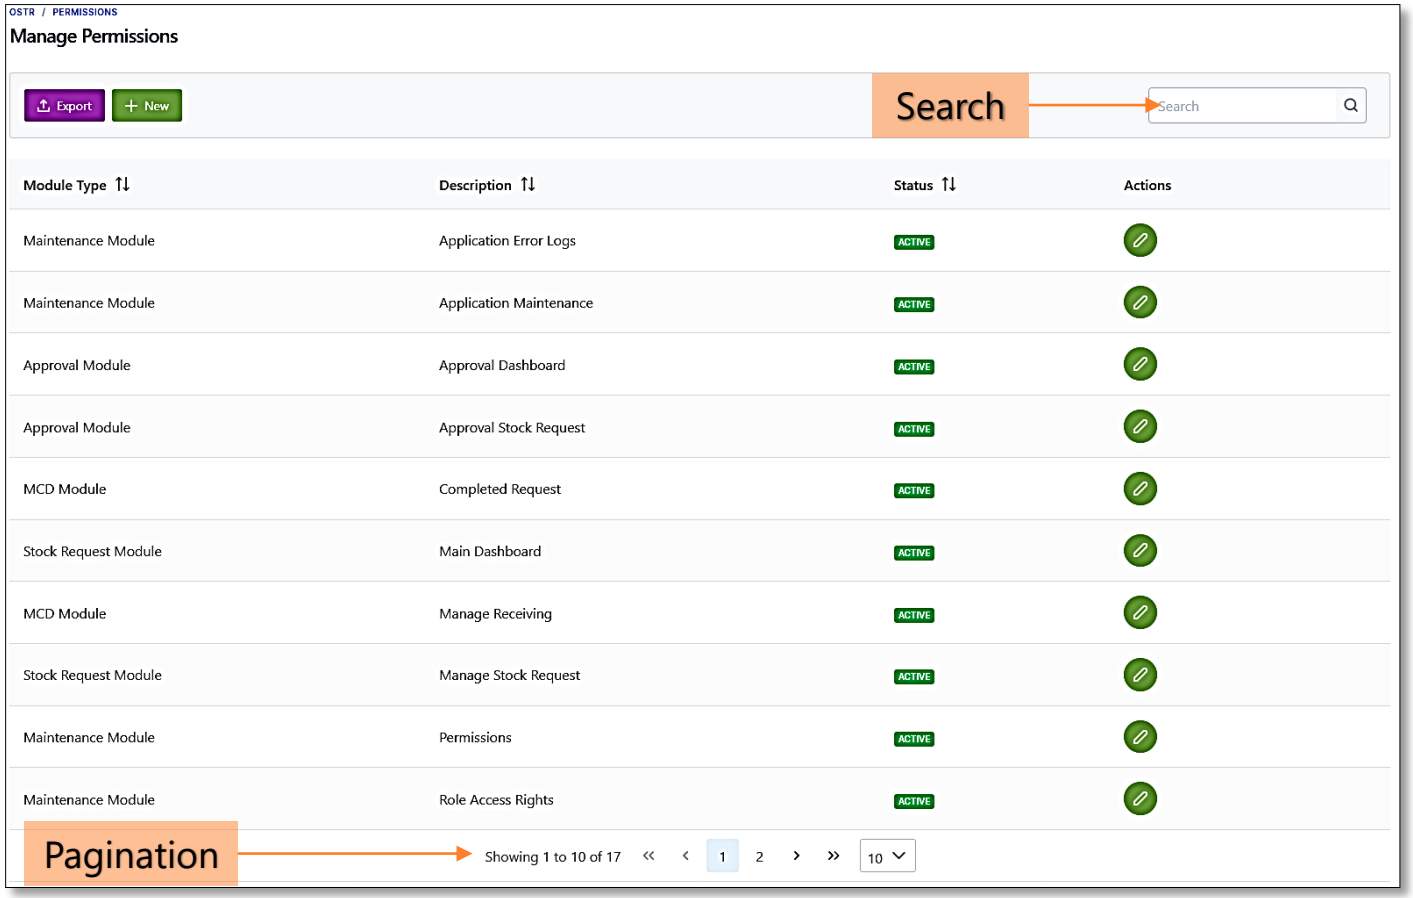

4. Click the **Save** button to save the changes made.

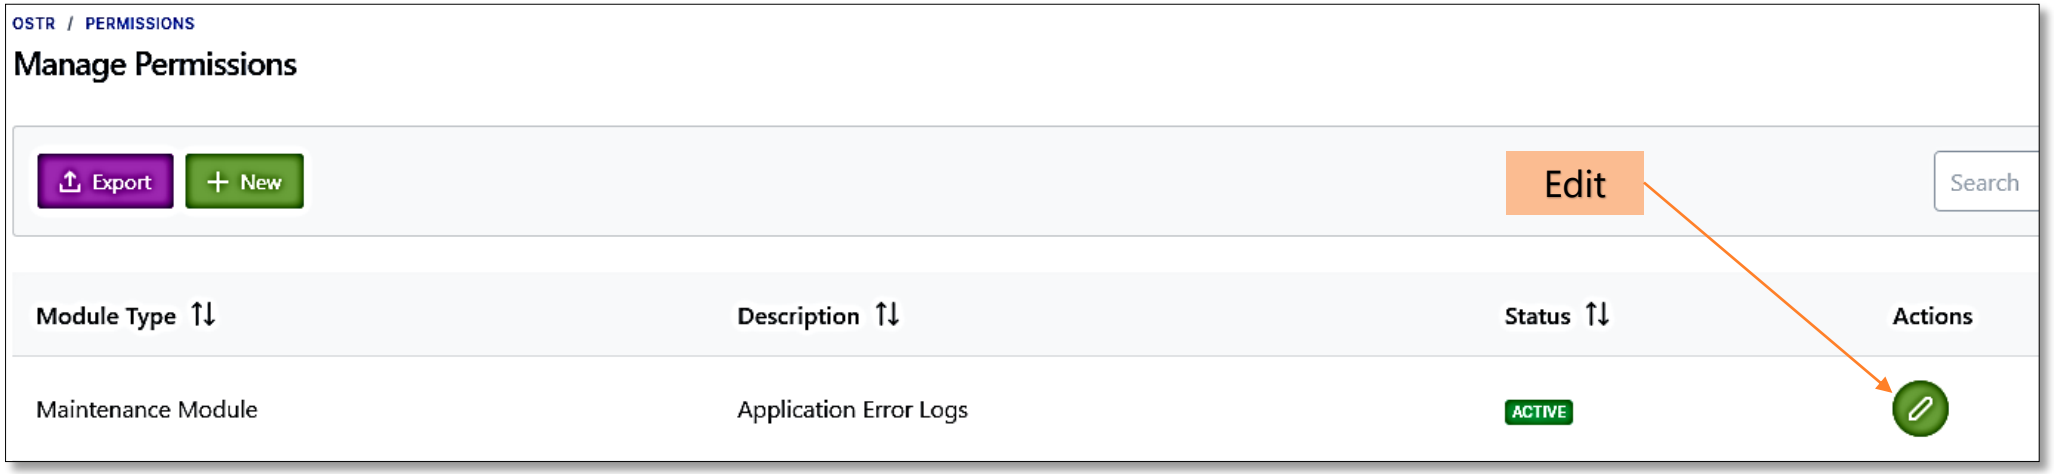

Change the status of a Permission

1. Go to **Permissions** and select the **Dashboard** option.
2. View the **Manage Permissions** screen. You may use either the **search** or **pagination** functions to look for the permission whose status you want to change.

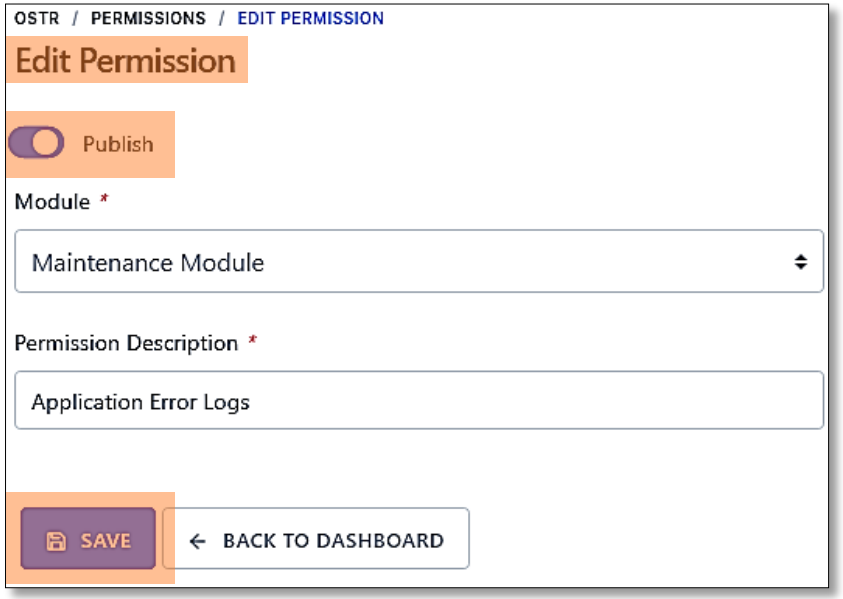

PERMISSIONS

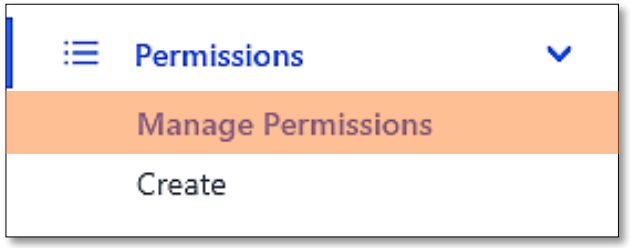

3. Select the **Edit** icon and toggle the status bar once the **Edit Permission** screen appears.

4. Click the **Save** button to save the changes made.

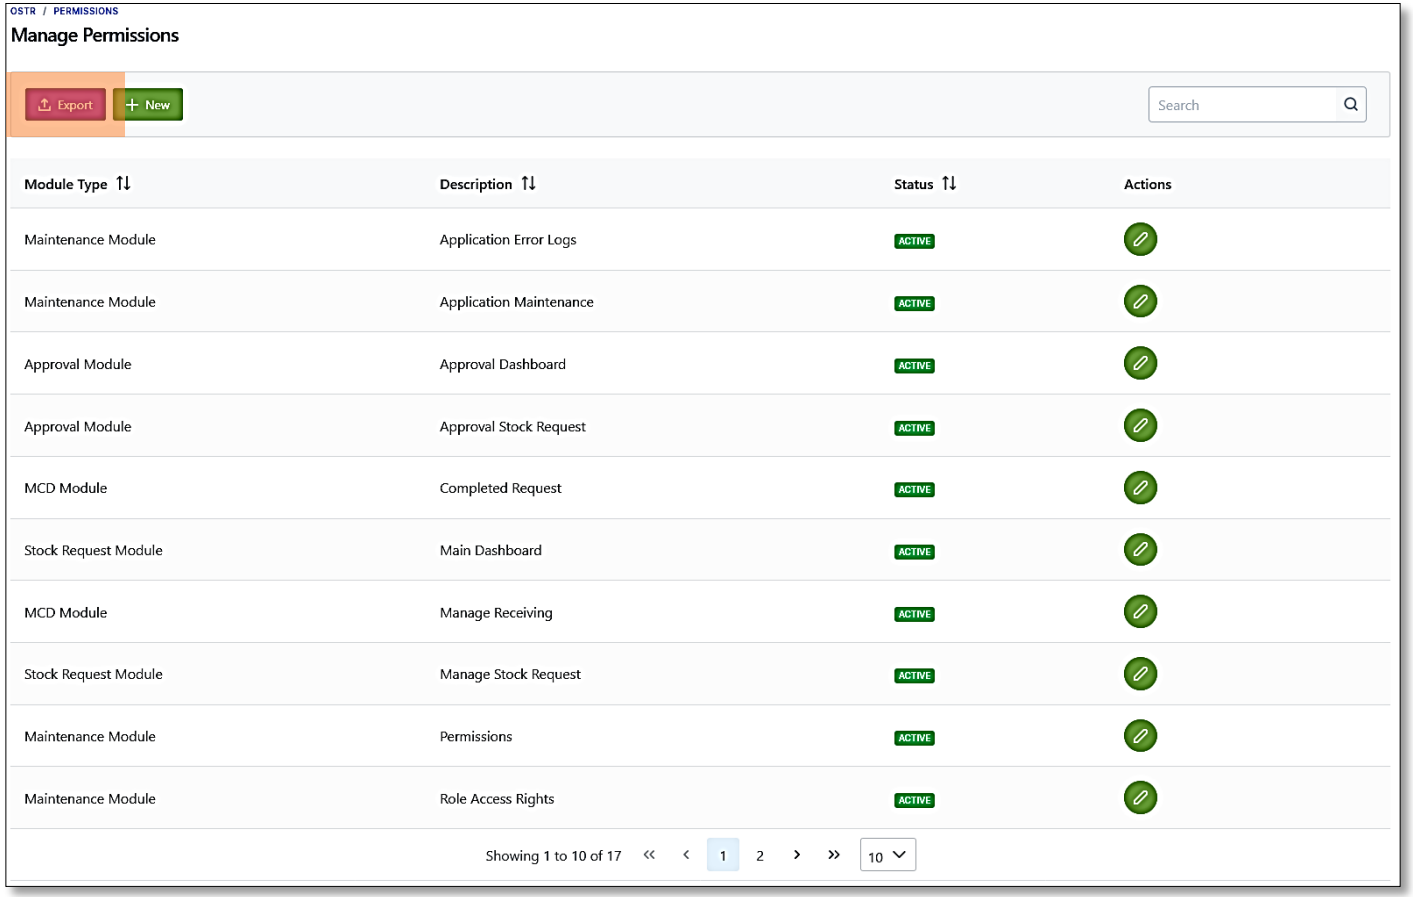

PERMISSIONS

Export Permissions

1. Go to **Roles** and select the **Manage Permissions** option.
2. Click the **Export** button to export the permissions.

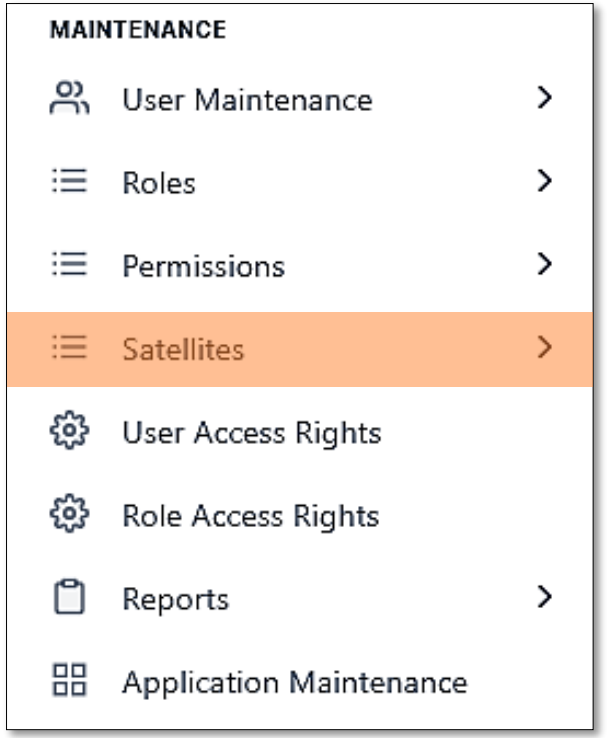

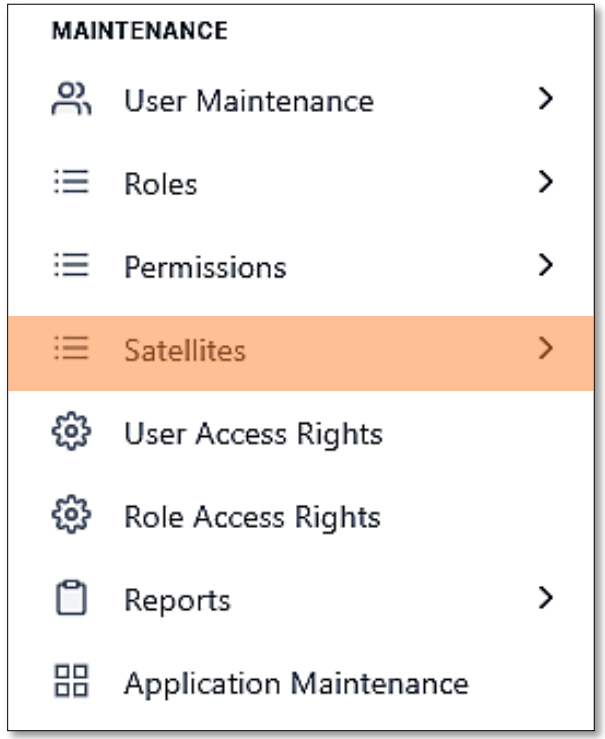

Chapter 11

SATELLITES

SATELLITES

Satellites

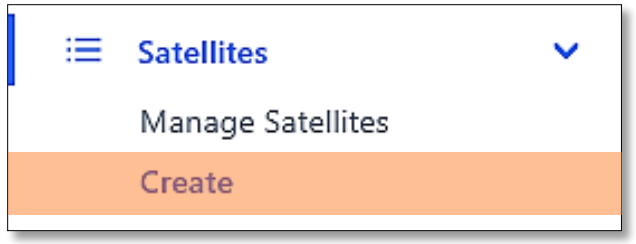

An OSTR maintenance module that displays information about satellites and allows you to manage the satellites of the modules.

You may also do the following:

- Create, edit, delete, view, and export the satellites.

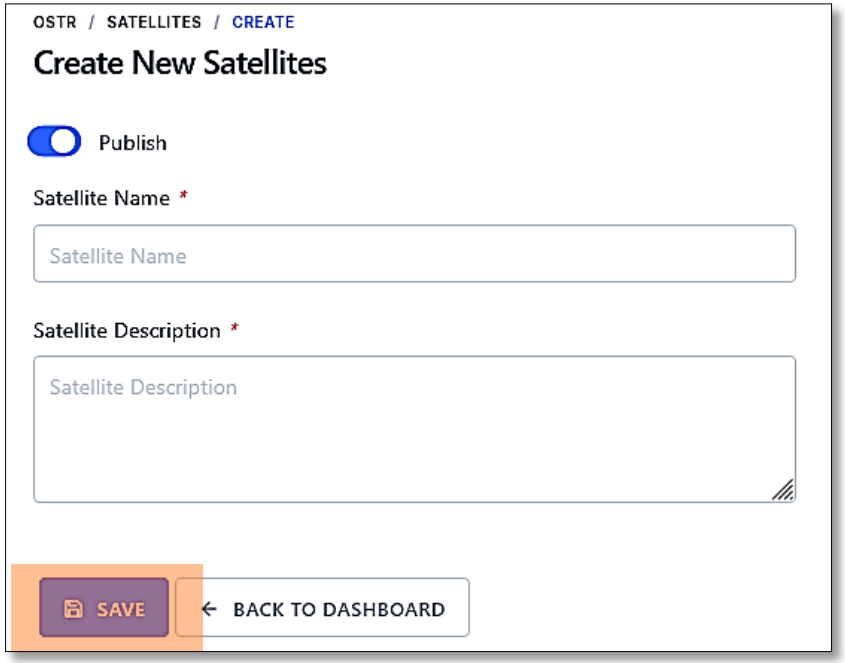

SATELLITES

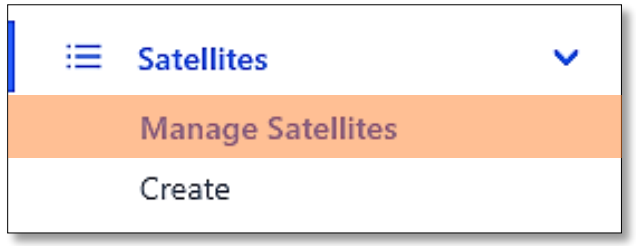

Create a Satellite

1. Go to **Satellites** and select the **Create** option.
2. Enter all necessary information.
3. Click the **Save** button to complete the process.

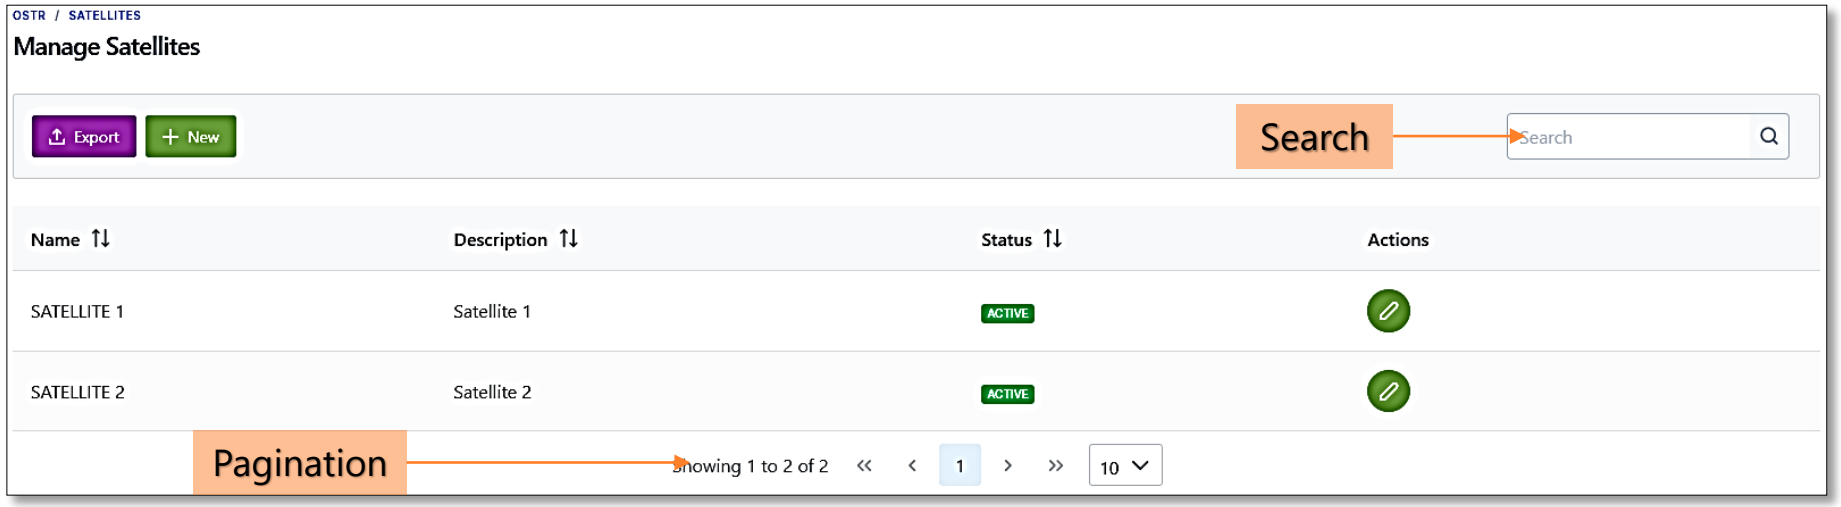

Status	It is the current status of the satellite.
Satellite Name	It is the name of the satellite.
Satellite Description	It is the description of the satellite you are currently creating.

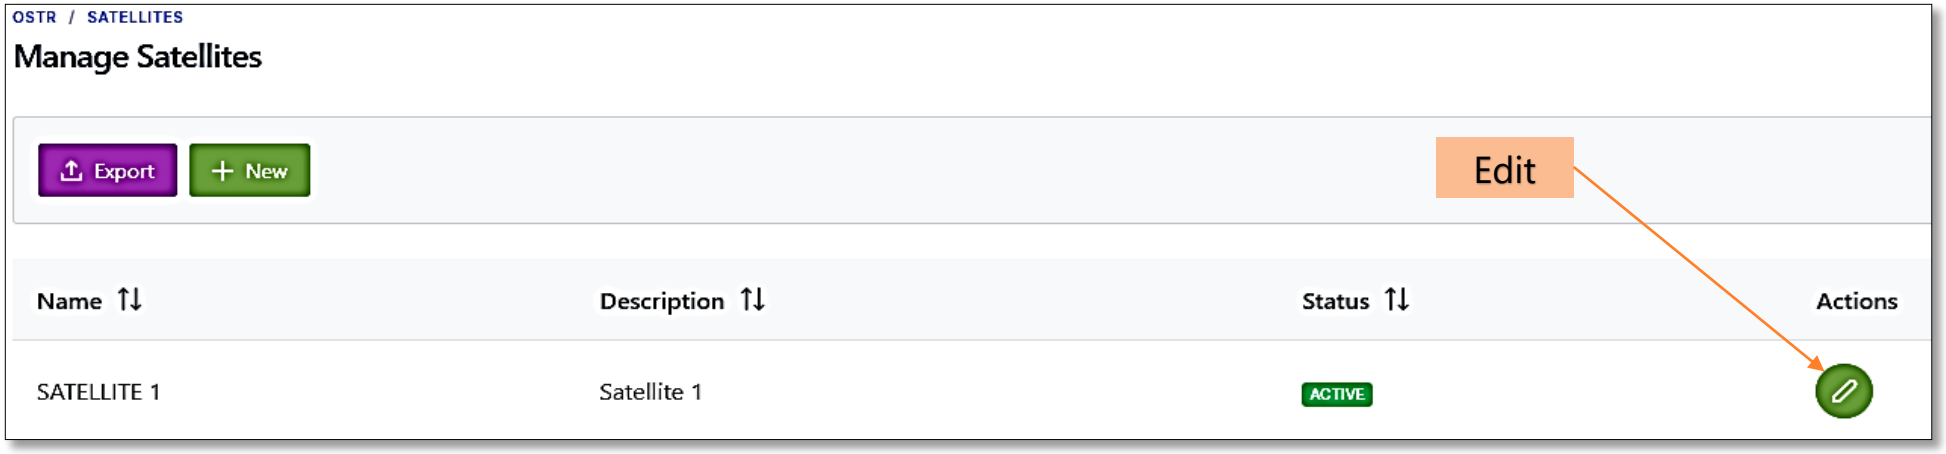

Edit a Satellite

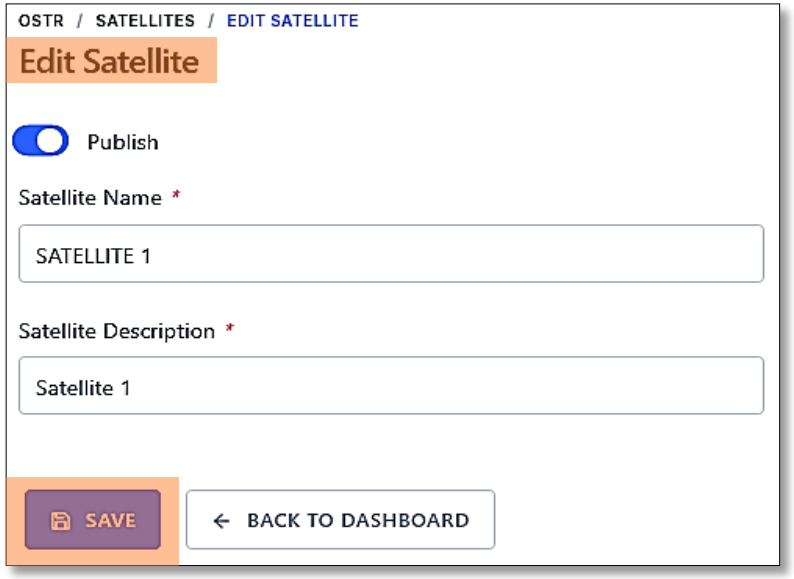

1. Go to **Satellites** and select the **Manage Satellites** option.
2. View the **Manage Satellites** screen. You may use either the **search** or **pagination** functions to look for the satellite you want to edit.

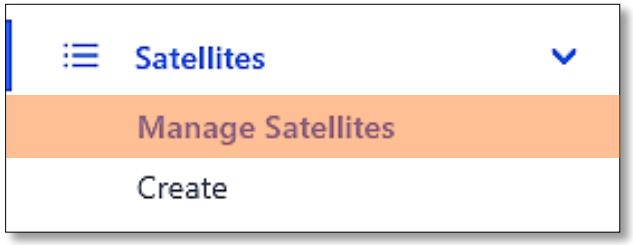

3. Select the **Edit** icon and change the information accordingly once the **Edit Satellite** screen appears.

4. Click the **Save** button to save the changes made.

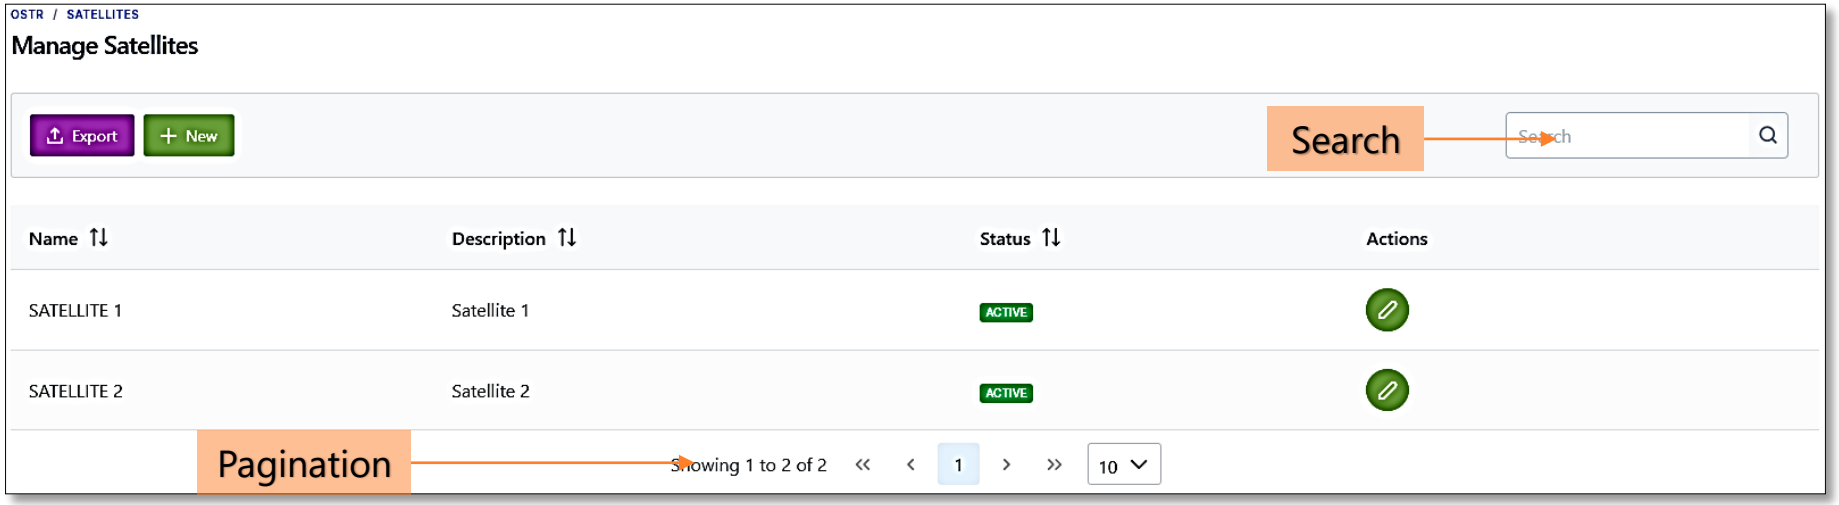

SATELLITES

Change the status of a Satellite

1. Go to **Satellites** and select the **Manage Satellites** option.
2. View the **Manage Satellites** screen. You may use either the **search** or **pagination** functions to look for the satellite whose status you want to change.

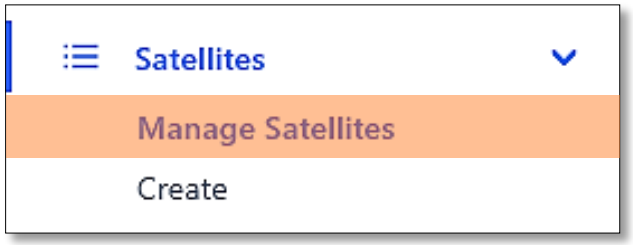

SATELLITES

3. Select the **Edit** icon and toggle the status bar once the **Edit Satellite** screen appears.

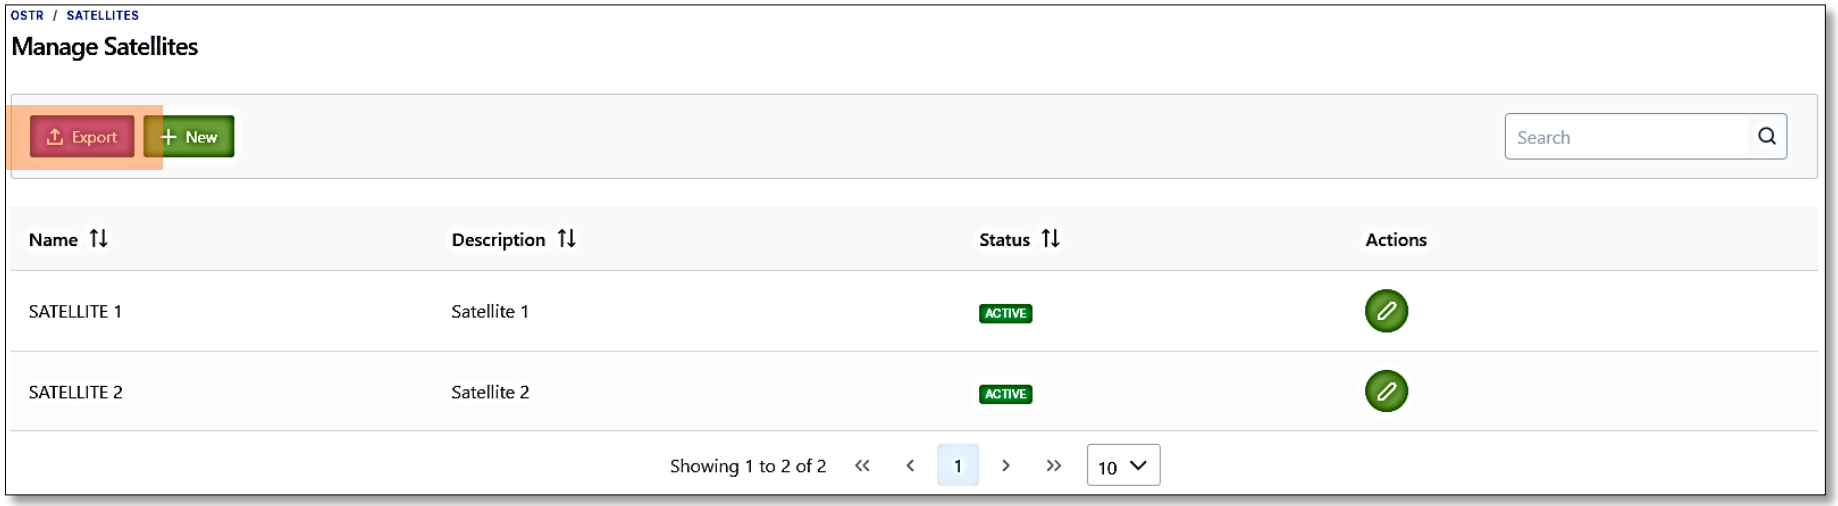

4. Click the **Save** button to save the changes made.

Export Satellites

1. Go to **Roles** and select the **Manage Satellites** option.
2. Click the **Export** button to export the satellites.

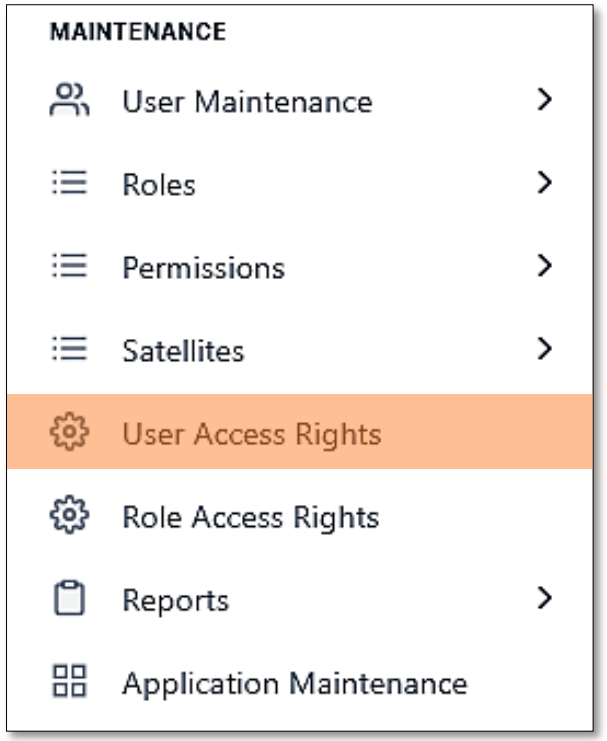

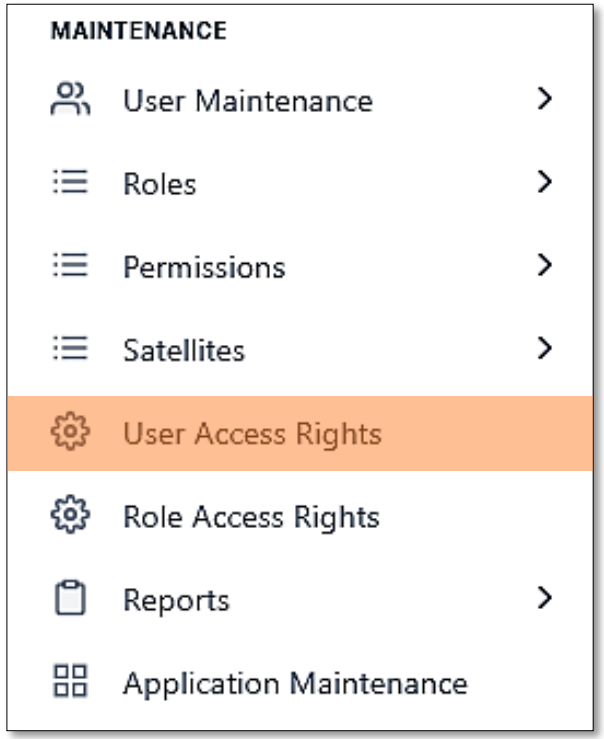

Chapter 12

USER ACCESS RIGHTS

USER ACCESS RIGHTS

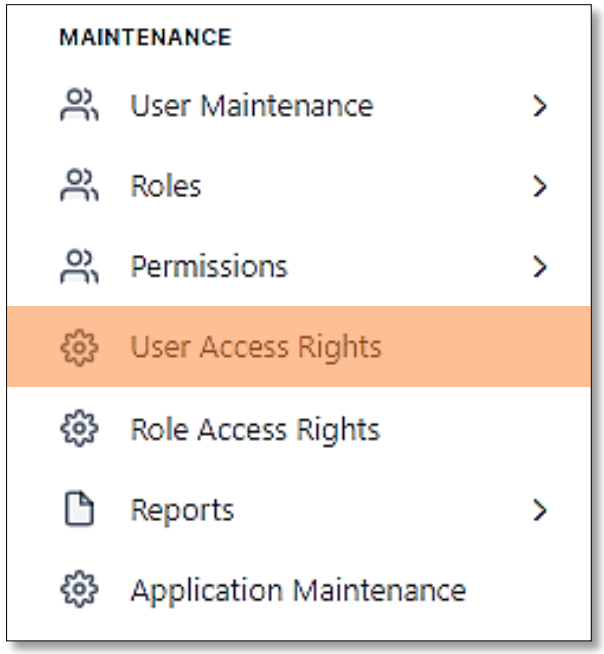

User Access Rights

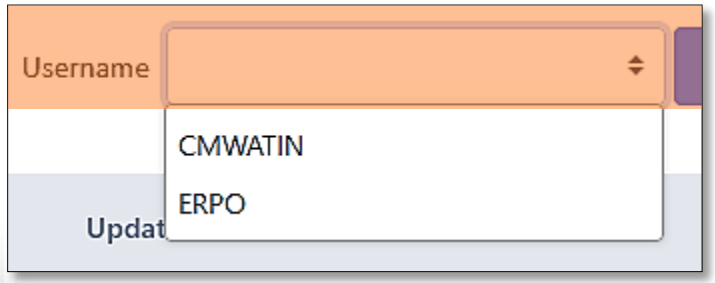

An OSTR maintenance module displays information about a user's access rights and allows you to manage what each user can and cannot access.

You may also do the following:

- Select a user and set the access rights of the user.

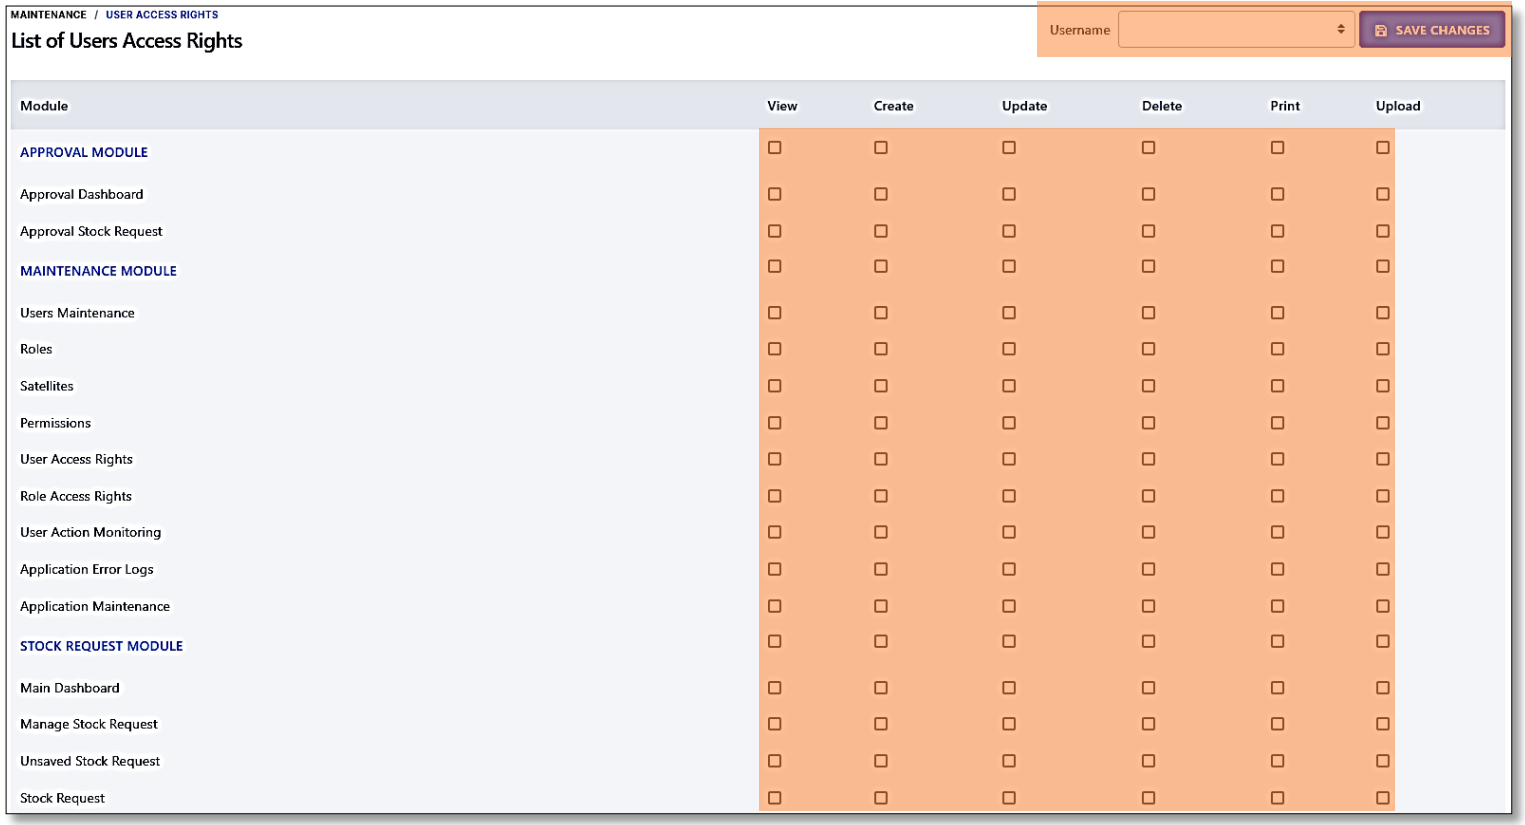

USER ACCESS RIGHTS

Change a User's Access Right

1. Go to **User Access Rights**.
2. Select a user in the **Username** dropdown menu.
3. Change the user's access rights accordingly by checking/unchecking a module's checkbox.
4. Click the **Save Changes** button to complete the process.

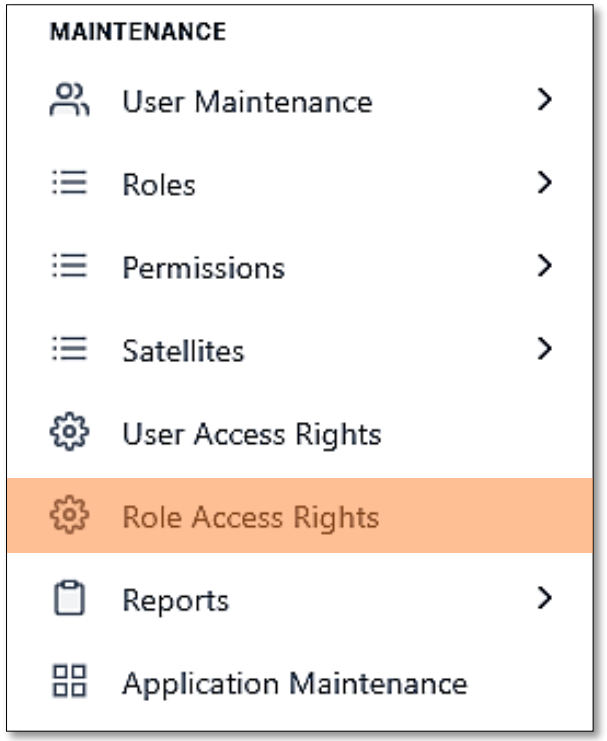

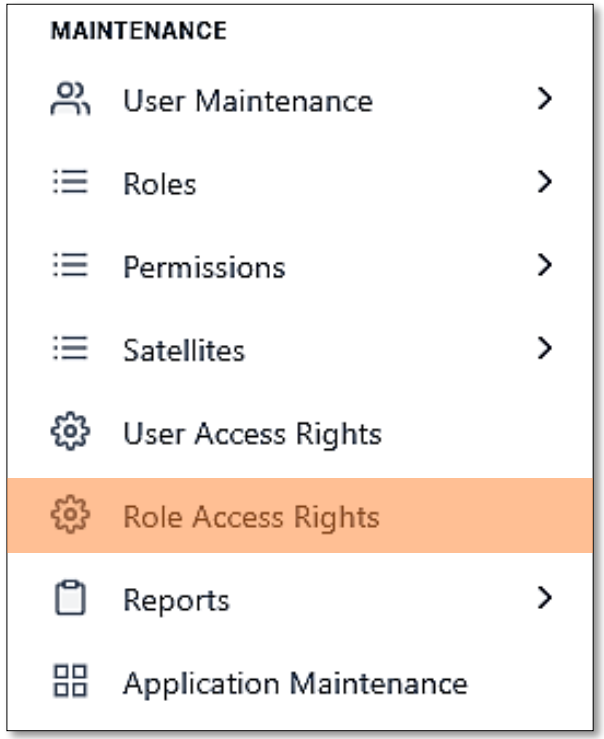

Chapter 13

ROLE ACCESS RIGHTS

ROLE ACCESS RIGHTS

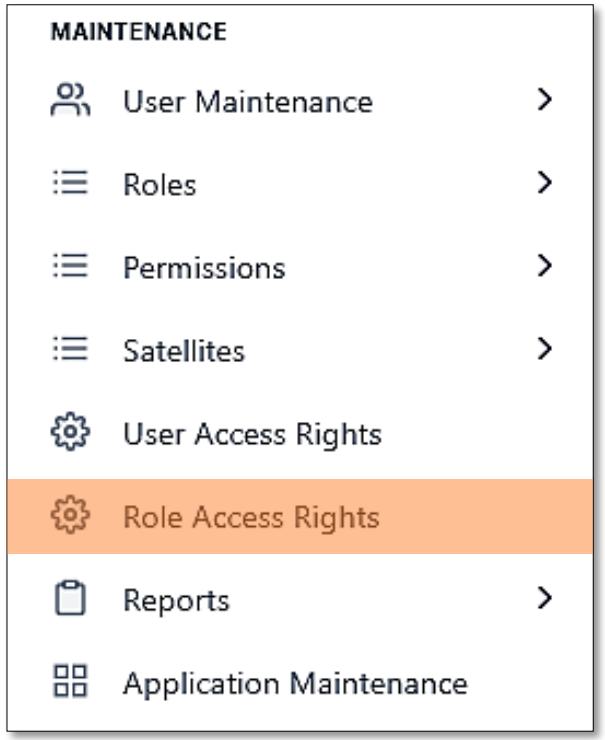

Role Access Rights

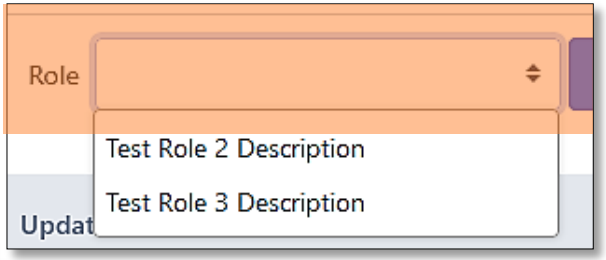

An OSTR maintenance module that displays information about a role's access rights and allows you to manage what each role can and cannot access.

You may also do the following:

- Select a role and set the access rights of the role.

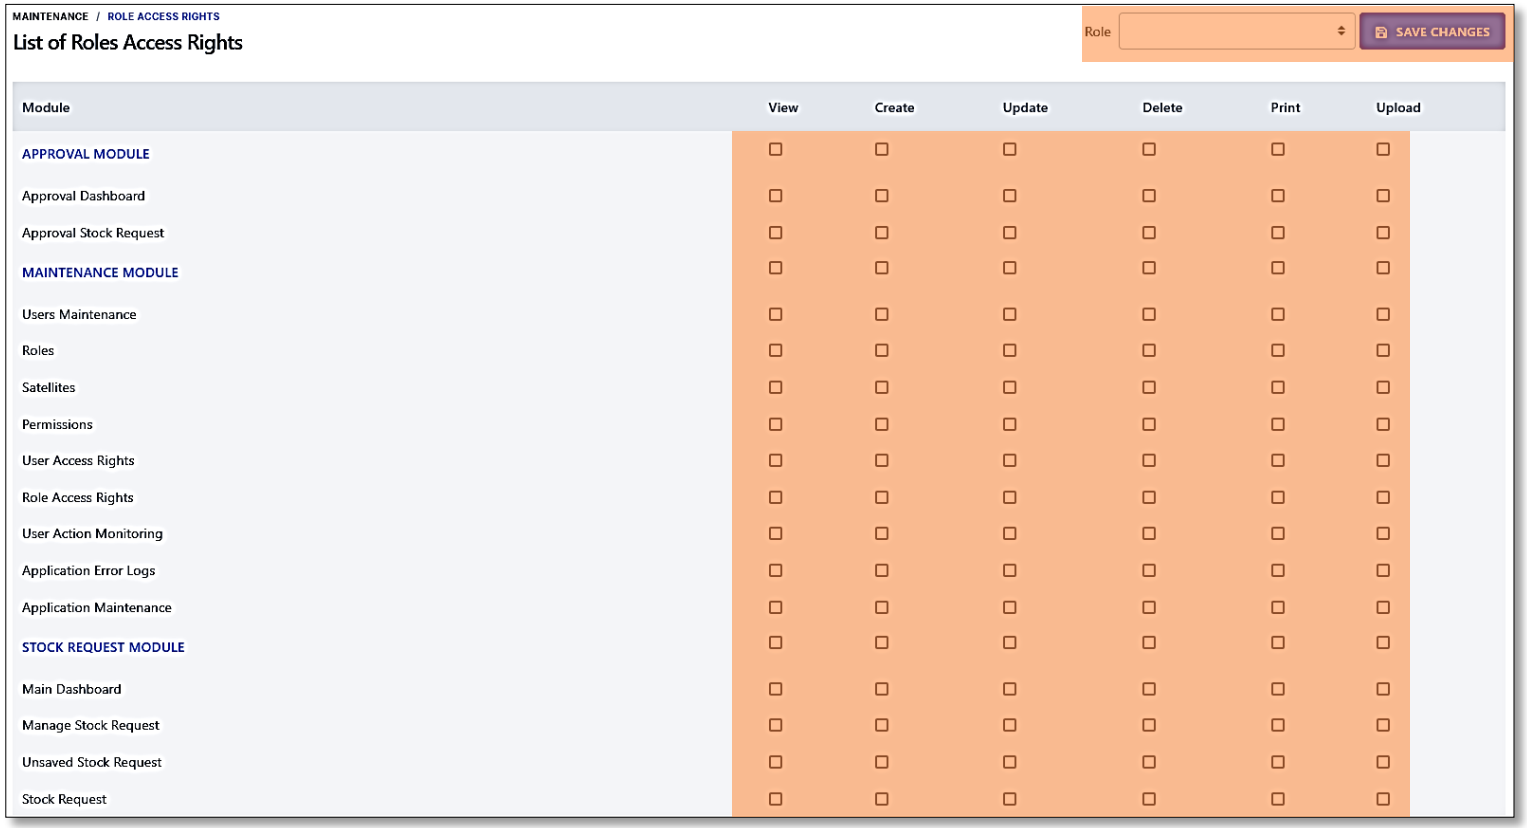

ROLE ACCESS RIGHTS

Change a Role's Access Right

1. Go to **Role Access Rights**.
2. Select a role in the **Role** dropdown menu.
3. Change the role's access rights accordingly by checking/unchecking a module's checkbox.
4. Click the **Save Changes** button to complete the process.

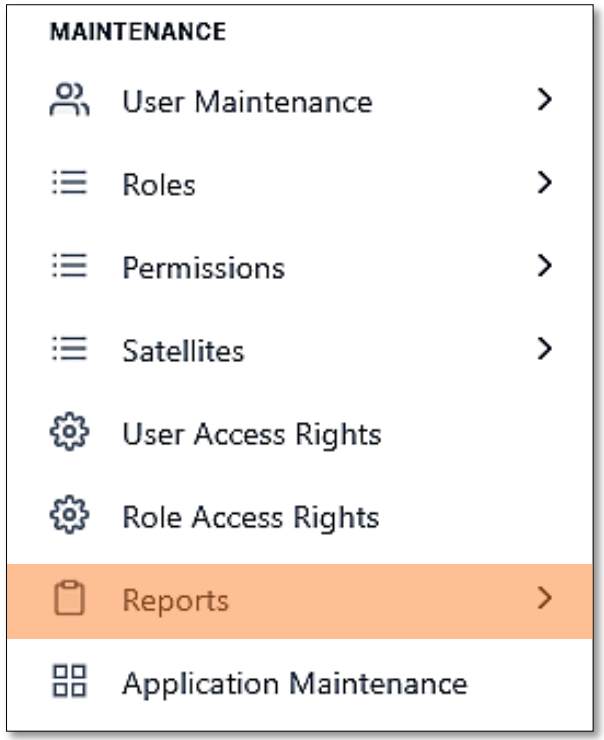

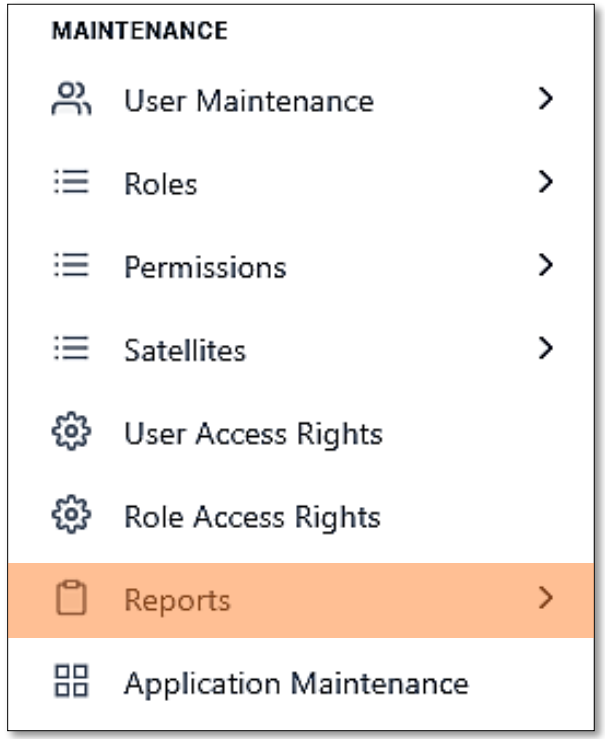

Chapter 14

REPORTS

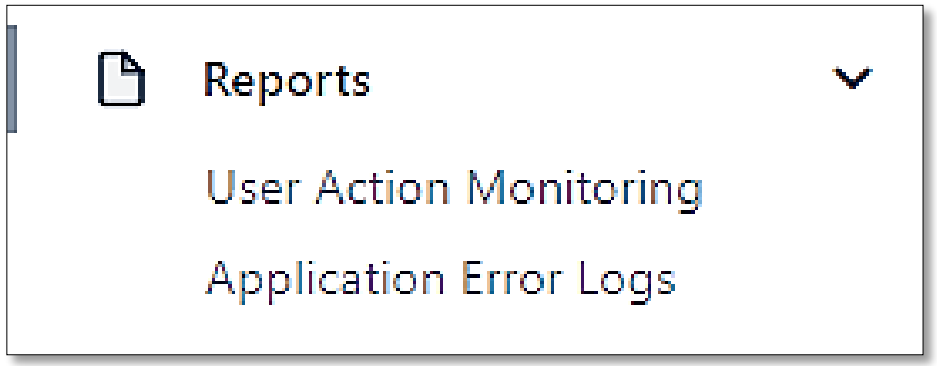

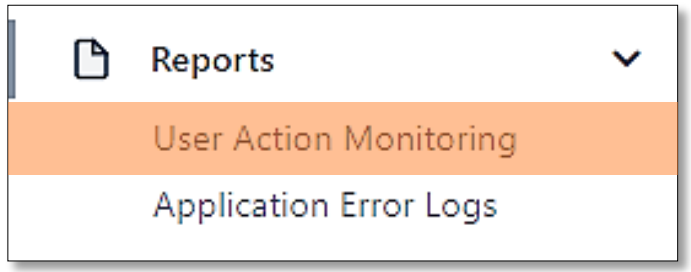

REPORTS

Reports

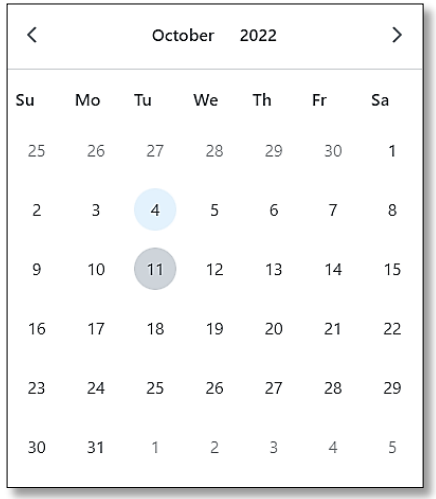

An OSTR maintenance module that displays reports. You are given the option to view and export the user activity monitoring and application error logs.

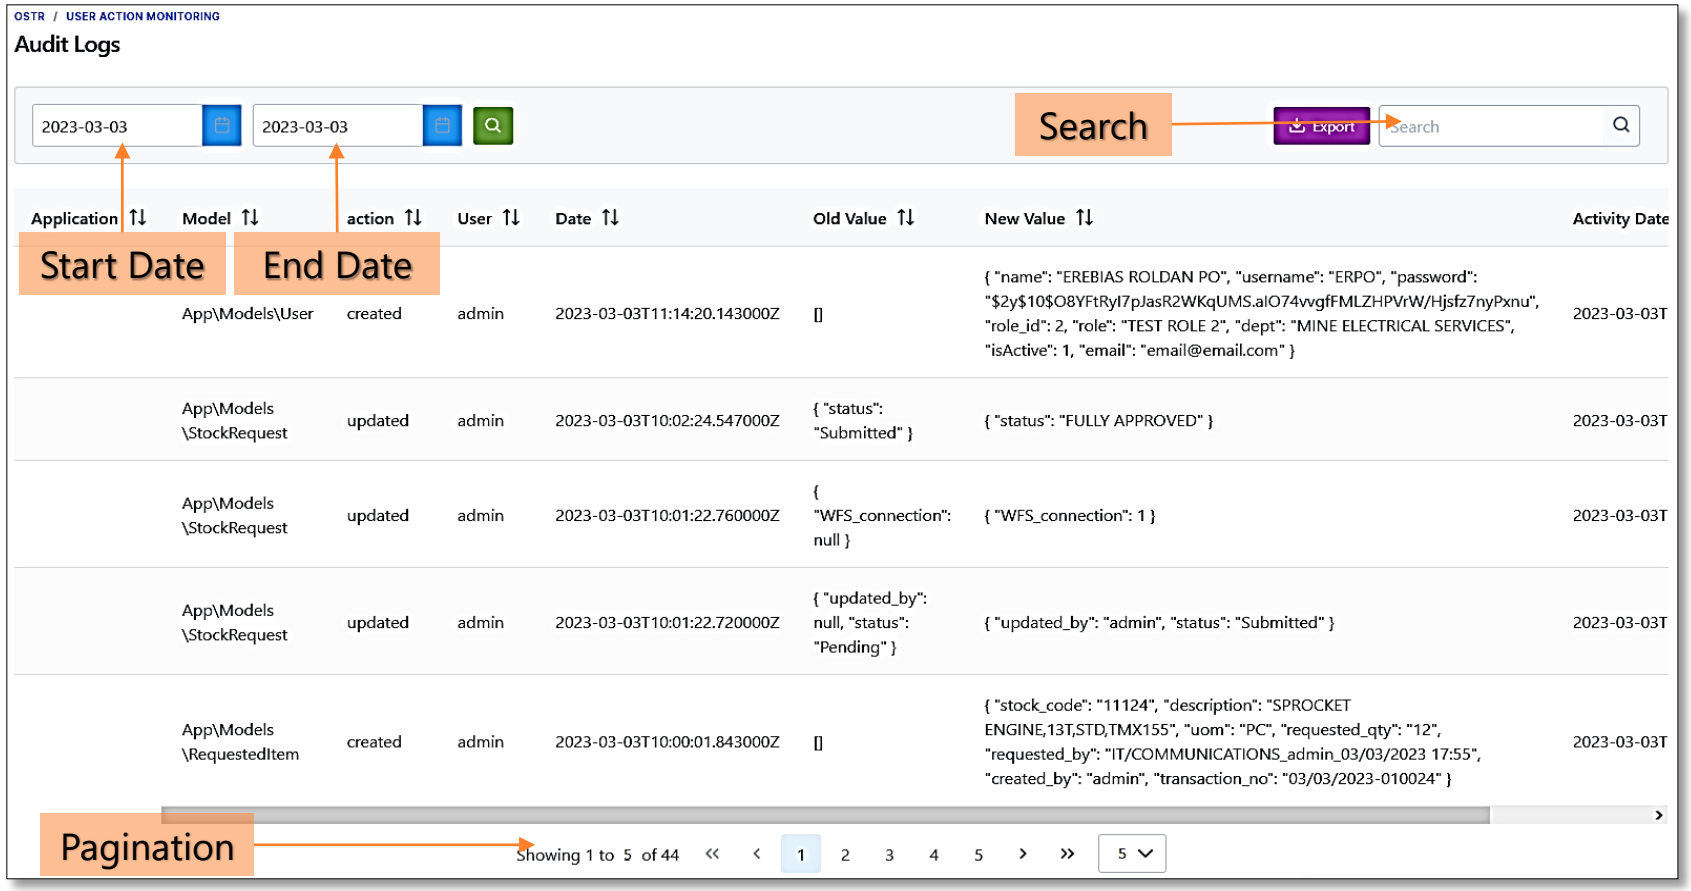

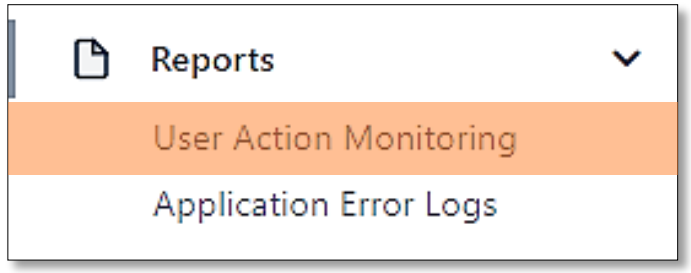

View the Audit Logs

1. Go to **Reports** and select the **User Action Monitoring** option.
2. View the **Audit Logs** screen. You may use the **search**, **pagination**, or **start date** and **end date** functions to look for the audit log you want to view.

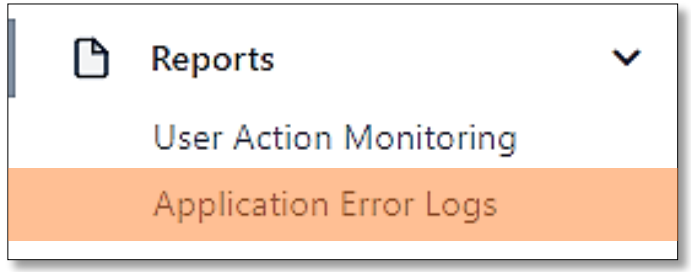

Export Audit Logs

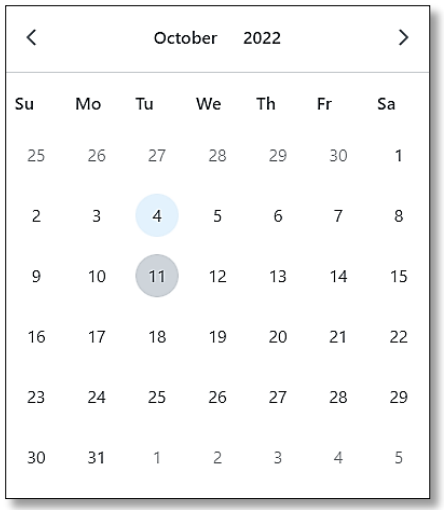

1. Go to **Reports** and select the **User Action Monitoring** option.
2. Click the **Export** button to export the audit logs.

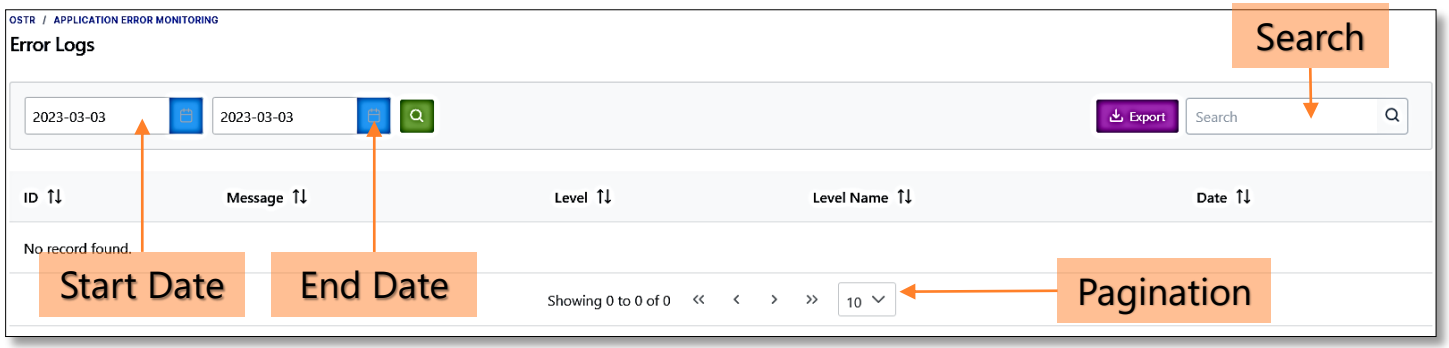

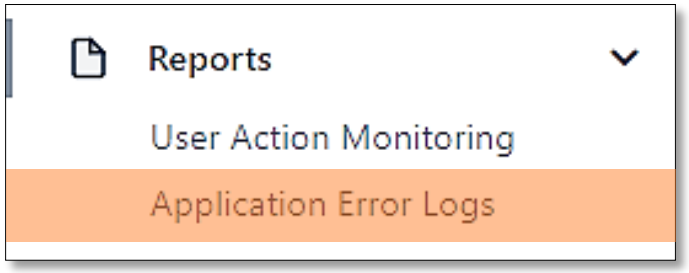

View the Error Logs

1. Go to **Reports** and select the **Application Error Monitoring** option.
2. View the **Error Logs** screen. You may use the **search**, **pagination**, or **start date** and **end date** functions to look for the error logs you want to view.

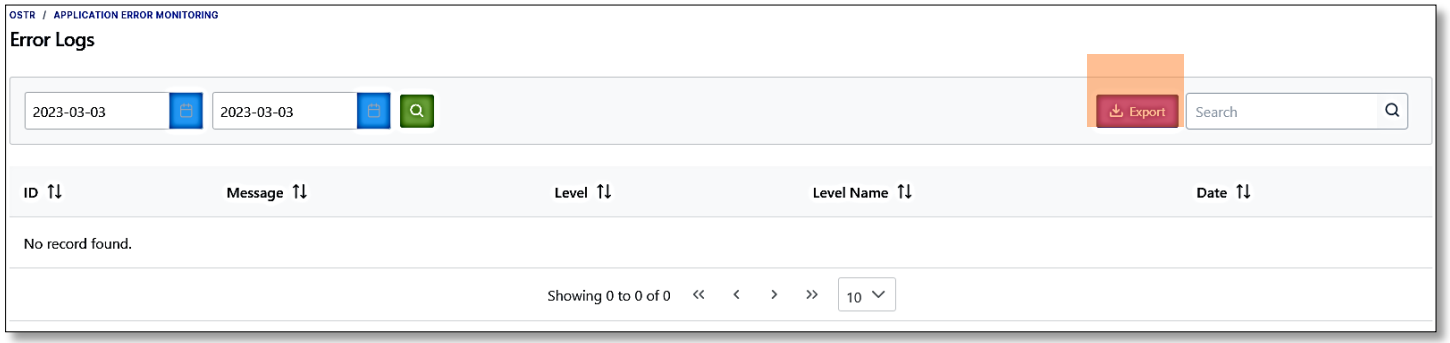

Export Error Logs

1. Go to **Reports** and select the **Application Error Logs** option.
2. Click the **Export** button to export the error logs.

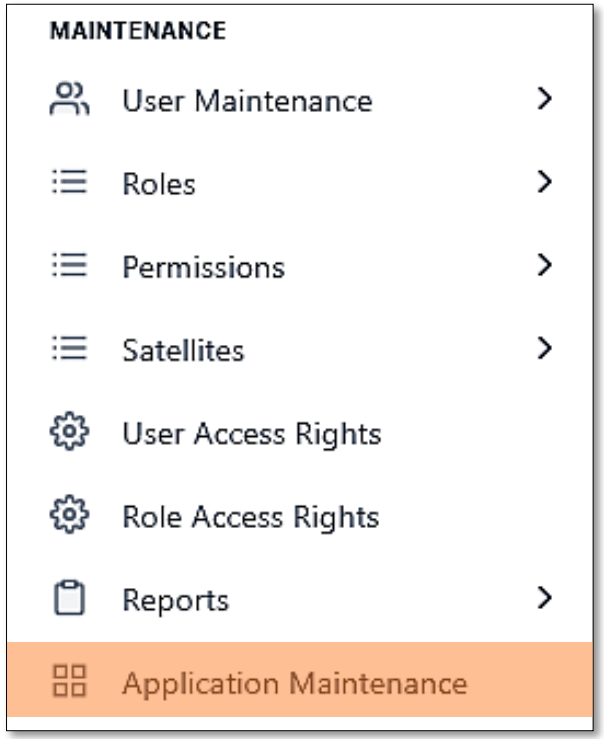

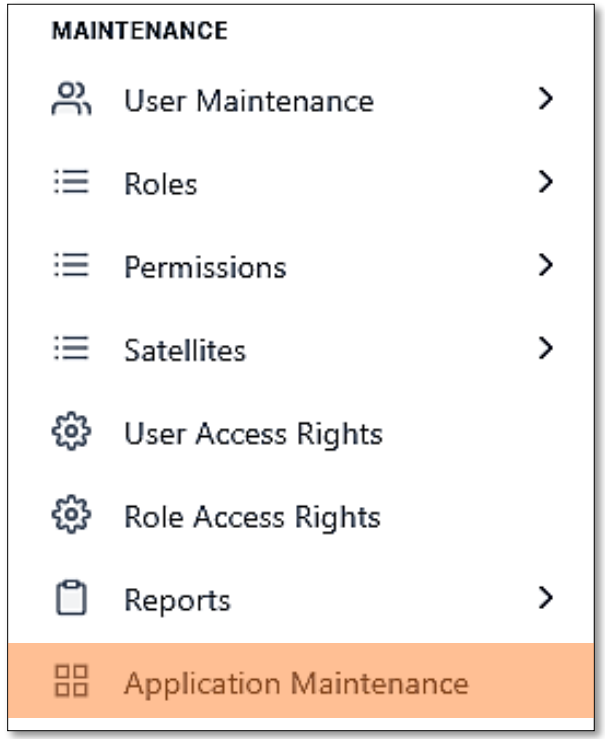

Chapter 15

APPLICATION MAINTENANCE

APPLICATION MAINTENANCE

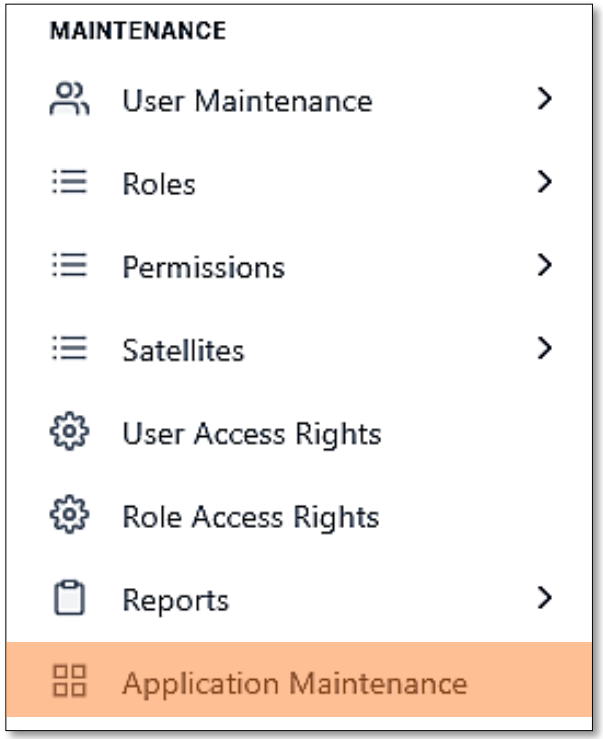

Application Maintenance

An OSTR maintenance module that displays information about maintenance schedules.

You may also do the following:

- Create, edit, delete, reindex, start, stop, and export scheduled shutdowns.

APPLICATION MAINTENANCE

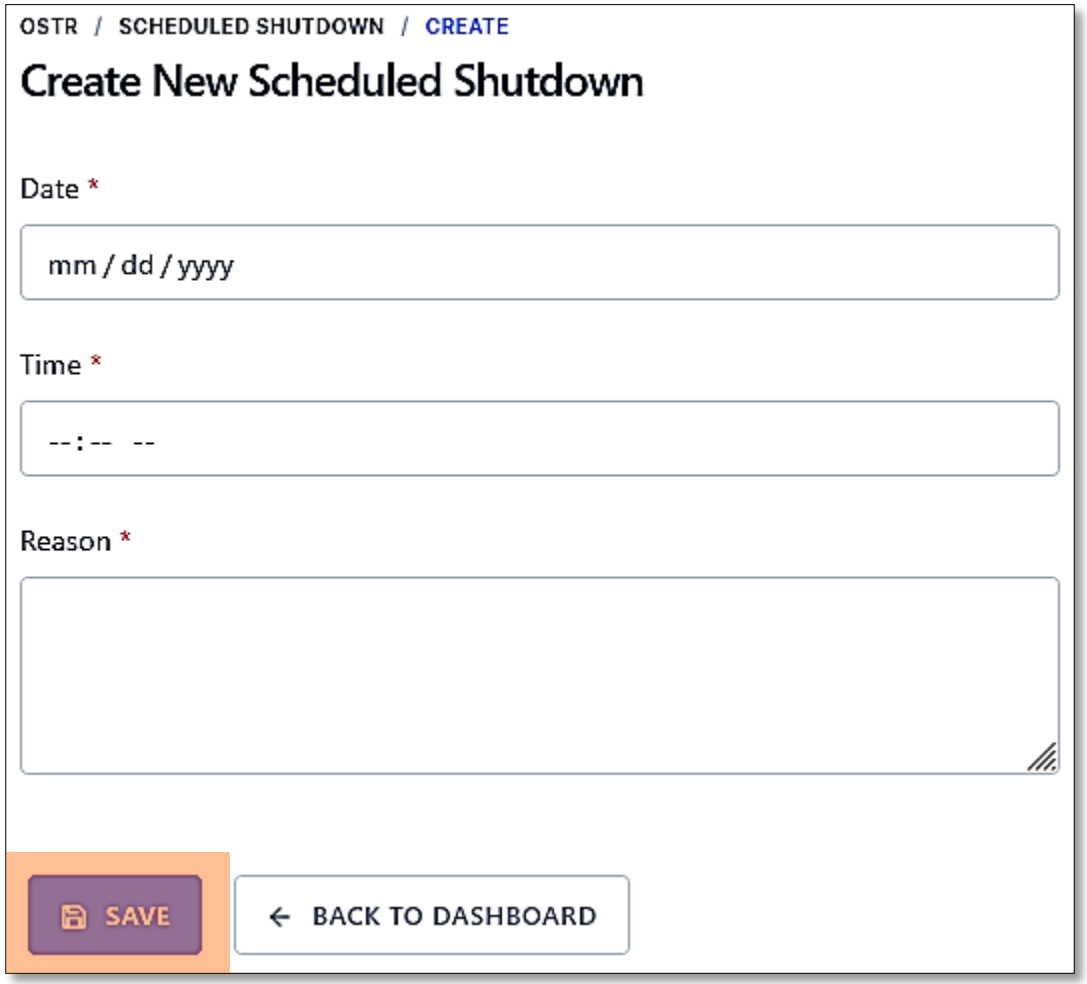

Create a Scheduled Shutdown

1. Go to **Application Maintenance**.
2. Select the **New** button to start the process.
3. Enter all the necessary information.

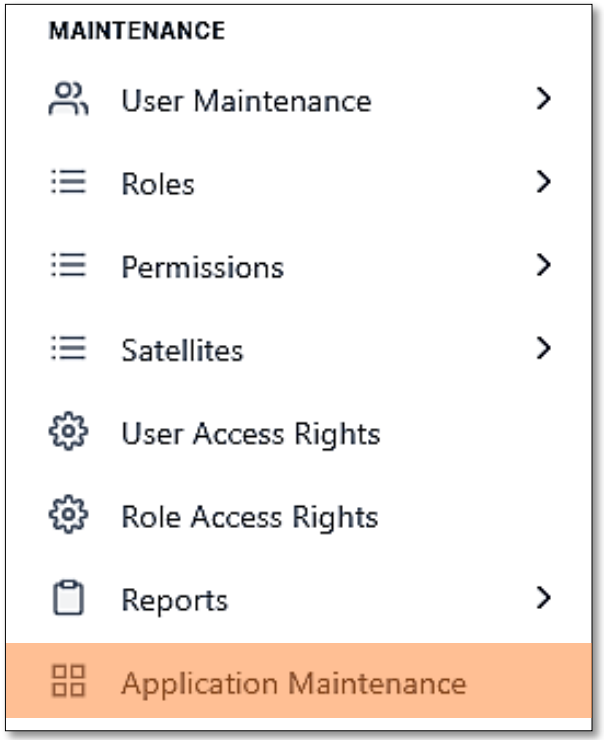

APPLICATION MAINTENANCE

4. Click the **Save** button to complete the process.

Date	It is the date of the scheduled shutdown you are creating.
Time	It is the time of the scheduled shutdown you are creating.
Reason	It is the reason why the shutdown is scheduled.

APPLICATION MAINTENANCE

Edit a Scheduled Shutdown

1. Go to **Application Maintenance**.
2. View the **Manage Scheduled Shutdown** screen. You may use either the **search** or **pagination** functions to look for the scheduled shutdown you want to edit.

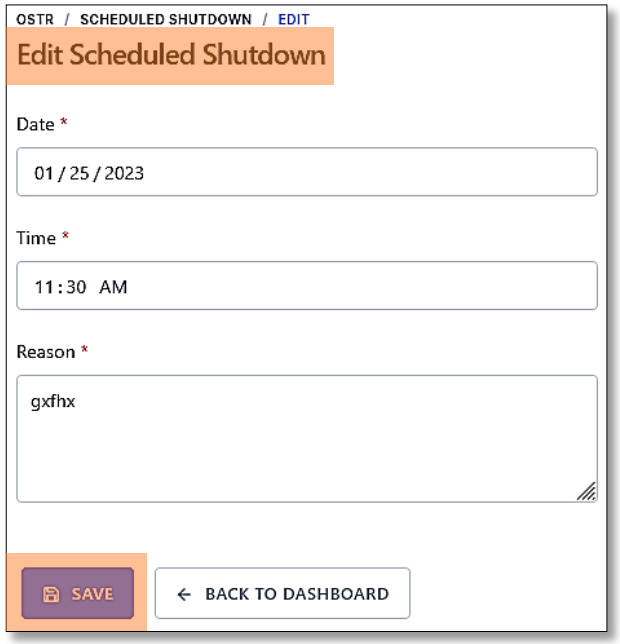

APPLICATION MAINTENANCE

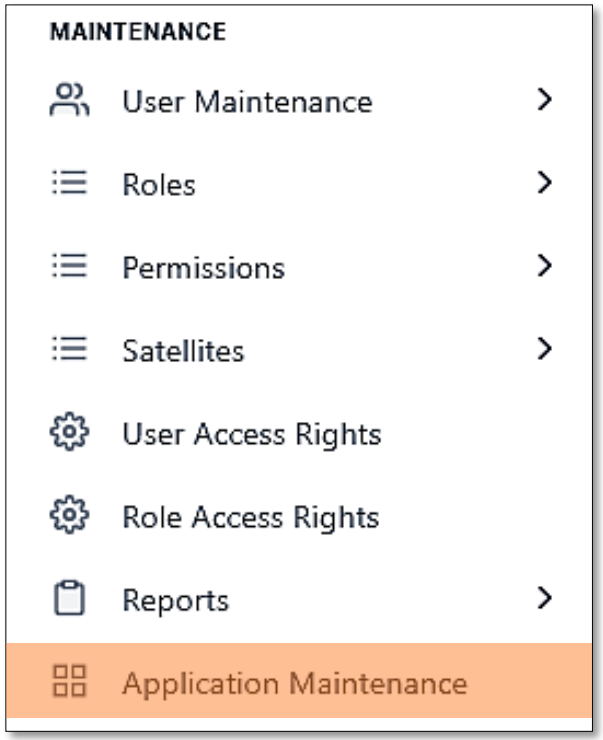

3. Select the **Edit** icon and change the information accordingly once the **Edit Scheduled Shutdown** screen appears.
